Oh, I get it. It's a Jewish thing, right? Many Jews are consumed with hatred towards followers of Jesus Christ, and go ballistic when someone proclaims their loyalty towards Him.

Skeptical? Check out the extreme hatred towards Jesus Christ, Christians, and non-Jews in general contained in the Jewish Talmud. Take note of the extreme hatred directed at the "religious right" from the "Jews media" and Hollywood.

>Am I wrong in saying that I seriously doubt if this abomination was affixed
>to
>a car belonging to a Roman Catholic, and if so, then I ask if anyone can
>tell
>me what Protestant denomination sanctions it? Tnx. AF2Y,Doc
>

Note how Doc tries to put a wedge between Catholics and Protestants in order to get them fighting amongst themselves instead of fighting against the REAL enemies of Christianity that now infest "our" so-called news media, publishing, TV, Hollywood, and even our government.

Oy vey!

1275. NYC area reception

Newsgroup: rec.radio.amateur.misc

Is it me or does New York City seem to have lousy radio signals? In Nassau county, the signals don't seem so bad but venture into Queens, or even worse, Manhattan and it seems there is a ton of interference. Case in point, I brought my walkman and a small SCA modified radio with me. In Queens, main carrier stereo was not clean, and SCA signals weren't either. In Manhattan, especially on the south side, stereo signals were nearly impossible to recieve clearly, and SCA was un-intelligable. If all the transmitters for most major NYC FM stations are in NYC, then why do they seem to come in the worst there? It did seem that stations with transmitters atop World Trade Center did have clearer signals than the ones on Empire State Building. No wonder why it seems all establishments that subscribe to Muzak in NYC get it off a satellite dish! If you live or have been in NYC, share your reception experiences.

Trivial nostalgia? You don't get on the hams bands much. It's the second-
most used mode on HF, but most days, I count about 50% of the conversa-
tions taking place utilizing code.

Tell you what, you build a transmitter and receiver from scratch for
your favorite mode, and I'll build a T/R from scratch for CW. Let's
see who can rack up the most QSOs exactly one month from now.

Hello everyone. just a reminder about TDD and I now have a web page up that has the current list of known particiapting stations. If you are going to participate let me know. You dont have to keep score to count. By just setting a few parameters you can help fellow hams rack up point without you even watching. I have included links to my email, the TDD site at TAPR and the list server subscription page.

You bet. They know first hand how badly the global marine distress system is functioning. This meeting will give them a chance to reflect upon the decision of abandoning Morse on the high seas.

Don't forget that the ITU, as a bureau of the UN, is just made of up communication ministries from each of the UN member nations. It's interesting that in the past, ARRL reps have been invited to join the US delegation.

> us.
>
Well...I don't see as many real NAZIs around as some folks who exhibit paranoid like behavior do. I have listened to some of the so called wizzards of 75 Meters and I think that they are probably mentally sick people who are using Han Radio to sound off and to try to get attention. I can not be sure that they are real organized NAZIs who would really be dangerous to anyone but themselves. I don't think that some of them really even understand real NAZI policies. Unless they are strongly advocating NAZI like policy and are otherwise sane, I do not call people NAZIs just because they are Germans or of German decent. Neither do I claim that people must be NAZIs just because their fathers or grandfathers were NAZIs during WW2.
I have been posting for a longer time on rec.radio.amateur.policy than I have on rec.radio.amateur.misc....I find that some of the people who are posting on the latter have shown less respect for each other and there also have been more spams in the misc group than in the policy group. The policy group is not flame proof by any means, but the misc group is IMHO worse. This is because when there is disagreement in the policy group it is more often about policies than personalities.
If you wish to flame or defame anyone or attach a label such as NAZI to him or her...you should take care that you do at least a minimum amount of research on that person. If he or she is a Ham, who has been identified by call-letters; you can at least look up that person in a call-book or get the information about that Ham via data bases that are free on the Internet. At least you can find the Ham's real name and address. If you see claims by others that put insulting labels on a person...you should not just accept them and parrot them. Ask the person who has made an accusation...WHY? If he claims that his opinion was formed by posts in a NG ask him to forward a copy of the post or posts involved or to tell you the NG, subject, date, etc so that you can look in the archives to verify the information. There are people who have lower levels of reading comprehension. They do not read entire posts and quickly jump to conclusions. Such people would not read a post as long as this one but might find a part of a sentance in it that wrongfully convinces them that I must be a NAZI if I wrote this. That is a shame and is unfortunately something that we might have to live

with simply because everyone may not be able to read at the same grade level....just like everyone can not copy Morse code at the same speed and everyone might not want to.
I am of Jewish ancestry BUT I do not believe that everyone who makes jokes about Jews is a Jew Hater. Some of the best commedians and comedy writers have been Jews who made jokes about Jews.
I am not inclined to look for NAZIs in every message I read. I think that paranoia is a medical condition that may be a symptom of serious mental disorders BUT there are many normal people who exhibit "paranoia like behavior" when they are exposed to strangers either via Ham radio or via the Internet. Some are just naive about the differences in different peoples since they have never travelled far from their homes. I have travelled a lot when I was in the Army and as a Field Engineer and I have been able to meet many people with differing view-points.
Ham Radio and the Internet can help us to exchange useful information and to learn from others....PLEASE DON"T USE IT TO DISPLAY HATE OR DISRESPECT FOR PEOPLE WHO YOU HARDLY KNOW. Please do not stereotype people because of where they were born, where they live, their race, their religion, their wealth or lack of wealth, their education or lack of formal education, their sex or sexual preferences (if not illeagal or threatening), their cultural beliefs (if not threatening or hatefull),etc..Doing so is not in the true American spirit nor is it good Ham Radio policy.
Hams need MORE license classes,
I never met a Ham I didn't like,
Bob Wex w2ilp (I Like People)

My offer still stands: Let's have a contest to build a station completely from scratch. You build your computer, transmitter, receiver, and I'll build a CW station. A month from now, let's see who's had the most number of on-the-air contacts.

Lest you forget as to why we should be proficient in building:

97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:
(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.
(b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.
(c) Encouragement and improvement of the amateur service through rules which provide for advancing skills in both the communications and technical phases of the art.
(d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts.
(e) Continuation and extension of the amateur's unique ability to enhance international goodwill.

Oh...you must have very hard days and even frustrating nights.
I like to feel good, the most people even do so.

> I bet I can run circles around your stone aged ass when it comes to
> computers
> and networking.

Oha, boy. I am dl5mhk.ampr.org, running a linux server here with a
novell emulation (mars_nwe) and emulates a SMB filesystem too...
on the linux server runs a INN, a sendmail demon...
In the qrl of my wife i configured a linux server with appletalk, so the
guys over there can access with the Apple Macs and Power PCs on the
common Fileserver...

By the way: Do we really need networking for amateur radio? We may use
it, shure, but what has networking to do with the term "radio"???

But don't even bother...you've tried it. :-)

> Makes me feel good that I can make you look obsolete with your stupid
> code
> and your old fashioned feelgood bullcrap.

Oh boy. Why do you do Amateur radio? Not to feel good? Not to have some
fun? Do you ever feeled the excitement, when you establish the first
contacts with your homebrewed radio?
No? Poor boy...you can't buy everything...

He allready learned the technical stuff needed when he got his
commercial license, so he won't have to learn anything new, other than
parts of the ham bands and which modes are used there.

He doesn't have to actually send or recieve any of those other modes
like packet, SSTV, EME, RTTY, etc! They only make you do that with
Morse Code. So tell him not to worry, the only mode you are forced to
actually perform or try to decode is Morse Code, nothing else.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 413
BID: $OPDX.413
June 14, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The Golist, NC1L, WB2RAJ/ WB2YQH & The 59(9) DXReport, K3UOC, N6HR, W6RGG, K8YSE, 4L5O, 9A6PKT, DJ5AV & DX News Letter, DL2RUM, EI4GK, F5NZO, G4BUE & DX News Sheet, HL0Y, I2WIJ, I5JHW, MI0BME, OH2BR, OK1JR, ON6TT/5X1T, ON9CGB, VK4AAR, YC0LOW and YU7CB for the following DX information.

3V, JERBA ISLAND (Tunisia, New IOTA!). Giovanni, I5JHW, informs OPDX that he together with Sergio/I5NSR, Danio/I5OYY, Sauro/IK5EKB, Roberto/ IK5FTQ, Marcello/IK5JAN, Gabriele/IK5OSA, Gabriele/IK5ZTW; and 3 OM operators of the 3V8BB club station (Lotfi, Ramzi, Fouzi) and 3 YLs (Zaida, Sarra, Ines) will activate Jerba Island (a new IOTA) between June 18-21st. Their callsign will be 3V8J. Activity will be on 160/80/ 40/20/15/10/2 meters and 17 meters (the only WARC band authorized in Tunisia). Operations will be on CW, SSB and RTTY. QSL via I5JHW direct or bureau.

4L, GEORGIA (6 meters operation). Omari, 4L5O, reports that he is active on 6 meters (50 MHz) and will be there all summer. His antenna is a 5 element yagi w/50 watts. He can be found daily between 50.110 and 50.130 MHz CW/SSB (no time given).

5N99MSV AND 5N0MSV WRAP-UP. Stan, OK1JR, reports to OPDX that he is back in OK-land (Czech Republic). He wants to thank all the hams who worked him as 5N0/OK1JR, 5N99MSV and 5N0MSV. QSL direct, and he states that he will send them out at the end of the month. If you are not sure about your QSO, check his log search (about 200 DX logs including 5N0/OK1JR, 5N99MSV and 5N0MSV) on the Web page: http://www.qsl.net/ok1rr

BY, CHINA. The "DX News Sheet" reports that Jack, WB8SMV, will be active until the end of July from several club stations including BY1DX in the AA CW Contest, and June 21st through July 14th from BY4LB in Qingdao. Activity will mainly be CW.

CU8, AZORES ISLAND (IOTA operation). Look for Moreira/CT1AHU and Lionel/ CU3EJ to be active July 21-31st from Flores Island (EU-089) as CU8/CT1AHU and CU8/CU3EJ. They will be entring the IOTA Contest in the Island DXpedition class with the callsign CU8I. QSL to CU3EJ. During their journey to Flores, they will also be active as CU3/CT1AHU from Terceira Island (EU-003).

E4, PALESTINE. Look for Radek, OK1FHI, to be active until June 23rd. His activity will include the AA CW Contest. Radek will sign as E41/OK1FHI from the QTH of David, OK1DTP, at Beit Jala, West Bank. QSL via his home callsign.

EL, LIBERIA. Start looking for Eric, EA5GIY, to be active as EL2VO during June or July. He is currently on a professional business trip through the country. QSL via EA5GIY.

FS, SAINT MARTIN. Operators Rob/PA5ET, Ronald/PA3EWP, Peter/PA4EA, Martin/PA4WM, Dennis/PA7FM, and Henk/PA3GCV will be active August 5-11th. They will sign FS/homecall. Activity will be on 160-6 meters CW/SSB/ RTTY/SSTV. Special effort will be on the LF and WARC bands for Europe. They will have three HF stations along with one 6m station. QSL via PA5ET. Check out the Web site: http://www.muurkrant.com/pi4com/tour99/index.html

IOTA NEWS.......
AS-093. The Yonsei Amateur Radio Research Asociation (YARRA), HL0Y, club station of Yonsei University, has planned their 18th DXpedition to Huksan Island. They will sign HL0Y/4 from July 23-30th. Activity will be on 40-10 meters (including the WARC bands) CW/SSB/RTTY. QSL via YARRA (HL0Y), Yonsei University, 134 Shinchon-dong, Seodaemoon-gu Seoul, South Korea.

EU-065. The UBA Section Gulden Spoor Kortrijk KTK, IOTA DX-pedition team referred to locally as the Minquiers Boys, have announced that preparation is now well in hand for their 1999 activity to Isle d'Ouessant before, during and after the 1999 IOTA Contest. They are awaiting the official confirmation of the callsigns TM5K and TM5ON. They plan to use TM5K during the 1999 IOTA contest and TM5ON outside the contest. Arrangements have been made with the necessary local official authorities for their operation and accommodation sites. Plans are well in hand concerning the team of 12 including cook, lead by Harvey (ON5SY), equipment, antennas, transport, catering etc.. QSL is via ON4ON Danny Commeyne either via the ON bureau or direct to Danny Commeyne, Rozenlaan 38, 8890 Dadizele, Belgium. There is a website which will be regularly updated at: http://users.skynet.be/sky83847/iota

NA-038. Two members of the LOOS DX Gang will be going to Quebec this summer and plan to activate Madeleine Island from August 11-14th. Another CISA is possible, also some activity may be from Prince Edward Island. More information can be found on the home page:

http://www.geocities.com/CapeCanaveral/Station/9368/

J49, CRETE (Special Prefix/Update). Bob, I2WIJ, informs OPDX that he has received the special callsign J49WI from the Greece Telecommunication Ministry. He will operate from July 12-26th and also be an entry in the IOTA Contest with that callsign. QSL via his home call I2WIJ. Please refer to OPDX.406 and the Web page: http://www.qsl.net/i2wij/

JT, MONGOLIA (Update). Laurence "Flo", GM4DMA, reports that his operations from Central Mongolia will use the callsign JT1FCR. Equipment will be an IC706, R7000 and a 3 element 50 MHz beam. Operation will take place June 19-29th. Please refer to OPDX.411 for more details.

ON THE ROAD AGAIN! Peter, ON6TT/5X1T, is on route to Kosovo to be joined by Mats, SM7PKK, later in the week. Their callsigns are to be decided later. Peter states, "We might be sporadically active, but work has priority."

QSL INFO AND NEWS......
VY1DX was activated in the CQ WPX CW contest by Hillar, N6HR, as a guest operator. Hillar has the log and a box of YARA Club QSLs on hand and would be glad to reply to any QSL requests immediatly!

Pete, MI0BME, was active as GD6IA from the Isle of Man during this past weekend's ANARTS WW RTTY Contest. QSL via GD3UMW.

QSL TA4/DL5MAE/P via DL5MAE, Wolfgang Schlaffer, Am Rosengarten 3, W-8059 Luess, Germany.
QSL TA4/TA3YJ/P (XYL) via TA3YJ, Nilay Mine Aydogmus, P.O. Box 876, 35214 Izmir, Turkey.
QSL TA4/TA3J/P via TA3J, Berkin Aydogmud, P.O. Box 987, 35214 Izmir, Turkey.

QSL changes for V63KU!. Sam, V63KU, will be closing down by the end of June as well as the P.O. Box in V6-land. All QSL request after the closing go via JA6NL through the JA Bureau.

New QSL route for 7Z5OO and PJ5AA. Mike, K3UOC, informs OPDX that he is changing his QSL route for all his past operations from N2AU back to W1AF. Since he expects to be in the USA for several years, Mike is taking over his own QSL responsibilities once again. Mike is the trustee of the club station at Harvard University (W1AF) and is now catching up on a very large backlog of 7Z5OO bureau cards. Those who have not received 7Z5OO or PJ5AA cards in reply to direct requests should QSL again via W1AF. So, W1AF is now the QSL route for Mike's recent operations from 7Z5OO (1994-1998) and PJ5AA (1996-1998) as well as for these older DX operations: PJ8H (1994), PJ5/K3UOC (1994), 4M5V (1992-1993), YV5/K3UOC (1991-1993), PJ1A (1991), US1A (1990), 4M4A (1985-1987), P46S (1985), PJ2/PJ3/PJ4/PJ5/PJ6/PJ7/K3UOC (1982-1985) and YV4/YV6/YV9/K3UOC (1979-1987). He has cards for all past operations. The W1AF address is: Harvard Wireless Club, 6 Linden Street, Cambridge, MA 02138 USA. Mike also has a log search page for 7Z5OO and PJ5AA at: http://www.qsl.net/n6ed/7z5oo.html

Alan, VK4AAR, reports individuals are still using his old address to QSL. Many announcements have been made from OPDX and other sources since Alan has changed his address in late 1998. Alan states mail is being forwarded....for now at least! Please send direct ONLY to VK4AAR via "ALAN ROOCROFT, POB 421, GATTON 4343, AUSTRALIA" for the following stations: V63PD, VI0ANARE (but *NOT* VK0ANARE), VK8AN, VK8AN/6, VK8AV/3 (Phillip Is OC-136 only), VK8MI, VU3RSB, YJ8AA, ZK2JJ and ZK2PJ.

R1, MALYJ VYSOTSKIJ. A press release from Jukka, OH2BR, announced that: "A joint Finnish-Russian team of 25 operators will show serious activity from Malyj Vysotskij Island in July on all bands HF to UHF. The team has been issued the callsign R1MVA. In the IARU Contest a special short callsign R1MV will be used." Activity will be from July 4-15th. The joint Finnish-Russian team includes: 8 operators from Finland (OH2BR, OH5BM, OH5LZY, OH5NE, OH5PT, OH5SC, OH5UX and OH5YB) and 17 operators from the well-known Russian contest team RU1A (RU1AA, RW1AC, RV1AW, RX1AA, RN1AM, UA1BX, RA1ACJ, UA1ANA, RV1AC, RU1AS, UA1AAF, RA1ARZ, UA1ACC, RA1ARJ, RA1AIP, Alex and Vadim). The modes of operation will be: CW, SSB, RTTY, MS, EME, tropo (Aurora not wanted, hi!) Their HF equipment includes: FT-1000MP+DVS-2 (7), FT-1000D (1), TS-940 (1) plus some spares. Signals will be boosted by six linear amplifiers. Additional accessories include Dunestar filters and Heil Sound Pro headsets. HF antennas include: Inverted L's for 160 and 80 meters, 3 element beams for 40, 30 and 12 meters, 4 element beams for 20 and 17 meters, 5 element beam for 15 meters, 7 element beam for 10 meters and also an A3S, A3WS, R-7000 and wires antennas. They will have seven towers (10...20 m high) with Yaesu rotators. They will have 6 generators (2...7 kW). Their goal is to simultaneous operate CW/SSB/RTTY on all bands with propagation. Plans call for 9 to 12 operating positions. Suggested frequencies are:
CW - 1831, 3510, 7010, 10111, 14025, 18071, 21025, 24891 and 28025
SSB - 1845, 3795, 7045, 14195, 14295, 18145, 21295 and 28495
RTTY - 14084

QSL Manager is Jukka Heikinheimo, OH2BR, Rikunkuja 4, FI-01420 VANTAA, FINLAND (CBA not valid). VUHF frequencies and details will be issued by OH5LZY in VUHF bulletins. Home page and log check are under construction. More news later. Expedition preparation was started in late 1998, now all licenses are granted, callsigns assigned and equipment ready to be transported to the island. THIS TEAM IS DETERMINED TO ESTABLISH MASSIVE PRESENCE ON THE BANDS! BE PREPARED!

T30 & T33, WEST KIRIBATI AND BANABA ISLAND (Update). Tom, DL2RUM, reports that the team has received the following licences concerning their trip to Kiribati this year. The following callsigns were assigned: T30Y, T30CW, T33Y and T33CW. Activity will take place in October and November (refer to OPDX.406). For further details, please visit the Web site at: http://www.qsl.net/dl2rum/
Concerning the trip to Banaba, the Berlin DX Group, lead by Sigi, DL7DF, reports, "Unfortunately and in an unexpected way, it seems so, that we can`t find an agreement with the airlines to carry our oversized baggage with us. The transportation is not the problem, but the extra costs. So

we are still looking for support and donations. Who can help us? If you have the possibility to support us, please feel free to contact us and/or visit our web-site.

TI, COSTA RICA. The "DX News Letter" reports that Kees, PA5CW/TI8, is now active through June 22nd. Activity will be CW on 10/15/20/40 meters (possibly on other bands. No QSNs have been reported yet. QSL via PA5CW, Kees Wiegers, De Schans 96, NL-9351 AZ Leek, The Netherlands.

V6, MICRONESIA. "The 59(9) DXReport" reports that Mike/G0VJK and Mike/G4VGO are planning an operation from Truk next year (February 14th-March 6th). They will concentrate their operation on 160-40 meters CW. More information will be forthcoming.

XW, LAOS. By the time you read this, operators 7L1MFS, JA2MNB and JR2KDN may have ended their operation as XW8KPL/CSN. As this bulletin was being prepared, they were very active on 15 meters SSB (around 21280 kHz). Their announcement states that they will be active on CW/SSB/RTTY on 80-6 meters. QSNs reports show activity on 20/18/15/12 meters. QSL via JR2KDN.

YB, INDONESIA. Sanji, HA6VK, a diplomat in the Hungarian Embassy in Jakarta, has finally received an official notice from the Indonesian authorities which approves him to get an Indonesian amateur license. This approval is a part of the agreement between Hungary and Indonesia allowing their hams to operate in a reciprocal basis. Expect to hear Sanji on the air using the callsign YB0AVK this month. Sanji has been involved in this effort since October, 1998. More details will follow soon.

YW7, VENEZUELA (Special Event/IOTA operation). To celebrate the 1999 "Venezuelan Navy Day", the Association of Radioamateurs of Venezuela (ARV) and the Grupo DX Caracas have organized their annual DXpedition. This year they will go to Coche Island (SA-012) and will be active as YW7C, from July 29th through August 1st, 1999. Activity will be on SSB and CW. QSL via W4SO.

YZ75, YUGOSLAVIA. Laci, YU7CB, reports that YU club stations are allowed to use the special prefix YZ75 during the month of June to celebrate 75 years of amateur radio in their country. He also mentions to look for his club station, YU7AEW, to be active as YZ75AEW (QSL via YU7CB).

ZA, ALBANIA. Croatian operator Pero, 9A4SP, is active every evening on the frequencies 7080-7085 kHz at 2100z. Pero is working in Tirana, capital of Albania, and is using the callsign ZA/9A4SP. He will be in Albania until June 28th.

Don't worry about KJI. He may be back sooner than you may think. I have no clue as to why or how. I heard the Liberty Net filed some papers in his defense or something like that. At least that's what I heard on 14,313.

The effort is being spear-headed by the newest member of the Liberty Net, W9ART. Informed sources told me that Art's petition to get KJI back on the air was signed by all members of the Liberty Net.

The word on the bands is that his suspension will be revoked by the middle of next week and he will be restored to full operating privileges. In fact there is a rumor that he will be upgraded to Advanced so he can read encyclopedia articles on more frequencies.

If KJI does return to the bands next week, a welcome back ceremony will be held on 3947.5. KT4TR will be master of ceremony, and the devotional will be led by KC3AU. President Clinton will be listening from the QTH of K5ZU.

It's all just a rumor but the sources have been accurate many times in the past.

Frank, why'd you send your comment to .homebrew, .equipment, .swap,
.shortwave, and .scanner?

Frank A. Adrian <fadrian@uswest.net> wrote:
>Wow! This is really getting surrealistic. Even most no-coders know how to
>send and recognize SOS

That's not enough. They also need to be able to copy:
* Location of distress
* Nature of distress
* Type of assistance requested
* Number of people involved
* et cetera

If Europe has problems they should solve them themselves. Germany did
not attack the US. Japan did and then Germany declared war on us.
If the people in Yugoslavia can't get along it would be far less
expensive for the USA to just nike the entire country and solve the
problem there once and for all time. That country is not worth a
single american life.

What is sacrilegious about someone publicly proclaiming their love for Jesus
Christ?

Oh, I get it. It's a Jewish thing, right? Many Jews are
consumed with hatred towards followers of Jesus Christ,
and go ballistic when someone proclaims their loyalty
towards Him.

Skeptical? Check out the extreme hatred towards Jesus
Christ, Christians, and non-Jews in general contained in
the Jewish Talmud. Take note of the extreme hatred
directed at the "religious right" from the "Jews media"
and Hollywood.

I really doubt that. Most of the same group who have no trouble studying for a Morse exam also have little trouble learning new technology. It's a safe bet we built our first computers while you were still wetting your diapers, and built the network you're using while acne scars kept you home from prom night.

As to your closing remark: the meek can inherit this earth when I'm damn well done with it.

Michael.

Some people assign more emotional content to "fascist" that it
deserves. I can see why "Nazi" and "Hitler" are so emotionally
charged, but I fail to see why "fascist" is included. "Fascism"
existed long before Nazi Germany and continues to exist now.

I subscribed to this ng to read about radio, If I want to talk religion I
will go to the pagan and wicca ng's I subscribe to.
Please, I get bored of hearing Christians rant and rave trying to recruit.
Chose your faith and go to the ng's that suit, ham radio has NEVER been
about religion
and talking about it has always been prone to offend. I just hope you leave
the subject alone on air.

Thats my rant over with.
Blessings to all

You claim to be an EE. Would you hire someone for an electronics job when his only qualification is that he passed the Extra Class ham exam? Not likely, since he could pass it without knowing the material. Is this what you call filling a rational, valid requirement for the FCC??

Is that it?
I designed, developed and implemented a Y2K compliance and correction mechanism for the Government of South Africa which runs and works on Sun SPARC, RS-6000, HP9000, DEC Alpha, IBM AS-400,
Apple Mac, Power PC and of course, PC's.
The rollout consisted of 75,000 workstations and 5000 servers split between 3 teams of 3 people, completed in less than
3 weeks and this was just for the month of January.

> me what Protestant denomination sanctions it? Tnx. AF2Y,Doc

Doc, Such displays are not characteristic of organized religions, Roman Catholic or Protestant.

It is somewhat of a trivialization and not appropriate to use in referencing what we Catholics and others consider our Savior. Some years ago, "Honk if" bumper stickers proliferated the highways; "Honk if you you like the Packers", "Honk if you're against the War". "Honk if you love Jesus"
was a cute twist the the fad but somewhat inappropriate. However, we would not consider it sacriligious. Catholics display references to Jesus with the respect He deserves. Consider for example a bumper sticker that said "Honk if you love the Prophet Mohammed". You know that such a display of inappropriate subordination would seriously inflame conservative believers in that religion. "Honk if you Love Jesus" may inflame members of other
religions as well. That's just the way it is. It is a hollow expression which probably
does more to alienate than enjoin.

People who display such stickers have often been raised as followers of organized religions and then rejected it, later to be 'born again' when they could rediscover Christ and new sources to which they can impart their earnings. They can deal with the new Jesus, who is now more a peer than God, with whom they relate on their own terms. Of course, we believe that the only true relationship with Christ is on "His" terms, as the only way for all
Christians to find God the Father.

Hope this answer your questions.

As a VE, may I commend you on your fine attitude. In some cases I think people deserve their licenses more for the effort they have expended, than on how well they did on their tests. Some people ace all the tests easily and didn't wear themselves out studying. Others try several times to pass one test after knocking themselves out trying to learn all the information. To me, these people have demonstrated the commitment to Amateur Radio that is deserving of becoming a Ham. Things that are easily acquired have less importance to people. Those who have struggled, may have a greater appreciation of what they accomplished. Good luck on your upgrades.

That's exactly what it is. A great deal of the people that are in favor of keeping the code test are worried that if leering the code is not required then it will die. Of course, if people found it useful they would learn it weather required or not. By worrying that it will die out, these people are admitting that the code is not very useful. I get a kick out of the ones that give the rational that if you are in a plane crash (car wreck, ship wreck, ect., pick one), you could fashion a CW set out of what ever was available and become an instant hero. Same theme used by survival food and bomb shelter salesmen.

>
> Yes, but who NEEDS code these days?

What do you really need? Do you need amateur radio to communicate?
Do we need SSB?
No? Do you have a cellular phone too?

Do we have to be technical experts? No? You have a repair shop for your
radio? I see...

And why have you passed a ham radio exam?

> Sounds like a alot of time to learn something that is nothing more
> than trivial nostalgia in this day and age.

CW is the only mode, which needs your personal engagement. Neither SSB,
FM nor Amtor or Pactor or even Packet Radio needs only a bit of that
time, which is necessary to learn CW. But: every ass is able to make a
amtor qso after a short instruction.
As a CW op you have done one thing, which gives you a good feeling:
You proved yourself, that you are able to do a thing, what others don't
or can't do. And the second point is: A ham, which works hard for his
license, he will not throw away that interesting hobby, if it seems,
that paragliding is more fun.

Look around, talk with people, which have a license and don't use it:
It's in min. 80...90 percent a codeless license.

>

I don't wish to burst anyone's bubble, here, and FAR be it for me to defend Drew, but remember we're talking about RADIO. You know, RADIO where you can be fired because its the Third of the Month? Where you can be fired because the Manager's Wife is having a bad hair day?

Hell, I was fired twice for having high ratings. We are not talking about an industry peopled by brain surgeons. In fact two of the managers I, myself, have worked for and one owner all got into radio because they washed out of Hamburger U. It is, at best, a very petty industry.

And, not acknowledging the whereabouts of a recent former employee is not only not uncommon, its fairly SOP.

So, before you click your heels and start Dancing on the Ceiling, find out WHY Drew isn't there anymore, and then for the sake of accuracy, believe about 20% of what you're told.

We aren't measuring the 'dirtyness' of the word, Cecil.
We are discussing it's fitness for use in the Morris Code
De Bait.

You are very right.
If we found code useful, practical, logical, something other than a novelty, nostalgia and a hazing process,
then we would be much more open to code.
Having to learn code to become a HAM is like having to reinact a covered wagon scene from an old western
movie, in order to get a modern handgun license.

Mr. "Donk," -you are going to cause someone to have a nervous breakdown, K2IVX. He thinks you're WB2OTK and that I'm collaborating with Rich in attacking him and warned me to stop or he's going to "get even closer to the anti-Semites" than he already is. Furthermore he's going to step up his attacks on me and Rich to a frenzied pace on this board. Lenny very much objects to your labeling him a phony Jew even though you're right. According to him,the way to go is to make "nice nice" to Jew haters in order to calm them down. If any Jew stands up and spits in the face of a bigot, that, in his demented mind, is creating more anti-Semitism which is exactly the type of thinking an anti-Semite likes. Based upon his abhorrence of activism, I assume he deplored Jews walking with Rev.Martin Luther King in Selma because that too created anti-Semitism. And he must feel that the ADL is very dangerous because in combatting anti-Semitism, it too is creating anti-Semitism. And that the UJA should not exist because its presence creates anti-Semitism. And that Israel should not be so protective of its borders because that too creates WORLDWIDE anti-Semitism. Lenny's logic is ultra-disgusting and highly embarrassing. And don't think I'm the only Jewish amateur radio operator to be so incensed at his placable,wishy-washy wussy assessments. Lenny, it's time you realized that I don't give a flying fig about your assessment of me or my radio friends or for that matter, anyone I catagorize as a filthy bigoted hunk of trash like your buddies Herbie Hitler Schoenbohm,KV4FZ, "Pious Polly,W4FQF, Lloyd Montcalm, WA2EXQ, KT4TR. "Moronic Queenie Mort,K3QAM and other ham radio pus bags. You want to kiss their butts hoping to be liked and accepted? Then do it but shut your mouth when it comes to those who refuse to. I think it was Rich who said that in 1948, if the general popualce of Israel had accepted your birdbrain passive theory of ethics, morals and survival, that democratic nation, born of the remnants of a decimated people in Europe,would have forfeited her right to live. Thank God Lenny Schaiers did not rule Israeli thinking. After what you said last night about how you will cozy up even closer to the bigots if "Donkboy", a.k.a. Rich Whiten(in your mind) doesn't leave you alone, I have lost all respect for you and am telling you in no uncertain terms to keep out of my mailbox and never to phone me again. If you don't pay attention, I will lodge formal complaints against you in several ways. In my estimation you're a traiterous rat who ought to be ostracized by Jews the world over. How dare you call my rabbi to compalin about my activism at the behest of your snivelling dreck pal from Vero Beach, KT4TR? You've had it with me, Lenny and if you bother me in the future, I'll give you WAR like you've never experienced. This is my final communication with you, skunk. Pay attention. Doc,AF2Y

Hey Dr Hate
what makes you think that you have the power to do shit! Hey you gotten lost in that lonely self centered world that you live in? Have you gotten to be so caught up into your own self importance that you now believe
that you have the power to kick people out of the room because they don't believe your communistic views. I would suggest that you find yourself some friends there Dr Hate because if you don't the fact that you are self-centered will kill you. I have a suggestion why don't you do some volunteer work at your local hospital. It might allow not to hate so many people. Other than that you are showing the real signs of a loser.

Tom B. <ab7tu@parg.org> wrote in message news:376340AA.BABABAE0@parg.org...
{snip]

> In some cases I think people deserve their licenses more
> for the effort they have expended, than on how well they
> did on their tests.

That's a rather strange (IMNSHO) view ... the purpose of
licenses and testing is ONLY to determine an applicant's
QUALIFICATIONS. NOT to determine "motivation," require
some arbitrary (even miniscule) amount of "effort," or
any such thing. If someone can't pass the written tests,
they are, by definition, not qualified for the license.

The written tests are rational, valid requirements in
light of the FCC's regulatory interests and goals for
the Amateur Radio Service. They are not meant to be
a "lid filter" or a "measure of dedication."

The Morse tests, on the other hand, have outlived their
necessity and should be abandoned. As has been well-
documented, the primary reason for Morse tests, and the
reason test speeds were increased in the past, was the
ARRL's desire to LIMIT the number of entrants into ham
radio. There is no *rational* reason to want to limit
entry on the basis of an arbitrary, irrelevant "requirement."

> Some people ace all the tests easily and didn't wear
> themselves out studying.

Then I guess, they knew at least the minimum necessary
to meet the FCC's entry level requirements (bearing in
mind that even the Extra written is an "entry requirement"
to that level of privilege). Too many hams view their
license as a "graduation certificate" of some sort, rather
than an entry permit. Too many hams value their license
for what they had to do to get it (in many cases decades
ago) rather than what it permits them to do.

> Others try several times to pass one test after knocking
> themselves out trying to learn all the information.

If they can't demonstrate entry-level competency, then
they need to study more until they can.

> To me, these people have demonstrated the commitment
> to Amateur Radio that is deserving of becoming a Ham.

There is no "commitment" requirement specified in Part 97.
This is nothing more than expression of the misapplication
of some sort of "work-ethic" belief system which has no
place in government regulation.

> Things that are easily acquired have less importance to people.

You're entitled to that opinion, but it's certainly not
universal, nor is it, IMNSHO, valid. For example, I had no
difficulty in passing my test for a driver's license, but
I still value it for what it permits me to do ... its value
has NOTHING to do with whether the test was hard or easy.
A ham radio license is EXACTLY the same, IMNSHO.

> Those who have struggled, may have a greater appreciation
> of what they accomplished.

There is no body of evidence for that assertion ... in fact,
I'd bet that if a scientific study were done, those who had
a hard time achieving some objective would simply feel "that
was a bitch, I'm glad it's over with" rather than "wow, I really
value ____ because it was such a bitch to get it."

This is much like those who have submitted to the Morse
hazing ritual in order to get a higher class license, not
because of any desire to learn/use Morse, but in order to
get the unrelated voice/data privileges, and have then
"thrown away the key" never (or seldom) to use Morse again.

I firmly believe that having Morse crammed down their
throats has turned more people off to Morse than it has
recruited as Morse enthusiasts and that there would probably
be fewer people with a distaste for Morse had they been
allowed to *choose* to learn and use it of their own volition.

>Clinton was right. It cost us money, time and effort but the world knows the
>price for attempted genocide. WAY TO GO. MR. PRESIDENT! Doc,AF2Y

No one has gone home yet ... NATO has not even moved in yet. Most
refugees never go home. In which case Milosevic wins because he has
reduced the population balance by a large percentage. How long do you
think our troops will stay after they start dying from snipers and
land mines? Milosevic is an indicted war criminal. He is still in
charge. Now he can move his troops back, regroup and hit somewhere
else in Yugoslavia.
***You ignoramus. Charles Lindbergh told Britain and the USA NOT to oppose
Hitler because he couldn't be beaten. The stupid French in '35 and '36 could
have crushed Hitler when he violated the terms to keep out of the Rhineland,but
they stood back and watched. We did nothing when the Japanese overran China and
Manchuria. We did nothing when the Italian Fascists invaded helpless Ethiopia.
We did nothing when Hitler took Austria and the Sudetenland and then all of
Czechoslovakia. And by the time we acted because our survival was at stake. And
because we didn't act when we should have, FIFTY MILLION died in WWII. How's
that for having kicked the hell out of Milosevic? AF2Y,Doc>>>>>

I wasn't really that interested Peter, and yes I know the industry is very petty and fickle. I just got a kick out of the way the reply was worded, "walking around town all day, everyday". Of all the ways a former employer might choose to respond it makes one wonder if Drews behavior at work was similar to the childish and IMO slightly unbalanced way he presented himself here.

What the hell is going on?. Because of the VA. phone net on 3.952, I was on 3.949,for 90 minutes tonight and signed clear at 0125 after hearing no regular 3.950 devotee. I had a nice QSO with Bob from Manahawken,NJ; he gave me a 30/9 report to prove I was working out. When I first got on 75 tonight, I searched around for sig., reports and each one was excellent. I gave W1WCR a call-no reply. I gave WB4AIO a shout-nothing heard. I called for any Liberty Netter to give me a call and no reply heard. Where the hell were the vagabonds? Afraid of me? Afraid of debate? You mean to say I hoisted up a dipole to talk to wussies? When these animals are among each others' company, they're big and brave and bold. Alone they're puke. N2SAG heard me. Where was that ballerina? How about KE2LO, that miserable Nazi bastard from Orchard Park, NY? As silent as a titmouse. How about N3GVA? Mike flew the coop. And where was KR4LY, Larry, the idiot who used to live up here but fled because of the abundance of the "unpure people of color." I'm through with 3.950 for the night; it's now 0120 so let them have the frequency. Gosh, all I wanted to know from W1WCR was how he could justify tying up a frequency for hours for the purpose of stirring up hate against Pres. Clinton, Mrs. Clinton, any middle of the roader in D.C., Jews, Blacks, immigrants, homosexuals et al. Don't worry-I'll be back. Doc,AF2Y

If it can happen in a modern civilized nation in the 30s, it can
indeed happen in America. You don't believe we are capable of being
duped like this? Check out the folks that actually believe Clinton.
Nuff said.

I've been diagnosed with MS. Not only has it has affected my ability to concentrate (mainly because of the very intense pain) but, also to do simple things with my hands. I probalby will never be able to use a straight key let alone a keyer. My CW will now have to be from the keyboard. Not a best choice but my options are running out until the pain goes into remission. I don't feel disabled just physically chalegned, causing me to work harder to improve the senses to over come the physical degregration. To get off the subject just a little . . . the doctors feel that I delevoped MS four years after the Persian Gulf tit for tat. I WILL SURVIVE & I WILL PASS MY 20 WPM. I have a life to live because I'm only 39 and will not blow away in the breeze. Please understand that because of the waiver intended for those who need it, it WILL be abused by those don't it because they think that they'll get over on someone. I don't think they'll be saying that from the Federal Penitenary

Thanks Jay I know who that is. I find that to be very funny we tried to get him off line for years. I wondered how long it would be before he got takin him off line from Bellsouth. We got this same guy kicked form mindspring and a few other servers. In fact PORKBUTT was the one to get him kicked from mindspring so he says but we know PORKBUTT is a lier! Bellsouth was the hardest to get him kicked off of. In fact he had lied and forged headers to say people where hacking when they wern't So what comes around goes around. I know one or two that he did that to.
I'm also another one that dispises PORKBUTT. I'm looking forward to porkbuts NAL. GOODIE GOODIE
Pig vomits gone so I hope PORKBUTT is next A.K.A. DONKBOY99.Now we need to get old PORKBUTT of line as well as the Doctor of Hate. The to get them off the radio.

It's not the radiation directly, it's the effect of the radiation on the
ionosphere that disrupts communications. As I recall, HF "skip" propagation
is gonzo for many hours after a nuclear blast, but the effect should clear
up in 24 hours or so and you can go back to DXing... if you still have
a power source.

I don't recall any references offhand but if you really wanted references
instead of just confirmation that the effect exists, e-mail me and I will
see if I can find some.

>will I accept, anything but the unconditional surrender of NCI'.

Don't hold your breath waiting. NCI will
win the code test war. It is only a matter
of time. News on the international front
is that the Swiss are probably going to trash
all code testing.

The interesting thing will be that when the
ITU powers that be finally discuss the issue of S25.5,
there isn't likly to be anyone that would believe
there is any need for code. ITU reps are
far more likly to have a realistic understanding
of contemporary communications...and that
sure doesn't include code as anything but a
recreational mode used by some hams.

Cheers,
Bill K2UNK

I have here all the legal papers that were faxed to me from the DA's office in Clifton, NJ.

My my my, it's some VERY intresting stuff! Including the ARREST WARRENT for AF2Y. Plus the comments made about him by the employee who he had "sexual advances" with.

It was the best $15.00 I have ever spent.....Now I need your help.

I need a webpage to post this info. on. Please get back to me if any of you have room on a page for this VERY IMPORTANT INFORMATION. This will bust AF2Y's balls once this comes out for all to see.

>> I wouldn't call it "willful," Cecil. Rush-hour traffic interferes
>> with our timely commute home, but that interference is not "willful."

>"Get out of the way, there is a contest going on!" is not
>willful interference?

Gee, at least you were given a friendly warning, Cecil!

We have parades -- lots of them. Hawaii has the distinction of having
the greatest number of state holidays in the nation. Kalakaua Avenue
and associated streets are blocked at least once per month for parades.
Some folks gripe and complain, but notice is given well in advance,
asking drivers to use alternate routes. Same thing with amateur contests
-- notice is provided via the periodicals well in advance that such and
such contest will be given on such and such dates. Plan ahead, Cecil.
And recognize that:

1. Contests fill the bands with happy operators.
2. Spectrum-hungry observers outside the amateur service will have no
doubt that the ham bands are being fully utilized. (And you *do* realize
how important that is, right Cecil? WARC bands are available for you and
others who can't comprehend the importance of this.)
3. Contests give operators a chance to voluntarily subject themselves to
long hours of operating (in a fun manner), testing both their stamina
their station's efficiency, two very important qualities for those wishing
to abide by S91.1(a) and (d):

97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur
radio service having a fundamental purpose as expressed in the following
principles:
(a) Recognition and enhancement of the value of the amateur service to the
public as a voluntary noncommercial communication service, particularly with
respect to providing emergency communications.
(d) Expansion of the existing reservoir within the amateur radio service of
trained operators, ...

Would you rather have the bands fill with contests or filled with comms like those which occur on 14.313 Mc? The week contains 168 hours; a weekend contest uses at most 48 of 'em -- 29%. But of course, not every weekend contains a contest, so the percentage of time in which contests utilize the bands in a year's duration is lower.

Again, little KR4 Boy you are wrong. You don't have to have a long robed Guru to tell you that you can be a "Brother". Any one can witness for Jesus. All believing Christians are "Brothers in Christ" and need no commission from a sensor swinging human!!

Get real Doc, this self appointed messenger of 14.313 is nothing but an egocentric self anointed hypocrite. For years he has butted in on to the frequency, asked to make a call and then spent the better part of 4 hours or more spouting his religious crap. His signal is 20 kc wide at times and he broadcast's to anyone that will allow him to be a sounding board.

This is also the same Jamming for Jesus John that created songs and had his stumpjumper friends play on top of "the enemy". I guess I can "stick it" then, eh Doc. Im so glad this a-hole moved to Atlanta. Now you can all listen to him in the following years, like we in the south have had to do while he was in Scranton. Better you than I.

My, My , thats a turn around for a CHRIST hater like you. but you told
the Englishman a different story. What a bigoted putz!!
***Why should I hate Christ? Christ isn't even his name. It means Saviour in
Greek. He was a Jew named Immanuel ben Josef. He was circumsized and made Bar
Mitzvah. In Aramaic, he's Yeshua but not Yeshua the Saviour. Only in the Greek
was he given that title. And the Greeks also renamed him Jesus. And so if you
were to speak to him today and address him as Jesus Christ, he'd ask,"Who's
that?" I hate hate, the hate created by those who worship a Jew and then
disparage us for not calling him God which is forbidden in the Ten
Commandments. We agree along those lines with the Moslems-Jesus is mentioned
both in the Koran and Talmud as a prophet/teacher.THAT'S IT! Remember what's
more important-to love the message or the messanger? Doc,AF2Y***** and
realdeal, for Christ's sake, why don't you identify? You Christian
coward.******

> me what Protestant denomination sanctions it? Tnx. AF2Y,Doc

Doc, Such displays are not characteristic of organized religions, Roman
Catholic or Protestant.

It is somewhat of a trivialization and not appropriate to use in referencing
what we Catholics and others consider our Savior. Some years ago,
"Honk if" bumper stickers proliferated the highways; "Honk if you you
like the Packers", "Honk if you're against the War". "Honk if you love
Jesus"
was a cute twist the the fad but somewhat inappropriate. However, we
would not consider it sacriligious. Catholics display references to Jesus
with the respect He deserves. Consider for example a bumper sticker
that said "Honk if you love the Prophet Mohammed". You know that such a
display of inappropriate subordination would seriously inflame conservative
believers in that religion. "Honk if you Love Jesus" may inflame members of
other
religions as well. That's just the way it is. It is a hollow expression
which probably
does more to alienate than enjoin.

People who display such stickers have often been raised as followers
of organized religions and then rejected it, later to be 'born again' when
they could rediscover Christ and new sources to which they can impart their
earnings. They can deal with the new Jesus, who is now more a peer than
God, with whom they relate on their own terms. Of course, we believe that
the only true relationship with Christ is on "His" terms, as the only way
for all
Christians to find God the Father.

Hope this answer your questions.

73 es cul

KR4AJ
Thank you Mr. Finn for that exquisite presentation of facts. You indeed have your head on straight. A bumper sticker saying "HONK IF YOU LOVE JESUS" is, in my estimation, sold to raise money for phony Christian Coalition ministries, an example of which is that loose-lipped Brother Stair, the Last Day Pervert of God. No middle of the road Protestant denomination e.g. Lutheran, Presbyterian, Anglican,Episcopalian and others would stoop so low as to cheapen the significance of their Saviour. AF2Y,Doc***

The standard NCI line. You guys needs some new trigger words, Rick.
Does Fred have you all stand up and say 'hazing ritual' 5,000 times
at every board meeting while you march around the room ?

The Morse code may very well be useless to you, but I've used it
to communicate with 30,000+ hams all over the world, so it's not
useless to me, and it's not useless to thousands of other hams all
over the world.

It's only useless to hams to who won't bother to learn it.

Isn't there any way that you guys at NCI can "Support the
modernization of ham radio and help to assure its survival into
the 21st century!" without running around waving your Morse
Code Woodie in everybodys face ?

NCI isn't about modernizing anything. It's about a dozen meatheads
with a hard on for Morse code. Anybody who can't see that has
a brain that is useless.....

Organization: Communications Network Dirtball
To: frequencycaptain@my-dejanews.com

****HOLD ON THERE A MINUTE,ORIS. WHAT I READ BELOW IS MORE OF A THREAT TO RILEY
HOLLINGSWORTH THAN STATEMENT OF FACT. YOU'RE WAY OFF BASE; YOU DON'T ADDRESS AN
FCC MAN IN THAT MANNER OR IN THAT TONE. WHOM DO YOU THINK YOU ARE? MR. HAM
PERFECTO? WHAT YOU ARE SAYING IS THAT YOU DEMAND THAT HE PUNISH WB2OTK SEVERELY
BECAUSE YOU,N3CND,KNOW FOR SURE RICH HAS LIED AND ALL THAT JAZZ. THE FACTS
SPEAK FOR THEMSELVES:IF YOU YOURSELF DIDN'T HAVE A PERSONAL GRIPE WITH RICH,
YOU COULDN'T CARE LESS ABOUT HIS STATUS. NOW WHAT YOU ASK IS THAT RILEY ACT ON
YOUR BEHALF TO TAKE HIM OFF THE AIR! THAT'S BULLSNOT AND YOU KNOW IT. MY
SUGGESTION IS THIS: MIND YOUR OWN BUSINESS. IF RILEY WANTS TO PUNISH RICH, THEN
LET HIM AND YOU'LL BE ECSTATIC. IF HE CHOOSES NOT TO, THEN ACCEPT IT AND BE
DONE WITH IT. STOP TRYING TO DICTATE POLICY TO THE F.C.C. IT SOUNDS LIKE
HELL.AF2Y,Doc*****

What has the FCC gone blind to fact that its let one of the worst
jammers off the hook? Have they been totally blind to the fact that this
jammer does and has always used foul language over the radio? What's
this has the FCC chickened out again? The first real chance on the
betterment of ham radio and the government washouts go yellow? Is this

another example of how our FCC is going to handle the true troublemakers on the amateur radio service? The service is truly going to die now! I will make a prediction that the airwaves will be worse now then ever. Has Hollingsworth lost his backbone? Did the FCC stop enforcing the rules? I mean I know for a fact that this jammer DID LIE to Hollingworth about the homebrew 8877 amplifier being under construction. I have heard it on the air more then once, and ran up to full power. I also know for fact that the station in question did go down on 3.8945 MHz and cause willful interference on many occasions. I also know when things started to calm down, the station in question would stir the crap back up and laugh about it. I also know that this guy did sell worthless filters over the radio and when people complained and wanted their money back all of a sudden there was something wrong with their radios. WHAT IS THIS!? Has the FCC lost their minds? What kind of farce is this I say? Well Mr.Riley Hollingsworth you have handed out the wrong message to both groups and the amateur radio community as a whole. You can bet the airwaves will be full of PORKBUT SONGS 10 5 with his squeaky voice going off about NALs and others just going off the deep end. I can surly see the death of amateur radio is right around the corner. What has Mr. Hollingsworth done now? It looks to me that Mr. Hollingsworth has handed a license to jam to one of the king jammers on the radio today. What is the world of amateur radio come to? We all where in high hopes that you Mr. Hollingsworth where going to be the new sheriff in town. It appears that you're another Washington quitter! You can bet that 20-meters for the next here on end will be crazy! You can bet that 75 will be completely nuts as it was before this so-called FCC crackdown (again I say WHAT CRACKDOWN? I have talked about this in previous commentary.). As for par for the course the FCC cowards at the most perfect time to save the service form its own self-destruction. What is wrong here? I pulled the strong anti-FCC web pages down at your request Mr. Hollingsworth. You assured me that something was going to be done! Just like in the past and just like Washington allot of hot air and nothing gets done!

Well for those of you in the Banana Republics that want the low end of the spectrum for your banana work. Just stick it out for a few more years. The FCC has sent the wrong message to all the white trash on amateur radio today. Start getting your bids ready because it will be just a matter of time before this trash embarrasses the USA to the point of Congress yanking the whole service from us. Darn CBers are better operators then the trash that the FCC has decided to let off the hook. For the rest of us, you can bet that this is the long-term plan of the FCC and this administration to give the trashy amateur radio operators the chance to destroy the whole service. Take away more freedoms and gain more control over the American people. You can bet that the FCC will give the policing of the airwaves to the local police and when that happens WE WILL ALL LOSE! You can take that to the bank! Then it's just a matter of time. Banana republics GET YOUR BIDS READY! The spectrum will soon be for sale to the highest bidder.

WAY TO GO HOLLINGSWORTH! Perfect opportunity for the FCC to show that they mean business. The perfect opportunity to show that the FCC

isn't a paper tiger and that it has real teeth. Typical of our government in this country of ours always start a good job but rarely finish. Aw what do you expect from Washington? They send a lawyer to do the work of an enforcer what a bunch of quitters. Hollingsworth if you read this way to go! Don't worry boys Hollingsworth will read this because I'm sending it to him. I guess time will tell.
Best Regards and May amateur radio R.I.P.

Oha. Not bad. You are a professional? You learned that on a university?
You've got lessons for that? (Sorry for my english, i think you get,
what i mean.)

I am not a professional. I learned that, after i finish my daily job, i
arrive at home at 21 o'clock. And have a family too. And i had no good
documentations for all that stuff. I learned it by making it, without
any teachers and professional education papers...and schoolbooks or
whatever you want...and i think, its not bad for one who doesn't really
need that stuff...

On the other hand, what has all that to do with amateur radio?

I just responded your (a bit impudent) comments about my old ass and
computers. I just show you, that - altough i am not a professional - i
am not just uninformed in computers stuff...thats all.
You have a drivers license? But Michael Schumacher is even better...
Say, is that comparison sensible?

How did plaintruth get my goat? I'm crying to be quoted properly. Does accuracy bother both of you? Anyway, you guys should answer my question, are your opinions based on scholarly research or just plain ol' prejudice?
BTW, answere another question, how come you two guys just write invective without contributing to a meaningful discussion. Most everyone else in this NG with whom I've disagreed has counterpointed my arguments with their own. Takes all kinds I guess.
"plaintruth"?!?! I doubt it.

Anonymous:

That's too bad - I'm sorry you feel so negatively
about Ham Radio. I am 37 y/o, have had my
ticket for about 3 years, and I really enjoy it. If
you REALLY look around, you will find that most
of us are not lids, whiners, crackpots, and
hate-mongerers; they just seem to be the most
vocal. Just ignore them, they're NOT the majority.
(Besides, you're gonna find those types no
matter where you go or what hobby you take up.)

Now, I'll be the first to admit I am mostly a Rabbit -
I listen MUCH more than I talk, so I understand your
dismay at the complaining. But I have a Secret
Weapon at my disposal - it's called Changing
Frequencies. Just because someone is complaining
or being obnoxious doesn't mean I *have* to listen.
OR reply. If I don't like the way my own QSO is going,
I can either change the subject or just say my goodbyes
and sign off. I know I can't control others, just myself -
and I certainly don't want to add to the problems out
there. Which leads me to my last point...

MIght I also most gently suggest that, if the hobby has
changed, perhaps your attitude should too. Neither
Ham Radio - nor the World, for that matter - will
ever again be like what you remember as The Good
Old Days (I'm sure the same will be true for me
many years from now!) So be patient, maintain your
high standards no matter what, and hang in there
until you find those nice folks you want to talk to.
That's *gotta* be more fun than just sitting around
complaining about it... it has been for me! ;-)

<whew - sorry for being so long-winded>

I agree! "communist Jews" makes about as much sense as "Christian
Satanists." Jews, even more than most Americans, see the need for gun
ownership.

Jim, there's none so blind as he who will not see. As I've explained numerous times on posts here, I've helped train hundreds of young people getting into ham radio through Explorer Post 599 in Phoenix. The attitude of youth today is very different from what it was in 1990. code is no longer respected as a valid technical skill,....only an outdated useless one. It is no longer a hard sell to these kids, it is a NO SELL.

Ham radio faces a number of challenges to its survival in the next decade. The internet, CC&R's, computers in general...etc. What we DON'T need is to continue an obsolete hazing ritual as a onerous burden on top of these handicaps as we try to make it relevant to our modern world of electronic telecommunications. In case you didn't know, I say

this as a ham who LIKES cw personally, and use it often in weak sat work. But it's just another mode now. There are no longer any valid reasons for mandatory learning of the code. Not interference mitigation, not a pool of trained radio operators, not to intercommunicate with other services in an emergency, nothing, PERIOD. Nowhere does the FCC state that any part of the test should constitute any kind of litmus test barrier, to indicate a threshold degree of effort. Nor do they believe that a high-speed code tested person is a better ham. That was disproved back in 1990 in the last NPRM that resulted in the no-code tech license.

The time that we all knew would come, has. It's here now. It's too bad that many of the OT's in ham radio refuse to recognize it, and would rather go down kicking and screaming, or rather see ham radio die, than adapt to a world without morse testing.

There are many other modernizations that will need to be done to keep the hobby/service relevant into the next decade. I have a number of opinions on them. But the morse cw test is the one, single glaring item that we can take care of right now, before the average age of the General licensees hits 70. (When the FCC quit keeping birthdate records, it was 63) Once we lose too many older hams to death/disability, it will be very hard to bootstrap the hobby back up with new youth members, even if the code is eventually eliminated, in say another decade. The time is now. Seize the moment, if you care about the future of ham radio Jim.

I have an old 8ch Midland 70-336A VHF radio. I was wondering if there was anyway to program the EPROM with a regular EPROM burner??? Can anyone tell me a way to get this radio programmed. I bought it from a guy not in my area so the repeaters in my area are not programmed into the radio. Any help would be appreciated. Thanks. 73's

Rick, there is, IMO, a single valid reason for keeping the code requirement - S25.5. We should honor the treaty until it is changed or at least notify the ITU that we are going to ignore it (as NCI suggests).

What I find interesting is that the trend of communications is going towards being "Digital" in nature yet only a minute portion of the amateur license question pool has anything to do with computers. CW is a mode of communication and Packet is a Mode of communication, yet there are only 3 possible packet radio questions on an exam, of which none are of any real value (Ex: What is a TNC?).

Why doesn't the FCC have a requirement for a potential licensee to know ASCII Code verbatim, especially if a licensee is required to know Morse Code verbatim? Both are supposedly equally valid modes of communication yet there is a completely unbalanced approach to each mode.

It's obvious that you feel there is no longer any technical merit to CW. To say that your charges agree with your bias is no big surprise. (DUH!)

I think CW still has merit. I also operate digital modes. Personally, I see little merit to digital modes by radio when the Internet is much more reliable and more pervasive. Voice communications are better held on land lines or cell phones. Even with this as background, my eleven year old still hasn't the motivation to take on Morse code, which he sees as a possibility for personal failure. Perhaps that's the real reason: the mode relies almost entirely on the operator's ability. There is no flaky software to share blame for bad copy.

Incidentally, I've learned that QRM is subjective: you don't hear about it until they have difficulty copying. Whatever the reason, sending slower almost always mitigates the problem. While I don't consider it to be synonymous with QRS, the fix is usually the same.

Michael.

For Sale: Kenwood DSP-100 in excellent, like-new condition. Cables, manual included. Plugs directly into your TS-450, TS-850, etc. Gives you ability to vary the sound of your SSB signal from deep, rich "broadcast quality" to a sharp, narrow signal for contests and pileups. Also adds carrier suppression and unwanted-sideband suppression. Can set CW rise and decay (fast vs. slow). Gives you transmit DSP functionality like some of the newest rigs.

Sell for $400 (or best offer) and will split shipping cost anywhere in continental USA. Will consider partial or straight-up trades for comparable value. Feel free to run something by me!

I hide my biases well from them Michael. I put on a good face and do my best to sell them on trying 5 wpm. It's a no sell. I think we had one or two out of a total of about 30 in two recent classes, one in east valley and one in west valley, who actually tried to learn code. Only one tested. It just doesn't wash with these technically sophistocated young kids anymore. there's no use even trying.

We've seen the same thing. But there's a big difference between
interest at a demo, and actually getting down and dirty to do the
learning and practice. Once they see how slow it is, they lose interest
real fast in the classes.

Most hams nowdays choose not to build radios. Commercial rigs are too
cheap and easy to get ahold of. Except for bare bones cw stations, few
choose to build transmitters/receivers.

> >There are many other modernizations that will need to be done to keep

But if the public doesn't mind that, then it is irrelevant.

And if need be, we have the capablility
of building our own gear.

Again, few of use can build more than a bare bones cw rig anymore.
Major project construction is rapidly becoming a lost art. Even major
kits are gone. Notice so few construction projects in QST and 73?

That's good. Once you get rid of the code testing, the only other
hurdle you'll have to overcome is "Hey, Dad, can I get a $5,000
advance on my allowance so I can buy an FT-1000 ?" and then the
HF bands will be flooded with 8 year olds. (Spare us the stories about
all the radios you've build with TV sets from the trash can, Jeff).

I have never believed that 8 year olds are the answer. I think we
need to be recruiting more 50 year old people. I retired at 49, and
I have more free time, and disposable income, to donate to ham
radio than a whole troop of boyscouts put together.

>The time that we all knew would come, has. It's here now. It's too bad
>that many of the OT's in ham radio refuse to recognize it, and would

If you're referring to me, I'm not kicking and screaming about about
Morse code going away. I'm kicking and screaming about the kicking
and screaming. I never had a problem with the 'modernization of ham
radio'. I have only had a problem with the manner in which the fact
that I needed to be 'modernized' was presented.

I think maybe you don't realize it, Rick, but you are right in the middle
of a big hate campaign. It used to exist just here in a few newsgroups,
but not any more, now it's on web pages all over the world, on the front
page of the Wall Street Journal, in Washington, D.C., and who knows
where else. Bruce is hoping all the 'trash' will stay on the internet, but I
don't think that's going to be the case.

After you get all these 8 year old boyscouts licensed, you can take
them to a ham club meeting and explain "See those old guys over
there in the corner ? They are the procode, facist, lying assholes.
And those other guys in the other corner, they are the moron
two meter Nazi lying nocode geeks. Now you kids decide which
group you wanna play with......."

In my opinon, which may be wrong, but I'm entitled to it just like anybody else is, the troops are forever divided. And petitioning the FCC until Carl and Bill turn blue isn't going to fix that. As long as there is ham radio, there will always be hams who use Morse code, tests or no tests. And now that the precedent has been set, there will always be 'No Coders' and 'Pro Coders'. Welcome to the beginning of the end, sponsored by Usenet, The Lenny And Squiggy Show, and Mt. Olive Township, New Jersey, and documented by Deja News, to make sure nobody ever forgets what happened.....

HERR DOKTOR !
For a Yid you are ONE BIG DUM SMUCK and a Putz to boot.

I Now understand why they banned you and your mother from the local
Shule.
You for being a Putz and a Shmuck, this for letting the Goim baiting
turn you into a ranting and raving Shmuck in front of the WORLD, and
your poor mother for being the mother and of the Shmuck of the Year.

It is a Shame that you are a Jew, it the likes of your type that have
started the Pogroms and the HATE against the Jews.
You are the type of Jew that GIVES JEWS A BAD REPUTATION.
Just Shut UP and Go and have a stiff Drink or some thing BUT PLEASE
STOP MAKING JEWS LOOK STUPID.

Nate

Message-ID: <19990613203607.15987.00001281@ng-cb1.aol.com>
Source record: 139637

I still am not getting an answer about what Christian faith supports the "HONK IF YOU LOVE JESUS" bumper sticker. Why don't you see anything equivalent on the car of a Jew?
Preferably a Cadillac. I'll tell you the reason. BECAUSE WE JEWS RESPECT THE CREATOR-THAT SPIRIT IS IN OUR HEARTS AND SOULS. We don't have to turn a profit by coming out with a piece of paper trash like that. Such a bumper sticker is a DISGRACE. If you worship Christ as being God, then SHOW RESPECT. You'll never see the day when any Jews puts a piece of sticky paper on any car to proclaim "HONK IF YOU LOVE MOSES," or worse than that, "HONK IF YOU LOVE JEHOVAH, or HASHEM, or ADONAI, or YAHWEH." And if I get a snotty reply from a Jerry Falwell type Protestant who'll say that Catholics put suction cup plastic saints on their dashboard, I'll reply with this: it's not a crime because that thing is merely an emblem, a representation never ever prayed to. It's a token of faith and furthermore the company is owned by Lipperschwitz and Goldberg of Rye, New York. AF2Y, Doc

I work with two stations in Wichita, currently, from my home base in Chicago. How Drew comported himself inside, is a matter of speculation. And little more, I'm afraid. I've heard airchecks. He wasn't bad.

Former employers are notorious for saying derogatory things about employees who have left. The best of them, and the most damaging, are done in credible, but amusing ways.

And if creative matters were at issue, the bad blood can last for decades.

Given the current state of media, the ever shrinking number of jobs, and the competitive nature of the talent seeking them, Drew may find it tough to hang find a decent job. However we are talking Kansas. Where broadcast tenure is pretty much a rare thing. What did he say, 19 months,..truth is that IS a long time in that area.

The good news is that every change of job brings personal and professional growth. A firing can bring evolution. Let's hope he benefits from the moment.

And that the soles of his shoes hold out.

Although if he gets down to Wichita, Town Easte has a real nice food court.

Because sometimes you have your sh_t together. This Morse code "debate" is a subject that for a long time I did not get involved in. but after seeing so many inaccurate and/or illogical arguments I felt the need to make a statement. Basically Sir, you seem to have your head straight but when it comes to putting it in words, it often does not come out right. The debate is futile anyway, the fate of Morse code is sealed. It is an old and outdated mode that will soon disappear from the test and will, eventually, virtually disappear from use. The same kind of arguments and resistance to change always happens when old technology is dropped. I work as a machinist for a living. I see the same kind of arguments in my profession, In fairly recent times (the past 15 years or so) there has been a major transition from manually operated machine tools to computer controlled robotic machine tools. The old timers, by and large, have resisted the change every step of the way saying that it has reduced the skill level and that now it does not require a real machinist to do anything. Those arguments are just as invalid as most of the Morse code debate. A modern machinist needs to be just as skilled (if not more so) than an old line one. It is just different. BTW, I am one of those old timers. The difference being that instead of resisting the change, I accepted it and have done my best to use it to full advantage. And yes, it is an advantage.
These kind of arguments have gone forever. Look at the industrial revolution when machines started to replace hand work. There was extreme resistance to change. When cars started to replace the horse as transportation, there were many laws passed making it extremely difficult to operate a motor vehicle legally. In more recent times, the big debate about allowing the use of electronic calculators in school.
I could go on and on with examples but the point is that old notions die hard and often take a generation or more to come about but in the end, the old is replaced with the new and we are all better off for it.

I listened to your audio file, located at

http://www.angelfire.com/ga/3950Page2/images/AA8DP61.ra

and it doesn't have anything to do with "running Blacks out of
town." It's hard to believe you even listened to it.

On the recording, AA8DP discusses how the Black people of Somerset
County, Kentucky, themselves ran the Communist "freedom riders" out
of their community.

It is very interesting information, but you totally misrepresented
it -- which was not unexpected.

During the conversation, K5ZU abruptly begins a jamming monologue.

So the recording has value as documentation of K5ZU's ongoing
malicious interference, and I think that it should be forwarded to
Mr. Hollingsworth with notes on the date, time, and frequency and
the suggestion that it be added to his file on K5ZU.

Will you do that, please?

Honor bright,

Kevin, WB4AIO.

Oh, i've just built one for SSB for 40 and 80mtrs, the 40m section is
already working, and now i am thinking shall i complete the 80m section
first, or shall i make 40mtrs qso's day and night, hi.
It's Output are 5W, i've got (from DL) just 7X and R1FJL. Not so bad,
eh?

I've built also a SST for 20mtrs, got also some QSO's to US. Just abt
2800 miles/watt. I would like to see some of the nocoders establishing
such distances from a box which is 85x90x40mm, droven by 10 AA-NiCd-
Cells. :-) They don't know what "feeling good" really means...

I wouldn't call it "willful," Cecil. Rush-hour traffic interferes
with our timely commute home, but that interference is not "willful."

>parts of the ham bands and which modes are used there.

What commercial license? He was the lone RO on a Vietnamese-owned,
Indonesian-registered, Philippino-crewed freighter which sailed the
South China Sea. License? Yeah, right. HF and MF CW only. The only
other mode was VHF-FM -- that radio was up on the bridge for the
captain to utilize.

>He doesn't have to actually send or recieve any of those other modes
>like packet, SSTV, EME, RTTY, etc! They only make you do that with
>Morse Code.

That's because those other modes don't require much skill, compared to
code. Each can be learned in just a few hours time, so no sense in having
a skill test for them. I suppose if any of them were the second-most used
HF mode, it might be appropriate to test one's skill in utilizing them,
but the exam wouldn't be much of a challenge.

>So tell him not to worry, the only mode you are forced to
>actually perform or try to decode is Morse Code, nothing else.

"Forced"? In the same way we're forced to pay taxes?

From the Oxford English Dictionary: "Forced: Subjected to violence."

1463. ACS Newsletter for 6/14/99

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-14 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7k1r4b$qjs@news.Hawaii.Edu>
Source record: 139651
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard! .....

>From the Editor's Desk:

This edition of the ACS Newsletter is coming out a few days early this week: I will be attending the National Emergency Number Association (NENA) Conference in Charlotte, North Carolina next week, and I didn't want to leave without publishing Monday's Newsletter.

Some great questions came out of some of this week's email, and I wanted to share them with you as well.

Stay safe, everybody - see you the week of the 21st! Dave Larton, Editor
.....

Please Welcome:

John Teer, AK5Z <JohnTeer@vbmc.org>
Harlingen, Texas

I am the Texas State RACES District 33 Radio Officer and the AEC for Cameron County, Texas with primary responsibility for amateur radio emergency communications for the City of Harlingen and the amateur radio section of the Harlingen Emergency Operations Center. I also am a member of the Valley Amateur

Radio Information Activity Council (VARIAC). This council is made up of various clubs in the Rio Grande Valley who wish to participate. Its purpose to to coordinate the Valley's clubs' efforts in emerge ncies working under the ARES/RACES leadership.

Further information links can be found at: www.qsl.net/ae5r on the internet. I am also the Trustee for the Valley Baptist Medical Center Amateur Radio Association Emergency Repeater that exists to provide auxillary medical communications in times of eme rgency. The VBMCARA website is: www.qsl.net/ag5b and membership in the Association is open to all amateurs. A list of all know amateur radio clubs and organizations (and links to their websites) can be found at: www.qsl.net/ak5z

Member of Placentia RACES, helping the City of Placentia in times of emergency, disaster, and for community events. Now also a member of the Caltrans D12 RACES/Disaster Services Communications Group.
.....

>From the Mailbag:

From: bibradl@ci.long-beach.ca.us

I have printed a 4' binder full of your manuals to try to learn as much as I can. You see, for many years, Long Beach has had a loosely organized RACES organization. Now, our Emergency Services Coordinator, and I are trying to organized it. I have already used your Plan template to draft a RACES Plan. We have modified it to fit our local needs. I would like the permission of the California ACS to use the other manuals that I have found on your web site. I would like to retype them, make additions, changes, and/or deletions as necessary to fit our local needs. In doing so, I would certainly acknowledge in each document that it was initially written for and by the California ACS. Permission to do this would be extremely beneficial to our organizational efforts, as well as saving us a lot of time (probably years). Your permission would be greatly appreciated. In addition, as the City Emergency Radio Officer for Long Beach, I would be interested to know if you offer any classes for Radio

Officers. Thanks, Bill Bradley WD6FON

(Bill: Thanks for writing. Feel free to use any and all of the documents contained on the ACS Website! It's there for your downloading pleasure; we maintain no copyright on anything we have on the Web. We'd appreciate an acknowledgement, and a blurb asking club members to subscribe to the Newsletter wouldn't hurt, either! -- Dave Larton)

From: Randy Miltier <miltier@mind.net>

I'm a new Emergency Coordinator for Jackson County, Oregon. There seems to be a question to wheather an ARES/RACES organization can "own" equipment. In our case the ARES/RACES equipment is listed on the local ham club's inventory. This creates problems of its own (gray areas) and I would prefer to have all ARES/RACES equipment under ARES/RACES control. To provide insurance on any equipment you would have to have a person, club or association to do so. My question is: How do other ARES/RACES organizations "own" their equipment? Do we need to be a non-profit association? Is this even a legal/IRS problem?

Thanks,
Randy Miltier, K7RPM
EC Jackson County, Oregon

(Randy: Most of the organizations I've seen have the equipment 'owned' as part of the overall organization, as a not-profit corporation. It takes some money and some time, but the benefits are worth it. If any of our subscribers have similar answers for Randy, please e-mail him directly. --Dave Larton)

Mike Unfried WB9MJQ <wb9mjq@jps.net>
Upland, CA

I like the ACS Newsletter, I think that it is very interesting and has lots of good articles. I would like to see articles and or training on disaster communications. Plus articles on emergency disaster prepardness. Maybe a list of speakers that could be contacted to give talkes or seminiars at regular amateur radio clubs. Or go so far as even to say disaster prepardness organizations. And are any of the articles allowed to be repubished in other amateur radio club newsletters. What is the procedu re that you want followed. Please let me know. What types of articles will be permitted to be pubished in the ACS Newsletter? Thanks for your help in advance and keep up the good work. Looks good.73 Mike WB9MJQ

(Mike: We encourage you to republish any of our material in your local club Newsletters. As you've seen, our Newsletter is not strictly made up of one organization, but of many. Our EMCOMM Bulletins attempt to address concerns of ALL emergency

communica tors, regardless of club or agency affiliation. Most all of the articles we use in the Newsletter are unsolicited, and we welcome all comers with an interest in emergency communications. We try to stay away from political issues, and welcome articles o f a general interest to an audience. Check our website for back issues of the ACS Newsletter and our EMCOMM Bulletin series, dating back to 1985. I'm pretty confident that most of your questions have been covered at least once during our 14 year histo ry! Dave Larton)

.....

**** FEATURE ARTICLE ****:

The following article is reprinted with permission from "The Connection", published by North American Emergency Management Inc. http://www.naem.com

Community Disaster Response

by Frank Lucier, Retired San Francisco Fire Department

Community disaster response is certainly not a new concept. America^&#65533;s pioneer history is filled with stories of neighbors helping neighbors and communities banding together in the face of adverse conditions. The Civil Defense system was created during World War II to respond to the effects of a bombing raid on this Country. Local volunteers were used as neighborhood ward captains and a pocket manual was produced outlining basic emergency skills and response procedures.

Following a major earthquake in the Los Angeles area in the mid 1980s, a group of Los Angeles city officials visited Japan to observe first hand an exercise of a neighborhood-based response program taking place in Tokyo. They were so impressed by what they saw that, following their return, the Los Angeles City Fire Department created a program to train citizens in basic disaster skills. This program was developed under the direction of Chief Frank Borden.

In 1989, the city of San Francisco and the surrounding communities suffered a devastating 7.2 Richter event, the Loma Prieta earthquake. It became very clear to the Fire Department that the help of civilians would be needed if we were to successfully respond to all the emergencies that arose. We discovered, though, that citizens had few disaster skills. We realized that when a disaster happened, whether an earthquake, storm or terrorist activity, the people on the scene were actually the first responders and, in a major event, they were often the only responders for possibly long periods of time. We felt it our duty to follow Los Angeles Fire Department^&#65533;s lead and develop a community disaster training program.

We researched the Los Angeles program and in 1990 developed our own program and began training the citizens of San Francisco in the Neighborhood Emergency Response Team training program. I developed and directed this program for the first seven years in which time we trained over 7,000 people from neighborhoods and local businesses. The San Francisco program has become a model from which many other cities are drawing ideas and structure.

The concept of community disaster preparedness has spread since Los Angeles first developed their program back in 1985. Today, FEMA's Emergency Management Institute offers train-the-trainer classes in Community Emergency Response Team training or CERT at a national level. There are community programs being conducted all across the country, each geographic area modifying the curriculum to meet the natural disasters that they face. No longer does the program deal strictly with earthquakes but with flooding and storms also.

The Training

The target audiences for the training are community groups and businesses.

The training is a combination of classroom type instruction as well as hands-on skills training and exercises. The skills taught in-class do not differ from group to group but the response responsibility does.

The training presumes no prior knowledge of disaster preparedness or response skills and is easily manageable by all the participants. The courses are conducted over a six-week period and graduates that attend each session receive a hard hat, identification vest and a certificate of completion. The instruction is normally done at a neighborhood school or at the business and is taught by members of the San Francisco Fire Department. An outline of the training may be found at http://www.slip.net/~nertsffd/ .

Organizational structure

In the event of a major incident, disaster management for City of San Francisco decentralizes into what are called Emergency Response Districts or ERDs. There are ten ERDs in the City, each having the geographic boundaries of the ten Fire Battalion district. In this decentralized mode the fire Battalion Chief is responsible for all tactical disaster response and management issues within that ERD. These battalion chiefs or ERD leaders report to the Office of Emergency Services where the city department heads and their operational people gather to make overhead decisions and to support the tactical response of the ERDs.

Within each ERD there may be several NERT neighborhood and business team. Each of these teams has its own staging area or

place where team members gather to make decisions on actions to take and assist teams in mitigating disaster events. Each team can work independently of each other and independently from Fire Department directions. The first action the team takes is to form a command structure for operations, or Neighborhood Command. This is a basic form of the Incident Command System (ICS) with sections for command, logistics, operations, intelligence and administration. Being a modular system it can grow or contract as needed. The Neighborhood Command exists to support activities in the neighborhood and make decisions that will do "the most good for the most people". The incidents that are beyond the scope of training, collapsed buildings, major fires, hazardous materials spills are immediately reported to the ERD.

There are redundancies built into the NERT communication system. The first choice for communications is the telephone. This may not always be possible because of the amount of phone traffic following a major disaster or the possibility of the system being overloaded by telephone receivers being knocked off the hook by the quake. As a back-up form of communications every NERT team has at least one HAM radio operator equipped with a portable HAM radio. The NERT organization also installed HAM radios in each of the ERD fire stations with a base station installed at the Office of Emergency Services. Thus the NERT teams are able to communicate with each other, with the ERD and when necessary with the Office of Emergency Services. If all other systems fail, the NERT teams will default to using written messages and runners to communicate.

To test this system of response and communications, two drills are conducted each year. The spring drill focuses on skills, team building and internal communications. Trained NERTs are brought to a central location, usually a school or other large building with multiple rooms. There is some skills refreshing such as disaster medicine, search and rescue and lifting heavy objects. Then the group is divided into neighborhood teams and these teams are put through several disaster scenarios. The intent of this drill is to have the people practice their skills and inter-team communications in a simulated disaster setting.

The fall drill is a decentralized exercise where each neighborhood team designs there own drill scenario and practices skills at their neighborhood staging area. We also practice the disaster HAM radio net by scripting messages that are sent from the staging area to the Battalion command to the OES.

Putting it all together

In the event of a real disaster such as a major earthquake, this system of community disaster response operates at different levels. The first level of operation is at the area where the

damage is most severe and people are injured and trapped. The individual NERT's will be the true first responders since they will already be on the scene (this is where they live or work) when the event happens. In individual or group effort, they will organize convergent volunteers into teams and direct them in assisting the injured, searching for missing or trapped people, or what ever needs to be done.

While they are conducting these lifesaving operations, they are also making notes of the major incidents (large fires, building collapses, natural gas leaks) and sending this information, along with team operational information and needs, to their neighborhood staging area.

A second level of operations happens at the staging area. There, other NERTs are arriving from less damaged areas of the neighborhood and are forming a Neighborhood Command unit, using ICS, to assist activities in the neighborhood, and to communicate with the ERD. The teams in the field are communicating with the Neighborhood Command by use of HAM radios, or if none are available, by written message and runner.

At the staging area the Neighborhood Command unit is gathering supplies that may be needed by the teams and by themselves, are organizing convergent volunteers to assist the teams in the neighborhood as needed, and communicating major incidents, as well as neighborhood status, to the ERD. All of this can work without direction or control of the Fire Department and it is designed to work this way. The response to a major disaster event will be spontaneous and it is really the first critical hour that community teams can be most effective.

At the ERD the Battalion Command dispatches professional emergency response workers to the site of major incidents as well as communicating this information to the Emergency Operations Center at the Office of Emergency Services. The EOC has been designed to support all field operations. The are capable of moving resources and staffing from less affected areas to the impacted areas of the City, as well as request additional resources and staffing from the State and Federal Government. This process of community response is at the core of new the Emergency Operations Plan for the City of San Francisco. They will be first on the scene to assist injured people, they will assist the professional rescuers when needed, and they will communicate major damage to the ERD so they will be a major source of intelligence for the City.

Experience has taught us that first responders to sudden on set disasters such as earthquakes are always the people on the scene immediately before the event occurs. They are by definition the first responders. This system of training and response attempts to give these first responders skills to make them more effective and a support system to assist them.

Frank Lucier is a retired Lieutenant from the San Francisco Fire Department. He was the Program Coordinator for the NERT Program from its inception in 1990 until 1997. He is currently on the Executive Board for NI/USR, president of North American Emergency Management and editor of The Connection. http://www.naem.com (From CCEP NEWS - http://www.ccep.ca)

What's New on the Web:

FEMA Issues Revised Federal Response Plan

Washington June 4, 1999 - The Federal Emergency Management Agency (FEMA) today issued an updated version of the plan for mobilizing and deploying federal resources for people and communities overwhelmed by natural disasters and manmade emergencies.

Called the Federal Response Plan, the document serves as the principal organizational guide for defining the roles and responsibilities of the 26 federal member agencies and the American Red Cross that are engaged to deliver a broad range of emergency aid during a major crisis.

"Our revised plan incorporates 11 changes and other modifications that result from the lessons learned and the experiences of our federal partners since we first employed it during Hurricane Andrew in 1992," FEMA Director James Lee Witt said. "By making the plan more consistent with current policy guidance and new ways of doing business, we have significantly improved our response capabilities for aiding distressed states immediately and expediting their recovery."

Witt said that among the key revisions is the addition of a new evolving Recovery Function Annex, which begins the integration of recovery and mitigation functions into the plan's response structure. The updated plan also includes four new support function annexes covering Community Relations, Donations Management, Logistics Management and Occupational Health and Safety, and two new appendices for Federal Response Plan Changes and Revisions, and Overview of a Disaster Operation.

Additionally, the revised plan reinforces the use of Incident Command System principles, mentions the importance of private sector partnerships, and describes several new response resources, coordinating mechanisms and management tools. There is also an updated version of the Terrorism Incident Annex, originally published in February 1997.

The full text of the revised plan is currently available on FEMA's World Wide Web site (http://www.fema.gov/r-n-r/frp/).

Printed copies can be ordered free of charge as they become
available from FEMA's Publications Office at 1-800-480-2520.

This week's EMCOMM Bulletin:

EMC188 Intro to Trunking 1/3
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC188 Intro to Trunking 1/3 For release 6/15/99

AN INTRODUCTION TO TRUNKING RADIO SYSTEMS By Mike Krueger,
N6MIK, Assistant Radio Officer, Training Officer, County of
Orange RACES

"The concept of a trunking radio system was first developed in
the mid-1980's for the commercial radio business. More and more
business customers required radio communications, while fewer
and fewer frequencies remained to issue. Motorola designed the
first trunking system to help alleviate the congestion in the
LMR spectrum, and allow more users to share the same frequencies
by way of dynamic re-use. Trunking is a method of using
relatively few communication paths for large number potential
users. This article will concentrate on the Motorola systems,
due to their popularity among California public safety agencies.
These radio systems are similar to the telephone trunking
concept that has been in use for years.

There are currently three types of Motorola trunking systems in use by public-safety agencies: Type I, Type II and Type IIi. A Type I system is the oldest and least robust of the Motorola trunking formats and has a limited user capacity. The newer and much more complex Type II, or SmartNet, system abolishes Subfleets and introduces the Talkgroup (TG). This type of system is very popular among public safety because of increased security, emergency signaling, and remote radio monitoring and control. Type II systems are capable of up to 4,000 talkgroups, 65,535 individual radio identifiers, and up to 28 system repeaters.

A typical Type I trunked radio system, which is also called Privacy Plus, consists of five to seven radio repeaters connected by a central controller. A Type I system defines its "channels" by using Fleet and Subfleets. For example, a city fire department may be on one fleet and the public works department may be on another fleet, with up to 16 subfleets per fleet. Subfleets are referred to by letter, A~O, and are the "channels" of a Type I system.

The Central Controller is the computerized brain of the trunked system and performs many functions, the most obvious of which is letting users talk by managing the talkgroups and system repeaters. The controller also allows for administrative functions, such as adding talkgroups, radios, or repeaters, changing the trunking parameters, billing, and other functions. The central controller uses one of the system's repeaters to transmit a constant data stream (3600-baud FSK) on the control channel. This stream is encoded with a 4-digit hexadecimal system identifier and sends instructions to radios on the system. The control channel usually rotates daily among a set group of channels to avoid making one repeater do all the work."

1464. Career hams are losing their sex drive

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-14 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <7k1uhq$eq8$1@nnrp1.deja.com>

June 13 1999

Career hams lose sex drive

by John Hardon
Social Affairs Editor

THE radioroom has triumphed over the bedroom. Career hams are losing their sex drive due to stress on air, new research has shown.

The research, carried out in Britain and the United States, shows that career hams still find it much harder to attract women.

Porsche DiRossi, whose study is to be published later this month, based her findings on 2,000 interviews with women carried out by the American Medical Association, and on further research of her own, which typically included displaying her ample bosom at hamfests and club meetings.

She found that 96% of hams aged between 59 and 101 (there are no hams under 45) reported all sorts of sexual dysfunctions, such as lacking enjoyment of sex. A quarter of those working DX complained about long "droughts" when they did not have sexual feelings for humans, only FT-1000MPs - and said DX, rather than a lack of love, was to blame.

British men are among the victims. Relate sees many couples where men have gone off the air due to pressure of women. In a recent British survey by Relate, 40% of women reported loss of sex drive, a situation the organisation expects to become more common over the next decade as a codeless license class emerges.

One 35-year-old Birmingham accountant, who lost his sex drive while overseeing a DXCC bid, said: "My XYL's approaches irritated me, whereas before I had found them exciting."

Such problems can strike even the most privileged women. Geri Halliwell, the former Spice Girl, has admitted she rarely has sexual relationships with hams. "She is not that interested, especially after every ham who ever kissed her immediately told the local traffic net," said a colleague.

I was first licensed in 1964 at age 13 and back then ham
radio was indeed a service and I learned a lot about
electronics. I also met people my own age on ham radio.

I let my license expire and about a month ago passed
the exams to get back on the air. However, I am totally
disappointed in the service now. It seems to be occupied
by a bunch of silly old men who want to belly ache about
the state of affairs of the world. THere is now service
about it.

Why would any young person get involved in ham radio now?
The internet hold much more opportunity and challenge.

What kind of teenage would want to talk to a bunch of 60 to 70
year old men who have been given the world and do nothing
but complain? For that matter, I, as a 47 yo man wonder
why I would want to be involved. From what I hear on HF,
the service has gone totally downhill. Hollingsworth
is right, it's like the Jerry Springer show.

Getting my license again required some work and I enjoyed
studying for it. But I doubt if I will be staying. Times
change and ham radio has not changed in a postive manner.

My take on a reasonable person's definition is "well enough to
communicate effectively".

I feel I have plenty to say. I developed my skills to communicate
verbally, written by hand or machine, and through Morse code. OTOH, if
you have nothing to say, it matters very little how slowly you say it.

Michael.

I designed, developed and implemented a Y2K compliance and correction mechanism for the
Government of South Africa which runs and works on Sun SPARC, RS-6000, HP9000, DEC Alpha, IBM AS-400,
Apple Mac, Power PC and of course, PC's.
The rollout consisted of 75,000 workstations and 5000 servers split between 3 teams of 3 people, completed in less than
3 weeks and this was just for the month of January.

Disappear from the test, maybe; but that remains to be seen. This is
strictly an administrative issue. It won't diminish in utility, as it is
still the only human readable mode with its combination of throughput,
bandwidth, and power requirements. Its popularity might wane, but only
through the lack of user skills to exploit its characteristics.

You might liken this to the airborn guns vs missile debate years ago.
BVR missile engagements require only the skill to operate machinery to
identify the target, lock the guidance system, and release the weapon.
Dogfighting and gunnery skills were seen as obsolete by the nearsighted.
One offshoot from experience gained in combat over Vietnam was the need
for continued and extensive training in precisely those ACM, BFM, and
gunnery skills.

You're the first machinist I've heard to voice the opinion that their years of making chips contributed nothing to their knowledge of parts production. Certainly you know more about tool selection and path programming than the bookworms cutting the tapes?

> These kind of arguments have gone forever. Look at the industrial
> revolution when machines started to replace hand work. There was
extreme
> resistance to change.

That's very lame. You're comparing illuminated scrolls to Xerox machines.

> When cars started to replace the horse as
> transportation, there were many laws passed making it extremely
difficult
> to operate a motor vehicle legally.

My daily commute would be less stressful and far less dangerous if we hadn't "dummified" those laws. The truth of the matter is, this country lacks realistic standards for training and testing. With that said, if you really understood the issues, you would know it wasn't so much a question of personal freedom, as it is one of economic growth.

> In more recent times, the big debate
> about allowing the use of electronic calculators in school.

Teaching of basic arithmetic -- addition, subtraction, multiply, and divide -- hasn't diminished in the least bit. It would be tragic to not take advantage of modern tools to help visualize and understand application of mathematics. This is taught in addition to, not as a replacement of the basics.

> I could go on and on with examples but the point is that old notions
die

You have yet to bring forth one meaningful example.

One counter example I can think of, in relation to old vs new, is the Internet compared to radio. When the message positively must get through, I send it via email. On one PSK31 QSO under very difficult condx, I had to ask for confirmation of QSL information via email. Interestingly, I've never had to do this in CW.

Michael.

The case for retention of code beyond anything
needed to satisfy S25.5 is what must be proven.
The FCC pretty much asked that in the NPRM.

>Why not just admit that YOU desire
>it to end because you personally cannot fathom the usefulness of morse
>testing?

Code is useful as a recreational mode. Nothing else
in any comments filed with the FCC gave any
credible reason to retain code testing beyond that
of S25.5 requirement.

> In addition, you have not been appointed the arbiter of what
>is *rational*.

Nor have you. Indeed, it is the FCC that has that power.

>But then a driving license is almost universal and isn't difficult at
>all. It is also not an amateur radio license. I am happy, however, to
>note that you didn't have any difficulty in obtaining a driving license.

I sure didn't. It came pretty naturally to me.
I probably spent less time learning to get my drivers
license than I did studying code.

> computers
> and networking.

Still another comment, man:

I was born in East Germany. We hadn't computers to buy for the folks.
Only for the industry, everything was directed and controlled by the
government and the said, that the folks don't need computers at home.

But the components were partially available, CPUs (Z80 clones), RAM
(Intel 2102 clones) and other stuff.

So we have built our computers self, we programmed them (Assembler),
by the way we started with 1 or 2 kBytes RAM, so we hadn't a assembler
running, we translated everything with pencil and paper from the
mnemonics into the machine code. And we etched our boards also self and
built the micros from scratch.

Still questions, spunky? Do _you_ want to tell me anything about
computers, man?

cu, Ralf

Hello Anonymous,
I myself have been a Ham since 1976. I also have seen the service taking a few hits lately. I truly have to disagree with you the service as a whole is still the same great service it always been. I will say this just like any community it has its bad neighborhoods as well as its good. Just like the Internet it has its bad neighborhoods as well as its good. So I wouldn't be so quick to get up on your high horse if I were you. If you are using this Newsgroup as a argument for your reasoning then its saying all Jewish folks are bad because of a few idiots or all blacks are bad because of few idiots there. I will say this,"The bad neighborhoods have seem to expanded since the election of Bill Clinton". The reason for this is the FCC has slacked off on the enforcement of the Amateur rules and regulations. They say that is due to the lack of funds. Just another example of how this Government lies to us.
I hope you can find a facet of the service that gets your attention so you can get your mind off of the negative stuff about the service. Old guys do seem to wine about the state of affairs. They just don't do it on ham radio but everywhere old men meet.

John and I had a heart to heart talk and it took a real man to admit the things he did and to render apologies. The only one I will mention is that he knew he was used by the StumpJumpers and no names will be given. Allow me to direct this at the guys who resent John's preaching on the bands. Unlike many of the Protestant evangelists who try to impose their brand of religion on the multitude, John does NOT. I have never heard him utter a derogation against any faith, race or nationality. What is imperative to understand about him is that he is POSITIVE his form of religion is absolutely corect and what he and Astley Reed,6Y5GR and John,WA8PBM do is to reinforce it AMONG THEMSELVES! KC3AU has as much right to praise Jesus on any frequency as another person has to denounce Jesus. As long as John doesn't BROADCAST and IDs properly,he is abiding by the guidelines set forth in Part 97 and if that still isn't enough for you, go stick it. Yes, if he were a pawn of Herbie and the KV4FZ anti-Semitic clones, I'd have a lot of negative things to say about the man. But he is his own man. He's disavowed any former allegiance to evil Polly and Herbie suckups, therefore I ask that everyone leave him alone. If you find his conversations boring or annoying, then QSY. John is a good person but has,in the past, presented an incorrect and distorted interpretation of what he's about. But being extremely intelligent, I know the truth and recognize the fact that he is not out to make enemies and not necessarily converts either. He is there to REINFORCE his own beliefs and by doing so,telling those who might be skeptical about their religions that there's another choice. Naturally as a Jew, I don't accept the divinity of Jesus and never will, but I do applaud free speech especially when it's not done to harm anyone in contrast to the maniacs on 3.950 and KC3AU is more than entitled to use that RIGHT. I therefore again ask that you stop harassing and jamming John as well as complaining about him to Riley Hollingsworth. God bless you even if no one sneezed. 73,Doc,AF2Y

>Why would any young person get involved in ham radio now?
>The internet hold much more opportunity and challenge.

You are correct. The amateur service has changed somewhat, however I think the advent and proliferation of digital radios which is soon to come, will bring a new generation into the hobby.

You, like me, are the product of parents from the WWII generation. We were fascinated with the technology our fathers used in the second world war, hence we wanted to be like them. The kids today have a different spin on hobbies, and rightly so. We shouldnt force feed a hobby onto them just because we thinks its great.

Ive never been bungy jumping, have you?.....And I dont intend to.

>What kind of teenage would want to talk to a bunch of 60 to 70
>year old men who have been given the world and do nothing
>but complain?

Kids will always find a place to hang out amongst themselves. What we have to do is provide the space for them to do so. When I was groing up Id leave the room when the conversation turned to "Great depression" stories.

>But I doubt if I will be staying. Times
>change and ham radio has not changed in a postive manner

It is what you make it to be. Encourage young people to get involved and watch them spread the word. Most kids are waiting for someone to lead them into a new endeavor.....they cant have a hobby tha they dont know exists.

And, as Jeff would know, and others aboard too, in the usual
practice in, for example, the marine CW circles that folks are
want to discuss, a working knowledge is at least 20wpm. That
is based upon almost 100 years of commercial practice.

If hams are to be considered availing themselves of a working
knowledge, that too should be 20wpm, IMHO. It does not have
a ``working knowledge'' component that is really workable at
1ypm, 5wpm, or even 13wpm. Hams really do have it so easy.

I've been meaning to post this for some time,but other matters have preempted it. I want to PUBLICLY express my gratitude for the thousands of E-mails,letters and comments on QSLs thanking me for my outspoken stand against intolerance both on ham radio and here. I say what I say because I know I'm right and that I speak for the overwhelming number of hams and SWLs who approve but are too shy to make verbal contributions. I'd find it impossible to address all of the congratulatory remarks but here are my replies to a few from overseas. To Hans Kackenmeister from Stuttgart: no I do not hate Germans. I am German from both parents but a good one. And I do thank you for remarking about my of the Nazi Net on 75m. Unlike your nation which locks a bird up who sports a Nazi emblem or spouts off about Holocaust revisionism, this nation is way too lenient with such beasts. To Chaim Rothwax of Tel Aviv, Israel-I think Netanyahu was all talk and no do and hopefully Barak will change things. And I thank you for the 20/9 reports you gave. I run 800 watts output to a two element fixed wire beam at fifty feet--the finest wire antenna in North America. And lastly to Francisco Tema from Tenerife, Canary Islands: yes, I did write "Hola CQ" to teach Yankees how to speak ham radio Spanish in order to build bridges of friendship primarily in the Americas. I strongly believe in brotherhood. AF2Y,Doc

That's is title ... where's the beef???
He still only has one vote out of 11 and definitely does
not "run the show" as some would imply. In fact, while
he's a contributor to all of the board's discussions and
decisions, he's not "pushy" at all. I personally think
he's a nice guy who really cares about ham radio.

>callsign holders. Let's see who has the most callsigns.

Hi Ken,

Since the database is public information, you can download the
club call database from the FCC website at:

ftp://ftp.fcc.gov/pub/XFS_AlphaTest/amateur/

The name of the Club/Races/Military database file is CRM.ZIP.

The FCC has taken action against multiple club callsign holders,
and has revoked a number of calls held by one individual, W9BO.

A few other people are voluntarily turning in club calls, probably
with the hopes of keeping their ham tickets.

The FCC is also threatening to revoke licenses (primary) of people
scamming multiple club calls, and have sent notices to a number
of people. Information is in the FCC press releases on the ARRL
web page.

So if you are going to pass out awards, you better hurry as it looks
like the Vanity Club Call Scam Program has officially ended =8-O

Anyway, the last time I downloaded it, the winner was W6DOE, with 32
club calls:

AI4CA CPRA AMATEUR RADIO CLUB W6DOE
AI4HQ APCO INTERNATIONAL AMATEUR RAD W6DOE
AI4PS APCO INTERNATIONAL AMATEUR RAD W6DOE
AI6CA CPRA AMATEUR RADIO CLUB W6DOE
K1JON SIERRA AMATEUR RADIO CLUB W6DOE
K3JON SIERRA AMATEUR RADIO CLUB W6DOE

PRESS RELEASE - PRESS RELEASE - PRESS RELEASE
====== Dateline: June 16, 1999 - Agana, Guam
====== Credits: Staff Reporter Jim Kehler, KH2D
PRESS RELEASE - PRESS RELEASE - PRESS RELEASE

News Wire Flash - The Beat Goes OFF !!!!

A new amateur satellite will be launched in late June as the results of a joint venture between No-Code Interntational(tm), and Swatch, one of the other world leaders in poor public relations. Swatch was in the news recently when they botched an attempt to launch commercial advertising on a Russian amateur satellite. We don't need to tell you about what NCI has botched lately.....

The satellite, named Dumb-Me-Down-Nik will feature a digital voice beacon that will repeat "CHEE WA WA - MORSE CODE SUCKS - WANNA BUY A SWATCH?" every 30 seconds as it orbits the globe. The beacon text is based on three things - NCI director Carl Stevenson's favorable trip to the HF spectrum in Mexico, NCI's policy, and the fact that Swatch's numbers haven't been looking so good lately. The beacon will be broadcast in the amateur VHF band, as most NCI members only own VHF radio equipment.

The satellite will also introduce NCI's new concept of keeping time, called 'BEAT-OFF Time' and will measure how many 'BEATS' there are left until Morse code testing is officially 'OFF' the books. An official figure on how many 'BEATS' remain has not been released yet, as nobody at NCI seems to be able to count that high. It is rumored that Fred and Bruce are looking for the calculator, and we are awaiting further information on when the big Beat-OFF will occur. NCI promises to email all members with exact information so that they all are sure to 'lend a hand in the final countdown'.

Director Carl Stevenson, NCI's main visionary, was quoted as saying "Here at NCI, we are hoping the FCC will release information at the VE meeting in early July. It sure would be neat if it was the 4th of July, as I imagine most NCI members would love the Beat-OFF to be in conjunction with all those fireworks. After having had both hands in this for so long, I will be extremely happy and very relieved when the Beat-OFF is over."

NCI is now seeking additional partners in the venture to help finance the four AAA batteries needed to power the digital voice talker. Swatch refuses to buy batteries, saying the last time they bought some they were forced to give them away.

QSL cards, in electronic form only (email) will be available to all NCI members to confirm reception of the digital voice talker beacon. An anonymous NCI director said that the cost of postage stamps to mail real QSL cards was unfortunately beyond the scope of the current NCI budget. It has recently been rumored that Fred is again begging for money, so real QSL cards are remotely possible, but NCI says "Don't hold your breath".

NCI's Vice President of Demotivation, Billy "Beany Baby" Sohl, when questioned about the details of the launch, said he was busy looking for the fuses for his model rockets and said that the only public statement he chose to make at this time was in the form of a question: "What's a Morse Code Woodie ???"

CHEE WA WA - MORSE CODE SUCKS - WANNA BUY A SWATCH ?

NCI - BEATing OFF Amateur Radio into the 21st Century !!!!!!!!!

'NCI' is a unregistered trademark of No-Code International.
'NCI' is also a registered trademark of the National Cancer Institute.
'Swatch' is the name of a company that sells silly looking watches.

There is nothing in ham radio to attract intellegent, curious, who would be good operator types, anymore. With the ease of getting a license (one dosen't have to know anything), it only attracts the cb mentality types and that is why it is almost on the same level with cb now. How are you going to convince some young person that getting a license and spending $$$$ on equipment will give him the thrill of the ability to talk to someone half-way around the world is exciting, when he can pull his cell phone out of his shirt pocket and call just about anywhere in the world?

What planet have you been living on Dan. The "PLASTIC JESUS" AKA
"DRIVING GOD" was sold in the fiftys and sixtys by a Catholic Order.
This little item was placed on the dashboard of the car. In fact, in the
movie "Cool Hand Luke' Cool Hand sings the song "Plastic Jesus" So dont
talk about a subject unless you check it out,,,

I'll agree with that. Now, somebody should tell the Army that they should
teach people to shoot small arms. This lack of skill has lead to
abominations such as the M-16.

Where did you get that? I never said that my experience isn't useful. On the contrary, it gives me a great advantage but I don't whine about the "good old days" like most of the old timers I know nor do I expect every new machinist to spend years on conventional machines so he can learn "real machine work". It would be a benefit but it is not practical (and, I have to admit, the majority of young people getting into the trade do not have that kind of motivation) . As for the "bookworm cutting the tapes", most company's are figuring out that it is far more efficient to take a good machinist and make him a programmer than to take some computer geek and try to teach him to be a machinist, and they are giving the man on the machine a lot more capability to make it work such as complete programming and editing facilities right at the machine. BTW, I haven't seen a paper tape in about ten years, rather obsolete you know :)

Not at all. I'm talking about traction engines instead of horses, sewing machines instead of needle and thread, internal combustion engines instead of steam. All of these and many more were strongly resisted.

You are thinking of liscense testing. Fact is, testing today is about as difficult as it ever has been. When my father got his first drivers liscense, he bought it at the local hardware store, just like a hunting liscense.No test required. What I was talking about was the laws past specifically to discourage people from driving in the early days of motor cars, such as when coming to an intersection, one was required to stop the car, get out. walk to the middle of the intersection, look both ways. If it I was clear, you then had to fire a shotgun into the air as a warning, then you could cross. These laws sound ridiculous but they were real. Ther are many more, look it up. Would this help your daily commute?
>

When I was in high school, when electrinic calculators started becoming commonly available, the argument was that allowing the use of such things would "dumb people down", they wouldn't have to know how to do math anymore.

On the contrary, yes I have.
I learned the morse code in 1971, it was somethig to do (I lived in Etiopia at the time. Not a lot to do there). I have since totally forgotten it and doubt I will spend the time to re-learn it. If cw is something you want to do,fine but I don't believe it should be required. There are to many other modes.

As you know by now,in this constant battle between Protestants and Catholics, I'm very pro-Catholic and of course have the highest respect for the Pope,JohnPaul II whose real name was Karol Vojytejczyxzyakyjcz or something like that. My Polish is a bit rusty. Anyway I love the guy for a few reasons. He forgave the Jews for killing Christ which was damn nice of him. He is multilingual and since I am a genius in foreign language. we have something in common. He likes to travel and so do I but I readily admit that I would draw no audience if I announced that I would bless a million or more at a gigantic mass. And so the Holy Father has me beat on that issue. But seriously, the man is a blessing for each person in this world who loves his fellow man and tries his best to show it, like I. And above all, Pope John Paul II was more responsible for bringing down the Soviet Empire than any individual in history. In a future post I shall explain why. The reason I'm writing this to my fellow hams is that I just saw a picture of the Pope wearing a bandage on his head and I'm angry because of the way this precious person must have sustained the boo boo. The way K2IVX has been lately,hostile, erratic and menacing, I feel that a strong possibility for the Pope's injury was due to Lenny's lashing out at him with a stale bagel. Or, and most probably correct, there was an assault by one of these Brother Stair right-wing Christian Coalition Born Again, Died Again, Rose Again, PlotzedAgain, Jerry Falwelled Again fruitcups who believe that the Holy Father is either the devil or consorts with him or considers him the anti-Christ and therefore hit him with a hammer. Such action is deplorable and on this board, I suggest that these Religious Wrongs come forward and explain in detail the real reasons why they attacked such a noble individual. Doc, AF2Y

Ours does, too. Even the News at 11 folks tend to hang around the
old salts on the bugs, and take a good close up of the QRQ.
Unless a pretty YL is on the microphone, they usually have just a
short shot of a second or two of the jargon into the mic.
It is especially fun to watch the young kids of 8-12, that come
up and get a real kick out of the CW. It still does have appeal,
and is something the populace identifies with ham radio.

It is mostly a problem of parts and parts spares. IC's and transistors
are obsolete by the time we get them, and often hard to replace.
Discrete components are becoming a thing of the past. It is often
impossible to get parts for a project more than a couple of years
old, due to parts availability (or lack thereof). The knowledge
base required to build something usable is rapidly exceeding the
capability of most hams. It is a problem everywhere, due to the
``progress'' of technology, be it good or bad or just ugly.
Because of those kinds of issues, maybe 5-10% of us are actual
builders, anymore. Maybe 25% of us are parts recyclers that do
very minor building and a lot of rehashing gear or parts thereof.
The rest of us (2/3's) are PL-259 installers and appliance operators,
at best..... Changing times.....it did not used to be that way.....

20M/80M CW is nice and clean. A fine bunch o' gents there.
CW/Morse does filter well, even on those bands.

1526. I just Joined No-Code International!

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-15 00:00:00 UTC
From: n0vfp@aol.com
Message-ID: <19990615161021.01736.00000150@ng-ca1.aol.com>
Source record: 139503

I just joined the terriffic group of Hams who want to advance the Hobby!

Read the nice letter they sent me! Cool!

Dear new NCI member:

Thanks for registering as a No Code International (NCI) member. You are now on
record as supporting our cause. In the next few days, you will be receiving a

membership certificate (suitable for framing) and a unique NCI serial number.

Please use this number in your e-mail and other correspondence to notify others
of your NCI affiliation.

We strongly believe Morse code proficiency should not be a compulsory licensing
requirement in the Amateur Service for any class of license. It appears to us

that this requirement serves only to keep the number of licensed ham operators

low and acts as a barrier for many otherwise qualified individuals.

Amateur Radio is a hobby of different modes of communications and participation
on some bands is precluded by the Morse proficiency qualification. We do not
believe this is in keeping with the objective of the Amateur Service whose
cornerstone has always been "...advancing the radio art."

Over the years, the CW requirements in the International Radio Regulations for

Amateur Radio access has been reduced at every International Radio Conference
capable of de-emphasizing them. The next such meeting will take place in a
couple of years.

NCI intends to have a very strong voice in the total abolition of the Morse Code
requirement. And you will be part of it. To be effective, we need to identify
others who believe as we do. By having a large body of supporters, we will be

able to influence those who are in a position to affect regulatory change.
We welcome your support. There is indeed strength in numbers.

Through its periodic bulletins, NCI will keep you abreast of all breaking news

that impacts the Morse proficiency requirement in the Amateur Service. We will

keep these to a minimum so as not to overload your e-mail box.

73 ...and welcome to NCI.

Fred Maia, W5YI
Executive Director

Well, if a PC is required, then it does make sense that each undergrad
have one... You have a self-selecting group. Here at the public level,
not everyone has the financial capability to own a computer. Many of
my students hold down two jobs in addition to taking a full load of
courses. Owning a PC is of low priority.

That's it? You have nothing to say about the rest of my comments? Read
them again, and then respond:

We have parades -- lots of them. Hawaii has the distinction of having
the greatest number of state holidays in the nation. Kalakaua Avenue
and associated streets are blocked at least once per month for parades.
Some folks (like you, Cecil) gripe and complain, but notice is given well
in advance, asking drivers to use alternate routes. Same thing with
amateur contests -- notice is provided via the periodicals well in advance
that such and such contest will be given on such and such dates. Plan
ahead, Cecil. And recognize that:

1. Contests fill the bands with happy operators.
2. Spectrum-hungry observers outside the amateur service will have no
doubt that the ham bands are being fully utilized. (And you *do* realize
how important that is, right Cecil? WARC bands are available for you and
others who can't comprehend the importance of this.)
3. Contests give operators a chance to voluntarily subject themselves to
long hours of operating (in a fun manner), testing both their stamina
their station's efficiency, two very important qualities for those wishing
to abide by S91.1(a) and (d):

97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur

radio service having a fundamental purpose as expressed in the following principles:
(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.
(d) Expansion of the existing reservoir within the amateur radio service of trained operators, ...

Would you rather have the bands fill with contests or filled with comms like those which occur on 14.313 Mc? The week contains 168 hours; a weekend contest uses at most 48 of 'em -- 29%. But of course, not every weekend contains a contest, so the percentage of time in which contests utilize the bands in a year's duration is lower. (Jim: Shuddup! I don't count Burma's Worked All Re-education Camps as a valid contest.)

```
-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

US Technician Plus operators now have vastly greater
priveleges as visitors in many foreign countries than
they do at home in the US!!!

The FCC has finalized reciprocal licensing participation
in CEPT and the ARRL has begun issuing IARPs (International
Amateur Radio Permits ... both CEPT reciprocal operation
and IARPs grant holders of US Technician Plus and higher
licenses gain FULL amateur privileges, INCLUDING HF while
visiting in CEPT and CITEL signatory countries!!!

Holders of US Technician licenses gain only VHF
privileges in CEPT/IARP countries and Novices gain no
privilegesat all, since there is no comparable CEPT/IARP
license class.

It's a shame when US citizens have greater freedoms and
priveleges in other countries than they do in their own
country. This is just another sign that US rules are
desparately in need of updating/modernization.

Getting the licence is easy, at least the Novice class is. :-)
you need to pass 5 wpm morse code test, you can study for this with
several different computer programs, I used SuperMorse, and also pass
the written (multiple choice) Novice exam (element 2, the question pool
is available on the web and at most amature radio stores.
The ARRL has a website and lists places where you can take an exam.
Building your rig: buy a kit it's easier than tracking down all the
parts and pieces yourself and will save time in aggravation in the long
run. I built a Norcal 40A (info again available on the web), it was
relatively easy and I was on the air in just a few days.
hope that helps,
73

Solarpower1watt QRP'ed:

>
> I agree! "communist Jews" makes about as much sense as "Christian
>Satanists."
>

Time for a history lesson. The majority of
Bolshevik leaders during the communist
revolution in Russia were Jews. The
aforementioned revolution was largely financed by New York City Jews. Most
of our pro-Soviet "atomic" spies were Jews. Stalin's bloodthirsty henchman
Beria was a Jew. Bela Kun, the infamous
communist bitch that ruled Hungary was a Jew. A great majority of pro-communist
activists in the 50's and 60's were Jews.
I could go on and on. There is an overwhelming and damning amount of historical
evidence documenting Jewish
affinity towards communism. Of course,
not all Jews can be placed in this category, but their overall involvment as a
people is somewhat startling.

> Jews, even more than most Americans, see the need for gun
>ownership

I would hope this is true, but how come so
many of the movers and shakers behind
gun control and outright confiscation are
Jews? Charles "shit-eating-grin" Schumer
comes to mind, as well as Diane Fienstein, Barbara Boxer, Ron Kuby (sp?),
etc.

Hey ... just asking!

>code is no longer respected as a valid technical skill,....only an
>outdated useless one.

Now how would those kids be able to come to such a conclusion?

>It is no longer a hard sell to these kids, it is a NO SELL.

Young people have minds that are easy to mold. I suppose if their
instructor was enthusiastic about code comms, and showed them how
easy it is to build radio equipment, you'd turn out a bunch of home-
brew CW operators.

Our CW booth ALWAYS receives the greatest crowd during our Field
Day demonstration. Folks stand there in awe of the code ops, kids
included.

>Ham radio faces a number of challenges to its survival in the next
>decade. The internet, CC&R's, computers in general...etc. What we
>DON'T need is to continue an obsolete hazing ritual as a onerous burden
>on top of these handicaps as we try to make it relevant to our modern
>world of electronic telecommunications.

Whoops! There goes any chance of them becoming home-builders.

>There are no longer any valid reasons for mandatory learning of the code.

You should begin such a statement with "In my opinion...", otherwise
those young minds will mime your words, without giving them any
second thought. Better yet, why not keep your opinions to yourself
while teaching your radio classes? Let the kids decide for themselves
in an unbiased atmosphere.

>Not interference
>mitigation, not a pool of trained radio operators, not to
>intercommunicate with other services in an emergency, nothing, PERIOD.

How about being the only radio service that's capable of building
equipment for and operating such a mode? I find that a proud distinction.

>There are many other modernizations that will need to be done to keep
>the hobby/service relevant into the next decade.

It will always be relevant if for no other reason than it's the only method of communication in which no government or commercial providers are necessary. And if need be, we have the capablility of building our own gear.

Ha, Ha, Ha, Ha!!! Do you sell fire insurance, too?

***AF2Y replies: you can be sure I never would mock God, the Creator, Adonai, Hashem, Yahweh, Jehovah. I take the God of the Jews very seriously. He did afterall create the universe and eveything in it so you had better get with the program and stop putting other Gods before Him, the Almighty. Did not the Creator give Moses the Ten Commandments? Isn't one of them something about,"I AM A JEALOUS GOD.WORSHIP NOTHING EXCEPT ME."
I'm paraphrasing since I don't have my Old Testament handy but I've read the Pentateuch(Five Books of Moses)over and over again and that Torah ain't nothing to trifle with. Lots of despots have tried to destroy it but without success and in attempting it, have brought down the wrath of Jehovah to destroy them. Take Mike Galego for example.*********

Hi all,

I have a 1993 Silverado and I would like to install either a 2m or dual band radio in it. Have any of you done an install in a truck like this? I would like to hear how you did it and what equipment you used. Any other advice would be great. Thanks.

Does the Silverado have a compartment between the front seats?
I ended up mounting (permanently) my 2M rig in a Toyota inside that
compartment (vertically) with the factory bracket. Just remove the lid from
the compartment to insure ventilation - and to make it easy to use the radio's
controls.

Here's my last on that point. It seems to me
that the terms fascism, Nazi, etc. are very much
viewed as being the same. The two most
emotionally charged fascist states were Nazi Germany
and Italy during WW-II. There's also a number of
people that do recall and understand that Franco's
Spain was a fascist state under his regime. Other
than that, there aren't other regimes that the
common person thinks of at all when they hear
the word fascist.

End of brief history lesson.

Thanks for the correction.

I asked my boy over dinner about not wanting to learn Morse. He was very precise about his reasons, and echoed your sentiment elsewhere that it's so slow. He said he wanted to at first, but not anymore after listening in on the Novice bands. They're so slow!

I believe I made that remark once in his presence. I said something about being able to order pizza between letters in one QSO. (And proceeded to do so.) This was in an early fit of enthusiasm after getting my own speed up.

I think you're right that speed is the key, along with the perceived difficulty of progressing. In my own experience, twenty is easy to achieve, and as fast as many can type. He's already learned his phonetic alphabet, but not internalized it yet. My hope is he'll see a gentle progression from phonetics to Morse.

Michael.

>Does Fred have you all stand up and say 'hazing ritual' 5,000 times
>at every board meeting while you march around the room ?

Idiotic drivel! It seems clear to me that you really
dislike (hate?) Fred W5YI. Your attempt to
suggest that any NCI director must follow the
dictates of Fred or anyone else is just more
fantasy land bull.

>The Morse code may very well be useless to you, but I've used it
>to communicate with 30,000+ hams all over the world, so it's not
>useless to me, and it's not useless to thousands of other hams all
>over the world.

Wonderful. But there isn't a single element in that
statement that serves to support any need for any
type of CW testing at all.

>It's only useless to hams to who won't bother to learn it.

I learned it and it is of no interest and no use to
me. That is for me and everyone a personal assessment.
As above, the usefulness of code to any one individual
does not sustain any need for code testing.

>Isn't there any way that you guys at NCI can "Support the
>modernization of ham radio and help to assure its survival into
>the 21st century!" without running around waving your Morse
>Code Woodie in everybodys face ?

What's a Morse Code Woodie?
As to being in anybody's face, that is more bull.
Use code all you want, teach code to anyone you
want, recruit new users of code all you want. NCI
has no problem with USE. It is the code test and
only the code test.

>NCI isn't about modernizing anything. It's about a dozen meatheads
>with a hard on for Morse code. Anybody who can't see that has

>page of the Wall Street Journal, in Washington, D.C., and who knows
>where else. Bruce is hoping all the 'trash' will stay on the internet, but I
>don't think that's going to be the case.

Whate hate campaign? The only issue is the code test.
People like you want the issue to be expanded to
imply an outright opposition to code USE. No such
effort exists except, perhaps, on the part of a handful
of individuals...NONE of which are NCI directors.
Read the NCI web pages and you see that we fully support
USE of code. NCI opposes the code test requirement.

>After you get all these 8 year old boyscouts licensed, you can take
>them to a ham club meeting and explain "See those old guys over
>there in the corner ? They are the procode, facist, lying assholes.
>And those other guys in the other corner, they are the moron
>two meter Nazi lying nocode geeks. Now you kids decide which
>group you wanna play with......."

Great commentary Jim. It really helps your position...NOT!

>In my opinon, which may be wrong,

You are (IMO).

>but I'm entitled to it just like
>anybody else is,

Indeed you are!

> the troops are forever divided.

I respectfully disagree.

>And petitioning the
>FCC until Carl and Bill turn blue isn't going to fix that.

Who said it ever would. The changes which Carl and I
petitioned the FCC for (on behalf of NCI, not as individuals)
would simply end the debate. Time alone will be the
arbiter of what happens then.

>As long as
>there is ham radio, there will always be hams who use Morse
>code, tests or no tests.

As well there should be. NO argument there. USE
code all you want.

>And now that the precedent has been set,
>there will always be 'No Coders' and 'Pro Coders'.

The issue is only framed in such polar positions
as it relates to the debate, discussion and comments
having to do with code testing. Once that ends, the
debate ends. Yes, there will always be CODE users
as opposed to those that don't use code...but so what,
we have had that for years.

>Welcome to
>the beginning of the end, sponsored by Usenet, The Lenny And
>Squiggy Show, and Mt. Olive Township, New Jersey, and documented
>by Deja News, to make sure nobody ever forgets what happened.....

I'm sure my fellow elected officials will be surprised
to hear that Mt. Olive Township has had anything
to do with this ongoing discussion and/or the end
of ham radio. As it is, we (MOT) try to be ham friendly.

I have worked with area hams to help make that happen.

Cheers,
Bill K2UNK

1578. 5 wpm good for full ham privileges in CEPT and IARP countries

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-15 00:00:00 UTC
From: billsohl@planet.net
Message-ID: <37665edf.2853521@news.interactive.net>
Source record: 139615
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

*** From ARRL Bulletin 38 (ARLB038) June 8: The FCC has implemented the European Conference of Postal and Telecommunications Administrations (CEPT) Recommendation T/R 61-01 that eliminates the need to obtain a special license or permit for US hams wishing to operate during brief visits to most European countries. In addition, the ARRL has begun issuing International Amateur Radio Permits to simplify operation by US hams in certain South American (IARP) countries.

The FCC put the final pieces of the CEPT arrangement into place June 7 by issuing a Public Notice in English, German, and French that spells out the basic information about Amateur Radio operation in CEPT countries. To operate in a CEPT country, US hams only need a copy of the Notice, their original Amateur Radio document, and proof of US citizenship (a US-issued passport or a birth certificate should suffice).

US hams holding any license class but Novice are eligible to operate in CEPT countries. A US citizen with a Technician ticket may be authorized privileges equivalent to a CEPT Class 2 (ie, VHF-only) license, while a US citizen holding a higher class license may be authorized CEPT Class 1 (ie, all amateur and amateur-satellite) privileges.

The authorization is for use of a portable or mobile station only, including stations set up at hotels or a camping site. Authorization is also granted for US hams to operate the stations of permanent licensees in host countries. The use of Amateur Radio aboard an aircraft is not allowed, however.

To identify while overseas, US stations will use their assigned call signs preceded by the CEPT call sign prefix for the country or territory visited. US licensees operating under this agreement overseas cannot request protection against harmful interference.

Operators must abide by the provisions of the ITU Radio Regulations as well as CEPT Recommendation T/R 61-01 and the regulations in force in the host country. US operators planning to operate in other countries must become familiar with that country's regulations and frequency allocations, paying special attention to regional differences.

Participating CEPT countries as of June 7 include Austria, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France (including Corsica, Guadeloupe, Guiana, Martinique, St Bartholomew, St Pierre et Miquelon, St Martin, and Reunion/Dependencies), Germany, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania,

Luxembourg, Monaco, Netherlands, Norway, Portugal, Romania,
Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey,
and the United Kingdom (including Great Britain, Northern
Ireland, the Channel Islands, and the Isle of Man).
The ARRL has begun issuing the International Amateur Radio
Permit (IARP) that allows US amateurs to operate from Argentina,
Brazil, Peru, Uruguay, and Venezuela without having to obtain a
special license (the US and Canada also are CITEL signatories).
The IARP is valid in any country that is a signatory to the CITEL
Amateur Convention.
The Class 1 IARP--available to Tech Plus and higher class
licensees--requires knowledge of Morse code and carries all
operating privileges. The Class 2 IARP--equivalent to the US
Technician ticket--does not require knowledge of Morse code and
carries all privileges above 30 MHz. An IARP is not a license,
but it certifies the existence of a license.
Complete information on CEPT and IARP operation, including
an IARP application form and a copy of the FCC Public Notice on
CEPT, is available from the International Operating page on
ARRLWeb, http://www.arrl.org/field/regulations/io/.
The new procedures affect operation only in participating
CEPT (European) and CITEL (Central and South American) countries.
They do not change the procedures for US hams wishing to operate
overseas in countries that are not CEPT participants or CITEL
Amateur Convention signatories. Information on operation from
these countries also is available on the pages of ARRLWeb.
----------end of ARRL bulletin----------

As I have said, I have all the legal papers including AF2Y's ARREST
WARRENT here.

We must bust Charles (AF2Y's) balls once and for all.......I need a web
page to post all this stuff on, let me know if any of you have space for
some very intresting legal papers.

I will keep on "fighting the good fight" to shut down Charles for once
and all. He is a known troublemaker who MUST be taken off the radio!

Please see my former postings as to how I came about getting Charlie's
legal papers from the Clifton, NJ DA's office.....it's some very
intresting stuff.

In this whole AF2Y case, I have TEETH LIKE A PITBULL......once I lash
onto AF2Y's fat ass there is no way I can let go!!

I will expose you for all to see, Charles.

NEXT TIME YOU HEAR "DOC" ON THE RADIO....ASK HIM HOW HE LOST HIS
DENTIST BUSINESS DUE TO "SEXUAL ADVANCES" HE HAD WITH ONE OF HIS
EMPLOYEES.

There once was a boy named "Doc"
Who had trouble with his jock,
He showed a women at his work
Who said he was a jerk,
Now on his pants he has a lock.

Lets get this BASTARD off the air!!!!!

My 2 cents worth on this discussion --

Here at Rensselaer Polytechnic Institute (RPI) all of our undergraduate students (~5500) have at least one computer (it's required for freshmen to have one when they arrive), and there is an active ham club (W2SZ) with a lot of equipment - (3 complete stations - 2 HF and one UHF/VHF satellite system and two repeaters). It is true that we have an emphasis on science and engineering at this institution, but it's good to know that there are still a lot of very bright and technology-savvy kids that are interested in ham radio (and are generally good programmers as well...).

I see in your arrest records you were in jail for 3 days while you were awaiting your court date, Charles. How was the food in the Clifton Jail? Did you meet anyone named Bubba while you were bending over for the soap?

How did your wife like the fact you were in jail? I bet that good for nothing lawyer son of yours posted your bail.

Doc lost his dentist business due to "sexual advances" on a fellow employee. When are you going to learn, Charlie?

Too bad that you could afford the legal bills during your trial.......BUT YOU CAN'T SPEND $1.27 FOR A CAN OF OIL FOR YOUR RUNNING MACHINE!

I'm going to dig up even more stuff real soon.

billsohl@planet.net (Bill Sohl) wrote:

>Whate hate campaign? The only issue is the code test.

Really, Bill, wake up. Smell the coffee.

>Read the NCI web pages and you see that we fully support
>USE of code. NCI opposes the code test requirement.

I don't have to read the NCI web page to see what you support.
I've been reading this newsgroup for years. NCI supports what
it's board of directors support.

NCI members don't write the paperwork, Carl does. NCI members
don't make presentations to the FCC. Carl does. I don't need to
read web pages to know what Carl thinks. I've read it all here.

>Great commentary Jim. It really helps your position...NOT!

I'm not worried about 'helping' my position Bill. Let me state my
position once more, not that I think you'll get the message, but......

I don't have a problem with your position. I don't have a problem
with NCI's position. I have a problem with the way your position has
been presented. Understand ?

Are you honestly numb enuff to think that after all that's been said
and done, we are gonna be just one big happy family when the
FCC decision comes out ?

Do you think that all the no code techs will rush to join the same
ham club as K3LT is in after all the nice things that he's said about
them ?

Do you think that all the contesters, DX'ers, and every day run of
the mill hams will rush to join the same ham club as Carl after all the
nice things he's said about them ?

When the FCC decision comes out, we are all just gonna sit down,
have a beer, and laugh about all the things that have been said for
the last how many years. Right, sure we are Bill. Nobody ever really
meant all the nasty things that have been said, we were all just
kidding, right Bill ? Do you think this 'discussion' has been contained
here ?

Two years ago we had a discussion, field day weekend, late one night
over a few open bottles of alcoholic beverages. Some words came up

in the discussion, two I remember specifically were 'hazing ritual'. The participants of that discussion have never sat down with each other to talk about anything since. If the division is evident in the very small ham community here, it should be real evident other places. To everyone but you, I guess Bill.

My news server still isn't working right, Bill. What was that you said you usually do when you are on HF, I must have missed it.

>suggest that any NCI director must follow the
>dictates of Fred or anyone else is just more
>fantasy land bull.

Don't get your blood pressure up, Beany Baby, you'll bust a seam.
I've never met Ready-To-Make-A-Buck-Freddy, so I sure don't hate
him. Fred has a well known ham radio business to run, so people
wondered why he was taking time to 'direct' NCI.

But the fact that Mr. Fred was listed on your (NCI's) web page
as the 'Executive Director' of NCI (until somebody asked why) gave
me the impression he was in charge. The fact that your (NCI's)
web page said Fred was 'taking over' NCI cuz Bruce was busy also
made me think he was in charge.

The fact that when somebody asked why, he mysteriously 'lost' his
position as 'Exectutive Director' and the blurb about him 'taking over'
disappeared too, it makes me think you boys went running around
shoving things in the closet.

Tell us it ain't so, Bill..... Tell us you don't have any stock options in
the American Fred No Morse Code Radio League. Tell us he didn't
promise you a job as the Head Beany Baby In Charge Of Demotivation.

>>The Morse code may very well be useless to you, but I've used it
>>to communicate with 30,000+ hams all over the world, so it's not
>>useless to me, and it's not useless to thousands of other hams all
>>over the world.

>Wonderful. But there isn't a single element in that
>statement that serves to support any need for any
>type of CW testing at all.

There isn't a single element in that statement that was INTENDED to
support a need for any code testing, Bill. That statement was simply
written in reply to a statement that said Morse code was 'useless'.
Pay attention....

>I learned it and it is of no interest and no use to
>me. That is for me and everyone a personal assessment.
>As above, the usefulness of code to any one individual
>does not sustain any need for code testing.

Well, if that's true, Bill, then the USELESSNESS of Morse code
to any one individual does not sustain dropping code testing,
I guess, but we aren't talking about code testing, Bill. We are
talking about the fact that Rick T. said Morse code is 'useless'.
Pay attention....

>What's a Morse Code Woodie?

It's a wooden Morse Code Key that was used by early telegraphers
on the B & O Railroad, Bill. Next time you and Carl go to Washington,
stop by the Smithsonian, I think they have one in their collection.

>As to being in anybody's face, that is more bull.
>Use code all you want, teach code to anyone you
>want, recruit new users of code all you want. NCI
>has no problem with USE. It is the code test and
>only the code test.

Zoooooom. Right over your head again..... We aren't talking about
code testing, Bill. Pay attention.......

>Go read the FCC's NPRM. The FCC sees the writing on the wall (IMHO).

What does the FCC's NPRM have to do with NCI hate mongering, Bill ?
Are you suggesting the FCC supports hate mongering, or did you and
Carl spray paint something on the wall while you were there ? Good thing
the FCC has NOT seen some of the writing thats been done here, huh Bill ?

Sounds about right to me. Could you imagine Elizabeth Dole as president of this country? Her OM would have to be in the background doing the real work. A vote for Liz is really a vote for Bob. I do like Dole pineapples, however (the canned kind. Elizabeth Dole also needs to be canned, kindly, too). And who wants another Bush in the job! He would probably screw up the economy real bad like his dad, who knew so much about technology that he thought supermarket scanners were a great idea, after they had been already been installed in most supermarkets for ten years. Would George Junior throw up on world leaders? That would depend if he was hooked on halcion like the old man was. Gosh, I was really one embarrassed American after Prez George Herbert Walker Bush threw up on the Japanese hosts in Tokyo while we tried to convince them to sell less Toyotas and stop buying up America. But George needed the halcion pills to deal with jet lag...Bravo Sierra, he was probably hooked on them & probably still is. Buchanan will probably run and have a secret alliance with Racist heavy David Duke in Louisiana. Buchanan will charge up the hill with the peasants wielding pitchforks, guns cocked and loaded (or whatever that saying saying is), all in the name of "states rights", which is a code phrase among conservatives that translates loosely as "let's go back to slavery".

Yeah, Gore looks pretty good, come to think of it.

There seems to be a misunderstanding based on the thousands of E-mails received about my papal comments. Listen up you fools; despite some former problems, I think the concept of the papacy is fine. In fact, while in college I came into contact with it. I had a friend named John Sicola who was a religion major and after the second year, decided to attend a seminary to become a priest. He graduated, was ordained and began ministering to a small congregation in Flatbush, Brooklyn. I had not seen him in 35 years before we crossed(no puns intended) paths at a class reunion. He didn't seem happy and when I asked why, he admitted that he had not progressed in the Roman Catholic hierarchy. John was still ministering to that same small congregation in Flatbush. I then consoled him and explained what had happened. I asked, "John, did you not want to rise to the status of a bishop?" to which he said yes. "What would be next, John, Archbishop?" I continued. "And what next, John, a Cardinal?" "Yes" he replied. Finally I asked the key question,"Once Cardinal, wouldn't you then aspire to be the top man." And he replied, "That would be my fervent wish." I then concluded by telling him that was the major problem that hindered advancement. He didn't understand so I then stated emphatically, "Do you think the Vatican would want their leader of over a billion people to be called Pope Sicola?" And that's the point of this post. Drink whatever you want, Coke, Pepsi, Dr.Pepper etc. but make sure they're decaffeinated. Also I made a comment about my liking Pope John Paul II because he exonerated the Jews of killing Christ which, when looking over the ghastly persecutions and murder of my people in Europe from 70A.D. until 1945 based on such nonsense, that was a damn nice gesture. And that brings up another question;deicide. How do you kill God? A spirit can be killed? And if you say that Jesus was God and was here for 33 years, then who was minding the store? If someone can render an explanation, I'm all ears but in the minds of some bigots,I'm all nose too. Come to think of it, I saw a picture of Polly, W4FQF, and believe me; that fellow is truly all ears. Thanks for your kind attention and down with Brother Stair. Doc,AF2Y

My hat is off to "The Equalizer. "NATE". To be included as being in the class with such a fine person thrills me beyond any of the many awards I have received.. Im telling you, Nate is one fine person. Not a schmeggee like AF2Y, Dr Hate , always fondels youngsters, and his idol WB2OTK AKA WB2OINK, Keep up the good work Equalizer, and keep kicking the crap out of these two schmos.

With pleasure from the desk of,

Rileygotcha

From ARRL today

"ULS registrants without telephones: What do ULS registrants do if they have no telephones? According to an FCC spokesman, if the applicant/ licensee does not have a phone number, he or she can use a business telephone, the telephone number of a close friend or relative, or just fill in with zeros."

More FCC/ARRL stupidity. The point is, peabrain bureacrats, if you don't have a phone you don't have an internet connection and the government has no right to make someone go sit at a library and learn to use a internet connection (assuming your library has one).

They think they have all the answers but they only demonstrate their stupidity over and over again.

Hi.
I recently purchased a 1999 GMC Sierra pick-up truck. I would like to use a "Through Glass Antenna", on this truck. I was told that because of the type of tinting materials used in the windows, that this was not a good idea. I was told there would be a lot of signal loss as well as heat build-up at the pass through point. Does anybody know if this is true, or have any other thoughts about this? I was told it was because of the Titanium that is used in the tinting of the glass. This tinting is built into the glass from the factory, not add-on windows film.

Hello Dick:

I hear what you are saying and your comments have some merit however, as a former EE student myself, and having worked in industry for sometime before a 180 degree career change, I can honestly tell you that in the real world, one cant bamboozle a company for too long. A persons talents are quite obvious right from the very beginning, whether or not if they have a degree from a non USA college or if they have any degree at all. If a managing department engineer is sharp, he/she will discover a phony right when the ponies leave the gate.

1601. motorola gm300 rss question

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-16 00:00:00 UTC
From: Joe Stilwell <stilwellj@silkspin.net>
Message-ID: <3767d5b7.0@news.silkspin.net>
Source record: 139387

I have a gm300 mobile radio that I have heard can be programmed with the maxtrac rss software. When I try to read the codeplug it comes back and says the radio isn't supported. I have version 5.20.01 from back in july of 90. In the software there is an option on the service menu called update model definition file, is that a way to tell the software about this newer model maxtrac radio? It asks for lines out of some update pages, where do you get those? If that is a way to update the software does anyone have the lines for the GM300?

Thanks

> something else when they catch up to you......

Here in Houston, if they catch you with a transmitable uhf radio that
will access police, they will throw you in jail just for possesion of
it. I know a guy , who at the time was a "student cop". That is he had
been thru police academy and was waiting a job with a dept. He had a
sabre radio in his car, and had car trouble. When he went to a auto
parts store and came back, the police were checking out his car a
possible stolen. They say the little sabre ht on the seat, and
determined that it was capable of transmitting on police bands. They
threw him in jail even though he had never transmitted with it. He had
the radio to be able to use ham bands and listen to pd on the same
radio. I think they eventually dropped the charges, but it took a while.
Moral: Most police agencies are retentive about possible bootleggers .I
wouldn't do it. MK

According to Newsline, the VECs have announced that they are postponing
their July meeting with the FCC because the FCC has put Amateur Service
restructuring on the back burner. The Commissioners are not working on it
and haven't said when they will even look at it. So much for Dewana
Terry's "fast track" statement of last summer.

I upgraded the program last night with a few features people have
recommended. For example I let you select from three sampling rates.

I am always open to comments and recommendations.

Also, several people had difficulty running the program under Windows
NT. I don't have NT so I was not able to test it initially, however the
problem has been solved and the program runs fine under NT too now.

If you had trouble running the program under Windows NT, download the
current version and it should work fine.

Nice to see N0VFP (a/k/a "CBRambo 1")
talking to himself again.

Lloyd has not notified the FCC of his change of address because he wishes to further his own illusion that he is "CBRAMBO", a/k/a Drew Durigan. Both Drew & Lloyd have moved recently, yet for some strange reason neither one of them seem to want the FCC to know where they reside. Or perhaps it is not the FCC that Lloyd and Drew are hiding from. Perhaps they are afraid that if their current addresses are listed in QRZ, someone who dislikes their inane posts in this NG may pay them a visit. Just a thought.

Why are these two screw balls, WB2Oink er WB2OTK and W4NTI on this forum all day long. I will tell you why. Mr Riley Hollingsworth has told these two professional radio bullys and qrmers that he has had it with their brand of "Radio Fun". Their little playhouse of qrm was ripped out from under them. That is why they stay here all day stirring up trouble and talking about family members of decent people. WB2OINK posted a reply to K2IVX for him to "go feed his mother". This is the kind of talk these two loafers do all day long here , and used to do on the ham bands.. The vote on any poll of amateurs is overwhelming for WB2OTK to lose his ticket. and for NTI to get employment,,, And he should!!!

Source record: 139405

Hello. I'm wondering if the Icom IC-756 HF/6m radio is a good buy or not? I would mainly use it on RTTY/SSB/CW on 80m-10m. I would mainly be rag-chewing, working DX and using it for contests. Any particular feelings/opinions you happen to have about the radio I would appreciate hearing. I have already compared this radio to the FT-920 rig and I'm not interested in hearing about that radio. Please don't recommend it to me. Thanks a lot and let me know if you can help.

Hello. I was wondering how do you feed an inverted L for 160m. I assume that it has to be fed at the bottom of the vertical part correct? But how is it actually fed? Would it be possible to use coax or balanced line in some way? Or would I have to run a wire all the way to the back of a tuner? Let me know if you have any input. Thanks a lot for reading!

Source record: 139407

Hello. I have a few questions on the Dentron ClippertonL HF amp and I was wondering if anyone could help out. Please let me know if you can provide any input on any of the bellow questions. Thanks a lot for reading.

1. I've heard that the amp will run on a regular 110 plug, but it's not recommended. Is this true, and why is it not recommended?

2. What modes will it do and what power will it put out on all of those modes generally?

3. Will it cover 160m-10m including 12m/17m with full output?

4. Is this a generally good and dependable amp (especially in contesting)?

5. Is there anything else that I should know about this amp and do you happen to know of a picture of it on-line?

6. About how much does one go for used in good condition today?

Of course. But Carl insists he is an engineer, tho he only
attended a semester or so of EE schooling, and if he really
is an engineer, then it wouldn't matter much where he got
his shingle would it? The proof in the pudding would come
through anyway, wouldn't it? Or not.

The reason that running the Clipperton L on 110 is the reason as any
other amp. Thuogh the amp will run it will not be as efficient as it
would be on good old 220.

On sbb the amp will do 1300 watts out with about 110 in thats PEP. I
wouldn't run the amp much over 600 watts on FM and 300 watts AM. On CW
you can run the full 1300. If you are going to run any of the Data modes
I wouldn't sujest running the amp over 600 watts.

The amp that I have will only cover 160 through 15. You can modify the
amp to work on 12 and 17 as well as 10-meters. All one would have to do
is modify the band switch.

I'm not much on contesting. I would say the amp is a good dependable
amp. I run mine as a backup amp to my SB 220.

If you want to see mine you can go to
http://www.dirtball.com/station.html

I wouldn't let mine go for less than 500 dollars but mine has new band
switch, caps, diodes, and tubes.
BTW the tubes are 572Bs

73 I hope that this helped

Sir:

Consider this situation. I have an unlisted, unpublished phone number that is solely for use in connecting to the internet. My computer is the only thing plugged into that phone line and I am not about to share the number with anyone.

My son has a similar situation -- an unlisted, unpublished phone for his internet connection. His other phone is a cell phone and he does not distribute that number.

Thus, it is not at all impossible for someone to not list a phone number but to have full internet access.

Then, of course, there may be the case of an individual with no phone but with and ISDN connection.

Why all the controversy, I have been a ham since Feb. and do not understand why it seems everyone is embroiled in a controversy over CW. I personally like CW the best, just upgraded to general and work PSK and CW almost all the time. Gentlemen and ladies, this is a hobby, not an issue of world peace. Enjoy it for what it is, live and let live. And most of all relax and have FUN!

Ohy Vay!
It has now been discovered that "DONKBOY99", is in fact Charles Swartzbarg AF2Y, Known in New Jersey and the East Coast as the Dentist that "Always Fondles Youngsters".

A Failed Dentist, Troublemaker, Schmuck of the first order, Goy baiter and generally a Mashugana Putz.

This Putz was Banned from the BETH HA'SCHMECKELE SYNAGOGUE in Edison NJ (Home town of W2YEE) for attracting HATE Mongers to the Jewish Community and baiting the local Kooks who in turn wanted to "Repaint" the Shule, this ALL because of his "Mouth" and the combative attitude of his "Yenta" Mother.

Well it looks like the Dockelah is now claiming that he is an "Sefhardick" Jew with his brilliant use of the "COJONES" phraseology and his Spanish Ham Dicktionery that He NEVER DELIVERD.

HOLA! Did he not claim that he is in reality is an "AskheNazi" Jew, Ah well it looks like he is nothing more then a make-believe Khazar Jew Dreck with a German name.

It is now COMMON Knowledge that Charles Swartzbarg AF2Y is the New "Music Man" of 3950, and that "Pork Butt" OTK is in reality the "White Noise" Jammer let us all congratulate them for their Monumental Achievements in ham radio.

And now let us SEND IN THE Real CLOWNS, AF2Y and his side kick OTK "AKA W2OINK".

Extra! Extra!
The egregious law firm of COHEN, SHLEPPERMAN, ZOTSKELE AND PUNUM Esq. informed Doktor Hate AF2Y AKA "Always Fondles Youngsters", that he might be looking at some "Federal Time".

Yes Sir Readers it looks like Dok Boy is looking at an all expense paid vacation for in part for his actions in "possible" Mail Fraud.

This as a result of the removal of POSTAGE STAMPS from SASE "Cloudwarmer "envelopes and their subsequent use for his DAUGHTER'S wedding invitations.

As we read hundreds of hams and SWL's that have sent in the envelopes have contacted authorities, action is pending....

Now we know WHY he did not post the "Cloud Warmer" information on the Forum for FREE, but insisted that we send in them "envelopes", what a "Gonif" and Cheapskate.

Folks He actually thinks that the following pathetic excuse will get him off the Hook.

"Due to the fact that the cost of printing up CLOUDWARMER instruction sheets has gone up by 100% in the past week(from a nickel a copy to a dime) and due to my having to save some bread for my daughter's wedding, I no longer can offer them gratis. In other words,..you want to build one as effective as mine,PAY FOR IT. I will be establishing a pricing program within the next few days and VISA, MASTERCARD and DISCOVER will be accepted. Thank you."

It is now COMMON Knowledge that Charles Swartzbarg AF2Y "Always Fondles Youngsters" is the New "Music Man" of 3950, and that "Pork Butt" OTK is in reality the "White Noise" Jammer let us all congratulate them for their achievements in ham radio.

Actually just thinking about I am sure that this Dynamic Duo makes "Pinky and the Brain" look like "Real Rocket "Scientists.

And now lets get on with the Show, let us SEND IN THE REAL CLOWNS of Amateur Radio, AF2Y and his sidekick W2OTK "AKA W2OINK" the true Brain Trust of 14313.

1645. AF2Y-OTK-STARTELING REVELATION

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-16 00:00:00 UTC
From: The Equalizer <equalizer2000@my-deja.com>
Message-ID: <7k6t8c$6p3$1@nnrp1.deja.com>
Source record: 139442

It is now COMMON Knowledge that Charles Swartzbarg AF2Y "Always Fondles Youngsters" Is the New "Music Man" of 3950, and that "Pork Butt" OTK is in reality the "White Noise" Jammer.

The STARTELING REVELATION is that as a result of AF2Y's and OTK's "Capture for the Jamming and White Noise "Crimes" by the FCC they have decided to TURN into "Rat Finks" against all of their so called "Friends".

Let me put it in SIMPEL and mild Terms so that ALL of the so called "Friends" can Understand, AF2T and OTK (OINK) have turned into RAT FINKS in a attempt to save their Collective Pork Butt's from NAL's and Equipment Forfeiture actions, have Jumped Ship like the Rats that they are and Turned in any one that they had any "dealings" with.

If you had any dealings (OF ANY KIND) in the past with "Doktor Hate" or "Pork Butt" the dynamic traitorous RAT DUO (like BIG Amplifiers come to mind) WATCH YOUR BUTTS, the BIG "Kosher" SQUEAIL is on and forget about getting your gelt back.

As many may have witnessed in some of their blathering they think that they have some form of "immunity" and will come out clean and in one piece when the dust settles, this is think is based on the twisted belief of Doktor Hate that he can defuse the situation by stirring up the Nazi waters and this will be enough to "clear" his and porkies actions.

Actually just thinking about it this Dynamic Duo makes "Pinky and the Brain" look like "Real Rocket "Scientists.

And now let us SEND IN THE Real CLOWNS, AF2Y and his side kick OTK "AKA W2OINK".

For those of you who haven't heard,
http://setiathome.ssl.berkeley.edu/
is a site for SETI (Search for Extraterrestial Intelligence). They are using distributed processing. You download a screensaver, that will use your PC when you aren't. It only downloads around 300K, and then processes for 15-100 hours(!) depending upon your processer.

Also, there are "groups" where people with like interests can join, to add their processing time...

To find the Ham Radio group after you've registered, go to the groups section and at the bottom is a section "Search for Groups", and search for Ham Radio...

And I have a paper on the wall from the FCC that says I am a "REAL" ham, and I don't think you should have to take a code test! If you have a problem with that maybe you should talk to the FCC about what it takes to be a "REAL" ham in the USA now a days!

And just for the record I am learning code so I can upgrade my ticket, but I still don't think a test should be forced on us unless you want a special test for every mode of transmission including RTTY AMTOR and all the others before you get to use any of those subbands!

>
>Sent via Deja.com http://www.deja.com/
>Share what you know. Learn what you don't.

To answer your Deja.com add above (and yes I know you can't stop it from being at the end of your posts)
Share what you know.(no problem) Learn what you don't (learn this then, their are no-code supporters who are not Quote "just to damn sorry and lazy to learn" unquote. Some just don't like code as a personal preference)

It just sounds to me like you Dan/W4NTI are just another one of those "But it's the way we ALWAYS did it" excuse using hams!

I got one of those letters also when I joined. I also got a request for money
from them to help them do their work! Which puts them in the same class as all
the others. They just want the MONEY and will tell you what you want to hear to
get at it!

And the "membership certificate (suitable for framing)" what a cheap ripoff I get better looking certificates showing me what great gifts I could have already won and they even have Ed and Dick's photo on them!!!

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday June 20th 1999
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $4 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $10.00-each at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 146.52 and W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

Bill Sohl posted:

: *** From ARRL Bulletin 38 (ARLB038) June 8:

<snip>

: US hams holding any license class but Novice are eligible to
:operate in CEPT countries. A US citizen with a Technician ticket
:may be authorized privileges equivalent to a CEPT Class 2 (ie,
:VHF-only) license, while a US citizen holding a higher class
:license may be authorized CEPT Class 1 (ie, all amateur and
:amateur-satellite) privileges.

<snip>

:-------------end of ARRL bulletin----------------------

Hello Bill...

I'd read this in the ARRL Newsletter last week and it tells me that Telegraphy Elements 1(B) and 1(C) will be put out to pasture by the FCC with this ruling. The Advanced Class and Amateur Extra Class may survive but written Elements 4(A) and 4(B) will be the only requirements. The FCC would have a difficult time making operators pass 13 or 20 wpm in order to do on their own equipment in their own home what can be done when playing an 'away game' with 5 wpm. Particularly, when the 'foreigners' can 'play' both 'home and away' with 5 wpm.

I think, the FCC can see the time is ripe for simplification and it will happen REAL SOON NOW (2 weeks).

I could be wrong, but I really feel it's 'fait acompli'.

Extra! Extra!
The egregious law firm of COHEN, SHLEPPERMAN, ZOTSKELE AND PUNUM Esq. informed Doktor Hate AF2Y AKA "Always Fondles Youngsters", that he might be looking at some "Federal Time".

Yes Sir Readers it looks like Dok Boy is looking at an all expense paid vacation for in part for his actions in "possible" Mail Fraud.

This as a result of the removal of POSTAGE STAMPS from SASE "Cloudwarmer "envelopes and their subsequent use for his DAUGHTER'S wedding invitations.

As we read hundreds of hams and SWL's that have sent in the envelopes have contacted authorities, action is pending....

Now we know WHY he did not post the "Cloud Warmer" information on the Forum for FREE, but insisted that we send in them "envelopes", what a "Gonif" and Cheapskate.

Folks He actually thinks that the following pathetic excuse will get him off the Hook.

"Due to the fact that the cost of printing up CLOUDWARMER instruction sheets has gone up by 100% in the past week(from a nickel a copy to a dime) and due to my having to save some bread for my daughter's wedding, I no longer can offer them gratis. In other words,..you want to build one as effective as mine,PAY FOR IT. I will be establishing a pricing program within the next few days and VISA, MASTERCARD and DISCOVER will be accepted. Thank you."

It is now COMMON Knowledge that Charles Swartzbarg AF2Y "Always Fondles Youngsters" is the New "Music Man" of 3950, and that "Pork Butt" OTK is in reality the "White Noise" Jammer let us all congratulate them for their achievements in ham radio.

Actually just thinking about I am sure that this Dynamic Duo makes "Pinky and the Brain" look like "Real Rocket "Scientists.

And now lets get on with the Show, let us SEND IN THE REAL CLOWNS of Amateur Radio, AF2Y and his sidekick W2OTK "AKA W2OINK" the true Brain Trust of 14313.

It is now COMMON Knowledge that Charles Swartzbarg AF2Y "Always Fondles Youngsters" Is the New "Music Man" of 3950, and that "Pork Butt" OTK is in reality the "White Noise" Jammer.

The STARTELING REVELATION is that as a result of AF2Y's and OTK's "Capture for the Jamming and White Noise "Crimes" by the FCC they have decided to TURN into "Rat Finks" against all of their so called "Friends".

Let me put it in SIMPEL and mild Terms so that ALL of the so called "Friends" can Understand, AF2T and OTK (OINK) have turned into RAT FINKS in a attempt to save their Collective Pork Butt's from NAL's and Equipment Forfeiture actions, have Jumped Ship like the Rats that they are and Turned in any one that they had any "dealings" with.

If you had any dealings (OF ANY KIND) in the past with "Doktor Hate" or "Pork Butt" the dynamic traitorous RAT DUO (like BIG Amplifiers come to mind) WATCH YOUR BUTTS, the BIG "Kosher" SQUEAIL is on and forget about getting your gelt back.

As many may have witnessed in some of their blathering they think that they have some form of "immunity" and will come out clean and in one piece when the dust settles, this is think is based on the twisted belief of Doktor Hate that he can defuse the situation by stirring up the Nazi waters and this will be enough to "clear" his and porkies actions.

Actually just thinking about it this Dynamic Duo makes "Pinky and the Brain" look like "Real Rocket "Scientists.

And now let us SEND IN THE Real CLOWNS, AF2Y and his side kick OTK "AKA W2OINK".

Ohy Vay!
It has now been discovered that "DONKBOY99", is in fact Charles Swartzbarg AF2Y, Known in New Jersey and the East Coast as the Dentist that "Always Fondles Youngsters".

A Failed Dentist, Troublemaker, Schmuck of the first order, Goy baiter and generally a Mashugana Putz.

This Putz was Banned from the BETH HA'SCHMECKELE SYNAGOGUE in Edison NJ (Home town of W2YEE) for attracting HATE Mongers to the Jewish Community and baiting the local Kooks who in turn wanted to "Repaint" the Shule, this ALL because of his "Mouth" and the combative attitude of his "Yenta" Mother.

Well it looks like the Dockelah is now claiming that he is an "Sefhardick" Jew with his brilliant use of the "COJONES" phraseology and his Spanish Ham Dicktionery that He NEVER DELIVERD.

HOLA! Did he not claim that he is in reality is an "AskheNazi" Jew, Ah well it looks like he is nothing more then a make-believe Khazar Jew Dreck with a German name.

It is now COMMON Knowledge that Charles Swartzbarg AF2Y is the New "Music Man" of 3950, and that "Pork Butt" OTK is in reality the "White Noise" Jammer let us all congratulate them for their Monumental Achievements in ham radio.

And now let us SEND IN THE Real CLOWNS, AF2Y and his side kick OTK "AKA W2OINK".

Sorry, Jeff but a good friend of mine is a graduate of EE from the college
of the former communist state of Poland. They had very little test hardware
to use when he was in school, just mathematics.
He now is the head of the engineering dept of one of the better universities
here in New England.

In the United States Of America, club callsigns are free. No charge.
Get as many as you like. Take two or three, they're little. Now if you
want to chose your own very special vanity call, I think those are
about $14 U.S. for ten years.

The point is the CW requirement for HF is STILL a requirement. You have
NO CHOICE in the matter.

> And just for the record I am learning code so I can upgrade my ticket,

Good, Keep it up. Once you get ur speed up, you will love CW.

but I
> still don't think a test should be forced on us unless you want a
special test

>

NO, I dont think we need a "special Test" for every distinct mode. But,
CW is and should remain a qualification for HF privlidges. After all,
ONE of our purposes is to provide "emergency communications".

As for "Incentive licensing", it sucked in 68 and it sucks NOW. All it
does is fragrement amateurs into groups. This is one of the MAJOR

problems with the service today.

We (amateurs and the FCC) have lost sight of the "basis and purpose" of Amateur radio. It is not about ordering pizza on the 2 meter repeater, its not about swapping recipies on HF. Its not about chassing DX and ragchewing....it is about providing a source of trained and skilled operaters that can and do contribute to the state of the art.

Sorry,if Im from the "old school" but there are a LOT of us that feel the same way.

IT TAKES TWO THINGS TO COMMUNICATE, AN OPERATOR AT BOTH ENDS.

Additional interesting info on scamming club calls.

73 - Leo - W3LEO

The ARRL Letter, Vol 18, No 21 - Fri, 21 May 1999

FCC SETS ASIDE MULTIPLE CLUB STATION GRANTS

The FCC has set aside 14 recently granted club station call signs and 12
recently granted club vanity call signs held by an individual trustee.
The FCC's Riley Hollingsworth, K4ZDH, took the action May 11 in a letter
to Motoaki Uotome, W9BO, of Honolulu, Hawaii. Uotome is the trustee for
35 club station call signs in various cities in the continental US as
well as in Hawaii, the Marianas, Guam, and Alaska.
==========

This is what he had as of a few weeks ago.....

1677. AF2Y's Legal Troubles

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-16 00:00:00 UTC
From: kc1zq@yahoo.com
Message-ID: <7k8fso$n7i$1@nnrp1.deja.com>
Source record: 139474

It looks as if old Charles has met his match. I have MORE legal papers being sent to me via US mail. These papers are from the State Of New Jersey's Legal Records Office. The women I spoke with said she will send them "mid next week".

Looks as if Charles could not make payments on one of his cars......thus the bank had to repo it and legal action then took place.

My my my Charles, when are you going to learn to pay your bills & not have "sexual advances" on fellow employees?

So there you have it....I'm still looking for a web page to post all of old AF2Y's legal troubles on. When I find one, I expect there to be at least 2,000 hits per day on the page.

**********NEWSFLASH**********
PORKBUT BROWN NOSING ON 3.901 MHZ
Tonight I counted two spots where old porkbut didn't ID for 15 mins and once for 12mins and once for 20 mins. What is up with this?
You all should hear old porkbut brown nosing Riley Hollingsworth. He wishes Mr Hollingsworht was at the hearing between Herbie and Judge Luton. I would of loved to see that lier and nobrain loser porkbut before the judge. I wonder how much cander old porkbut would lack we all know that the filters he sells don't work we also know he sells amps to CBers and well all know he stole a all mode 2-meter rig from me.
You should hear the porkster braging about losing 50 lbs I quote "I jumped on the scale before dinner and it showed that I lost 50 puonds!" He never did say how much he did weigh. More lies from the radio lier porkbut.
Talk about no brain. Its funny how he can say what ever he wants about other people but when the truth about him is exposed he gets all mad. Then he is going to beat that person up that is telling the truths about him.
Lets face it everybody porkbut SHOULD lose his ticket and NEVER be permitted to use ANY type of radio again including a wireless mic.
porkbut has less cander then what Judge Luton said Herbie had. In the beginning I have to admit that I was worng about Rich Whiten and the rest of you where right porkbut IS a lier and a theif. I know now because he stole from ME! I hope the FCC takes his ticket. It would be the best thing that EVER happened to amteur radio!
Now we all know he is a racest.
73 from Oris
Beware of the lier and theif Rich Whiten WB2OTK A.K.A. porkbut

Hi all,
Please pass this on to other stations.

Can any claim to have worked the 'Worlds Oldest Ham' (c)

Rules:- Just in case it gets out of hand.
Closing date for entries 2400hrs 31/12/99
Proof of entry in log may be required
In the event of 2 or more stations claiming the same callsign. The most recent wins.
The winning station must be ALIVE & ACTIVE beyond the closing date for entries.
Multiple entries ARE allowed
The Judges decision is FINAL.

Nominations please

I'll start with:

Category 1/ National.
CALLSIGN - AGE - DATE - CLAIMED BY

Category 2/ International.
CALLSIGN - AGE - DATE - CLAIMED BY

I2SM 88 14/6/99 G0HFJ (Heather)

Category 3/ I am the worlds oldest Ham.

CALLSIGN - AGE - DATE - CLAIMED BY

N.B. It is the oldest operator, not the oldest callsign that counts.

Thanks,
Tom (G1SYX)

1684. FT-290R power output? 2.5W or 25W?

Trying to close a deal for a FT-290R, and the seller says his unit only puts out 2.5W, not 25W, in the high power setting. All of the references I have seen to the FT-290R claim a 25W hi power output on all model revisions. Am I missing something here? Was there a FT-290R that was only capabable of a max of 2.5 watts out?

You folks are talking about the interesting article from ARRL, I gather.

From the article:

WASHINGTON, DC, Jun 17, 1999--The FCC's Riley Hollingsworth, K4ZDH, says the Commission may have to resort to fines to curb the practice of hoarding multiple club station call signs. "The reason we're concerned about this is that we consider it an abuse of our licensing processes," said Hollingsworth, a legal adviser for enforcement in the FCC's Compliance and Information Bureau. "If somebody
applies for 30 or 40 licenses over time, it really overloads the staff." Hollingsworth pointed out that the call signs often must be typed in manually.

Earlier this month, a ham listed as the trustee for more than three dozen club station call signs agreed to give up all but one of them.

<clip>

Hollingsworth concedes that the FCC rules do not specify an upper limit to the number of call signs an individual may hold, but says "the underpinning of the rules is common sense." He recommended that multiple call sign holders should seriously consider turning in their excess grants before they hear from the FCC, "because we will be pursuing them."

<clip>

The FCC says the two-year rule applies for those seeking to obtain one of the desirable call signs being yielded or called back by the FCC, and Hollingsworth plans to specify a date of cancellation on each letter to a holder so that it will be clear when the two years are up.

"We're also going let them know they can't reclaim any of these call signs under former call sign holder exceptions to the two-year period," he said. Close relatives also would be unable to claim any of the call signs in the future.

<end>

I do see collecting callsigns from other countries, if indeed you operate them from time-to-time. I, for instance, do plan on doing a dx-pedition sometime in the next five years... I certainly would feel that I earned those calls I hope to obtain. Having those next to my name will be a badge of pride... working from some remote location... (ah, the dream of an adventurer!).

Anyhow, I found this topic to be rather interesting. I'd love to hear a comment or two from some of these "warehousers."

>ARYAN FIST wrote:
>(Text deleted)

What the hell is an "Aryan" anyway? My world atlas does not include any country called "Arya". Are Aryans people of German descent with blond hair and blue eyes? In my travels to Europe I have seen more people fitting that description in Sweden and Norway but the Norse in particular seem to avoid any connection to things German, for some strange reason. In areas around Frankfurt and Stuttgart, I have seen only a few people with blond hair and blue eyes (possibly Norwegian immigrants). Poland has by far more people fitting what I understand to be a description of "Aryan" people. In Israel, I have seen more than one person with blond hair and blue eyes; one was a woman of Jewish faith who had emmigrated from Denmark. I never did make it to an Arab country because they disallow entry of anyone with an Israeli visa stamped on their passports. But are all people with blond hair and blue eyes Aryans? If so, where are they from?

Is it noted on their birth certificate? Is it possible to be an Aryan and have brown hair and green eyes wearing purple socks? I am Irish. Are Irish people Aryans? Are all Aryans Lutherans? Do Aryans hate Catholics? (Catholics do not hate Aryans). I do not hate Aryans. Do all Aryans hate non-Aryans? Are all Germans Aryans? Is Arya a DXCC country? If so, what is the address of their QSL bureau?

Please advise.

Upon checking Charles tax records with a friend who works for the IRS....we found out that he payed NO income tax for the 1996-1998 tax years.

My my my, things are sure starting to look dark for Charles....this info has been passed on to the audit desk at the at the branch office where my friend works.

Will Charles go back to jail yet once again? I THINK SO!! Now we just have to turn the screws a little more 'till he breaks.

While you & I pay our taxes....CHARLES THINKS HE DOSEN'T HAVE TO. This is wrong and un-american. Lets all work together to get this creep back behing bars where he belongs.

Call the IRS & report Charles is not paying his taxes. You can get his name & his P.O. Box # (why do you have a P.O. Box, Charles? Scared of something?)by going to HTTP://WWW.QRZ.COM just enter AF2Y and it will give you his info.

It's time we all STAND UP and SHUT DOWN this AF2Y bum & user of us all.

I can see the headlines now...."NJ Man Convicted Of Tax Fraud".

Old Charles is already convicted on 1 count of "sexual advances" toward an employee of his.....NOW THIS.

You can do 1 of two things Charles.

1. Run from the law.
2. Turn yourself in.

Why don't you do the right thing and call the IRS before it's too late Charles?

I hear they go kinda light on 1st time tax crooks Charles. After they take your home & car.......you might have to do only 3-4 years in prison. Don't bend over to pick up the soap.

I have had many many emails regarding web space to post all of AF2Y's legal records on....thank you all!!

Is this only the start of what I can find with only a little background checking out of AF2Y? Who knows what will show up next.

More to come....stay tuned.

Back in the 70s, while in Germany, the ham club gave classes This was
when there was no Tech (non cw). A couple came to the classes, with
the wife in toe. She proclaimed no interest in learning "ham stuff".
To make a long story short...He passed his 5 and she passed her 13.
Resulting in a Technician and a General class.

Greetings:

Has anyone been able to convert a Uniden FMS850T 800 Mhz
trunking radio to the 902 to 928 band? I guess it will
have to get programmed to conventional "channels", then
see if it will swing high enough to lock and tune to the
higher frequencies.

I can get about 40 of these, and would like to use them
in our band if possible.

Thanks for any and all assistance.

Folks,

Before I installed a through-glass 2m/70cm antenna on the rear tinted glass of my Dodge Durango, I investigated this and was told that almost all factory tinting does not contain metal, but that metal is found in most aftermarket tints. The performance of my antenna was very acceptable in both SWR and coverage.

Talk about demonstrating stupidity, you did a hell of a job. Internet access does NOT equate with telephone line, genius! Ever hear of access via cable TV provider? Or any one of a dozen different bandwidth choices like Frame Relay or a fractional T-1, or hell - how about the "QRO" of Internet access like ATM over a SONET backbone?

Read the warning label on your ankle: Remove foot from mouth before speaking

Hi.

Ok thanks for info. I understand why they take all this call if it's
free they abuse the system.

Actually, I've found my Larsen 1/2 Wave thru-glass to be an excellent performer over the 1/4 wave mag-mount I used several years ago. The Larsen utilizes a large-area base which seems to couple well through the glass. Any losses I'm experiencing through the glass seem small considering the performance and coverage area I get with the antenna. The only drawback to the antenna is it is a full half-wave high and tends to hit low hanging branches, garage overhangs, etc.

As for performance on tinted windows, I have no direct experience but I would think with the mass number of people using Cell-phones and glass mount antennas, I would think they would likely build many new cars with a tinting material which would not greatly affect the performance of thru-glass antennas. Just my 2 cents...

On the other hand, I rented a new Oldmobile Silhouette van last fall,
and the front windshield completely blocked GPS signals. So there are
some metallic factory tints out there.

By this do you mean an equal number of questions, or do you mean that testing should determine that someone is equally competant in all of the modes? I don't believe the two approaches are equivalent.

I just got off .313 with Brother John Occhipinti,KC3AU, and relinquished it to him for his religious inclinations and I advise you sinners to give a listen since he makes a hell of a lot more sense than Brother Stair. Why is it that as soon as those on frequency heard John calling me, they began with catcalls , music and obscene language. What did he do to deserve it? You jammers are filthy mongrels. unwashed. unclean disreputable louts whom God could never love. Don't you feel that John brings the message of peace to .313? Wouldn't you prefer that to the nastiness instigated by the likes of Queenie, Polly, Youngblood and KB4MXL the blind golfer who constantly kills caddies? I say give peace a chance. Listen to Brother John for some religious enlightenment. Open your sinful hearts to his messages and stop harassing him. Peace be with you my children. 73, AF2Y, Brother Elevator

So what?

HAMS COLLABORATE...NO CODE HAMS COLLABORATE...PRO-CODE HAMS
COLLABORATE...GUN BUFFS COLLABORATE...
so do all special interest groups.

So what?

PLEASE keep thinking,
Hams need more license classes,
I never met a ham I didn't like,
I don't collaborate with "hate groups",

>some way? Or would I have to run a wire all the way to the back of a
>tuner? Let me know if you have any input. Thanks a lot for reading!

Nat, there is an email list devoted to 160m -- called "Topband."
It's hosted on contesting.com. Try the usual Majordomo subscribing
technique.

My 160m book, "The Challange of 160!", by Si Dunn, W1BB, shows an
Inverted L being end-fed directly with the center conductor of 50
ohm coax, with the outer conductor going to ground (see below).
The vertical portion, length A, and the horizontal length, B,
should satisfy A+B=468/F, with length A as long as possible. Now,
the author devotes an entire chapter to grounding systems. Some
Topband guys run hundreds of counterpoise radials, others use
a wire mesh. Your ground will make or break your 160m antenna
system.

Next time you pass an AM broadcast tower, check out the *extensive*
grounding system they use. We had one AM tower here in which the engineer
snuck one of the radial wires from the tower base into a canal leading to
the ocean -- he cut into the street pavement, laid down the wire, and
filled in the slit he'd cut with tar. Stayed that way for years. I laughed
everytime I drove over it! The city workers either never detected it or
chose to ignore it.

GL!

Yep -
I think it was a British commedian who said every time he signed off:
"GO...And let your G-d go with you".
I think I know what he meant but you each can interpret him as you may....BUT just remember...
PLEASE keep THINKING...because
I never met a Ham I didn't like and I'm not looking for any, regardless of religious faith or lack of religious faith. IMHO all faiths are to be respected as long as they do not preach hate of any other faiths...Doubt is OK...but not total distain.
In many parts of the world their are unrests and even wars between peoples of different faiths...PLEASE don't start such ignorance in the USA. IMHO our founding fathers didn't, and our present responsible leaders don't, want any religious revolutions in the USA. That is why there has been a separation of church and state here and that is why the USA has prospered even though it has leaders and followers of many religious faiths.
Hams need more license classes...but not more hateful cults,
Bob Wex w2ilp (I Like Peace)

Poland does not contain an "offshore" university. I'm referring to those
islands in the Caribbean which offer a BS, MS, and PhD for "life experi-
ences," no classes need be taken. They're also called "Degree Mills."

Three or so years ago, up here in the mountains of NE Tennessee, a couple did just this. They ran an essay contest to give away their farm complete with new house, equipment, etc. They had an entry fee and guaranteed to return the fee if they did not get enough entries to pay what they thought was a fair price. I believe the entry fee was $100 and they got very few entries. Called it off, finally sold the place.

1734. AF2Y ASKS;WHY NOT A YIDMOBILE?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-17 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990617195433.23095.00000197@ng-fn1.aol.com>
Source record: 139322

I've been noticing a strange phenomenon here in New Jersey. I'm seeing cars with a metallic fish emblem with the Greek word "icthos" within it and affixed to the trunks. Having also had Greek in college(I neither turned my back to the professor nor bent over to pick up a dropped Bic pen), I put two and two together and remembered that the Greeks were big into translating bibles and somewhere I read about a miracle performed by Christ regarding fish. I think it's when he turned a hundred fish into ten thousand bagels to feed the starving Phillistines or something like that-not positive. Or maybe he gave the apostles enough halibut and bass to open a downtown market in Nazareth. I wish I could pinpoint it exactly and I will ask Brother John, KC3AU about it or Brother Astley after he climbs down from picking coconuts. Well anyway, the significance of the fish is to tell the world that the car is a "Goymobile" i.e. belonging to a Gentile. Now whether or not this would make a difference to a cop pulling the guy over for speeding is highly speculative but then again,if the cop is Gentile and checks out the fish instead of the license plate number, the guy just may get away with the infraction. But then again the cop's name might end in "Berg" which nowadays is far from a fish story. So I was thinking-if the Gentiles can proudly display their faith on the trunk of the car, why not the Jews. Furthermore let's remember that their cars are a hell of a lot more expensive than the goy's with the fish. I propose something similar for a Chosen's car. A METALLIC CIRCUMSIZED PUTZ emblem and for a few dollars more, a larger emblem with PUTZ and TESTES. I was thinking of what direction the shlong could be oriented and if we point it straight up, it might present a reprehensible sexual symbol to an old maid passing the car . And so we can point it east where lies the Holy Land anyway. Remember that temples are built looking east since the banks in ancient Palestine were on eastern summits and if one doesn't look out for his own money, who will? I therefore am asking if someone would like to put up the venture capital, I'd be willing to give it a shot. Indeed, a Yidmobile would certainly compete very well with a fishy Goymobile. Please contact me at radiosigs@aol.com with your comments. Thank you for your kind attention. AF2Y,Doc

Most organizations have a certain amount of history associated with them, which provides the newcomer some background on where the organization came from, what it stands for, or its objectives or causes. I feel that is why the code test is included. Proficiency is not really what it is for, rather, it is for background, and I embrace the code test as "where radio came from". Just my opinion.

Of course it is. But let's not forget that:

PSK31 is useful as a recreational mode,
SSB is useful as a recreational mode,
RTTY is useful as a recreational mode,
FM is useful as a recreational mode,
PACKET is useful as a recreational mode,
EME is useful as a recreational mode,
CLOVER is useful as a recreational mode,
ATV and Slow-scan are useful as recreational modes,
PACTOR and AMTOR are useful as recreational modes, and
AM is useful as a recreational mode.

Some people might even find SS to be recreational! Seems in amateur radio
all the modes are useful as recreation.

Yes Sir Readers, it looks like the BIG "Kosher" SQUEAIL, AF2Y known fondly as the Dentist that "Always Fondles Youngsters" has started to show his true "Pink" Side.

I guess that after the fall of the "Evil Red Empire" and the capture and imprisonment of the Mid-East "Yenta" Spy Gang our intrepid putz, Dockhela has been forced to play chess at the local park with the likes of "Bojangels" and "Brother Twitty".

This must be a Blow to the ego for such a "High" member of the "Nomenclatura" after all he Was educated "Magna Cum Loaded" at the Maurice LaMumba Dental Collage.

It must be sheer torture to such a high-ranking member the "Kosher INTELLIGENTSIA"
Such as AF2Y, Pure sheer excruciating PAIN having to live and DEAL with the "Enemy" of the proletariat on a daily basis, Oh the humanity of it, and now he is not even Abel to get his orders from the "secret Radio messages" because "Fearless Leader" has no shekels to keep the Stations running.

As a result of the above and in sheer frustration we have the Dokehala Bashing Western Christian Religion, Insulting the Papacy, Insighting Division between Christians (Goy baiting) all in the name of his interpretation of "God", is that god by chance Marx or Lenin Charlie?

Such a Putz, and the Smuck keeps using the same Bolshevik training manual that was out of use for the last 25 years, Charlie WE HAVE COPIES of the book, lets try some things NEW and refreshing.

Duh! Leet's SEE I thinkith

209.16.244.122 that is Dan the Grouchy "Tracer" Man at

user-38h1T3g.dialup.mindspring.com

What NO DSL? Just a cheap Cheesewald dialup connection, are you that
far down in the WOODS of ALABAMY Danny boy!

BTW Danny BOY the 38h1T3g tell what the originating exchange is...

Name: DANIEL L JESWALD
Addr1: 76 WILDMAN RD
Addr2: ANNISTON AL 36201
33.659 N 85.825 W Calhoun County

Lokk at this the BOYOH has a Email: w4nti@arrl.net that he activated
on 06_Jun_1999

What happened Danny Boy YOU are affraid to put in the mindspring.com
address so you are using the ARRL's skirts as a redirector...

The Shame of it, and you a ALABAMY BOY hanging with the likes of Pinky
AF2Y and the Brain OTK (OINK)

I wonder if they still have an old fashioned Welcome Wagon in the South
like they did in the "Good Old Days", this way they can "welcome" you
the "Right" way.

Poor poor Charles, He couldn't make his car payments & the bank took
his car away. That is what you get when you have a big mouth and no job.

I might have some info on his home payments real soon....lets see what
credit he has (if any).

Thanks to all who have sent me emails about trying to get more credit
info on Charles....mark my words, more info is on the way as of mid next
week.

Talks with his bank & former employer will be soon to follow......THE
MORE YOU DIG, THE MORE YOU LEARN!!!!!!

The Human Pitbull,

It looks as if old Charles has met his match. I have MORE legal papers being sent to me via US mail. These papers are from the State Of New Jersey's Legal Records Office. The women I spoke with said she will send them "mid next week".

Looks as if Charles could not make payments on one of his cars......thus the bank had to repo it and legal action then took place.

My my my Charles, when are you going to learn to pay your bills & not have "sexual advances" on fellow employees?

So there you have it....I'm still looking for a web page to post all of old AF2Y's legal troubles on. When I find one, I expect there to be at least 2,000 hits per day on the page.

kc1zq
David,you have admitted having a female side to your personality, Does it dominate you or does your outdoor plumbing rise to the rescue? You seem to be always in conlict with yourself or whomsever is controlling your psyche at that moment. I think you'd be a good candidate to be closely examined by psychologist Leslie ex-Whiten(don't know her married name). Were you crazy before or after you admitted on the air to finding your first wife in bed with a woman? If it's the truth, then I can understand why you've gone off the deep end. Couple that with the weed you had tucked away at Dayton, and that too has contributed to your abnormal behavior. Too bad Fred Roll took pity on you at Dayton '99 but then again, Fred has always been kind to dumb animals, Doc,AF2Y***

Tony Heatwole wrote:
>
> Hello. I was wondering how do you feed an inverted L for 160m. I assume
> that it has to be fed at the bottom of the vertical part correct?

That's probably the most convenient place to feed it, by far.

> But how
> is it actually fed? Would it be possible to use coax or balanced line in
> some way?

I feed mine at the base of the vertical section with a simple L-network coupler in a weatherproof box. Buried coax runs out to the coupler, which just sits on the ground next to the main support tree. (The antenna touches the tree with no ill effects at all, by the way.)

The coupler can match my antenna on 160 through 20, where it performs very well indeed, especially for an antenna (I use 150' total wire length) that takes up only about 100 feet of horizontal space and needs no towers. Fits fine, with six irregular radials just underneath the grass, on a city lot.

If you only wanted to run it on 160, you could probably feed directly with coax and eliminate the coupler if you trimmed the approximate quarter wave of wire for lowest SWR.

I don't recommend balanced line for a base-fed antenna, as the proximity of the Earth will make balancing nearly impossible, and hence the feeders will radiate in a probably lossy manner. Plus, you'll trip over them.

In addition to being a fine antenna for the lower ham bands, the inverted L Marconi is also a superb broadcast band daytime-DX antenna. Here in Rochester, Minnesota, I can receive Omaha and Chicago and Fort Dodge and Sioux Falls ground wave every day there isn't a thunderstorm, and almost every channel has a good signal here during the day. The only unreadable channels are the ones with too many signals.

Best of luck,

Kevin, WB4AIO.

Of course, and all the modes should be tested equally. As it is, Morse
code testing is considered as important as everything else tested in
ham radio combined. It is equal in importance to the written exam,
not an equitable situation.

Hi All,

I have a website dedicated to help regarding packet radio on whatever mode you operate (for both Ham radio users and CB users where legalised). There is also a mailing list concerning packet radio which is very useful if you do not always have access to a news server. the addreses are listed below.

Website: UKPG United Kingdom Packet (radio) Group : http://start.at/ukpg or http://members.xoom.com/ukpg

The Mailing list is available from the above site or direct on : http://ukpg.listbot.com

Best Regards
Greg.

Even with an ideal set up thru-the-glass antennas are not great
performers. Being end fed 1/2 wave their patterns leave a lot to be
desired in mobile operation. In a pinch they are convenient... no
holes, look nice etc. You will notice the difference as you approach
the fringes of a repeater. I have used both and now will do whatever is
needed to get a 5/8 wave on the car. If you can put a 5/8 wave on a
luggage rack etc. you will be much happier with the antenna's
performance.
As far as tinting, I would check with GM, they will be able to help.
Thru the glass cell antennas are very popular. Also call the antenna
manufacturer... they will know what glass is and is not acceptable.

Yaesu FT-8000R dual-band mobile
(identical to current model FT-8100R except without removable control head).
Very clean, <50 hours total use, no mods, non-smoker, never mobile.
118-520 MHz (incl. AM AIR), 760-1300MHz RX, less cellular
All the newest bells and whistles.
With DTMF Yaesu mic, manual, and schematic.

Will TRADE for a 2-meter all-mode rig in good condition.
Let me know what you have. Trades only please. Thanks.

Yep, Luther was not only whoppingly full of hate towards Jews, but his ideas and remarks to the Holy Roman Emporer of his era (Name escapes me momentarily) encouraged explicitly more violence against Jews in Europe at the beginning of the Reformation that at any time in more than 200 years.

This fellow UOTOME, MOTOAKI has been busy collecting calls in other countries as well, including Mexico, Portugal, Uruguay, Chile, Argentina, Canada, and several others. I think I read something on Jim Kehler KH2D's web site about how rampant this practice is and how big a prestige thing copping a bunch of call signs is in Japan, and how JAs routinely travel to Guam to scarf them up. Yeah, it's wrong, it's unfair, and it's annoying, but you got to wonder what drives these guys to go through all the trouble for some alphabet soup they don't ever sign with, and which everyone who sees the long train after their name and legitimate call knows is bogus. What a nuisance, what a bore.

There is not a thing that any one could say on here that would match the nasty things and the filthy lamguage that you have used in here over the years Rube, so cut out the act.. You have wished people to die, you have said filthy things about people and their families. Now, you get really indignant when some body just makes a report about "WAIVER BOY".

Now that King Hussein is dead , who is Waiver Boy going to cry to. He cried to him to get his "WAIVER" If you can't take it Rueby boob don't dish it out.... Thank God for Herbie, he uncovered this waiver scam...

I still think the best answer is no code license testing up to at least General class but keep the CW sub bands closed except for those who pass the current code test. And I'm not saying all classes as no code just half way. The higher classes are for more proficient operators and that should "always" include code! But those who have no interest in code should not be excluded from the complete HF band just because of that one point.

It's been long enough now for Riley Hollingsworth to have gotten a reply from W1WCR concerning the "certified" letter he sent out. He questioned W1WCR about violations and the broadcasting use of amateur radio. I think we should know if there has been a response, an action, a decision or anything else pertaining to this issue. Hey, let's get on the ball, let's find out what's going on with this and where it stands.

ARRL Bulletin 39 ARLB039
>From ARRL Headquarters
Newington CT June 18, 1999
To all radio amateurs

SB QST ARL ARLB039
ARLB039 Multiple call sign holders could face fines

The FCC's Riley Hollingsworth, K4ZDH, says the Commission may have to resort to fines to curb the practice of hoarding multiple club station call signs. ''The reason we're concerned about this is that we consider it an abuse of our licensing processes,'' said Hollingsworth, an FCC legal adviser for enforcement. ''If somebody applies for 30 or 40 licenses over time, it really overloads the staff.'' Hollingsworth pointed out that the call signs often must be typed in manually.

''If we have continued abuse, we're going to have to levy some forfeitures, which we have done in the past for abuse of Commission processes,'' he said. ''With short staff and budget considerations, we just can't let things like this go on.''

Earlier this month, a ham listed as the trustee for more than three dozen club station call signs agreed to give up all but one of them. Motoaki Uotome, JA1GZV, who also holds a US Extra ticket as W9BO, apparently was the trustee of 41 club station call signs. Last month, the FCC set aside 14 recently granted club station call signs and 12 recently granted club vanity call signs Uotome held and asked him to justify the grants.

Hollingsworth concedes that the FCC rules do not specify an upper limit to the number of call signs an individual may hold, but says ''the underpinning of the rules is common sense.'' He recommended that multiple call sign holders seriously consider turning in their excess grants before they hear from the FCC, ''because we will be pursuing them.''

In addition to the Uotome case, the FCC has contacted amateurs in California and Arizona who hold several club station call signs and has asked them to justify having them. News of the cases already has had an impact. ''We're had several others come in on a voluntary basis and turn their excess number in,'' Hollingsworth said.

The FCC says the two-year rule applies for those seeking to obtain one of the desirable call signs being yielded or called back by the FCC, and Hollingsworth plans to specify a date of cancellation on each letter to a holder so that it will be clear when the two years are up.

''We're also going let them know they can't reclaim any of these call signs under former call sign holder exceptions to the two-year period,'' he said. Close relatives also would be unable to claim any of the call signs in the future.

Christopher
On June 12 the State of Indiana had a Y2K Emergency communications test
for the ham operators in this state to test their ability to relay news
from the counties into the state Emergency Management Agency's (SEMA)
Emergency Operations Center (EOC). There is another test to be held
sometime in November of this year. It's just so if the phone lines
or the electricity goes out on Jan 1 2000 the emergency communications
will still go through!

Here is the original FCC definition of the Technician class license:

"This class was established expressly for serious minded experimenters who need spectrum space in which to air test their equipment. It was not established as a communications service and should not be regarded as a stepping stone between the Novice and General operator classes. The Technician class of amateur license has as its purpose the provision for serious amateur experimenters to explore the higher frequencies and otherwise contribute to the art".

Bingo! I've been a tech/techplus since 1985 and that's the spirit in
which I participate. I experiment with homebrew antennas, mostly. But I
also take part in Skywarn activities on VHF, and and that's surely a
communications service.

What do you propose? Bring reality into line with this definition?
Kicking the weather, ATV, and other nets off these "experimental" bands
would be a pretty hard sell.

I think ther were two ft-290 modles, the first was did have just
2.5 watts or so and the second, maybe it is the R modle or maybe it
has a II or mark II on the end of the 290 part. The second version
usually came with a amplifier that straps on the back to get to 25
watts. YOu had an option ot take it off and strap on a battery pack
and use the bnc connector on the front to get about 2 watts out

Yes, a 1/4 and a 1/2 will have similar patterns.... the advantage comes
from a 5/8 wave which has a much flatter pattern and exhibits more gain
@ 90 degrees to the vertical..... just 2 cents more...

>otherwise contribute to the art".
>
>"...not established as a communications service..."

[BEGIN QUOTE]

That is not true now. Here is what the FCC said when the established the
current technician license in 1990.

II. BACKGROUND

3. The International Radio Regulations require that persons seeking a license
to operate an amateur station prove that they have the ability to send correctly
by hand and to receive correctly by ear text in Morse code telegraphy signals.
[3] Although this requirement may be waived for an operator of a station
transmitting exclusively on frequencies above 30 MHz, [4] each of the five
classes of operator licenses currently issued by the Commission requires the
applicant to pass an examination in the international Morse Code. [5]

4. Over the years, we have received many requests from persons who argue that
proficiency in telegraphy is an unreasonable barrier to obtaining an amateur
operator license. When we proposed codeless classes previously, [6]
nevertheless, the amateur community strongly objected. Lately, however, the
sentiment of the amateur community appears to favor at least an entry level
codeless license class. As a result, our Notice proposed to reprogram resources
from processing applications for new Novice and Technician Class licenses to
processing applications for licenses for a new entry level codeless class.

5. In the Notice, we stated the three fundamental objectives that we have with
respect to the proposed codeless class. Our first objective is to offer an
entry level operator license opportunity to otherwise qualified persons who find
the telegraphy requirement a barrier to pursuing the purpose of the amateur
service. [7] Our second objective is to establish a type of license that can be
implemented promptly. Our third objective is to avoid negative effects upon
current licensees, upon the work of the volunteer examiners (VEs), or upon the

Commission's workload and resources.

6. In the Notice, we proposed to add a new entry level codeless "Communicator Class" operator license in lieu of the existing Novice and Technician Classes of licenses. We also proposed to grandfather current Novice and Technician Class operator licenses indefinitely. The operator privileges proposed included all authorized emission types, a maximum transmitter power of 200 watts peak envelope power, and authorization to transmit on amateur service frequency bands above 30 MHz with the exception of the 2 meter and 6 meter bands.

[END QUOTE]

The FCC was not planning on continuing the "experimental class" license when the proposed the new "Communicator class".

Organizations that supported the new codeless Technician Class license were QCWA, ARRL, NCVEC, and ARIG.

There is no current regulation that states that the Technician class can only use the spectrum for experimental purposes.

There is no power, duty, or authority in the Communications Act (not part 97 of the CFR) that gives the FCC the authority to require telegraphy examinations for access to H.F. bands.

The FCC telegraphy examination requirement is no longer in conformity with the Communications Act nor with the Constitution limitations of police power.

Hello Jeff:

But I thought the testing was to determine a proficiency of MODES of communication based on the validity of each mode, not which mode is more popular at any given time. If what you're saying is correct, than lets say in 10 years from now packet takes over as being more popular than CW by the same margin that CW has over Packet today 3:1 (by virtue of some new experimental sub-mode discovered within Packet). Then, the amateur license test at that time will have much more serious Packet questions and fewer CW questions?

Aw yes you just stated it," religious tolerance ". This is talked about in the prophecies. For there ever to be peace in the middle east there has to be some sort of religious tolerance. That is why the vadican has repersentives from Israel to New York. That also seems to be the teachings of the the Catholic faith. The same prophecy talks of people becoming less and less in their faith. Which was stated in the last post. Another thing must happen for religous tolerance is people become less involed with their faths. We become a more pagan society. I'll give you all a good example how many Jewish people in the United states celibrate Christmas but don't beleive in the brith of Jeasu Christ. Easter is the same way. How many Jewish people get the kids a easter basket but don't beleive in the resurrection of Jeasus.
So you all can close your eyes to the written prophecy that the Anti-Chirst will rise out of the Roman Catholic church and the Beast will rise out of Europe. BTW the Beast is the western Europe military machine in case you didn't all ready know. Pay attention to the book of Daniel and the book of Revelations. These books tell the prophecy. There are a few great profits that are not of any religious fath. I have said it before and I will say it again I have nothing against the people of the Catholic religion for they are being lead a stray by the leaders of the Catholic Church.
I wish I was wrong on this one but I'm not.

Of course, the "original FCC definition" is half a century old by now
and is somewhat akin in evolution to the original Ford Thunderbird.
In the 50s, techs were indeed involved in serious VHF/UHF experimentation.
We HF peons were in awe of them getting their peanut tube homebrew designs
to function properly. In the 50s, the written exam for the techs and the
generals was the same. Times change and definitions change. We cannot
expect an entry level license to be for serious minded experimenters
anymore.

Hello,

Good luck in your quest for the General license. I think you will find it a very doable endeavor. Here are some suggestions...

(1) For starters, stop reading this NG. Studies have shown those who post here frequently typically suffer a 25 point decrease in I.Q. If you've bothered to read much on here then I'm sure you'd agree.

(2) I presume your biggest problem will be the code. Get a shareware code trainer program. There is a good list of them at: http://www.ac6v.com/pagez.html

(3) Listen to the W1AW code broadcasts. I found them very helpful. For that matter, listening to on-the-air QSO's in general is helpful.

73 and Good Luck,

Marv

Isn't it interesting that so many of the highly technical NCTA types
are now backtracking and trying to distance the *Technician* license
from *technical* matters.

How else are you going to know if your experiment works unless you
communicate with some one else? Now give me a break, we all know that
Ham Radio is about communications, electronics, and of course
experiments.

PS Stop complaning about Techs, they are Hams too!

Dead? Just how old are you? < Sorry I could not resist...:-) >

I really doubt allot of Technician class operators know who you are, or really even care. Don't take yourself so seriously. October was just a guess as to when the FCC would reallocate the bands, I really do not know. Out of curiosity, why did you not choose 14.060? That would have driven your point home a little more.

But this is a satellite newsgroup, why not meet up on FO-20 or FO-29 SSB? I have not collected enough antenna to work AO-10 yet.

Warmest Regards

I think that sentence is only partially correct.

The QCWA support of the new license still envisioned a strong technical content for the Technician license qualifications as evidenced from their comments which included "urges that the Novice Class license be continued as a route for the person who finds little difficulty with a Morse code requirement but LACKS THE EXTENSIVE SKILLS AND TECHNICAL KNOWLEDGE REQUIRED by the Technician Class examination." (emphasis added)

The ARRL supported something called a "Communicator" license, which would have been quite different from the new Codeless Technician class. This class would have had a low power limitation and privileges only above 222MHz.

The NCVEC, desirous of not having to develop new exams, suggested just dropping the code requirement from the old Technician class. Go figure! Their proposal was ultimately adopted, in large part because it allowed FCC to retain a 5-level class structure. (Only later was the Technician Plus class "added back in".)

The support of ARIG is a given since the proposal held promise of a dramatic increase in their market size. Go figure again! Why would they support a technically strenuous exam? Techies might tend to build equipment, not buy it!

1836. HATS OFF TO WB2OTK

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-18 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990618113139.13956.00000437@ng-fq1.aol.com>
Source record: 139208

I just had an hour QSO with the great WB2OTK and my initial opinion of him formed in 1989 is reinforced daily. He's an electronic and computer genius and the reason why some "jump" him is strictly out of jealousy. His grasp of computer technology amazes me and I hinge on his every word. Every time I talk to Rich I learn more and more about this thing called "cyberspace" and you can thank HIM for my mastery of it thus far and for all of the fantastic postings I leave on this board. Without his influence and guidance, I simply would not be here which would definitely prove detrimental to the importance of this entire thing called rec. radio. I realize I have become, in a rather short time, the stirrer that mixes the drink on this forum and the single greatest asset it has. And you can thank Richard Whiten and also my dear friend Dan Jeswald, W4NTI, for introducing the concept to me. Getting back to WB2OTK, when you hear my amazing signal from that Cloudwarmer, it's not really I who's responsible. It occurs through the wisdom and guidance and electronic prowess of the great OTK. Never having heard of a reflector beneath a dipole, by paying attention to the Lord of Ham Radio, I constructed the system and was awarded recognition beyond description. As I mentioned previously, my tape recording of what I thought were intelligent extraterrestrial signals has been verified in the labs of Arecibo and Dr. Alan Hynek for which I shall be written up in QST and CQ as well as going on CNN for an interview. I have already granted interviews with TIME, NEWSWEEK and US NEWS and WORLD REPORT. In all interviews I have stressed the fact that I owe my success to Rich Whiten and I believe he too will be soon recognized as one of the great electronic brains in the world. I mean the man has everything. A wonderful wife, family, home and financial comfort. And what you don't know is a lot of his wealth has come about by way of royalties garnered through inventions such as the analoid RF reference sigmoidascope, the inductive colostomic perforation bilateral electrocatheter and the rhomboid reflector used in gravitational analanalysis by NASA. If one thinks he tends to brag, then why has he never mentioned these great achievements? He made me swear that I wouldn't but it's about time he got the recognition he deserves. All of ham radio owes a debt of gratitude to Rich Whiten for his astounding electronic intelligence, his antenna wizardry and mastery of computer technology. It is a great privilege and honor knowing and appreciating this great man and because of him, ham radio will continue to grow and improve in the 21st century. AF2Y, Doc aaaaaaaa

:-) Yes, of course. A "fun quotient" could be derived for each mode, and
the number of questions would scale with that. The more fun the mode, the
more questions we would get to answer about it. The most boring mode
would have the fewest questions.

You're trying to be a trouble maker, aren't you Cecil. ;-)

This crap surly reinforces my opinion. Charlie is undoughtably the
stupidest man on the planet. Charlie like you I beleived what old
porkbut said till he got me to trust him and then he burned me! All
though there were those out there that tried to warn me. porkbut is a
candidate for socail psychology, he has no morals. The only thing the
guy knows about the computer is what he has picked up from me and a few
other experts in the feild. The man is a complete fraud. He is no more

than a general class that memorized the test in the late 60's early 70's. The wouldn't know the pythagorean theorem from a parallelogram. I would ask the idoit what a gate is and he would say that it was the opening for a fenced in area. If you where to ask him what a source was he would thats where you buy things. I wouldn't begin to say what old porkbut would say what a drain is maybe where he lived. This guy is a pure fraud! I don't think that the idoit would even know what a EEPROM stands for much less about the processing address lines of a pentium chip works. I wonder what the fat pig would say if you caught him off gaurd and asked him what the ALU is in a computer. porkbut is no more then a con artist. I talked to the head guy at Dentron three years ago at the Shelby ham fest and he said that is a wonder that somebody has not died working on one of his so called home brew amplifiers. The man is a menice! He lied to Riley about the pair of 8877s homebrew amp, and he lies everytime he opens his mouth. So Charlie it will be just a matter of time before he gets you. He has allready made you out to be a true fool. He ripped Tom off you know the guy that is a cripple and just spent the last 13 months in the hospital. He burnt Tom on a amp too. Then he made Tom think that he did something wrong to burn the amp up. porkbut does not get rid of anything unless he has allready scerwed it up. He traded Bob down in Flordia a Hiel mic that didn't work. He told Bob that the mic was fine. Bob never did get it to work and as soon as I exposed porky Bob got switched back. I wonder who got the bad Heil mic from porkbut. Bob would never admit to to our conversation on the phone because he is anotherone that doesn't want to put up with the mouth of the porkbut radio bully. So here are just a few examples about porkbut the conman of 75-meters!
As you see Charlie you little suck off on porkbut doesn't prove anything but you are a bigger idoit then we all thought.
Oris

Hello All,
I have for trade a MFJ 1278 Multimode TNC Has 10 modes and dual ports. Includes all the cables, software and manuals. Has some scratches on top of case but works well.

I would like to trade this for some sort of 10m fm radio, 2meter radio or a kenwood DG-5 Digital display for my kenwood ts-520s. You may send email me other offers you have for trade. Lets make a swap! E-mail me today!

It was not I who downgraded the requirements for the technician
license, Hans. Your gripe is with the FCC. I liked the name
suggested by the ARRL, i.e. "Communicator".

Didn't mean "popularity" in the "fun" sense, Jim. I meant it in the
"frequency of use" sense. From Webster's:
"popular - frequently encountered or widely accepted"

Oh, okay. One would tend to think a correlation might exist though, i.e.
most fun/most popular - least fun/least popular. Not that there's
anything wrong with that. Maybe the VECS could host a popularity contest?
Or, all modes could be treated equally - as you originally suggested.

50. But the fact that I need to expire has to do with my use of Morse code, not my age.....

>I really doubt allot of Technician class operators know who you are, or >really even care. Don't take yourself so seriously.

I'm one of those 'pro coder' people. At least that's what they tell me. A lot of technicians want all of us 'pro coders' to dry up and blow away, as part of the new program to 'fix' amateur radio. But don't ever worry about me taking ANYTHING seriously.....

>Out of curiosity, why did you not choose 14.060? That would have driven >your point home a little more.

Because you said you wanted to TALK on the radio, so I assumed SSB. 20 meters is the best band we've had lately for propagation to the U.S. W5's I was listening to at 1400 GMT were all well over S9 out here. I assumed you were in the U.S., based on your call.

Had you said TYPE on the radio, I might have said 14.060 because that's a frequency commonly used for digital modes. I wasn't trying to make any points, I was trying to make a sked to talk to you.....

>But this is a satellite newsgroup, why not meet up on FO-20 or FO-29 SSB? I >have not collected enough antenna to work AO-10 yet.

Two reasons. One, footprints. You and I will never be able to talk to each other on FO-20 or FO-29 unless you move to Japan or Australia. I'm not planning on moving to your country any time soon. Two, my satellite carreer is over, I gave my antennas away to an aspiring technician class satellite operator..... wanna buy some satellite modems or a UHF preamp ? I think I have another KLM UHF beam out in the carport, I'll throw that in as a bonus if you want to scrape the Pacific island corrosion off it.....

No actually Doc, in rather short time you have become whats known as a Troll, Not unlike Burt Fisher, Drew Durrigan, Masataka, and several slightly unbalanced individuals who pass through, you stir up the group with non-amateur usually religious/racial or other type posts. Eventually everyone will get tired of you since you offer little to nothing and hopefully you'll go away, but for now I suppose you'll continue doing your thing perhaps thinking that your the new newsgroup celebrity. I suppose when you go back to 14.313 you'll brag about what a great post you've made and how you really stirred them up this time eh? Yawn....

This seems to be true for the vast majority. You will probably have enough time to also study for the Advanced theory test. In other words, you might consider going straight for Advanced, and skipping General.

I'm particularly partial to ARRL's study guides for the General and Advanced tests. They have the right amount of theory to prepare for the exams. Much of the material comes straight from their Handbook, which has much more background on all topics discussed.

For code practice, I like Morse Academy's Morse Tutor exercise. It times your response to each character sent. This helps you quickly identify the characters that give you trouble (assuming your typing speed is not the limiting factor). Take your worst dozen or so, and focus only on those for the session. In a 45 minute study session, I typically run the Morse Tutor with all characters for two 6 minute sessions, identify the 12 slowest, and then work on those for four more 6 minute sessions. I place less emphasis on wpm going this route; you can check it pretty easily with a 6 minute proficiency session to wrap up.

I got my Tech+ ticket in late April. I passed my Advanced with near perfect scores four weeks after that. Today, four weeks later, I'm copying 18 wpm solid, 20 wpm is still so-so. I'm in no hurry for the Extra, and worked on the code maybe twice a week in that time. Most QSO's on the air are solid copy now. I even generated a mini pileup last evening. After signing with an SP8, I grinned as the radio came alive with several late comers calling. It was several long seconds before I realized it wasn't stateside calling Poland; it was DL stations calling me! :-) For me, this was particularly gratifying.

For the time investment of 1 hour a day, 5 days a week for 12 weeks, I'm an active part of a global community. It's a short trip, and well worth the effort. My goal now is to build my skills to the level I saw from one mobile CW operator. His copy and fist while driving home were cleaner than mine while sitting in my shack.

Michael.

Dr OM/YL

This mail to inform You that I resently have uploaded an updated
beacon list at my website covering a 50 MHz world wide in six
continantal splitted listings covering, Africa,Asia, Europe,
North America, Ocean/Pacific and South America.
An worldwide 70 MHz list and European 144 MHz and 432 MHz lists
are added too.

These lists can either be viewed in html or downloaded as a ZIP
file in band pacages, the ZIPed version contains a bandplan aswell.
As something new its now posible to view the files in plain text,
as too.

These can be found at http://www.qsl.net/oz6om/

I hope You find the listings of use ...

Quite true. I remember sitting with my newly purchased HT, and
programming in the repeater frequencies. I would give a quick call on
each, and listen for the courtesy beep. Having thus completed the
experiment, I went on to the next repeater.

Another perfect example of "But this is the way we always have done it!".

I'm sorry Jeff but sometimes change is good, even if you are forced into it kicking, screaming and not wanting it!

I live in an area of Southern Indiana that has a lot of Amish people moving into it. I admire their way of life and their adherence to their lifestyle! On the other hand if we all were like them resisting change this "E"mail and the computer it's wrote on, or even the electricity that powers it would not be possable. All because progress requires change. The same is true for ham radio either it changes to meet the world of today head on, or it will be passed up by some other technology, (or FCC selling our bands) just as we drive past those Amish buggys slowly going down the road because "Thats the way THEY ALWAYS DID IT"!

And again I don't want to see Amateur Radio turn into another CB channel 19 sewage pit any more than you do, just up to date since the 2000's start in less than 200 days now! 73 to you Jeff!

I AGREE STRONGLY WITH THE BASIS AND PURPOSE OF HAM RADIO BEING AN
EDUCATIONAL, CONSTRUCTIVE TECHNOLOGICAL HOBBY.

Some of the above posts and others on this thread, while they may
contain some historical truths, can not be seen as respectful of any
faiths. IMHO opinion all faiths have come a long way since the days of
the crusades, the inquisition and other religious based passionate
movements. Even the holocast is not exactly to be thought of only on a
religious basis. Hitler, the mad dictator, tells us why he hated Jews
in his biography "Mein Kamph" [My Life]. His actual crazy reasons are
not religious reasons. I like to think that Hitler used Jews as a
scape-goat and as a means of arousing nationalism in the majority of
Germans who were suffering from a world-wide economic depression. He
did not think of "The Jewish Problem" as stemming just from religious
differences. He though of Jews as being of some other race than the
true Germans and thought in a paranoidal manner that the Jews were
trying to establish "a state within a state". His crazy views were
based on racial and political hatred more than religious hatred for he
had wrongly subdivided people who were not in his self-created fictious
unscientific Arian Master Race from all other peoples. He believed that
all other races were inferior to the Master Race regardless of religion.
I do not blame any entire religious group for the Holocaust. Some
Catholics and some Protestants in Germany saved some Jews...some were
indifferent and some are alleged to have helped the NAZIs round up the
Jews..No real historian blames or excuses any entire religious group.
Although most Germans were Protestant and Luther was German there were
always quite a few Catholic Germans as well.
I am of Jewish ancestory but I am not very religious in any organized

way. I once was a student physics teacher at a Catholic Military Accademy. Because it was customary there, I had to let the Catholic students open each class with some words of prayer...most of which would be tabboo to a religious orthrodox Jew....BUT I have found that modern Catholics are very tolerant of both Jews and Protestants in practice and very sympathetic to all faiths. The Old Testament is taught as being the Bible of the Jews and the Jews are credited with receiving the Ten Commandments and all else that may be good in the Old Testament. Catholics are also taught to be understanding of the mistakes of the past and to strive for world peace. The Catholic Popes seem to cling to their old customs of being anti birth control and pro male dominance BUT they have officially changed their old dogmatic views of the Jews. The Cathlolic Church, in my understanding, is more of a "living" religion than many others, because the Pope CAN change the rules and local Cardinals can also do what is best to foster peace in the countries where they serve.
The Vatican has now accepted ambassadors from Israel. In New York there has been a good dialog going between Catholic and Jewish leaders for some time and both teach their followers to respect each other although they do not approve of religious conversions or particullary strive for them. There is a local cable TV program where a Catholic priest and a Jewish rabbi share their opinions in a friendly respectful manner.
On the down side, I have seen hate propaganda originating from some religious groups, partucularly Protestent sects, which usually tries to make each group hate the others because of purported or real wrongs of the past. Unfortunately some Protestant sects seem to have tried to make Jews hate Catholics and Catholics hate Jews but I don't think that the hate literature is taken seriously by either. Such hate can never serve any useful purpose...nor is it IMHO in keeping with the true religious spirit of any religion. Sterotyped hate is not just the result of religious differences in many cases but may be the result of bad individual experience. If you get gyped by a Jewish merchant you might hate all Jews, although all Jewish merchants are not dishonest and all Jews are not merchants...and no religion teaches people to be crooks. Haters are never very logical because hate is not a logical emotion.
Some people believe that kids are born loving everyone and must be taught to hate. I do not believe that because I have seen some pretty cruel kids. IMHO kids have to be taught to respect all humanity and to love life and to care about all other humans' safety and well being.
IMHO symbolism, such as numerology or the Pope's hat, is just a bunch of foolishness. It belongs with the UFO nuts in junk newspapers. Heck a lot of religious leaders, including Popes wear similiar skull caps (yamucules). They just differ in color. I wonder what they will say about Hams 2000 years from now if they dig up some of the Hats that Hams are sold at Hamfests?

PLEASE keep thinking,
I never met a Ham I didn't like,

Hams need more license classes,
Bob Wex w2ilp (Interfaith Living Pope?)

The Ugly Side of the Internet

Jack Kay
Wayne State University
Presented at the Annual Conference of the National Communication Association
Chicago, Illinois
22 November 1997

"The Internet is, by far, the greatest and most
significant achievement in the history of mankind"
(Hahn & Stout, 1994, p. xix)
"The Internet is the greatest thing that has ever
happened to hate" (Goldberg, 1997, on-line).

Josh Glowens is a fictional character created to help understand how beliefs and actions antithetical to a civilized and egalitarian community take root, grow, spread and live on in future generations. I developed Josh to help answer a frequent question I get when speaking to groups about "cyberhate." Most of my audience members cannot understand how anyone could possibly believe the racist and anti-Semitic "garbage" that fills so many pages on the World Wide Web. They cannot understand how teenagers become willing participants in chat groups that advocate white power, destruction of "mud races" and hatred of the federal government. They cannot believe that the Internet has the potential to introduce youth to a community in which only whiteness is valued. Moreover, they believe that youth will see through the transparent appeals and reject the message. "Is this really dangerous?" is the single most asked question.
The Internet: A Context

Before we learn more about the transformation of Josh Glowens, I need to establish a context for the story. I have studied the communication strategies and recruitment efforts of white separatist groups over the past dozen years. The work discussed here is part of a larger, on-going ethnographic study of white supremacy. My research began in the mid-1980s and is based on observations at meetings and rallies of white supremacist groups, interviews and correspondence with supremacist leaders and followers, attendance at criminal trials of white supremacist leaders, interviews with law enforcement officers who investigate hate groups, print and electronic publications of groups such as the Aryan Nations and White Aryan Resistance (WAR), computer bulletin boards such as the Aryan Nations Liberty Net, white power newsgroups and listservs, and the world wide web home pages of the Aryan Nations and related groups.
While public debate surrounding the World Wide Web centers on "cyberporn," hate groups have appropriated computer technology and the Internet to advance their cause. Since 1985, members of white supremacist groups and their sympathizers have used computer technology to disseminate messages, interact with each other

and recruit new members. Initially, groups such as the Aryan Nations established computer bulletin boards that enabled anyone with a personal computer, telephone, modem, the correct phone number and, in many cases, an authorized password, to read messages, receive and send mail from and to other members, browse materials stored in the system's reference library, and participate in on-line conferences with other members. The bulletin board systems of the 1980s involved hundreds and possibly thousands of people. Today, hate groups have sites on the World Wide Web with text, graphics, sound and video, in addition to listserv mail groups and Usenet newsgroups, involving thousands and possibly hundreds of thousands of people. HateWatch (1997), an organization that monitors hate group activity on the Internet, reports: Prior to the advent of the Web, hate groups had limited influence due to financial constraints and their own geographical isolation. Now the situation has changed. The Internet has eliminated these natural barriers and allowed hate groups to disseminate their propaganda inexpensively and to a vast and growing audience. (on-line)

Leaders of the white supremacist movement have not been reluctant to discuss how they use Internet technology. Tom Metzger, leader of the White Aryan Resistance, states:

The Internet provides us . . . with the ability to reach many more people much faster, uh, reaching many many young people. We're aiming at the young people. And it works quite well that way. . . . Many times then you set the hook with a person and they come back. And it's like selling anything. If they come back then your opportunity to change their mind on different subjects is available. . . . (Time, 1996, on-line).

Daren Brittell, operator of a World Wide Web site for "Independent White Racialists," concurs:

My main message is to wake white people up to the genocide that is being taken place [sic] against our race right now by the new world order and the traitorous government in Washington and their lackeys. . . . The Internet has really helped us get our message out to a lot wider audience we wouldn't have been able to reach earliers, before. . . . Most of my activities were local bases, around where I live, I would do a lot of pamphleting and distributing literature, try to spread the message. And now it's given me a chance to reach people all over the world. (Time, 1996, on-line)

White supremacists have become quite skillful in using the new medium. Heller (1996) writes:

Hate literature once consisted on cheaply printed, poorly designed pamphlets and flyers that were sold by mail, sniped on hoardings, and deposited like bird droppings on car windows. Today, on the World Wide Web, white supremacist and neo-Nazi "cyber-guerillas" produce professionally designed home pages with sophisticated graphics and logos. Like the radio demagogues of the 1930s, they have carved out their niche in a new medium, mastering its various authorship and design programs with skill and savvy. (p. 22)

The Internet affords many mechanisms by which textual messages can be exchanged. E-mail is used by more people than any other resource on the Internet (Hahn & Stout, 1994, p. 67). Under the right conditions a message can be sent from one location and received at thousands of remote locations

throughout the world in a matter of minutes. Members of white supremacist groups use e-mail to communicate among themselves, recruit new members, and attack non-supporters and enemies. The two most widely used e-mail distribution systems by white supremacists include Listserv and Usenet.

A Listserv enables individuals to participate in moderated and unmoderated discussion groups on topics of interest to them. The discussion takes place through electronic mail messages posted by Listserv participants. Each message is sent via electronic mail to every person who has joined the discussion group. Some Listservs use software that automatically enrolls anyone who sends a subscription e-mail; other Listservs use an administrator to screen applicants. Listserv participants simply open their electronic mail to view the latest messages. Messages on moderated Listservs initially go to a Listserv administrator. The moderator can send the message as originally composed, delete it, or edit it. Unmoderated Listservs use software that automatically sends the message as originally composed to all Listserv subscribers. Thousands of Listservs exist, focusing on topics ranging from sightings of Elvis Presley to coping with immunodeficiency disease.

Most Listservs operated by white supremacist groups are moderated. One of the most active white nationalist Listservs is the Stormfront Mailing List (access: listserv@stormfront.org). Other lists are operated by the Canadian Patriots Network and by Resistance Records. The temporal structure of these Listservs is an ongoing asynchronistic meeting. Users typically browse the e-mail subject heading line to determine if they want to read the particular response. Listserv administrators justify restrictive membership and moderating the list by pointing to the "ZOG spies," "federal thought police," and the "Jew Anti-Defamation League thugs" who they claim continually strive to restrict thought and speech.

Originally developed as a place on the Internet to post news, there are now well over 5,000 newsgroups involving millions of individuals and tens of millions of messages (Hahn & Stout, 1994). Using newsreader software to read and post messages, subscribers discuss subjects ranging from political scandals to dirty jokes. Baym (1995) studied the newsgroup rec.arts.tv.soaps (r.a.t.s.), a group involving discussion of daytime soap operas. She describes the group's temporal structure as "an ongoing asynchronistic meeting" (p. 144). The temporal structure is affected by the structure of the Usenet system. Baym writes: Usenet also shapes the participant structure of its interaction. Usenet links almost 3 million people, any of whom can read anything posted to any group received at their site. Because anyone can read or participate, all Usenet interaction is fundamentally multiparty and public. People never know who all the readers of their messages are. (p. 145)

A post on a Usenet group is referred to as an "article." Each article typically includes a header, body, and signature. The header includes up to 20 lines of text which specifies such information as to which newsgroups the post is being sent, the size and subject of the message, and a one-line summary of the article. The body provides the text of the article, using words and other symbolic construction of letters and characters. The optional signature allows message authors to identify themselves and to provide a brief statement, as in the following signature appearing on alt.politics.white-power:

Reminding the world that Jews are cowards Watcher

Several newsgroups focus directly on issues related to white separatism, including alt.politics.nationalism.white, alt.politics.white-power, alt.revisionism and alt.skinheads. Most newsgroups are not moderated by a system administrator. Consequently, white separatist messages are found posted in many newsgroups that do not welcome such messages. Racist messages commonly appear in newsgroups that focus on the arts, entertainment and religion. Such messages are often ignored and occasionally result in "flame wars" in which the posted message is followed by critical responses and the message originator is sent a large number of acerbic e-mail messages. Some people find the "KILL files" feature of their newsreaders program a welcome feature, enabling them to avoid messages on specified topics or from particular persons.

Text, in its broadest form, is the basic unit of the World Wide Web. Most frequently, text on the Web appears on the computer screen as it would on a sheet of paper--as words, sentences and paragraphs. Text may also include drawings, photos, and graphics, again as these would appear in a magazine or book. As Web design and technology has advanced, text has expanded to include moving images, video and sound. Web visitors now view multimedia texts, complete with running headlines, voice-overs, still photographs, live video and audio, graphics that move and change color, as well as printed words. Text includes "radio broadcasts" and conferences with real time audio and video. A browser is used to access a text which is linked to other texts through hypertext. The browser allows the user to navigate the various texts on the Internet. The World Wide Web is "an attempt to organize all the information on the Internet . . . as a set of hypertext documents" (Hahn & Stout, 1994, p. 497).

The first hate site to appear on the World Wide Web was Don Black's Stormfront (access:http://www.stormfront.org/) in May of 1995 (Anti-Defamation League, 1996). Since that time I have discovered Web sites for over 100 white supremacist groups and several hundred individuals. Heller (1996) writes:

Hate literature once consisted on cheaply printed, poorly designed pamphlets and flyers that were sold by mail, sniped on hoardings, and deposited like bird droppings on car windows. Today, on the World Wide Web, white supremacist and neo-Nazi "cyber-guerillas" produce professionally designed home pages with sophisticated graphics and logos. Like the radio demagogues of the 1930s, they have carved out their niche in a new medium, mastering its various authorship and design programs with skill and savvy. (p. 22)

Most of the information placed on the World Wide Web by white supremacist groups is visual, taken from their print materials and electronic bulletin boards and enhanced with bold visuals. A few of the sites are making use of sound and video. Visitors to the home page of Resistance Records (access: http://www.resistance.com) can listen to excerpts from music by such bands as RAHOWA, an acronym for racial holy war, and Aryan.

Currently, use of the Web by white supremacist groups is primarily asynchronistic. Groups and individuals design Web home pages and place them on a server. The pages are then privately viewed with a browser program. Viewers are often invited to provide comments by e-mail. These comments are sometimes posted for general viewing. Discussion of the Web home pages often occurs in Listserv and Usenet groups, providing an interactive and synchronistic dimension to a primarily receptive and asynchronistic medium.

Various white supremacist Web sites direct viewers to Internet sites where

interactive and synchronous communication takes place. The 3.950 MHz. Amateur Radio Political Discussion Group home page (access: http://www.usaor.net/users/ipm), for example, provides a schedule for ham radio operators and short-wave listeners to interested in participating in discussions about the "on-going destruction of American's founding race" (1997, On-line). I have also come across white supremacist home pages which directs users to On-line conferences with real time audio and video using CUCME software. The most frequently used interactive Internet medium is the Undernet. Users access the Undernet through IRC. They find a 24-hour-a-day place to conduct real-time, textually-based discussion on virtually any topic with users from across the world. Harley and Hahn (1994) describe IRC as a large party where multiple conversations occur:
Whatever you say can be heard by everyone else in your group. You can also eavesdrop on other people's conversations. If you like, you can walk from one group to another, join in one of their conversations or just listen. You can also invite someone (or several people) over into a corner for a more private talk. And , if the need arises, you can whisper a private message in someone's ear. (p. 412)

IRC users learn a system of commands that enable them to do such tasks as join group discussions, list the number of users on a particular channel and their nicknames, switch from public discussion to private discussion mode. Although discussion is live, users can go on-line without being physically present through the use of a robot program. They may then record the conversation that occurs by saving it on their computer.
Virtually every topic covered in Listservs and Usenet groups is discussed on IRC channels. Specific channels on which subjects of interest to white supremacists are discussed include #skinheads, #NS_Nation, #aryan, #whitepower, #kkk, #nazi, and #aryan_nations (access, for example, Server okc.ok.us.undernet.org 777). A sample of a public conversation on the IRC channel #aryan follows:
So, you going to Jubilee?

Yeah, wouldnt miss it.

*** Swede (xxxx@xxx.xxx.xx) has joined channel #aryan

Hi all, white power !!!

Feds will be there, like always.

Hi Swede, where ya been?

*** ZOGbuster has left channel #aryan

The Transformation of Joshua: A Text

Mrs. Glowens describes her fifteen year old son, Joshua, as "a good boy-a typical teenager who loves sports, dislikes school, thinks that he does not need his parents and waits for the day when his learner's permit is replaced by a driver's license." She is frustrated that Josh does not do better in school, but is pleased with his interest in computers. At a parent-teacher conference Joshua's computer science teacher raved about her son's ability to navigate the

web and to use html. Mr. Glowens works hard on the assembly line at one of the big three auto plants. Several years before Josh started high school the family moved from a blue collar neighborhood to an upper-middle class suburb in order for Josh to go to one of the better schools. That move was at the insistence of Mrs. Glowens who decided it was important for Josh to go to college, even though she and her husband had barely graduated high school. Mrs. Glowens took a part-time job at a bakery and Mr. Glowens puts in lots of overtime to afford the steep mortgage payments.

Although Mr. Glowens never votes in political elections, he is quite opinionated. Government, he feels, has for too long given out handouts. At the dinner table he often complains about taxes and how sick he is to see his hard earned money going for welfare. The following is a typical diatribe. "I started out with nothing and look where we are now, in one of the best suburbs in the country--in a house that costs twenty times what my dad's house cost. And I did it without getting money from the family like most of our neighbors did."

Overt racism and anti-Semitism did not dominate the Glowens' household. Once Josh overheard his dad telling a joke to some friends about a rabbi who was more in love with money than his wife. Josh's mother once said at the dinner table that the reason Jews were so successful is because the race valued education and all Jews went to college. Josh did notice that his parents seemed uncomfortable when an African American family moved into the house across the street. Josh heard his dad say to mom, "I don't know how they can afford this neighborhood, and they even have a Lexus. "

The vast majority of students at Josh's high school are white--African Americans comprise less than five percent of the student body. The school does have a relatively large Jewish population--about fifteen percent of the student body, with a number of Jewish students wearing skull caps to class. Josh often felt the Jews and the African Americans were cliquish. Each group congregated with one another at lunch and at sports events.

Josh's parents gave him a computer for his fifteenth birthday. He soon bought a modem and talked his father into a subscription to America Online. Josh also joined a local freenet service provider to access newsgroups.

Josh's least favorite class was world history, required of all tenth graders. Josh disliked being forced to memorize dates of things did not seem very important. He did not understand how knowing about the events that started the first World War would do him any good. He also did not like the teacher, Mr. Greenburg. Josh felt he played favorites, always assigning the Jewish students the highest grades on papers and tests.

John did okay in Mr. Greenburg's class, until the unit on World War II. One day Mr. Greenburg showed a movie about the Nazi troops. Josh lost it during a newsreel scene in which a Nazi platoon marched in goose step formation. The stormtroopers looked hilarious to Josh, their large strides exaggerated by the high speed of the filming and the march music. Josh began by snickering which quickly became side-slapping laughter. Mr. Greenburg went ballistic. He stopped the film and demanded to know why Josh was laughing. Josh tried to explain but broke into further laughter. Mr. Greenburg became angry: "American soldiers lost their lives fighting the Nazis. The Nazis murdered millions of Jews. This is nothing to laugh about. Perhaps you will see the seriousness of this matter by writing a paper--a 2000 word essay on the Holocaust."

Josh left alone at the end of class, avoiding the stares and whispers of his classmates. He went home to sit at his computer and escape the terrors of the day by joining his favorite Cyberspace game site. After an hour of this he got into one of several chat rooms he frequented--this one where he pretended to be 17 and a varsity football player. His visit was cut short when mom called him down to dinner. When asked what happened in school that day Josh explained that he was doing a term paper on the Holocaust and he planned to do his research using the Internet.

After clearing the dishes Josh returned to his computer. After connecting to his Internet Service Provider, Josh launched his web browser, Netscape Communicator, and selected a bookmarked site from which to conduct a Lycos search (access:http://www.lycos.com). Josh typed in "Holocaust." Twenty seconds later the first page of search results appeared, indicating that 10,679 relevant results were found (see fig. 1). Josh went to the very first entry, a FAQ (frequently asked questions) listing for an archive on something called "The Leuchter Report" (access: http://www.cs.ruu.nl/wais/html/na-dir/holocaust/us). He read the page in fascination (see fig. 2), seeing such lines as "Impossible to Kill 6 Million People at Auschwitz," "Why would there be a swimming pool at a death camp," and "The 'myth' of the Holocaust was created solely for the financial benefit of Israel." Josh was curious as to why so many pages were devoted to refuting the claims of a guy by the name of Leuchter. Josh wrote the name down, thinking that he would refine his search by adding the name. Josh then visited some other sites, including the Nizkor Project (access:http://www.nizkor.org/hweb) (see fig. 3) and the United States Holocaust Memorial Museum (access:http://www.ushmm.org) (see fig. 4). These sites, and others, preached the need to remember the Holocaust so that it could never happen again. To Josh the web pages seemed aimed at teachers, with lots of lesson plans and instructional resources. "Not very interesting," he thought.

Josh decided to refine his search by adding the name "Leuchter." This change produced 132 relevant results (see fig. 5). Josh skipped the first several links to the Leuchter report and visited the Z&#65533;ndelsite (access:http://abbc.com/zundel). On screen appeared a colorful site with the boldfaced headline, "The Zundelsite: Did Six Million Really Die?" Josh read the site's mission statement:

The Z&#65533;ndelsite has at its mission the rehabilitation of the honor and reputation of the German nation and people. Specifically, the Z&#65533;ndelsite challenges the traditional version of the "Holocaust" - an Allied propaganda tool concocted during World War II - that is not based in historical fact but is a cleverly used ploy to keep the German war time generation and their descendants in perpetual political, emotional, spiritual and financial bondage. (on-line)

Josh read on to find page after page in which credentialed people supported the claims of Mr. Z&#65533;ndel. Josh noted a number of links to which he would later return.

Josh went to the next page of his Lycos search (see fig. 7), selecting a site that seemed objective, "Holocaust Internet Sites" at the North Harris College Learning Resource Center (access:

http://nhmccd.cc.tx.us/contracts/lrc/kc/holoca) (see fig. 8). Many of the links on the page were ones Josh found from his earlier surfing. Josh was struck by one heading, "Holocaust Denial." Here he discovered that there were Usenet discussion groups devoted to the Holocaust. He wrote down the addresses and then visited the Greg Raven IHR materials site (access: http://www.kaiwan.com/~ihrgreg) (see fig. 9). Here Josh learned about the Institute for Historical Review (see fig. 10), a "not-for-profit research group headed by distinguished historians who told the truth about the Holocaust."
After several more hours on the web, conducting further searches for "Jews" (15,843 relevant results--see fig. 11) and "Jews Aryan" (345 relevant results--see fig. 12), Josh went to bed, his head swimming.
Josh got up early the next morning and visited newsgroups devoted to white power, revisionism and skinheads. He also found several IRC (Internet Relay Chat) channels devoted to these subjects. He lurked. Days later, he participated.
Josh turned in a paper on the Holocaust to Mr. Greenburg. Mr. Greenburg praised Josh for the paper. Josh had taken the advice of "WASP Power" from Cleveland who he met in the White Power chat room: "Give the Jew what he wants--quote from the Holocaust Museum page and everything will be fine." But Josh also purchased several hundred stickers from the Aryan Nations web site--stickers with the Nazi swastika and "6 million Jews was not enough" which he pasted all over the school late one evening. Josh also visited other Web sites (see fig. 13 and 14).
During the next several years Joshua spent countless hours on the Internet, becoming a leader and member of an on-line community that promoted white supremacy and anti-Semitism. He grew increasingly distant from his parents. His on-line activities went off-line, with frequent attendance at reich-'n-roll concerts, skinhead marches and Klan rallies.
At age 21, Josh entered prison, sentenced to 10-20 years for a hate crime in which an interracial couple was nearly beaten to death in a skinhead initiation ritual.
Brighter Future: A Subtext

One could easily dismiss Joshua as a figment of the imagination of someone who has studied hate for too long. Unfortunately, Joshua is not so easy to ignore. Fortunately, there are not hundreds of thousands of Joshuas or even tens of thousands. Nonetheless, Joshuas do exist, and they are multiplying.
I exit this discussion with a series of "what if?" questions.

* What if Josh's parents had placed his computer in the family room for all to see rather than in the privacy of his bedroom?
* What if Josh had taken a debate class in which critical thinking and critical evaluation of Internet sources had been emphasized?
* What if the Holocaust Internet sites Josh initially visited were designed for students rather than educators?
* What if the first site Josh found in his web search for "Holocaust" did not address the Leuchter report?
* What if the North Harris College Learning Resource Center had not provided a link to Greg Raven's Institute for Historical Review materials?
* What if Mr. Greenburg had addressed the issue of Holocaust denial in

his unit on World War II? What if he did not use a paper on the Holocaust as a means of punishment?
* What if Internet Service Providers chose not to provide space to hate groups?
* What if Josh began his research by visiting HateWatch (access: http://hatewatch.org), a site that provides a context for the hate groups it links?
* What if organizations such as the National Communication Association and the National Federation had alerted the public to the dangers of hate on the Internet?
* What if Joshuia was not a fictional charcter?

> referred to as "ham" have any class?

I must admit that I do both: - Eat Ham and Ham it up. I don't eat Ham
on Jewish holidays. I had a Jewish friend whose parents had the nerve
to serve pork chops to his blind grandmother during a Jewish Passover
sedar. That was because pork chops were much cheaper than kosher lamb
chops. My friend did nothing to stop this sacrilege; not only that, but
he told everyone about it. After we heard about that, we refered to him
as the Patron Saint of Israel.

I guess that when we all go to Hades some of us Hams will bring the
air-conditioners, some will bring the beer and some will bring radios so
we can try to work DX to more heavenly authorities. (:o0)

I never met a Ham I didn't like,
Hams need more license classes,
PLEASE keep thinking,
Bob Wex w2ilp (I Like Pork)...but I know it isn't kosher.

I don't think that most Americans think that Jewish
Americans are very religious. Most Americans think
that Woody Allen is a typical American Jew. I won't
debate that.

I have met many obese Jews. I myself am not obese but just a little bit
overweight. Jews, like all other humans, do come in a variety of shapes
and sizes.
-
> "I have no purpose to introduce political and social
> equality between the white and black races. There is
> a physical difference between the two, which, in my
> judgment, will probably forever forbid their living
> together upon the footing of perfect equality... I
> am in favor of the race to which I belong having the
> superior position." -Abraham Lincoln

Yep -
It is a myth to believe that Lincoln freed the slaves because he
himself believed that they should be freed. In fact he wanted to
appease the Southern slave states in order to prevent their succession.
But the South severed itself from the union anyway. Upon winning the
civil war the slaves were freed mainly to punish the South. Lincoln had
to free them or the war would be seen as having no purpose.
On the other hand many Blacks said that Mark Twain (Samuel Clemens) was
a racist because he used the n..... word in some of his stories. It
was characters Clemens created like Huckelberry Finn that used the n
word but not Clemens himself. He just made his characters speak in
the way that seemed real because that is the way real people spoke at
that time. The Black Sam Clemens haters should have read "Puddenhead
Wilson", which pokes fun at racism and
shows that Clemens was an anti-racist at a time when most people were
racists. Unfortunately "Puddenhead Wilson" was banned from
schools before "Huckelberry Finn" because it tells of interracial
sex. Clemens also contributed much money to schools of higher
education for Blacks.
Yep -

You have to study history and read more than a few quotations in order
to understand people.
Heck...Sometimes I quote myself...and I'm not always so sure what I
really meant when I said some of the stuff that I said...so I guess I
shouldn't get upset when others get me wrong.
I never met a Ham I didn't like,
Please keep thinking,
Hams need more license classes because a few classes cant fit all,

I dunno about the sexual overtones part but what has this got to do with Ham Radio Policy? I thought that such talk should at least be miscellaneous if it did have to refer to Hams. It is bad policy to make such jokes here because some people have read nothing for so long that now they can read anything into anything.

1882. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-18 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7kcbv9$2gl@news.Hawaii.Edu>
Source record: 139263
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Yes Sir-re folks we just received OFFICIAL word from Rabbis
Schmeckelheimer, Gottinnew and Bezeminhoden the supervising officials
on a historic archaeological "dig" at TOOT HBRUSH in the Negev.

This information surfaced after a long and exhaustive and costly search
in a hostile environment by dedicated individuals.
It formally indicates that God gave Moses in reality 3 Stone Tablets
with 15 Commandments on them.

The Relevant fact is that DUE to the Negligence and Big Time Screw UP
of "Ichak" Ben-Swartzbarg (The Patriarch of the Swartzbarg Clan)
Official Tribe records indicate that this Putz's ONLY JOB was to Clean
up the Path of loose rocks that Moses was to take down from the Holy
Mountain, Need I paint the picture any further and thus we only have
the Present 10.

BTW "Ichak" Ben-Swartzbarg previous job according to Tribe records was
as the "Chief Navigator to the Tribes Of Israel" (this explains the 40
years wondering "lost" in circles in the Desert)

And mow 5 Thousand plus year in the future and it looks like we are
still cursed with the Mashugana Putz Swartzbargs, Now its
Charles "Yentill" know better as AF2Y "Always Fondles Youngsters"
the "Mighty Kosher Kontender", Let us Pray for Deliverance from
Mediocrity.

Don't get me wrong and I'm certainly not trying to hurt anyone's
feelings I hope.
The main problem with this newsgroup is the presence of a small-small
group of frustrated schmeggee pseudo intellectuals derelicts
in "hiding" from reality, this is spearheaded by the stupendous loose
lipped Intellectual Lilliputian AF2Y and his lackey soon to be X W2OTK.
We sorely need an infusion of sharp intellect, substance in writing and
most of all a dignity of class to combat the mediocrity that AF2Y and
his entourage bring to this newsgroup.

Let us Pray for Deliverance

I want to apologize to Joe Schlatter and the Schlatter family for my
crude attempts at humor with regard to the above web-sites. I thought
that "org" was used primarily for organizations like the ARRL or the
IEEE. I should have noted the slash after the "org". I should have
visited the sites before commenting here. The funny thing is my
XYL Ethel is also into bird feeding as a hobby. We have one metal
squirrel proof feeder and several plastic ones. We also have one with
thistle seeds for the finches. It is a small world and in addition to
our Ham Radio hobby and being computer users, we probably share other
interests. We are not as different from the Schlatters as some might
think. I guess I'll have to build a Wexelbaum.org/ web site to
illustrate us better. My XYL has been asking me to get a digital camera
so she can take pictures of the birds on the feeders too.
I'll try to look before I post in the future,
Sometimes I need more class myself,
Sometimes my mind gets missing in action,

Respectful 73,
Bob Wex w2ilp (Ignore Linguistic Posts)

If I use the N... word I'm a racest. Its OK for a Black man to call me a cracker. Go figure If I call a Jew a Jew then I'm a racest but they can call me a Gentile. Go figure. So If I call a woman a B...h then I'm a shovenist but she can call me a bas.....d. Go figure. Now Great peices of American literature are being destroyed because they speak in the language of the times they where writen. When is it going to stop? Yea the Cival war was about the south getting the crap taxed out of them it didn't have ANYTHING to do with slaves. GO FIGURE!!
Just my opinion I could be wrong

That's about right. There are 10 questions on the code exam, and I'd
estimate that the ratio of CW users to packet users is about 10 to 3.

Amateur Radio is a great hobby!

It holds something for everyone interested in the art of communication, whether it be code, or voice, image, satellites, etc.

If you are interested in the service end of the hobby, why not join the ranks of operators who pass traffic via the National Traffic System? You can do so in various modes and could possibly operate as a Net Control Operator if you want to.

Try to look at things in a positive way.

I just got through listening to the Kids Day transmissions on 20 meters. It's nice to hear these kids communicate their interests with such joy! Never once during that time did I hear a negative comment......

The good stuff is out there......just look for it.

Try contesting. There's no time for whiners and complainers.

Don't give up. You worked hard to get ur license back! And welcome back! Hope to work you soon....

73's
John....KB1AGD.....and proud of it!!

1897. AF2Y HAS RETURNED

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-19 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990619153502.25930.00001719@ng-cl1.aol.com>
Source record: 139078

To the thousands of admirerers having sent E-mails and calling to find out my whereabouts, I sincerely thank you for your concern. I, Jesus and Moses and all the saints and saintnesses, including the Pope's wife, send our blessings on this holiest of holy days-the Jewish sabbath. Yesterday I had a power failure thanks to a lightning strike 3 miles away and it knocked out old Betsy Computer, murdered everything on my hard drive, destroyed everything in my address book and favorites. However being the computer genius I am, I was able to reinstall the files onto the hard disk as well as to reboot AOL and to locate this forum which must rank as one of the greatest assets to ham radio and humanity of all time. I did miss almost all of you except persons like Oris Dirtyballs. Martin Shittum, Lloyd the Toid Davies and other loathsome characters who hang around childrens' playgrounds waiting for a hot game of hopscotch. Well to continue. this morning I had the extreme displeaure of hearing the Nazi from St.Croix, Herbert Lucifer Schoenbohm, on 14.300. The scumbag had just returned from the Vaterland and was telling eveyone how beautiful was the town of Dachau without ever mentioning that it was the site of one of the most notorious of all German "Vernichtungslager", extermination camps. Instead, Schoenbohm went into a tirade on how the slave trade in pre and early colonial America was controlled by Jews. What else would one expect out of the mouth of such a slime bucket? Remember this is the same man who has persecuted Intercon under the pretense of it's being controlled by Jews to steal money from phone companies. Don't believe that statement? I have a tape proving it. To continue, I asked Hitler if he has seen his brother Siegfried in Austria of which he denied all knowledge. Just log on any decent search engine, type in Schoenbohm and you'll come up with a Siegfried who is the spitting image of Herbie and who has a raunchy filthy nightclub in Vienna dedicated to sordid sex and atheistic and devil worshipping cultists. KV4FZ denies everything but then he's known for denying everything especially before ALJ Edw. Luton of the FCC which tells you why he's going off the air until year 2087. I would have conversed with the Schweinhund a bit longer but I had just finished treadmilling and my wife asked why I was talking to the man anyway. She doesn't know too much about Herbie but she smelled him through the speaker or then again it could have been Oris Dirtyballs, the king of the Georgian Landfills. Sorry but I must cut out now to do some paperworkk but I wanted to assure all of you concerned hams that AF2Y is okay and will be back on this beloved board for as long as Jehovah, the REAL GOD, permits. I don't dig this man God thing although I do highly respect my Catholic brothers and sisters, so forgive me for my candor which is more than Schoenbohm has. And finally once again I must salute Richard Whiten, the FINEST ham to ever hold a ticket who went out of his way for me in a technical sense to help me get back on this board. Yes, you can thank him and kiss his feet too. His electronic knowledge astounds me, from amateur radio to computers. I also want to think my beloved friend Dan Jeswald, a true American patriot who served this nation for over a dozen years in the military, for lending his time and patience assisting me to

regain dominance over this forum. I am proud to be associated with such fine, upstanding and brilliant individuals. And so for now, I must say adieu and will see you later or tomorrow. If you'd like to send me an E-mail to mention how very important I am to you and to ham radio, the switchboard is open to radiosigs@aol.com. You'll never do better than write me that letter. I'll accept letters of praise ONLY-your practice of lying and libelling interests me not. And a happy Father's Day tomorrow to all of you who, like I, brought wonderful children into the world. Schoenbohm is excluded since he's brought only felons into existence. See you later. Doc,AF2Y

This crap surly****SURELY***reinforces my opinion. Charlie is undoughtably
UNDOUBTEDLY*the
stupidest man on the planet. Charlie like you ****COMMA***I beleived
****BELIEVED****what old
porkbut****PORKBUTT**** said till he got me to trust him and then he burned me!
All***ALTHOUGH****
though there were those out there that***WHO**** tried to warn me.
porkbut****PORKBUTT**** is a
candidate for socail ***SOCIAL****psychology,***AND*** he has no morals. The
only thing the
guy knows about the computer is what he has picked up from me and a few
other experts in the feild.***FIELD**** The man is a complete fraud. He is no
more
than a general class that***WHO*** memorized the test in the late 60's
'60s**early
70's.***'70S**** The***HE*** wouldn't know the pythagorean theorem from a
parallelogram. I
would ask the idoit***IDIOT****what a gate is***WAS**** and he would say that
it was the
opening for a fenced in area. If you where***WERE*** to ask him what a source
was***COMMA***
he would ***SAY***thats ***THAT'S****where you buy things. I wouldn't begin to
say what old
porkbut***BUTT*** would say what a drain is***THIS MAKES NO SENSE*** maybe
where he lived. This guy is a
pure fraud! I don't think that the idoit ***IDIOT***would even know what a
EEPROM
stands for much less about the processing address lines of a pentium
chip works. I wonder what the fat pig would say if you caught him off
gaurd***GUARD*** and asked him what the ALU is in a computer. porkbut***CAPITAL
LETTER P & ENDING IN BUTT*** is no more
then a con artist. I talked to the head guy at Dentron three years ago
at the Shelby ham ***HAMFEST***fest and he said that is a wonder that somebody
has
not died working on one of his so called home brew***HOMEBREWED**** amplifiers.
The man
is a menice! ***MENACE***He lied to Riley about the pair of 8877s homebrew amp,
and
he lies everytime he opens his mouth. So Charlie it will be just a
matter of time before he gets you. He has allready***ALREADY*** made you out to
be a

true fool. He ripped Tom off***PERIOD & BEGIN WITH A CAPITAL Y*** you know the guy that***WHO*** is a cripple and just
spent the last 13 months in the hospital. He burnt Tom on a ***AN***amp too. Then he made Tom think that he did something wrong to burn the amp up. porkbut***PORKBUTT*** does not get rid of anything unless he has allready***ALREADY*** scerwed ***SCREWED***it
up. He traded Bob down in Flordia a Hiel ***HEIL***mic that didn't work. He told
Bob that the mic was fine. Bob never did get it to work and as soon as I exposed porky***CAPITAL P*** Bob got***OMIT VERB GOT*** switched back. I wonder who got the bad Heil mic
from porkbut.***PORKBUTT?****. Bob would never admit to to our conversation on the phone
because he is another***ANOTHER ONE***one that***WHO*** doesn't want to put up with the mouth of
the porkbut***PORKBUTT*** radio bully. So here are just a few examples about porkbut***PORKBUTT***
the conman of 75-meters!
As you see Charlie ***COMMA***you little suck off on porkbut doesn't prove anything but you are a bigger idoit***IDIOT*** then***THAN*** we all thought.
Oris

-- ***Hard to believe. FORTY-NINE spelling and/or grammatival mistakes in one posting!!!Jesus Christ, Oris,what do you do for a living? Can't be anything in which intelligence is foremost. Maybe you shovel horse dung in stables or something else dealing with manure which lends itself to your stink and grime. If I had as little grasp of the English language as you, I'd keep talking and stop writing, or perhaps cease BOTH. Richard Whiten is a Saint. A man who has been highly educated and well traveled. Do you think such a lovely and educated wife as he has would have married a liar and an ignoramus and a thief?. No. Monika Schoenbohm did! If I were you Oris Dirtyballs, I'd send Rich a letter of apology IMMEDIATELY and issue it also on this board and on the air.

No actually Doc, in rather short time you have become whats known as a
Troll, Not unlike Burt Fisher, Drew Durrigan, Masataka, and several slightly
unbalanced individuals who pass through, you stir up the group with
non-amateur usually religious/racial or other type posts. Eventually
everyone will get tired of you since you offer little to nothing and
hopefully you'll go away, but for now I suppose you'll continue doing your
thing perhaps thinking that your the new newsgroup celebrity. I suppose when
you go back to 14.313 you'll brag about what a great post you've made and
how you really stirred them up this time eh? Yawn....

That's a cute story. You know this reminds me of the feeling I get when someone from my home state calls up a national talk radio show. Too often it goes something like this:

Host: " We've had a great discussion so far. Let's go to (caller) in Alabama."
Me (muttering): "Please don't be a redneck."
Caller: "I wanna talk about all these libral media homeless-sexuals all over the place..."
Me: "D'OH!"
Host: "I'm not sure how this has anything to do with the budget pol-"
Caller: "And about this Kosovo situation. How is this going to affect Crimson Tide football recruiting? I hear there's a kid over in Pristina who's 6-4, 265, and runs a 4.2 forty..."

Thanks to WWCR for giving these callers a place to feel at home.

War NCI!

Congratulations Lloyd, you have discovered ham radio's version of the Late Night Show! The person you heard was probably JR Vining, N5??X of Conroe Texas. Been on "53" for years, although 53 has been quite MILD lately from what it used to be just a year ago!

You can usually catch "Ole Slobber Head" from 2 AM CST to sunrise.
Notable is his knack to weave an amazing din of the most colorfull and sexually descriptive multi-sylabic sentences while heavily under the influence of sour mash with coors chasers.

Keep an SWL ear on 3853 when Art Bell gets boring. You may find some late-nite radio listening fare, good enough to make even a truckers ears turn blue!

1930. Camp 807 - Northwest Ontario's annual Hamfest

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-19 00:00:00 UTC
From: No_Spam@No_Site.ca
Message-ID: <%bBa3.192$Me3.1381@198.235.216.4>
Source record: 139144

Camp 807, Northwest Ontario's annual weekend Hamfest, now has an
on-line presence. If you plan on travelling through Northwest Ontario
(between Lake Superior and the province of Manitoba) this summer, check
out the info at:

http://www.voyageur.ca/~tokyo/camp807.html

1931. I have arrived

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-19 00:00:00 UTC
From: rlaferty@my-deja.com
Message-ID: <7kf1fthku1@nnrp1.deja.com>
Source record: 139145

Well folks, I have been a passive member of this group as well as 14.313 for a couple of years now and it's time I made my debut. My name is Russ and my call is K4AVY. I am a friend of Rich and Jim and Doc and Dan and all the rest of the 'goodfellows'. The stumpjumpers are a bunch of disgruntled, whiney, crybaby "I'm gonna tell the teacher type babies' so I don't want anything to do with them. Also, the queer sounding individual(s) on the bands is very disturbing, is this good amateur practice, to promote homosexualism??? So, all you 'good' hams come to our side and help us put down the "stump" menace. It can affect us all.

> All because progress requires change. The same is true for ham radio
>either it changes to meet the world of today head on, or it will be passed up
>by some other technology, (or FCC selling our bands)

But there already is a code-free license available for access to those
bands which are in danger of being sold. How will deleting the code
requirement make those bands any safer? And no matter what technology
comsumers outside the amateur bands utilize, phone and CW will still be
the most popular ham HF modes. That won't change for a long time to come.

From: i_o_t_a@my-deja.com
Message-ID: <7kf2re$i0f$1@nnrp1.deja.com>
Source record: 139148

hi all....
i have just bought a ts-940s and was wondering what your
opinions are as to which desk mike i should use with it to achieve
really nice "STUDIO" audio. i prefer the audio to have more bass than
treble but it must be real clean.

i have a kenwood mc-50 which i was thinking about using with it.

anyone know how well this mike matches/sounds on this radio ?

any help on this matter would be much appreciated.

please email me ..
thanks.

I was tuning about the band last night. 3950 had gone to bed. Porkbutt on 3901 had went to bed hours ago. So I hit 3853 on my Sangean 909, and lo and behold it sounded like 3950 on a Saturday night.

Some Guy was playing some stuff off of WWCR, some health program. Then this guy from Arkasas gets and start yelling "Jammer, Jammer" then either the same guy or another started playing .wav files. This guy who was getting QRM'd was saying "Where's the FCC?" Someone should tell this guy that 3853 is not a "high profile" freq.

And I thought 3950, 3901 and 14.313 were fun to listen to!

I've found that most hams today are ignorant of the fascinating history of radio, and in particular, amateur radio. It never hurts to learn a little about those that came before us and about the rule structures which have been in place at various times during the last century, beginning with the first radio laws which came into being in 1912. Consider that 1951 FCC statement a "History Tidbit."

I'm happy that posting it caused folks to provide some thoughtful responses.

>The amount of excellent info contained between the covers
>is stupendous.

The books are fine, but it would have more meaning if there
were amateur radios whose S meters actually responded
with 6 dB per S unit over the range of their scales. The only
one I know of which repeatably does is the Kachina 505. It
auto-calibrates itself at power on across its entire range in
dBm, and then converts readings to equivalent S units in
software.

More typical amateur equipment varies from 2 to 8 dB per S unit
over the range of the S scale, and varies similarly from band to
band and radio to radio. Since the variance is as large as the unit,
it becomes basically worthless as a method of discussing signal
strength information. Until instruments are in general amateur use
which do better, using the S unit is more misleading than helpful.
It is like giving measurements in yards when the typical yardstick
in use varies in length from 1.19 to 4.75 feet.

You can suggest that amateurs should do calibration charts for
their S meters, I have done so for my radios, but few amateurs do.
It is better to give the measurements in a scale for which amateurs
typically don't have faulty instruments to measure. That way it is
less likely to mislead by association.

When amateurs report HF antenna signal strengths that differ
by 2 to 3 S units (as many do), it is virtually certain that those
antennas don't differ by 12 to 18 dB in gain. The large variance
is almost certainly mainly a function of the variance in the S
meters employed. I think it is important that we get amateurs
to disassociate their thinking from what they erroneously see
on their S meters. We do that by acknowledging that the S unit
is typically *not* 6 dB in the real world of amateur radios.

AMEN, Gary! This is particulary irksome when the S-meter readings are used to "measure" performance, such as the signal increase due to an amplifier or new antenna.

The S-meter (or guess-meter) has distorted the average ham's concept of the decibel!

1950. Alinco DR605 question

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-19 00:00:00 UTC
From: "Susan J. Sandersen" <sandersen@zianet.com>
Message-ID: <376B9B4C.3626@zianet.com>
Source record: 139164

I have a new DR605 and find it will not transmit in the Reverse mode. I set the freq for 146.98 with - offset, then press the Monitor button. Per the manual, the receiver unsquelches, the displayed freq shows the repeater input, i.e. reversed, the flashing + appears, but the unit will not transmit. Am I missing something operationally, or does this sound like a defect?

Would you kindly respond by e-mail to joe@zianet.com?

Thanks.

5000 plus tubes. 7, 8, and 9 pin. loose not tested. I have been told, many, (some ?) of these where indeed not used. And were removed from water damaged boxes. I can not comfirm this, nor do I believe this to be true. I do know that many I've tried, for my own use have worked well. They are being sold as used, as is, not tested. They are not sorted, and I will not do so. I will not sell singles.
I'm asking $25.00 per 100 count. Or your best offer for all 5000 plus tubes. You pay all shipping cost. I will determand shipping cost, based on how many you purchase, at time of sale.
When responding, please state where you've read my posting.
Thank you for your time.
Benny L Dowers

1953. Re: Alinco DR605 question

Joe
I may be comparing apples to oranges but on my DR 140 when I reverse it
the radio monitors the reverse frequency but still transmits on the
programmed transmit frequency with no reverse. I don't know if all
Alinco radios work that way but the 140 sure does.

I don't think anybody is advocating the removal of CW allocations (other than some of the Novice space), just revolving HAM radio around it as a cornerstone. I certainly hope you do not leave the community because of that.

> I'm one of those 'pro coder' people. At least that's what they tell me.

> as part of the new program to 'fix' amateur radio. But don't ever worry
> about me taking ANYTHING seriously.....

It is my opinion things are not as broken as many make the service to be. Some re focusing is may be in order. I am more of anti singular mode rule type. I think you have to agree that trying different modes becomes a good learning experience. Yes that includes CW.

>

Actually 14.060 is a QRP frequency around these parts. Sorry I did not catch the fact your QTH is out in the Pacific. I belong to the QRP club here because they are one of the few groups that actively homebrews. A lot of knowledge is passed around at the meetings. I did say talk, but I do notice the 'pro-coder' bunch I have conversed with view CW QSO's as a conversation. My bad.

scrape the
> Pacific island corrosion off it.....

Thanks, but I have to respectfully decline the offer. I have collected a DSP-2232 and a RFC 4-110 that I will be pressing into service very soon on the end of a home spun helix. I really would like to work AO-10 on a regular basis, but must do so with antenna covenants / restrictions in place. This is really cramping my 2 meter downlink antenna options. I am thinking of making a pair of corner reflectors with maybe 3 to 5 directors (perhaps even an endfire arrangement?). I can presently work most of the LEO's with homespun turnstiles in the attic.

Hope you reconsider your opinions of some of us Born Again Amateurs.

Warmest Regards

Christopher Cox

NOBODY is advocating barring CW operation from the Novice space.
All anyone is advocating is CW and SSB/AM sharing those typically
unused Novice frequencies.

PLEASE POST AND CIRCULATE:

Metro SkyWarn Inc, a non-profit service organization which provides severe weather spotter training and operates the spotter communication
system in the Minneapolis-St. Paul area, currently has and wishes to install the following equipment:

Receiver/Transmitter FCC Data WRT-701C
Type WRT-701C
Doppler Weather Radar S/N 1262
Collins p/n 622-5122-401

Antenna Mount
Type No. WMA-701C-G s/n 150
Collins p/n 622-7120-001 Mod 01

Antenna Radiator
WFA-701C-G s/n 109 Collins p/n 622-7131-001

We also have the power supply, cable ends with connectors, and an old computer with 8 inch floppy drive and some CRTs, the computer that was
connected to the equipment.

The unit was previously owned by the NWS @MSp Airport and before that by
WHEC-TV Rochester, NY 14604 (There was a business card for Robert R. Stephenson, Engineering Manager, taped to the unit.) We have no documentation on the equipment or its operation.

HELP Please.

If you have any information about this equipment, please assist us by letting me know what you have and how we can acquire.

If you have similar equipment or updates for the equipment or software, please let me know.

We are in need of the manuals.

OK, you're all no longer idjits. You are rocket scientists if you live in Virginia. Otherwise you might be idjits if I said so, or you might not be, unless you are K3LT or N5PVL, or unless you are a rocket scientist or unless you are W6RCA.

BGO

```````````````````````````````````````````````````````````````````````````

Subject: the confluence of personal jurisdition, the stroke of the keyboard and the state of Virginia

By CARL S. KAPLAN

AOL Subscribers Can Be Sued in Virginia, Judge Rules

Suppose you are engaged in a vicious online debate with an opponent in Virginia. Imagine, too, that you have just written an insulting message about your foe while hunched over your home computer in another state.

With the help of your America Online account, you post the message to a typical no-holds-barred Usenet newsgroup, a kind of electronic bulletin board that can be read by Internet users all over the world. Soon after, your opponent reads the message and decides that you have crossed the line and libeled him.

Can you be hauled into a Virginia court to answer a defamation lawsuit?

Late last month, a Federal District Court judge in Alexandria, Va., ruled that the answer is yes.

In a decision that one legal expert called "pretty shocking," Judge T.S. Ellis 3d reasoned, in essence, that because a Texas defendant used his AOL account to post an allegedly defamatory message, the message must have been temporarily stored in AOL's Usenet server in Virginia before it was propagated to other Usenet servers.

The upshot, said the judge, is that the defendant's use of the server to facilitate the alleged libel was sufficient to warrant jurisdiction under Virginia's long-arm statute -- the state law that gives courts power over out-of-state defendants.

Does this mean that any of AOL's 17 million subscribers who write objectionable messages are at risk of being forced to appear in Virginia courts, just because some of AOL's servers are located in that
```````````````````````````````````````````````````````````````````````````

state?

Michael A. Geist, an assistant professor at the University of Ottawa Law School who teaches Internet law, said in an interview that under Judge Ellis's ruling, the risk is real. But other legal experts were quick to disagree. A spokesman for AOL did not return phone calls.

"This is a pretty shocking case" that has broad implications for Internet users, said Geist, referring to Judge Ellis's decision in Bochan v. LaFontaine, dated May 26, 1999.

"With this sort of reasoning, someone in Canada who happens to have an AOL account, and who posts something, may find themselves subject to Virginia courts," he said. "That's hugely problematic."

The Bochan case began as a war of words among devotees of the conspiracy theories surrounding the death of President John F. Kennedy.

According to legal papers, Steve N. Bochan, a district manager for a group of theaters in northern Virginia, purchased a copy of a 1996 book on the JFK assassination, "Oswald Talked: The New Evidence in the JFK Assassination," written by two Texas-based journalists, Ray and Mary La Fontaine. He disagreed with the book and aired his views by posting comments to the online newsgroup alt.conspiracy.jfk in 1998.

These postings provoked a series of tart responses to the newsgroup from the La Fontaines and another defendant, Robert Harris of Albuquerque, N.M. In his ensuing lawsuit for defamation and intentional infliction of emotional distress, Bochan alleged that in some of their messages, the defendants accused him of being a pedophile, according to the court papers. The defendants, in an initial legal maneuver, asserted that the Virginia court did not have personal jurisdiction over them.

In an e-mail message, Bochan reiterated that the defendants' postings were untrue and hurtful. In interviews and faxed messages, the defendants denied that they had libeled Bochan. Last week, the parties reached an agreement to settle the case, but the terms were not disclosed.

In considering the jurisdiction issue only, Judge Ellis concluded that one defendant, Harris, had business ties with Virginia through his commercial Web site, and thus jurisdiction over him was a relatively easy matter.

But the La Fontaines, he acknowledged, had no business or personal ties with Virginia. Under state law, the court would only have jurisdiction over them if they caused "injury by an act or omission" in Virginia.

Observing that the La Fontaines posted their comments to the newsgroup using a Texas-based ISP and their AOL account, the judge said that the allegedly defamatory messages were transmitted first to AOL's Usenet server in Loudoun County, Va. There the message was both stored temporarily and transmitted to other Usenet servers around the world.

Thus, Judge Ellis said, because publication is a required element of defamation, and evidence showed that "the use of [a] Usenet server in Virginia was integral to that publication," there was a sufficient "act in Virginia" to allow for jurisdiction over the La Fontaines.

Analyzing the issue further, Judge Ellis concluded that under Federal due process standards, jurisdiction was justified for three reasons: Bochan lived in Virginia; the harm, if any, would be suffered there; and the LaFontaines knew Bochan was a Virginia citizen, despite their contentions to the contrary. As a result, they could "reasonably foresee" being sued in Virginia, Judge Ellis said.

Professor Geist said in an interview that Judge Ellis's decision runs counter to a majority of other Internet jurisdiction cases, which generally involve an analysis of how involved the defendant's Internet activity was with a particular state. "This case suggests that the location of an ISP or a server can be a determining factor in finding jurisdiction," he said.

The implications are significant, Geist added. If the reach of Virginia's long-arm statute is extended over scattered Internet users owing to the location of widely used servers in that state, the courts and laws of Virginia could effectively become the rulers of millions of Internet users, he said.

In addition, the decision could result in a rising popularity of offshore ISPs and servers to escape local jurisdictions, he said.

Dan L. Burk, an expert in cyberspace law who teaches at the law school of Seton Hall University, was more sanguine about Judge Ellis's ruling. "The court's decision was predictable and narrow, given the facts of the case and the libel claim, which has "funny" jurisdictional implications," he said.

Burk said that the judge viewed the case as being not much different than what would happen if someone used a Virginia-based company to print an allegedly libelous pamphlet that was then read in Virginia.

"Here we have someone who read the electronic message in Virginia, and they read it by virtue of its passing through AOL's server," he said. "That doesn't seem terribly problematic to me."

Burk added that he believed the mere location of a message-storing server in a particular state would not confer jurisdiction over the message's out-of-state author or be permitted by the due process

clause.

He said a recent case in California appeared to support that conclusion.

Burk found the Virginia case interesting for another reason, however. He said it seems to line up with other Internet cases that indicate that the presence of electronic impulses on a machine is legally significant.

In the recent case of Intel v. Hamidi, electronic messages sent to an Intel server triggered a trespass claim. "Here newsgroup messages sent via an AOL account to a server in Virginia constitutes an act in Virginia," Burk said. "We're really starting to treat bits like we treat atoms -- capable of causing physical effects that trigger legal results," he said.

SB DX @ WW $OPDX.414
Ohio/Penn DX Bulletin No. 414

The Ohio/Penn DX PacketCluster
DX Bulletin No. 414
BID: $OPDX.414
June 21, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/ WB2YQH & The 59(9) DXReport, K4AVQ, KQ6XA, N6HR, N6RT, W6KK, N0ED, DJ5AV & DX News Letter, DL3KUD, DL6MHW, F6AJA & Les Nouvelles DX, G3NYY, G4BUE & DX News Sheet, GM4FDM, HA0HW, JA1ELY, OH2BR, ON6QR, PA5ET, PY1KS, and ZD8V/KF4OOX for the following DX information.

5U, NIGER. "The 59(9) DXReport" reports that Dan, AE4RP, who is active as 5U7DG until the summer of 2000 or maybe summer 2001, hopes to be active on 160, 80 and 40 meters soon. The "DX News Letter" states that Dan received his license in July 1998 and is now the only radio amateur in the country. Dan is running 100 watts into a beam for 20/15/10m and a longwire for 12 and 17 meters. QSL via K4SE.

6O, SOMALILAND (also 5X and 5H). It has been reported by Toshi, JA1ELY, that Tomo, JE9IKG, has been staying in Nairobi, Kenya, on official business but will travel to Somaliland on June 19th, and stay there until June 29th. He will try to operate during his free time as 6O/JE9IKG. However, there is no powerline available there, so he will operating with a solar panel and with only 50 watts on SSB using a long wire. QSL via his home callsign. ADDED NOTES. Currently Somaliland does not count for DXCC. Also, Tomo has plans to make another trip to either Uganda (5X) and Tanzania (5H) in July. He expects these operations will be short and they will take place on weekends.

A9, BAHRAIN. The "DX News Sheet" reports that Regi, ON4CFI, is active until July 7th as A9/ON4CFI. Activity will be SSB on 40-10 meters. Checking QSNs, look for him after 0000z on 15 meters SSB. QSL via home call.

CARIBBEAN TOUR. Ronald/PA3EWP, Henk/PA3GCV, Peter/PA4EA, Martin/PA4WM, Dennis/PA7FM and Rob/PA5ET are proud to announce their "Caribbean Tour for 1999". They will go to the following islands of St.Maarten (PJ5), St.Martin (FS), Nevis (V4) and Anguilla (VP2E). The callsigns will be the home callsigns followed by the prefix with the exception of Nevis

which will be a V47 callsign that will be assigned at their arrival. Their schedule will be as follows: August 5-11th for St.Maarten and St. Martin (mobile); August 11-18th for Nevis; and August 18-25th for Anguilla. The team plans to have 3 HF stations and a combined HF/6 meter station on the air on the modes CW, SSB and RTTY. They plan to focus on the Low Bands and the WARC bands for Europe. SSTV and satellite operations will only happen when the occasions allow it. All QSLs for this tour will be handled again by PA5ET (ex PA3ERC): Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. The team has also set up a Web site to keep the DX community up-to-date on their operation before/during/after at: http://www.muurkrant.com/pi4com/tour99/index.html

CAVE EXPLORATION EXPEDITION PERU '99. Bonnie, KQ6XA, will operate as OA/KQ6XA and particapate in an exploration and mapping expedition to previously unknown deep caves in the remote area of the Andes Mountains. Using only solar powered gear, Bonnie will be active on 160-10 meters CW/SSB. Her activity will be between July 20th and August 20th. Bonnie invites amateurs to make a sked with USA and Peru operators. For more details, please visit her very interesting Web site at: http://www.qsl.net/kq6xa

C6, BAHAMAS. Maurice, ON4BAM, has plans this summer to be active from July 24-30th as M0CIL/C6A from Abaco Island. QSL via ON4BAM.

FK, NEW CALEDONIA (IOTA Activity). The "Les Nouvelles DX" reports that Jacques, F6BUM, will be active as FK/F6BUM from the main island (OC-032), August 9-21st. Activity will be CW/SSB. He plans to activate a few other IOTAs around the main island. Look for him on the following island:
Ouvea Island (OC-033) from August 22-24th
Lifou Island (OC-033) from August 25-30th
Mare Island (OC-033) from August 31st to September 2nd
Pins Island (OC-032) from September 3-5th

HB0, LIECHTENSTEIN. Andrea/DL3ABL and Michael/DL6MHW are going here for a one week holiday/activity from June 26th to July 3rd. They will be focusing their efforts on WARC bands to this semi-rare counter using high power. QSL via DL3ABL, Andrea Diekmann, Ginsterweg 51, 39326 Wolmirstedt, Germany.

HB0, LIECHTENSTEIN. By the time you read this, the first German-Hungarian HB0 DXpedition should be active until June 26th. Operators will be DL4OCM/ Tom, DF6VI/Jo, DL1FDH/Thomas, HA4DX (ex HA4GDO)/Tamas, HA0ET/Feri and HA0HW/Laci. They will be active from a guest house on Mtn. Malbun at 2200m above the sea level. They plan to have three stations active at the same time with amplifiers and Dunestar filters on CW, SSB and RTTY on 160-6 meters. Each operator will use his own callsign after the HB0/ prefix. The team hopes to provide a new QSO to you on any band or mode. All QSL requests are via the operators home callsign (either via DL and HA bureaus or direct to operators CBA), except QSL HB0/HA0ET/p via HA0HW. A full color QSL card with picture on front side will be available.

IOTA NEWS.......
EU-008. Operators GM4FDM, GM0UKZ, GM0NAI, GM4YMA, GM3NIG, 2M1EDM
and GM3COB will activate 2S5VG/P once again from the Island
of Gigha off the west coast of Scotland during the IOTA
Contest. Look for activity the Monday prior to the Contest.
QSLs go to GM3UTQ direct or via the bureau.

EU-094. Operators F5LMJ, G0LMX/F5MBO and F6GIN will use the callsign
TM5G from Glenan Island, July 23rd (may be 22nd) to 26th.
They will be active mostly on CW.

EU-129. The DL0HRO Team will take part in the 1999 IOTA Contest from
Usedom Island. They will be active before the contest and
will work mainly CW on the WARC bands. QSL via DL3KUD.

NA-169. The Western Washington DX Club and the Island County (WA)
ARC will activate Waadah Island over the IOTA Contest weekend.
They will land and set up two stations commencing July 22nd,
operate during the contest and then stay until the 27th when
their landing permit expires. For more information, E-mail
N6HR at: hraamat@whidbey.net

J8, ST. VINCENT. The "DX News Sheet" reports that Mike, G0GPX, will be
activve until the year 2001 as J87AB. Activity will be SSB on all bands,
especially at 1100z on 18147 kHz and 12 and 10 meters. He is there working
as a missionary at Canouan. QSL direct (BTW, Mike collects post cards for
his xyl and daughter).

JT, MONGOLIA. A JA DX team will visit here during July 2-6th. Look for
JT1FAJ (op JA0HC), JT1FAK (op JR0CGJ), JT1FAL (op JA0IXW), JT1??? (op
JR0BQT) and JT1??? (op JA0EJ). Activity will be CW/SSB on 160-6 meter.
QSL via home callsigns.

KH0, MARIANA ISLANDS. Look for JI2IXA, JN3AHZ and JM3FUY to be active
from Saipan Island as KH0/homecall, June 24-28th. Activity will be on
40-6 meters. QSL via home callsign.

KP2, U.S. VIRGIN ISLANDS. From July 8-12th, look for Dave/AG8L, Larry/
K6RO and Charlie/W6KK to be active as WP2Z during the IARU HF Championship,
July 10-11th. Activity before and after the contest will be on all bands
including 6 meters CW/SSB as KP2/(homecall). QSL WP2Z via KU9C. QSL KP2/AG8L
via NN6C. QSL K6RO and W6KK via their home callsigns.

OOOPPPSSS!!! In OPDX.413, under "YB, INDONESIA", the correct name and
callsign should have been "Sanyi" and "HA7VK", not Sanji and HA6VK.

OX, GREENLAND (The Biggest Island Expedition). A member of the Belgian
DXpedition Committee will head north to be active during the next IOTA
Contest (July 24-25th). Fred, ON6QR, will operate from IOTA NA-018 in
the capital city, Nuuk, hosted by the local amateurs. The callsign to
be used will be OX3NUK, although a special callsign has been requested.
Activity will be on CW/SSB on the 5 bands during the contest. Listen
also near the IOTA frequencies to catch Fred from Friday 23rd until the
contest. The QSL Manager is Mike, ON4GO. For more information, look at

the Web Page of the Belgian DXPedition Committee at:
http://www.ping.be/on6qr
Or contact Fred, ON6QR, at: on6qr@ping.be

QSL INFO AND NEWS.....
Toshi, JA1ELY, regrets to inform everyone that he is not the QSL Manager of XU1SS. He states that he doesn't know who this is, and it seems to be a pirate. Please, do not send him a QSL.

QSL UPDATE/CORRECTION. Last week we mentioned to QSL TA4/DL5MAE via DL5MAE, Wolfgang Schlaffer, Am Rosengarten 3, W-8059 Luess, Germany. This address is WRONG, however it may reach him, but will take a much longer time because it is the old zip-code which was used years ago. Helmut, DL7MAE, the brother of DL5MAE, states the best address is: Wolfgang Schlaffer, Luess, Am Rosengarten 3, 85467 Neuching, Germany (BTW, the address is the same QTH for Helmut and they both QSL 100% via the bureau).

Alan, K4AVQ, will be closing the books on his P40AV operation in Aruba 1997-98. If anyone needs a card let him know soon.

The following new logs are now online at: http://dx.qsl.net/logs
3B8/K5KG (April thru May, 1998) J41TEN (March 1998)
DS5DNO (thru June 14, 1999) SV1DNW (thru June 12, 1999)
DX1DX (thru June 3, 1999) SV9/G3AKF (May thru October, 1998)
DX100DX (October 1998) VQ9CV (thru June 7, 1999)

All direct QSLs for YK/DL6MHW during the April/May 1999 operation are sent out by DL3ABL. TNX for GDXF in sponsoring the color QSL card!

QSL PT2HO via PY1CAS to the Bureau or direct to: Guto, P.O. Box 07903, Brasilia - DF, 70649-970, Brazil.

R1MVA WEB SITE UP. Jukka, OH2BR, reports that you can find up-to-date information about the R1MVA-expedition at the OH5AB home page:
http://www.etela-karjala.fi/yhdistykset/viitoset/MVI_1999.htm
Jukka states that he will try to keep this information as fresh as possible. Log checking will be announced on the above www-address as soon as he has more information from the computer boys.

SV9, CRETE. Walt/G3NYY, Tim/G4VXE, Dave/G4FRE and Meg/G7FRE (YL operator) will be active as SV9/homecall from here (EU-015) between June 29th and July 6th. They plan to be active on the following modes: PSK31, Hellschreiber, Baudot RTTY and CW. Activity will be on all bands, 160-6 meters, the WARC bands included, with some SSB on 50 MHz only. QSL SV9/G3NYY via G3NYY, SV9/G4VXE via G3SWH, SV9/G4FRE via WW2R and SV9/G7FRE via WW2R.

VP9, BERMUDA. Ed, N0ED, will be operating as VP9/N0ED from July 15-25th, including the IOTA contest (24 hour CW section). Activity will be CW only on the WARC bands and 160 meters (QRN permitting) before the contest. He will use only a "100 watts and a dipole" during this operation, but he hopes to give everyone who needs it as a multiplier. QSL via N0ED. His

E-mail address is: n0ed@qsl.net
Ed will put more information (possibly logs) on: http://www.qsl.net/n0ed

ZD8, ASCENSION ISLAND. Paul Hutley, KF4OOX, is now active as ZD8V as of June 15th at 0030z from Ascension Island in the middle of the South Atlantic Ocean. Paul wrote to OPDX stating that he is currently active from 1800-2400z on 10-20 meters. He mentioned that he can also be found sometimes on the 14.247 DX Net for a couple of hours. He likes doing the DX nets and thinks they are fun. However, Paul spends most of his time on 10 meters around 28495 kHz. Paul reports that he needs 8 more states for his WAS and will be looking for them on the air (OPDX will try to find out what states he needs). Over the past weekend Paul indicated that he would like to be active on "Kids Day" (June 19th). He also plans to be active during "Field Day" and will be looking for Mercer Co. (PA club station) and for the Brevard Co. (FL) stations. In the coming future Paul mentions that he will have scouts over (on the island) for JOTA. However, Paul does state that he will call or take calls from anyone. Please note, that in the past when a ZD8 station has tried to support "Kid's Day or JOTA" the adult hams have tried to contact the ZD8 station. Paul requests and states, "Please if we are trying to support the kids, then let us do that and wait for another day for the ZD8 contact. As the children do not find this very enjoyable and this sets them against Ham Radio."

Subject: awards from Greece

Radio Amateur Association of Greece Award
The award is available for working and confirming contacts with at least
7 different Greek stations from the nine SV call areas (SV1-SV90. QSLs are
not necessary. Applications must be accompanied by a certified list of QSLs
(checked and signed by two ama teurs), together with 10IRCs or $5U.S.D and
should be send to: RAAG,Award manager,POBox 3564, Athens GR 10210, GREECE

*Greek Island Award
The award is available for working and confirming 10 contacts with at
least 3 different groups of Greek islands as follows:
1.CRITI
2.DODEKANISOS
3.IONIAN
4.EVVOIA
5.KYKLADES
6.SPORADES
7.LESVOS
8.CHIOS
9.THASOS-SAMOTHRAKI
10.IKARIA-LIMNOS

Awards are issued for 2 way CW ,2 way SSB, Mixed mode or Single mode,
Mixed band or Single band. Endorsement and stikers for each 10 different
islands. QSLs are not necessary.Applications must be accompanied by a
certified list of QSLs (checked and signed by two amateurs), together with
10 IRCs (4 IRCs for each endorsement sticker) or $5USD and should be send
to: RAAG, Award Manager, POBox 3564, Athens GR 10210, GREECE

*The Athenian Award
The award is issued for contacts with 25 amateur radio stations in the
Athens area.
The diploma is issued in any modes and in three classes.
1st class diploma is awarded for QSOs on 160 and 80 meters.
2nd class diploma is awarded for QSOs on 40 and 30 meters.

3rd class diploma is awarded for QSOs on the other bands.
Endorsement stickers are available for each 25 new contacts.
QSLs are not necessary. Applications must be accompanied by a certified list
of QSLs (checked and signed by two amateurs), together with 10 IRCs (4 IRCs
for each endorsement sticker) or $5USD and should be send to:
RAAG,Award Manager, POBox 3564, Athens GR 10210, GREECE

1967. Re: KE2LO passed away

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-20 00:00:00 UTC
From: kk4tl@aol.com
Message-ID: <19990620141038.25273.00002200@ng-cm1.aol.com>
Source record: 138981

I listen to the Liberty Net regularly. I do remember their discussion of the murder in Texas. And I do NOT remember Gene or any of the other net participants rejoicing in the death of the victim, nor the way in which he was murdered. Rather, their discussion revolved around the disparities with which the judicial system categorizes, investigates and prosecutes crime.

True, they have controversial viewpoints and spend a lot of time discussing possible conspiricies. But to draw inaccurate conclusions from their comments is - ohhhhhhh - what word am I looking for here - hmmm - BIGOTED ???? Yeah, that's the one. And bigotry is bigotry. Whether it comes from the right or the left.

To their credit, the Liberty Net participants were able to lay aside differences one night when N5HDQ passed away and express sympathy to his friends and family. Maybe they'll be able to do the same for Radiosigs when his time comes. Such a move would prove forever who the nobler faction is here.

1968. HATS OFF TO WB2OTK AGAIN!

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-20 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990620142051.25797.00001943@ng-cl1.aol.com>
Source record: 138982

Apparently my initial posting about the great wizard of electronics, Rich Whiten, WB2OTK, evoked quite a response and overwhelmingly positive. For that I say thanks. For the few who took exception to my laudatoria, I can only feel sorry for you. I feel sorry that you are blinded to the fact that Rich IS THE BEST HAM to ever hold a ticket. You are being led astray by the machinations of persons like Lavoris Dirtyballs and Schoenbohmists who,lost in the unreality of their own greatness, try to compensate for inadequacies by denegrating the King of Amateur Radio. In the nearly 11 years I have had the esteemed pleasure and honor of being tutored by Mr. Whiten, my knowledge of ham radio- related materiel has soared far beyond my expectations. I knew nothing about amplifiers before he lectured me. I knew nothing about dipole reflectors before he lectured me. He has made me into one of the best, if not the BEST ham radio op in the world for which I shall always be grateful. We who hate bigotry, racism, intolerance, government hating and a special brand of bigotry called anti-Semitism, have successfully looked to Rich for guidance and leadership which he's never failed to supply. Rich is the shining light in the dark recesses of this hobby/service and it's high time you WB2OTK bashers realized it. No single operator has done so much for so many so fast. I salute our leader in South Carolina and look forward to marching shoulder to shoulder with him in amateur radio into the new millenium. Incidentally I am the President of the WB2OTK fan club and for an offering will happily send a picture of him in his Bar Mitzvah suit and of Star wearing his gold yarmulka. The same type worn by the marvelous man in the Vatican, Pope John Paul II.

Hmmm...Alaska is even further North...but Eskimos are darker than
the average people of Denmark. I know of many Jewish blue-eyed blondes
(Goldie Hawn is an example). Oh well to some folks Jews are a minority!
Yep ...there is more to the world than you can see in the twin cities by
yumpin yimminy!

Maybe they evolved from albinos. Even Black tribes have albinos.

I do not hate anybody. Hate is a strong emotional word.

> The tragedy is that so many White people _have_ been taught to hate
> themselves to the extent that they have inverted our ancient moral
> values.
A bigger tragedy occurs when people are taught to hate others because of ignorant racism.
What ancient moral values? History shows that no Ancient Societies consistantly practiced any values that were any more moral than present day accepted moral values. This is true if you base such values on any religious values or civil moral codes that exist in laws today. In fact most were less civilized than the moral practices in the democratic countries that now exist. If you want to debate this I can give many many examples relative to any society that has ever been documented.
If you have the faith enough to believe in any bibles you will find lots of immorality spoken about in them. Moses brought his people the Ten Commandments, which was a moral code if there ever was one...BUT the people sined and did not follow the Commandments even then.
> To these deluded souls, anything which tends to the
> preservation of our genetic heritage, which gave birth to the
> Parthenon, Shakespeare, the transistor, and the Saturn V rocket, and
> everything in between, is somehow "evil." And anything which tends
> to the destruction of that heritage is "good."
Racists are not necessarily Luddites...Luddites are not necessarily racests. The above statement is meangless because it refers to both heritage, which means tradition, and to art and technology which becomes traditional with time. There can be little clear separation of the constructive against the destructive tendencies made by trying to understand the above statement...nor can I understand it myself.
> And others are so thoughtless of that heritage that they would throw
> it away for a roll on soiled sheets with a Bangkok bar girl.
Who soiled the sheets???
No different than ancient soldiers and crusaders who raped the woman of any race, religion, culture or nationality when they conquered and marched in. Maybe even a lot less cruel and uncivilized.
IMHO "heritage" can only be the sum of all tradition and technology that are inherited by all humans as a legacy of past humanity and civilization. No one race or sub-group can take all of the credit or be relieved of all of the moral sins.

Gunga Dinn was a better man than I am...So I don't know if any brown eyed girl from Bangkok is any worse. She might have been more ethical than Monica Lewinsky in the eyes of some...I'll not judge either.
> Best of luck,
>
> --
>
> Kevin Alfred Strom.
>
> News, links, and pictures: http://members.xoom.com/kevin_strom/

Most of what was said above is based on fact but too much is based on opinion. There are other factors that are important but have been omitted. The subject of race is often biased by people who wish to

create their own definitions, which may be based on little or no scientific logic. The major recognized races of man include only Caucasian when referring to primarily white skinned people. There is much disagreement among even the DNA experts as to what defines a true race or sub-race. There has been so much intermarriage between races, especially similar sub races who lived in the same areas and thus it is probable that there can be no really pure race no matter how such a race is defined. The Aryan race is, in some minds, the creation of racists. Its definition has varied. Hitler considered the Arians as the master race.
He claimed that non-Arians were inferior to his defined master race. Hitler's master race included such white peoples as Germanics, Tutonics, most Scandinavians,etc. He included both native English and Irish peoples, Normans and Saxons... BUT NOT Serbs, Slavs, Gypsies, Jews, etc. Thus he did not include all whites and he considered most Polish, Magyars, Russian and most peoples of the Balkans to be inferior to other white people. Hitler considered Northern Italians to be superior to Southern Italians who were often darker in complexion.
BTW Jews are far from being a pure race. The racially purest Jews are said to be Yemmanite Jews who have lived in the same area for many centuries and are very dark skinned people , not quite as dark as Negros, with black hair. Many Jews intermarried with all of the other white peoples of Europe and Asia, thus most Jews are not of a pure sub-race. Intermarriage and rape have made it common for Jews to have every hair and eye coloring that is found in other Caucasians. There are some facial characteristics that help in recognizing Jewish types but they are not always present. Many Jews can not be identified as being Jewish by how they look. It is quite common for Jews to be recognized as Italians, even in cities where there are many Jews and Italians. Russian Jews can not be picked out from non-Jewish Russians easily. Jews have intermarried in the past, even in greater numbers than at present. Many are not exactly proud of that but some are surprised if they are able to trace their ancestry back far enough. The Queen of Sheba was said to have been black and have consorted with King Solomon, who was an ancient Jew. The Royal Families of Europe claimed that they ruled because of devine rights because they decended from King Solomon. Go figure? Intermarriage goes all the way back to the time of the Romans and the time of the strong Persian empire and Mongul empire when Jewish women as well as many others were often taken as wives by force. It is obviously difficult to identify Jews from Arabs...and they are considered both to be members of the same Semitic sub-race by some experts.
I hope you have all learned something from this because there is lots of ignorance on this subject. It is a confusing web of narly mixing.
I can not say that those who want to keep their race pure are wrong. I married a person of the same religion and race as myself because I was most attracted by and accepted by my own kind BUT I do not condem those whose tastes or sexual needs may differ. I can not judge the morality of others by my own limited experiences.
PLEASE keep thinking...about facts...not predjudiced opinions,

Bob Wex w2ilp (I Like People)

Maybe they were talking about field day, the annual contest and field preparedness activity. Broadly construed, it might also test emergency communications in the event of a Y2K catastrophy (my personal view is not to sweat it).

Too late. Every SWL article you post to this amateur group regarding activity you've heard both in- and outside the hams bands is a WOT. I can't think of one single article you've posted here that contained useful amateur-related information.

Why not use rec.radio.shortwave? We created it expressly for you SWLers who don't have HF transmitting capability.

Hi,
I'm looking to build a digital tuner -- compact in size (circa 1.5"x3"x3") [thats HxWxD], with a standard Motorola antenna input and a female mini-plug output. I'm planning on using this in my car and connecting it to my car-kit (a permanent connection)-- the tuner thats in the receiver right now is an analog one and isn't very good. I don't know if I would need to include some kind of amp in the tuner -- so, perhaps that would be something one of you could help me with. I want to make this as inexpensively and with little hassle as possible (i have... well, no real electronics knowledge). If any of you can help me out and/or point me in the right direction that would be greatly appreciated.

USPS will not deliver mail to a sailboat.

>As per Jeffelah ?Best $13 I ever spent Jealous?? Boychik you got
>SCREWED for $13 bucks, I hope you used some form of protection.

If you knew anything about the coe, you'd realize that $13 for a shorter
and easier-to-send callsign is dirt cheap compared to the extra minutes
that will add up over the years from sending the extraneous dits and dahs
which accompany a longer callsign, not to mention the ease to the receiv-
ing operator.

>I did not spend one Cent for my Call, why be jealous of a Putz who pay
>for a call, you better take some economics classes while you still can.

You have no call. Like the other anons on here, you're on the outside
looking in; you're a "poser." (And you should take some grammar classes.)

>Oh and BTW do they know about your use of school property and theft of
>bandwidth for your hobby? Jeffelah, they will....

Yup. And they will affirm my right to post to these newsgroups.
Universities are not in the habit of removing free-speech internet
access. (I must have really struck a nerve, eh? Heeheehee)

>So when you stop stealing and spend some of your own money on this
>please go and piss in your sandbox on the beach.

<Scratch scratch> Huh? (We offer several creative writing classes --
consider registering for one.)

>Oh and BTW are you going to sell stock in your ?Pacific 500KC Coastal
>Station?,

Nope. It will be a single-man operation. I already keep a spare rcvr
on 500 in the evenings -- been doing so for some 20 years. Still lots
of traffic in the Western and Southern Pacific. I'll relay traffic
at no cost (passing WX OBS and AMVERS are a local call, as are
QTOs et cetera).

From: Dan O'Sullivan <webmaster@northshoreonline.net>
Message-ID: <7kjr63$8i5$1@news.iptransit.com>
Source record: 139000

O.K. , I'm on a roll. Went to the "MIT" flea market & found a
??"duplexer"???
It has 6 square tubes mounted together, about 2-1/2 ft long, rec,trans,& ant
ports.
On the other end, each tube has 1 adjustment screw.
So I'm told by one of our local hams, I should go back and buy the bridge
the guy was selling also, cause what I bought is "JUNK".
My question is > will it work good enough for a business band repeater with
5 mhz split.
Dano
P.S>
in case anyone wondering, the factory tag was marked for 154 mhz in, 159mhz
out.
& the make is a Phelps dodge.

Can anyone recommend an inexpensive 2 Meter SSB transciever?

Other information helpful would be a used radio source that often has VHF SSB radios, or a source that has kit radios of this type.

Any help is greatly appreciated. If possible, e-mail and post your response.

Okay, _that_ helps a lot. Now for some ham-related content. A major topic on these groups is the skill level of newly licensed no-code techs. They are ridiculed as people who infect the ham world with CB-style habits, among other things. I've found that this trait varies widely from community to community. Some towns have sharp operators, others make me cringe. This seems trivial until you realize the possibility that ill-timed "liddage" could really screw up an emergency net and cost lives.

Question for everybody: Have you noticed these variations?

Question for pro-code advocates: Would you trade code requirements on the exams for an increased emphasis on operating skills? (I'm not claiming they are mutually exclusive.)

I am a professional software engineer and a long time short-wave
listener.

I have developed a Windows program that allows you to filter audio in
real-time.

Connect the "Line Out" on your short-wave radio to the "Line In" on your
PC's sound card.

Use the Windows "Volume Control" program to assign inputs and outputs
and set levels.

The program takes the digitized audio, filters it and plays it out
through your PC's speakers!

No special hardware or modifications needed.

It does require a fast PC - 200 MHz or better.

For more information and a free Shareware copy of the program visit my
web site:

http://www.winternet.com/~swezeyt/dsp.htm

Thanks a lot,

I have alot alot aot of stuff for the swapmeet this month PLEASE CHECK
OUT LIST......TRW swapmeet is on the last Saturday of the month
6/26/99. TRW location is Aviation, and Marine Blvd. in the city of
Manhattan Beach 1 mile west of the 405 freeway. Time is 7:00- 11:00 AM

HERE IS THE LIST>>>>>>>>>>>>>>>>>>>>>>>>

I have alot of Kenwood stuff:

I have KENWOOD YK-88C 500 HZ CW filter 4 sale, and they will fit in
these
models..
TS-120S
TS-130S, SE
TS-180S
TS-430S
TS-440S
R-5000
TS-530S, SP
TS-830S
TS-670
$69.00 shipped in the US NEXT...........

4 Sale Kenwood VS-1 Voice Synthesizers .
These units will fit in these models.........
TS-940S
TS-440S
TW-4000A
TR-751A, & TR-851A
TS-711A, & TS-811A
TS-670
R-5000
$79.00 shipped in the US NEXT.................

Kenwood IC-10 interface, and IF-232C interface unit both
for only $99.00 (hard to find combo)

(2) YK-88SN $69.00 shipped
(2) YK-88A $69.00 shipped
(10) TU-4C for TW-4000A $42.00 shipped
(1) TU-3A for TM-201A, and 401A $42.00 shipped
(2) TU-6 for TH-21,31,41 $42.00 shipped NEXT..............

The R-5000 are "IN" the price is $439.00 shipped in the US

Kenwood R-5000 RECEIVER
IC 10 interface

IF-232C interface
YK-88C 500HZ CW filter
and custom rack mount, with external speaker, and manuals included.

Got some Collins stuff 4 sale........

1. (2) Collins 189A-1 phone patches for a KWM-1 $99.00 each.

2. Collins 310B-1 exciter with coils for 10,20,40,80,160 $295.00
looks good.

I have (2) TWO Collins Winged S-lines 4 sale they are both good to
very
good, and original.

3. Collins 75S-3 Receiver
Collins 32S-3 Transmitter
516F-2 power supply
copies of the manual...$1100.00 shipped in the US

4. Collins 75S-3 Receiver
Collins 32S-3 Transmitter
516F-2 power supply
copies of the manual...$1100.00 shipped in the US

Bird 8201 500 watt dummyload $150.00
Bird 4381 RF Power Analyzer sells new for over $1000.00
ONLY for $299.00

Hammarlund HQ-129X nice condtion $150.00
MFJ-484 GRANDMASTER MEMORY KEYER $ 30.00
Swan 350 with 117XC power supply/speaker/ hand mic works good $185.00

Heathkit SA-2060A BIG antenna tuner $160.00
Heathkit HD-1422 antenna noise bridge $20.00
Heathkit HD-3006 crossfire $30.00
Heathkit IM-5228 vacuum tube voltmeter $10.00
Heathkit IT-5230 CRT tester,& rejuvenator $10.00
Heathkit IG-5282 audio generator $10.00
Heathkit IG-5280 RF oscillator
Heathkit IM-1210 digital multi meter $10.00

Palomar PT-340 tuner/tuner $20.00
AEA Pakratt- 64 $20.00
AEA ET-1 antenna tuner 300 watts $60.00
Ameritron AL-84 amplfier $250.00

Message-id: <19990619222650.01031.00000950@ng-fb1.aol.com>

This is very shocking....

Taken from http://www.jewwatch.com/index.html

These Christians are but a few of the 100,000,000 Christian innocents who were exterminated by All Anti-Christian Jewish Red Commissars in Russia under the orders of Trotsky, the Jewish Commissar of Commissars. Yet Spielberg will never Direct a "Schindler's List" Movie for them or their genocide. Why is that? Because Jews did it.

My relatives and my fellow Christians were murdered in the USSR under Jewish Marxism between 1917-1945, and many of the Marxists came to Russia from New York to do this to Christians in 1917 after Jacob Schiff, the Jewish anti-Christian maniac banker who owned The Guaranty National Trust, the largest bank in the United States, financed Lenin and Trotsky $35 million for the Red Revolution and the mass killing of these Christian souls. We must never forget this

***What are 100,000 Christians when considering that under the Swastika,a twisted cross,6,000,000 Jews were murdered? Hell, 100,000 is a drop in the bucket. And besides, with all the door knocking, shortwave solicitating and street corner bible banging, you make up for those100,000 in a day. Furthermore how come I don't see my Catholic brothers and sisters carrying on like you Born Again, Died Again, Peed Again losers? Why is it that you Brother Stairites seem to harp on something called "Jewish Communism." Convenient isn't it to target a minority and to blame the world's ills on them? You right wing Christian Coalition bedbugs are nothing but cowards,screwballs and instigators and the latest I heard is that the leading contender for the Republican nomination, George Bush, is distancing himself from you cockroaches and once the general theme of the G.O.P. states that you're all crazy, then maybe we;ll see a major change in D.C. come Nov.2000? And if you understood European history, you'd understand why Communism appealed to the Russian Jews. For a millenium or more, Russian Jews suffered terribly under the rule of despots and kings-one more

anti-Semitic than the other. Along came this fellow Lenin with a promise for a better life for all. And end to progroms. The Jews bought the line and this I'll tell you. Joe Stalin, in the late '20s, offered a large hunk of land in western Siberia as a Jewish homeland for only Russian Jews. Being too cold and desolate, it was rejected. But at least Uncle Joe cared before he starved to death 2,000,000 fat Ukranians and shot all his army staff for assorted unfounded acts. My motto: hams unite. The only thing we have to lose is our Schoenbohm. AF2Y, Doc******

Listen to this exciting radio program!

5.070 MHZ WWCR 8:30PM CST!

At last, a radio programme devoted to modern Confederate matters! We won't waste your time with wistful remembrances of antebellum days and tragic might-have-beens. Our number one concern is what might be yet. On Dixie Rising you'll find cogent political dialogue on the subject of the modern day Southern Nationalist movement, news from all quarters of Occupied Dixie, and historical reportage dispelling once and for all the odious Yankee myths surrounding the War for Southern Independence.
Only on Dixie Rising can you regularly hear interviews with Southern luminaries like Dr. Michael Hill, president of the League of the South, Donald Kennedy, author of "The South Was Right!", Franklin Sanders, futurist and publisher of "The Moneychanger", Charles Lunsford, famous defender of Southern heritage, author Peter Applebome, and a variety of others whose ideas are important to the South and its people.

It's been long enough now for Riley Hollingsworth to have gotten a reply from W1WCR concerning the "certified" letter he sent out. He questioned W1WCR about violations and the broadcasting use of amateur radio. I think we should know if there has been a response, an action, a decision or anything else pertaining to this issue. Hey, let's get on the ball, let's find out what's going on with this and where it stands.

****WHY NOT FIND OUT FOR YOURSELF? E-mail the man--he won't bite. His add. is rholling@fcc.gov
Or be patient. I'm sure Riley has other matters than W1WCR or then again, maybe Vic's answer pleased him. If that's the case, Riley may choose to simply put the issue to rest, silently. *******

Awwwww!!! Poor widdle wiberal all upset
because your communist buddy Charles
Schumer's treasonous, unconstitutional
attempt to destroy the 2nd amendment
got derailed today?

Oy vay, such a mess, eh? How can you
yids keep the White goyim under control
when they have all those firearms and value their God-given rights so much?

EAT SHIT, you left-wing piece of garbage!

As our great leader, Nikita Khruschev once said, "WE WILL BURY YOU." Listen up, you running dog of capitalism...victory will be ours! Come to think of it, I once saw the short fat clown, Nikita, in person, along with Fidel Castro when I was attending college at NYU. That fat Commie bastard and his bearded sidekick from Havana were meeting outside the U.N. and Fidel was carring a chicken under his arm. No kidding! It must have been in the early '60s. That was when old "Nikkie" took off his shoe and started banging it on the table in the Security Council and following suit were his Red buddies from Eastern Europe. And man, did that fatso's feet stink. I remember the British delegate to the U.N.(I think he was Selwyn Lloyd) put a handkerchief over his nose. The place began smelling like Oris Dirtyballs. At any rate, Nikita was in his prime then but like all despots, he too bit the big one and thank God, the great Pope Paul II, Ronald Reagan, and Lech Walesa brought down the horrible Red monolithic state. Message-ID: <WM5b3.13327$4J5.1255@news3.mco>
Source record: 139039
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Larry Klose wrote in part:

>There is no power, duty, or authority in the Communications Act (not part 97 of
>the CFR) that gives the FCC the authority to require telegraphy examinations for
>access to H.F. bands.

Look in United States Code, Title 47 and you will find it, Larry:

47 USC 154

"(i) Duties and powers
The Commission may perform any and all acts, make such rules and regulations, and issue such orders, not inconsistent with this chapter, as may be necessary in the execution of its functions."

The Commission has been granted *very* broad power (subject to Judicial Review) over the Amateur Radio Service. This includes Licensing, Operation and Enforcement.

I'm all for the lively "debates" on here. And the "conflicts" on the radio. The "netters vs. jammers" battles and the "Herbie vs. Rich" battles. Face it, each side thrives on the other at times. For example, the Liberty Net guys have recently had a fresh new topic to discuss with the suspension of their "enemy", WA9KJI.

But when any of these groups loses a friend, I think we can lay down the attitudes for a minute and pass along a word of sympathy to the friends of the deceased.

To the Liberty Net guys, I will say that Radiosigs does not speak for everyone. I pass along my regrets in the passing of your friend Gene, KE2LO. Whether everyone agreed with his political beliefs or not does not matter at this time.

To this point, Radiosigs stands alone in his unkind comments about Gene on this n/g. N0VFP and KK7HO have laid down the differences long enough to pass along a kind thought and a prayer for Gene's family and friends.

I commend this, and I join them in it. I hope others will be able to rise above spiteful comments at this time. I'm sure that even WA9KJI would have had some kind words to say, even though he and Gene were in constant conflict on 3950.

I hope Radiosigs feels a sense of fulfillment with his comments. So far, he speaks only for himself.

Farewell, Gene. Enjoy your rest. Say hello to N5HDQ for us.

All I can say is PORKBUTT!! Thats what happened! See its like somebody who has denial. See they really can't admit to the problem. Its always something or someone else. In this newsgroup its the fact that PORKBUTT is a lier and Charlie helps him tell more lies. Those of us see this fact and try to tell the rest of you including the FCC and the rest of you can't see it. So this newsgroup suffers from what I like to call denial.

I have to agree with on the stupid part. Thats not enough bandwidth to
do anything. Ten people? I would figure that a link like that would get
alot of hits. Maybe thats all the bandwidth they had. So it isn't really
stupid to experiment with ham radio and the internet I wouldn't think.
However the MORON HAMS OF THE YEAR - 1999 has to go out to PORKBUTT
for lieing to the FCC about a amplifier, selling amplifiers to CBers,
and jamming on 3.894.5 MHz. First runner up has got to be Charlie A.K.A.
Dr Hate. This is for all the Hate that he not only brings to the
20-meter band but for all the hate he brings to this newsgroup.

I am in need of information regarding this handheld radio by Philips.
Specifically some programming clues would be very helpful.
Maybe under a different model# in other markets - 16 chl synthesised,
rotary switch channel selection, no display.

Any info at all welcome.

> any country called "Arya".

There are two countries with names possibly derived from the ancient Indo-European root word for "arya" ("noble" in Sanskrit); one is in Europe [Eire] and one is not [Iran] (but its ancient culture was established at a time when it was ruled by people who were racially European). The rulers of Iran, by the way, until quite recently had as one of their titles "Light of the Aryans."

Quite a bit of information on this is available in the works of Dr. R. P. Oliver, philologist and Professor of the Classics at the University of Illinois. I recommend his latest work as containing a basic summary of this question, though its main subject is the origins of Christianity. It's available for free reading on-line at:

http://www.ety.com/HRP/booksonline/oliver/toc_ol.htm

> Are Aryans people of German descent with
> blond hair and blue eyes?

Not exclusively. "Aryan" as a modern ethnological term includes all peoples of European or White race, since all Europeans share to a significant extent the genetic inheritance of the ancient Indo-Europeans. Only a minority of White people are blue-eyed blondes, but we possess those beautiful mutations more frequently than any other race. They, like our light skin, are a mark of our evolution in the far North -- where many light-colored creatures have evolved besides humans. To get an idea of how far north Europe actually is, consider that Venice is a more northerly city than St. Paul, Minnesota.

Probably the ancient Aryans, like the ancient Sumerians and Egyptians, had many blue-eyed blondes among them. But it is doubtful they were all so fair -- since there is no evidence that any exclusively blonde and blue-eyed people has ever existed on this planet.

Of course, some disingenuous tricksters will tell you that "Aryan" is a term relating only to languages and not to the peoples who spoke them. That's a lie. In fact, the term was originally used by the White rulers of ancient India to distinguish themselves from the various races over which they ruled -- hardly a linguistic

application. Use of the word as a linguistic term didn't occur until
the 19th century.

[...]
>
> Is it possible to be an Aryan
> and have
> brown hair and green eyes wearing purple socks?

Yes.

> I am Irish. Are Irish
> people
> Aryans?

Yes, most definitely.

> Are all Aryans Lutherans?

No.

> Do Aryans hate Catholics?
[...]

Since many millions of Aryans are Catholic, and the Roman church was
the invention of, and for many centuries almost exclusively composed
of Aryans, that seems highly unlikely.

> I do not hate Aryans.
[...]

That's nice.

The tragedy is that so many White people _have_ been taught to hate
themselves to the extent that they have inverted our ancient moral
values. To these deluded souls, anything which tends to the
preservation of our genetic heritage, which gave birth to the
Parthenon, Shakespeare, the transistor, and the Saturn V rocket, and
everything in between, is somehow "evil." And anything which tends
to the destruction of that heritage is "good."

And others are so thoughtless of that heritage that they would throw
it away for a roll on soiled sheets with a Bangkok bar girl.

Best of luck,

--

Kevin Alfred Strom.

Hi Hi Hi Jim -

Yours was a good post. The only thing I didn't like about it was that
you mentioned a trade mark named by that mid-European time-piece maker
and thus they acheived what many of us would like to prevent. YOU
HELPED THEM ADVERTISE...Is that supposed to be an AMATEUR SERVICE?
Volunteering to advertise without getting paid is IMHO neither
amateurish or professional BUT it could be dumb!
No offense meant,
Please keep thinking (with good non commercial humor if possible),
Bob Wex w2ilp (International Logic Provoker)

I only ask you please,
With ticks dont' feel at ease,
A time-bomb is a fatal trick,
Time increments with every tick,
And ticks cause lyme disease!

I'm interested in standard time,
But if I don't get paid a dime,
I'll not repeat the silly name,
Of a watch..just to give it fame,
Or just to make a WATCH word rhyme!

--w2ilp--

Oris... It is in no way racist to call a Jew a Jew. It might be racist to call a spade a spade...but there is nothing that any Jew considers bad when he is referred to as a Jew and the Jew word is used by itself, without derogatory adjectives. Now some ignorant people think that being a Jew is so bad that being called a Jew must be bad. It is not. They used to put an "H" on Jewish GIs dog-tags so that they could call them Hebrews instead of Jews. Hebrew is a language ...When Jewish chaplins explained that, they started to put "J" on the dog-tags of the JEWISH AMERICAN SOLDIERS. Some people were told that being called a Jew is an insult...{It is not an insult to Jews who are proud to be called Jews. It is only an insult to call some biased non-Jews Jews because they are proud of the fact that they are Gentiles). That is why the term Anti-Semite became more popular than the term Anti-Jew. Actually a Semite is any person from the Near East, so that Semites include both Arabs, (mostly Moslems) as well as Jews and Egyptian Coptics, etc. As a Jew I would prefer that Anti-Jews be called Anti-Jews, not Anti-Semites because I don't want to share any possible ignorant hate with the Arabs. There are some really bad ways you can address Jews if you want to really insult them...BUT I myself won't teach you how here because that is something that IMHO you can learn yourself if you have some loquatious Anti-Jewish cronies.
> Go figure. So If I call a woman a B...h then I'm a

> language of the times they where writen. When is it going to stop? Yea
> the Cival war was about the south getting the crap taxed out of them
it
> didn't have ANYTHING to do with slaves. GO FIGURE!!

Did you know that the Vice President of the Confederacy was a Jew? I guess that could prove the sterotyped idea that Jews are everywhere or at least into everything. Could it also prove that any stereotyped notion that you try to pin on Jews in general may be wrong? People are people and IMHO there are right and wrong, good and bad among all peoples. Jews were selling stuff to both sides during the Civil War anyway, and some Blacks claim that some Jews have been slave merchants

as well as Freedom Riders.
> Just my opinion I could be wrong
> 73 from Oris
OK Oris- You are not alone... I am sure that many others share your opinions...BUT that does not make them accurate and I respect you for being able to think that you may be wrong. You may not know very many real Jews. You may not be sure if you should be an Anti-Jew.
> http://www.dirtball.com
>
> 97.1 Basis and purpose.
> (d) Expansion of the existing reservoir within the amateur radio
> SERVICE of trained operators, technicians, and electronics experts.
I agree with 97.1(d) and feel it should be the PRIMARY purpose for Ham Radio...although Ham Radio is not an amateur service. All Hams are not Amateurs and All Hams do not volunteer to be of service to anyone. Service is optional.

I'm all for the lively "debates" on here. And the "conflicts" on the radio. The "netters vs. jammers" battles and the "Herbie vs. Rich" battles. Face it, each side thrives on the other at times. For example, the Liberty Net guys have recently had a fresh new topic to discuss with the suspension of their "enemy", WA9KJI.

But when any of these groups loses a friend, I think we can lay down the attitudes for a minute and pass along a word of sympathy to the friends of the deceased.

To the Liberty Net guys, I will say that Radiosigs does not speak for everyone. I pass along my regrets in the passing of your friend Gene, KE2LO. Whether everyone agreed with his political beliefs or not does not matter at this time.

To this point, Radiosigs stands alone in his unkind comments about Gene on this n/g. N0VFP and KK7HO have laid down the differences long enough to pass along a kind thought and a prayer for Gene's family and friends.

I commend this, and I join them in it. I hope others will be able to rise above spiteful comments at this time. I'm sure that even WA9KJI would have had some kind words to say, even though he and Gene were in constant conflict on 3950.

I hope Radiosigs feels a sense of fulfillment with his comments. So far, he speaks only for himself.

Farewell, Gene. Enjoy your rest. Say hello to N5HDQ for us.

***This morning, one of the other Nazi bastards, the smooth talking felon from St.Croix, KV4FZ, Herbert Lucifer Schoenbohm, was saying how sorry he was by the passing of the smelly creep KE2LO. Remember when that innocent black man in Texas was dragged to his death by three scumbags who will eventually die by lethal injection? KE2LO loved those racist rednecks. Why he thought it was a big joke that a black man had been so mutilated and murdered. That was the ugly mindset of overall Metzger filth! You couple that kind of stuff with all his other racist,anti-Semitic crap and ladies and gents--presenting 3.950 AT ITS BEST. I heard KE2LO died of a massive heart attack. That's too bad. A plick like that should have suffered agonizingly. I loathed that man alive and have as little use for him kaput. To me he was symbolic of the enemy we fought and died over in the European Theater of War and don't tell me that one single proud American mourns the loss of one German soldier. To hell with the murderous bastards and to hell with someone as bad-Gene Metzger, KE2LO. AF2Y,

Doc******

Listen to this exciting radio program!

5.070 MHZ WWCR 8:30PM CST!

At last, a radio programme devoted to modern Confederate matters! We won't waste your time with wistful remembrances of antebellum days and tragic might-have-beens. Our number one concern is what might be yet. On Dixie Rising you'll find cogent political dialogue on the subject of the modern day Southern Nationalist movement, news from all quarters of Occupied Dixie, and historical reportage dispelling once and for all the odious Yankee myths surrounding the War for Southern Independence.
Only on Dixie Rising can you regularly hear interviews with Southern luminaries like Dr. Michael Hill, president of the League of the South, Donald Kennedy, author of "The South Was Right!", Franklin Sanders, futurist and publisher of "The Moneychanger", Charles Lunsford, famous defender of Southern heritage, author Peter Applebome, and a variety of others whose ideas are important to the South and its people.

> disappointed in the service now.

Hmmmmm..evidenly you wern't any too proud of it originally,
or you'd never have let your license lapse. So what has
changed?

Oh, I know all the common excuses...school, job,
family...we all have those. But REAL HAMS never let the
license go.

The Porkbut vote page is down again. Has porkbut went and done what the
fat slob does best? Did the cry baby cry somemore. Well porkbut if you
can't face the heat get out of the kicten. Face it porkbut nobody likes
you! The ones that say they like you we all know that it will be just a
matter of time before you rip them off too! I geuss you can call me dumb
I trusted you. porkbut. All I got was the biggest con-man on 75-meters.
Hear porkbut cry more with that crummy 2 by 3 call. The man can't even
buy a dead guys call.
listen for more crying from porkbut
3.901 MHz

Listen to this exciting radio program!

5.070 MHZ WWCR 8:30PM CST!

At last, a radio programme devoted to modern Confederate matters! We won't waste your time with wistful remembrances of antebellum days and tragic might-have-beens. Our number one concern is what might be yet. On Dixie Rising you'll find cogent political dialogue on the subject of the modern day Southern Nationalist movement, news from all quarters of Occupied Dixie, and historical reportage dispelling once and for all the odious Yankee myths surrounding the War for Southern Independence.
Only on Dixie Rising can you regularly hear interviews with Southern luminaries like Dr. Michael Hill, president of the League of the South, Donald Kennedy, author of "The South Was Right!", Franklin Sanders, futurist and publisher of "The Moneychanger", Charles Lunsford, famous defender of Southern heritage, author Peter Applebome, and a variety of others whose ideas are important to the South and its people.

2046. VHF antennas...yagis and jpoles..for sale cheap!

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-20 00:00:00 UTC
From: n8wwm@aol.com
Message-ID: <19990619221209.14562.00000911@ng-fl1.aol.com>
Source record: 139113

I custom build <1 at a time> some darn nice 2 meter antennas!

3 EL Yagi-30.00 These are all aluminum, gamma fed, nice looking and
working
yagis...The Jpole is all aluminum, goes together
in 2 shakes,
4 EL Yagi-37.00 and is 3/4 wavelength long. These are excellent antennas,

and have sold out at local fests and club
meetings each
5 EL Yagi- 43.00 time I bring 'em.

Jpole<3/4 wave length>-23.00

Each antenna comes with an instruction sheet and all hardware to have it up and running in minutes. The yagis have gamma rod assembled and attached to the driven element. The Jpoles come with pre-drilled set points for tuning at 3 points in the band.

I am not some web scammer, I just like building antennas. You can reach me by this email address, by my call book address, or by sending a note to my call sign at PO Box 2189 Schiller Park, Il 60176.
Chicago area hams may arrange for local pickup.
SHIPPING IS $8.50, regardless of antenna. I will ship 2 of any one for $11.00.

INCLUDE YOUR EMAIL ADDRESS IF YOU ORDER BY MAIL...Checks or Money order payable to Doug Adair only...this is not a big business...I am just having fun and helping new hams not GET RIPPED OFF!

Thanks guys...73 and CU on 6 METERS!!!!!!!!!!!!

This is very shocking....

Taken from http://www.jewwatch.com/index.html

These Christians are but a few of the 100,000,000 Christian innocents who were exterminated by All Anti-Christian Jewish Red Commissars in Russia under the orders of Trotsky, the Jewish Commissar of Commissars. Yet Spielberg will never Direct a "Schindler's List" Movie for them or their genocide. Why is that? Because Jews did it.

My relatives and my fellow Christians were murdered in the USSR under Jewish Marxism between 1917-1945, and many of the Marxists came to Russia from New York to do this to Christians in 1917 after Jacob Schiff, the Jewish anti-Christian maniac banker who owned The Guaranty National Trust, the largest bank in the United States, financed Lenin and Trotsky $35 million for the Red Revolution and the mass killing of these Christian souls. We must never forget this

Just like Doktor Hate, Jeff the Putz Uses a P.O Box; I wonder what he has been hiding for the last 22 years, Dok's lost love child?.

As per Jeffelah ‘Best $13 I ever spent Jealous?’ Boychik you got SCREWED for $13 bucks, I hope you used some form of protection.

I did not spend one Cent for my Call, why be jealous of a Putz who pay for a call, you better take some economics classes while you still can.

Oh and BTW do they know about your use of school property and theft of bandwidth for your hobby? Jeffelah, they will....

And the reason that we use Deja-news is that it is available, it keeps Dreck like you from being a snoop, and it is free and we do not have to steal it..

Jeffelah, Why thank you for your concern about my Blood Pressure, it is quite normal. dealing with mishigaz like you only brings spice to life.

So when you stop stealing and spend some of your own money on this please go and piss in your sandbox on the beach.
Oh and BTW are you going to sell stock in your ‘Pacific 500KC Coastal Station’, just remember don not give up that security guard job until you have at least 5 million from the investors? IPO-IPO-IPO.

Thank you.

Love you bubelah
Nate

>claiming they are mutually exclusive.)

Operator skill comes about from operating. It can't be book-learned. A better question is this: Why were new operators decades ago better prepared than their brethren today? I believe it was due to the up to three-month wait between passing the exams and receiving the license (and thus the privilege to go on the air). During that wait, folks couldn't do anything but buy/build their gear and listen, listen, listen. Three months of listening to others on the air -- that's how they picked up the proper procedures. Once they got on the air, they were better equipped with operating knowledge than today's instant-on hams.

>You
>then could become the AIDS poster boy. Doc,AF2Y*******
>

Doc Hate,

You are oh so WRONG! I am love very much*****OH,"YOU'RE LOVE VERY MUCH." I'M SURE SHE'LL BE IMPRESSED BY YOUR INTELLIGENCE***** with a nice young lady at my church***WHAT CHURCH? THE ASSEMBLY OF GODDAMN BIGOTS AND LOSERS?"
And I know for a fact that she really likes me. I am not afraid of her by no means, I mean, Doc when I look into her eyes, I just fall in love with her.***WHICH? THE ONES ON THE SIDES OF HER HEAD OR THE ONE IN THE MIDDLE,JUST ABOVE HER NOSE?****She
has a smile that would light the whole Church***I'LL BET SHE HAS A BEAUTIFUL TOOTH TOO*****. She has the most beautiful
brown hair, with some blond mixed in. I think about her all the time.***WELL CHICKEN SNIP, WHY DON'T YOU MAKE ADVANCES? IF YOU KNOW SHE LIKES YOU, THEN DO THINGS TO MAKE HER LOVE YOU. SITTING ALL WEEKEND BEFORE A SHORTWAVE SET,HINGING ON EVERY WORD OF LIARS AND BIGOTS ISN'T GOING TO GET YOU FAR.GET WITH THE PROGRAM, LLOYD, BEFORE YOU END UP LIKE THAT TULIP FROM HICKSVILLE,N.Y., AL PARKER, N2SAG, WHO'S STILL LIVING OFF MOMMA AND POPPA IN HIS LATE '40S. FOR CHRIST'S SAKE, LLOYD--BE A MAN, NOT A WUSSY.IF YOU HAVE A MASCULINE SIDE TO TO YOUR OTHERWISE WRETCHED PERSONALITY, SHOW IT.****** In
fact, I was watching "Star Trek: Voyager" and that Lady capt had her hair just like the girl at Church I'm so much in love with. I just can't stop thinking about her, Doc***ARE YOU NOT SURE YOU'RE REALLY IN LOVE WITH SPOCK AND THAT GIRL HAS POINTY EARS?
AF2Y,Doc******

As far as rasict stuff on the radio, I really can't explain it. I mean I enjoy listening to Bro Stair, Pete Peters, Texe Marrs, and The Liberty Net. Shoot, I can't go a day without at least 2 hours of Bro. Stair. He's the "Last Day Prophet of God" you know. And If you don't get right with God, Doc you're gonna goto HELL!

2066. Re: Y2K test on HF?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-21 00:00:00 UTC
From: "Christopher W. Buckley" <cwbuckle@mtu.edu>
Message-ID: <7kle80fem2@campus1.mtu.edu>
Source record: 138883

I know that power providers have set up HF stations in various
places, and ran a test recently to see how well it worked for sending
messages out to other providers and large customers.

I wonder what the legality of this is. Would
loss of power due to Y2K be considered an emergency
where these type of communications are legal?

I know they intend to use ham operators, but
this really seems like a for-profit use of
amateur radio.

Any thoughts?

On Sat, 19 Jun 1999 03:02:31 GMT , Christopher spewed forth to rec.radio.amateur.misc:

Friends:

Please do not judge all Jewish people by AF2Y, Charles Swartzbarg. He has deep mental problems. This forum and amateur radio are good outlets for his sickness. Do not confuse his baiting and hateful talk with the millions of Jewish people who mind their business, go to temple, practice their religion, (which he does not), and give to the community. Just ignore his hateful remarks and remember there are bad apples in every group.

And that goes for his wannabe Jewish buddy PORKBUTT also.

No, the alligators operated on 3895. Some of this group still is
active, however the group has long ago disbanded. Mr. Abernathy did
operate with them for a time, however. This was before he got busted
and turned his "first" OKA license in.

Complicated and possibly stupid question: I have a C74MSY repeater that was donated by a friend, and I'd like to tune it into the 440 band. It's one of the much older models and looks like it could possibly be crystal-tuned. Anyone ever dealt with one of these? It's a large rackmount unit with separate exciter, receiver, controller, and PA modules.

Yes, I know, I really should be using a VXR5000U or something else from this decade, but I'm broke and have the choice between this freebie or nothing at all, especially since I still have to find a tower site, duplexer, bandpass and preamp, etc., etc. Please email any (polite! ;-) suggestions to KD5BIV at mailto:lihan@ccwf.cc.utexas.edu .. tnx/73

Christopher,

If one can be found a Kenwood TS-700A would be a good choice. Have
you considered one of those Ten Tec 2 meter Transverters? They can
be had in kit or built form. They require a 10 meter signal source.
You could easly use a modified CB radio or one of those "export"
jobbers for the exciter. Simply hook the two together and you are
on two meter SSB. CHeap and simple.

I have a TRAM D201 I wish to have repaired, it lost all power last time I had it up and I do remember it did'nt transmit any amount of power that you would really wish to brag about but still, it don't work anymore. I live in FLorida and wish to get it repaired somewhere here in the central part of the state, preferably on the eastern side of the state at that but I am not that picky considering I know not many people out there are TRAM repairmen. Anyways, any help would be greatly appreciated. Please email me at IZZY@Aol.Com as I don't get to this newsgroup often.

I have a TRAM D201 I wish to have repaired, it lost all power last time I had it up and I do remember it did'nt transmit any amount of power that you would really wish to brag about but still, it don't work anymore. I live in FLorida and wish to get it repaired somewhere here in the central part of the state, preferably on the eastern side of the state at that but I am not that picky considering I know not many people out there are TRAM repairmen. Anyways, any help would be greatly appreciated. Please email me at IZZY1665@Aol.Com as I don't get to this newsgroup often.

2084. need software for PK-232MBX (primarily for Weather fax)

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-21 00:00:00 UTC
From: Darwin <downwind_sailor@yahoo.com>
Message-ID: <376E5E32.E923EA35@yahoo.com>
Source record: 138901

Greetings.
I'm new to ham radio but I'm installing an Icom 735 on our cruising sailboat and leaving for parts awash in October. A friend just gave me a PK232MBX multi-mode data controller so I could tie it in for Weather fax.... and **maybe** for 'sail-mail' e-mail over the SSB radio. But the software this thing has is dated way back from '92 (Pakratt II version 5.1) and is a Windows 3.1 at best. I have been unable to locate the origianl manufacturer (out of buisness???) Advanced Electronic Applications Inc. This software is so old it even advises using a dot matrix printer, like as if I could even find one these days. Also, is there an updated rom for this unit??

Is there any shareware that would work well with my needs and Windows95?? Where can I download this software??? upgrade?? (gulp..buy??).

Help me if you can..

My FT-757GX is generating noise when the pre-amp is turn on. I checked for external source of noise but I don't have any. It is definantly being generated in the pre-amp circuit. Please help!

2086. Re: Y2K test on HF?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-21 00:00:00 UTC
From: Michael Young <nobody@all.org>
Message-ID: <929983465.279.39@news.remarQ.com>
Source record: 138903

Hmmm. My first thought is: in the event of a local power outage, their transmissions won't be interfering with my use of the airwaves. My station is off the air, with no power backup. The legality issue seems to be a prickly one. Was there specific mention of ham frequencies? The ham HF allocation is quite small compared to the total space.

Michael.

FS: Saber 3 Everything Included!!..

Radio
Saber 3 uhf 120ch*
5D core
H/pwr
non secure
Model # H44SAk7139CN
band spread = 440-470
comes w/1 brand-new batt Motorola, 1 used (7.2v @ 1800 ma)
2 ant. short and long.
Operating Manual for Saber 3
belt clip.
Laptop 486/25 mhz 12 ram 210 HD
the shape of the radio is in very
good shape I'll give it a (9 out of 10).

4 light "Smart" Changer
motorola NTN4734A
GOOD WORKING CONDITION!!

Keyloader (New)
GOOD WORKING CONDITION!!

Rib box (New in the box w/manual)
Power Switch Power-On
Low Battery
Rechargeable Battery
Data Transfer LED's
Runs Eight Hours with a full charge
GOOD WORKING CONDITION!!

Laptop 486/25 mhz 12 ram 210 HD
Compaq LTE Lite
I got a serial, a parallel,
a VGA, and a mouse port.
Plus I got the case for it too.
And a mouse too.
GOOD WORKING CONDITION!!

All for $750.00 FIRM

You paid for S&H And Insures.

I'll e-mail you and call you with
tracking number.
I'll ship anywhere in the USA ONLY.

2089. wireless comm. theory

Ham radio has contributed greatly to the formation of the fundamental concepts behind modern wireless communications theory.

Please visit www.jcheahtechtalk.com for wireless communications theory discussions. Paper submissions are also welcome. Book and paper authors are also invited to participate in the Guest Corner to conduct direct discussions with the readers.

July update will include Microwave oven interference simulation and pi over 4 shifted QPSK eye pattern plotting routine.

>
> Realdeal
[...]

You're right, the man who so well deserves the sobriquet "Dr. Hate"
does not represent all Jews.

But he does, unfortunately, represent a significant and powerful
faction among the Jews: the "Anti-Defamation" League and Simon
Wiesenthal Center types who would censor or imprison anyone who
would question their power or policies; the Charles Schumers and
Diane Feinsteins who would take away our First and Second Amendment
rights; and the media billionaires who use their power of television
and the press to subvert our representative government and to
convince our young people that racial suicide is a good idea.

There are Jews who have opposed the Schumers and the Swartzbargs --
Jews like Benjamin Freedman, Alfred Lilienthal, Noam Chomsky, and
Israel Shahak.

But they, unfortunately, have been in the minority, and most Jews
stand aside and let the ADL criminals speak for them, just as too
many White Americans stand aside and let Clinton and his Republican
appeasers continue to remain at large.

Happy Summer Solstice,

--

Kevin Alfred Strom.

The Internet Space Weather and Radio Propagation Forecasting Course begins in one week, on 28 June. Everyone interested in enrolling needs to submit their enrollment forms by 28 June. We will accept late enrollments if you postal mail your enrollment forms (as opposed to FAXing them) on or before 28 June, or if you e-mail us and indicate that your enrollment forms may be late. E-mail such notices to: Oler@solar.uleth.ca.

A complete course outline is available on the web at:
http://solar.uleth.ca/www/course.html

As well, a printable enrollment form is available at:
http://solar.uleth.ca/www/enroll.html

Questions or comments should be addressed to: oler@solar.uleth.ca.

This is the final notice we will post concerning this course.

You got that one right! Surprising for a southerner. In any case, several years back we were driving through South Carolina and I noticed a big confederate flag with a skull and crossbones on it in a gas station. The motto on the flag read "The South Shall Rise Again" to which I snickered "And the north shall kick it's ass once again!"

Which ancient moral values are you reffering to?

>To these deluded souls, anything which tends to the
>preservation of our genetic heritage, which gave birth to the
>Parthenon, Shakespeare, the transistor, and the Saturn V rocket, and
>everything in between, is somehow "evil."

Just checking, are we talking about the same group that enslaved African Americans, slaughtered American Indians, slaughtered American Buffalo almost completly eliminating them. Is this the same group that in Europe burned millions in the name ethnic cleansing. Was the Roman Empire a part of this group?
I'm just not clear which group your talking about when you bring up ancient moral values and "our" genetic heritage. Please explain.

>And anything which tends
>to the destruction of that heritage is "good."
>
>And others are so thoughtless of that heritage that they would throw
>it away for a roll on soiled sheets with a Bangkok bar girl.

So thoughtless of that heritage? Hmmm when the "white" sailors came across the Atlantic and found native women here are you implying that there was no sexual relations between the two? I suppose the "white" men were so proud of thier genetic heritage that they refused to lay with these non-white women?

Additionally, after visiting your web page I find it curious that a grown man has a web page defining "Feminine Beauty " with pictures of girls who are 9,11,12,14 and 16 years old. Do you find many 9 year old girls beautiful?

Since neither of you know, allow me to answer the question of "why do
they call him porkbutt".

The original eruption of the name "porkbutt" came from the filthy
mouth of one K4OKA, ex KJ4JX, ex K4OKA, a one Al Abernathy. This
began on the famous frequency of 3894.5. This particular
group was known as "The Abernathy Radio Network". This group later
began known as the "Stumpjumpers". And for all that are in the know,
this is but a sister organization of the B.A.R.F. (Better amateur
radio federation}. Better known as the Bigoted Ayrian Racist Facists.

Hope this is of some help.

>I don't think it's really any of your concern, you f#$%^& fool! Anyway, it's
>taken care of.

Yes, Lloyd, your failure to notify the FCC of your change of address (until recently) IS of my concern. As a licensed amateur operator, part of my responsibility is to see to it that other amateur operators follow the FCC rules.

>>Or perhaps it is not the FCC that
>>Lloyd and Drew are hiding from. Perhaps they are afraid that if their
>>current
>>addresses are listed in QRZ,
someone who dislikes their inane posts in this
>>NG
>>may pay them a visit. Just a thought.

>I'm taking that as a valid threat.

Take it any way you wish, Mr. Davies. It was not intended as a threat; the statement was made to remind you that you are responsible for informing the FCC of your current address as long as you hold a valid amateur license. I was merely suggesting that Mr. Hollingsworth or one of his flunkys might pay you and Mr. Durigan a visit if both of you do not inform the FCC of your change of address.

> You are the one who brought that up, Mr.
>Dead Man's Call.

Once again you prove your ignornace by evading the issue, Lloyd. NOWHERE in any of my posts have I used a "dead man's call." Look at my screen name, you dork! Where, preytel, do you see ANY reference to anyone's callsign? I could just as easily be the Frank Burns character from "MASH" as Frank E. Burns of Phoenix, Arizona.

You're the one who has an obsession with the "OYE BOY" or
>Eric Oyen. This is what I have heard. And from what I gather, It's not
>healthy
>for you.

I'm sure you were given that information by a very reliable source (snicker, snicker)--your buddy Drew Durigan. Now THERE'S a reliable source--a wanna-be DJ who's been fired from every job he's had over the past four years. And speaking of obsessions, Lloyd, you seem to have an obsession with Rich Whiten, a/k/a Porkbutt, as well as some device called a "TinyTenna." And from what I gather, it's not healthy for you. Moreover, your obsessions create a lot of useless spam which clogs this newsgroup.

>NOW,
>
>WHAT ELSE DO YOU WANT TO KICK ASS ABOUT!!!!!
>

Is that a threat, Lloyd? Oooohhh, give me a minute to call Drew Durigan's "lawyer" and tell him you're threatening me!

By the way, Lloyd, for a person who claims to have a college education in his QRZ profile, your lack of reasoning is appalling. And for a born again Christian, you've got a filthy mouth. Were you like, a CB'er before you barely passed your Novice and Technician tests and became a ham?

Go work some DX on 6 meters, Lloyd--maybe it'll mellow you out some.

"Where's all the RADIO CRYBABIES?"

"Dear" AF2Y,

Your hate-filled tirade shown above has
finally convinced me that you and your
obnoxious self-chosen race deserves no
sympathy or support.

You are hereby put on notice that I will
devote the rest of my life to free America
from Jewish influence.

Have a nice day.

***And make sure you begin your "cleansing of Jewish influence" by throwing out all the medical specialists and scientists and researchers and technicians and professors heading the greatest teaching academies in America. Yes, make sure you attack every Jew who devotes his everyday life to making the lives of bigoted goyishe scumbags like you and your families healthy, safe, secure and enriched. And once you've disposed of Jewish influence in medicine and associated sciences, then think about the arts and humanities and philanthropies. Sure enough,go ahead and throw out the culture and tradition and Torah that took heathens and turned them into people. Hell, my people were priests in the temple of Solomon while yours were swinging from trees. And don't forget to also dispose of everything Jewish Jesus taught and stood for -the man you turned into God and then attacked those same people who gave him to you for not doing the same thing that was forbidden in the Ten Commandments. This I'll say;for millenia, we Jews have survived and have spit in the faces of people like you. You can work all you want trying to do away with, as you call it, "Jewish influence," but you'll fail. You'll fail the same as every other anti-Semitic meathead's failed. And it's not because you're Gentile and not because you think you're Christian. The truth is that your kind are lowlife slimebuckets who don't amount to a flea on an elephant's rear. And you know

nothing of theology and philosophy either. And you like wallowing in the morass of ignorance and decadence to which I say this: you'll be long gone before you can do away with any vestige of Jewish influence. How's that for making you feel like the spitheel you really are? Doc,AF2Y*****

I was reading an article in the paper today that mentioned a new tactic being floated by the new confederacy.

Just try it - there'll be U.S. troops there before you could organize any type of secession movement. But then again, that is the southern U.S. - a place that I've always said should have been used for nuclear testing rather than spoil the pristine beauty of the western drylands.

In article <7khice$25m1@enews1.newsguy.com>, joe@schlatter.org says...
> Teach a Yankee to drive.
> Point his car north.

Consider the following points, should the folks proposing a sovereign south succeed:

1) Expatriate southerners would no longer be U.S. citizens, and therefore need alien visas to work in any of the non-confederate states. And northerners/southerners in both areas would need passports.

2) Dialing a telephone into the new Southern Confederacy would be an international call. Imagine that.

3) Kiss federal highway support goodbye - as well as federal contracts for boat building, etc. I'd actually welcome that as Electric Boat would then be in a prime position.

Let's face it, the civil war was well over a century ago. Let it go.

If you knew anything about the code, you'd realize that $13 for a shorter and easier-to-send callsign is dirt cheap compared to the extra minutes that will add up over the years from sending the extraneous dits and dahs which accompany a longer callsign, not to mention the ease to the receiving operator.

>I did not spend one Cent for my Call, why be jealous of a Putz who pay
>for a call, you better take some economics classes while you still can.

You have no call. Like the other anons on here, you're on the outside looking in; you're a "poser." (And you should take some grammar classes.)

>Oh and BTW do they know about your use of school property and theft of
>bandwidth for your hobby? Jeffelah, they will....

Yup. And they will affirm my right to post to these newsgroups, as they have for the last seven years that I've had this account. Universities are not in the habit of removing free-speech internet access. (I must have really struck a nerve, eh? Heeheehee)

>So when you stop stealing and spend some of your own money on this
>please go and piss in your sandbox on the beach.

<Scratch scratch> Huh? (We offer several creative writing classes -- consider registering for one.)

>Oh and BTW are you going to sell stock in your ?Pacific 500KC Coastal
>Station?,

Nope. It will be a single-man operation. I already keep a spare rcvr on 500 in the evenings -- been doing so for some 20 years. Still lots of traffic in the Western and Southern Pacific. I'll relay traffic at no cost (passing WX OBS and AMVERS are a local call, as are QTOs et cetera).

Good news about the young lady at church, VFP. Keep us posted. We'd like to hear wedding bells someday soon. Church is the best place to meet someone, that's for sure. We wish you the best on this.

I don't know what's up with your detractors on here, but they seem to spew out a lot of hate and arrogance towards everything and everybody. Maybe you're right. Maybe they need to get right with God. Maybe they could go to church with you sometime and your pastor could baptize them after they walk down the aisle and repent.

Maybe you could post the schedule for the Texe Marrs broadcast. I think he's very interesting. I also like David J. Smith on WWL (870 AM) every night at 1100pm Central Time.

Doesn't "dead head" mean "free of charge"?

In the maritime radio service, "DH MEDICO" indicates a medical-related message in which the sender is requesting that it be passed free-of-charge to the nearest health agency (US Public Health Service usually takes them and provides the requested medical advice).

I hope somebody will be able to help me. I have a tk-862 commercial radio from Kenwood and i have a problem.
As soon as the engine of my car is running I can't reach the repeater because the noise generated by the alternator is added to my tx singal causing the receiver of the repeater to ignore the noise added to the ctcss. If the engine is not running, everything is ok. I tried to put a noise filter in line the power cable: same thing is happening. I even tried the radio in another car to make sure the alternator of my car is not faulty. Always the same results.
Need help!
Thanks

Porkbutt needs to find a good Bible believing church and go get saved. He just lives a few miles from Tabernacle Baptist Church at the corner of White Horse Road and Hwy. 123. That would be a good one. Then he can take some Bible classes and go out on visitation night and invite people to church.

Either that or else someone should send the Jehovah Witnesses over to his house to sell him some Watchtowers.

I have just added two additional filtering algorithms to my program.

One is an Adaptive Filter which helps pull voice signals out of
background noise and the other is an Exponential Averager which reduces
background noise.

These are included as a bonus in the Licensed Version only.

2151. Ohio, July Foxhunt

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-22 00:00:00 UTC
From: dino@cros.net
Message-ID: <37702157.12926082@news.cros.net>
Source record: 138836

The Buckeye Transmitter Hunters Association (BTHA) will sponsor its second 1999 foxhunt on Sunday, July 25th, at 1:00 P.M. This will be a mileage hunt starting at the staging area, 1631 Tiffin Av, Sandusky. Erv, KA8CAS, will be the fox. Fox will start transmitting at 1:00 P.M. on VHF simplex frequency 146.565.

Maps of the hunt boundaries will be available at the staging area. Winner gets to be the fox at the next hunt; plus we'll put your picture on our web page at [http://www.cros.net/dougd/thunt]. What a Deal! And that's not all - Chili Dogs, potato salad and chips will be served at the staging area, [Dino, KA8IAE's house], after the hunt. The hunt will officially close at 5:00 P.M. (earlier if everyone finds the fox, or, UGH, gives up).

Everyone is welcome... come on over and have some fun. We scheduled this hunt in the afternoon hoping to snare some of those sleepyheads that couldn't make the morning hunt (see how thoughtful we are).

Talk-in and emergency communications will be on the W8LBZ repeater, 146.655-

The BTHA is dedicated to increasing skills in the area of Radio Direction Finding as a facet of Amateur Radio, both as a sport and for public service in the State of Ohio. We welcome everyone to participate in our frequent hidden transmitter hunts - held throughout the north central region of Ohio - at this time.

2155. What connectors for RG6 ?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-22 00:00:00 UTC
From: Ken Tentarelli <NOSPAMken@sugar-river.net>
Message-ID: <37705430.CAEABE2F@sugar-river.net>
Source record: 138840

Is it appropriate to use crimp-style UHF or BNC connectors
with RG6 coax ? Or are there better choices.

I got a length of RG6 from the local; cable TV folks They
use crimp style F connectors, but for ham use I want to use
UHF or BNC. I assume some type of crimp connector
must be used since the shield is aluminum so it can't be soldered.

Tnx, Ken AC1H

HEY!!!!
PORKBUTT is on 3.901 trying to rip Tom waiver boy off again. PORKBUTT
is setting him up good. PORKBUTT said he would build him a amp so and I
quote "cause TVI to run the neighbors off and then buy up the land".
PORKBUTT is a con-artist. PORKBUTT whats to build Tom another bad amp!
You guys should hear him buttering up Tom for the next burn. I
thought that it was illeagel to build amplifier's to cause interferance.
Look at PORKBUTT's last post. He can only hit at family members so
now he hits peoples wives.

To discuss them all is beyond the scope of a Usenet article, but what I was mainly referring to was the natural tendency to regard actions which militate against the survival of your own people as evil actions, and to regard actions which tend to ensure the survival of your own people as good actions.

In what is still, for some odd reason, referred to as the "West," this has been inverted in a matter of a few short decades.

> moral values and "our" genetic heritage. Please explain.
>

It's not that I think that all White people are so great, or intelligent, or moral paragons -- far from it. After all, Bill Clinton is White.

But it must be admitted that our race has been able to raise itself a few inches above the slime of universal squalor and savagery: it did produce the greatness that was Greece and the grandeur that was Rome; it did produce Beethoven's Ninth Symphony and Orff's _Carmina Burana_; it did produce the transistor and the spacecraft that allowed us to briefly touch the face of the Moon; it did abolish slavery and enshrine (I hope not briefly) the rights of citizens to govern themselves.

Such a race, which is also in my opinion a uniquely beautiful race, deserves to live and have its own territory, at least as much as does the Spotted Owl.

But just because we raised ourselves a few inches above the muck is no reason to get big-headed about how "great" we are -- an inch is just an inch, and the journey to the stars is many light-years.

Some did and some didn't. The results are evident for all to see in the faces of the citizens and the relative living conditions of Mexico City, Port-au-Prince, and Minneapolis.

> beautiful?
>
> Tim ka8ddz

Tim, since you have referred to this at least twice, and it has nothing to do with the issue at hand, I can only assume that you are 1) making false insinuations since you know you can't refute my arguments; or 2) you are yourself sexually attracted to underage girls, which is a sexual perversion I abhor, in which case you should turn yourself in for treatment if there is any chance you might act on your unnatural feelings; or 3) you have a genuine concern that perverts might look at the totally innocent images on my page (which include pretty girls and women of all ages up to age 65) and try to contact the girls somehow.

I will be charitable and assume that your motivation is the last mentioned.

I assure you that the identities of the models can in no way be discovered through my page, so there is no danger to them whatsoever. As a father of a young daughter, I am sensitive to the issue.

I will point out that one of the young models is my own mother in a picture taken many decades ago, and another is a now-deceased dear friend of mine. Thanks for sullying their memory with revolting implications.

I really don't blame you, though. Since the "sexual revolution" swept the values of the Old America into the trash, the horrid perversions openly vended and promoted by the culture distorters are unavoidable even by the most circumspect. Thus things which were considered totally innocent in the Old America, like two men embracing as an expression of non-sexual friendship, or a harmless picture of a cute little girl, now raise implications of perversion that were never even thought of in prior decades. This is very sad.

But I'll be damned if I'm going to let that ruin my aesthetic appreciation of beautiful girls of all ages, which are one of the things that make life worth living.

Viva Maurice Chevalier,

Kevin, WB4AIO.

Darwin,
In 1997, Timewave Technology Inc. bought all the rights to the PK-232MBX and
other data products from the now defunct Advanced Electronics Appplications,
Inc. of Lynnwood, WA. Timewave now provides complete support for the
PK-232MBX, including upgrades, repairs and Windows 95/98 software. We also
manufacture and sell the PK-232/DSP, an advanced DSP version of the original
PK-232/PK-232MBX.

For more information, Contact Timewave.

Gentleman and Ladies:

In memory of the passing of KE2LO, Gene Metzger who will be missed and in light of the Sterling responses that was provided to this tragedy by one Charles "Doc Hate"AF2Y AKA "The CloudWarmer Dupa" and his sidekick Mr.Rich "Short and Succinct" WB2OTK AKA "The Genius PorkButt Ape of Gibraltar".

A copy of AF2Y's message can be seen below..

In responce to this hatefull outporing from the two individuals in questione, let us Please AGAIN Remember to pass our individual notes of "Understanding" to them in the True Light of their Candid display of Grief on the Sudden and Tragic Loss of a member of the Radio Amateur Community.

For those so wishing, bellow is the e-mail information.

For "Doc Hate" AF2Y it is radiosigs@aol.com

For Rich "PorkButt" WB2OTK it is richwhiten@aol.com

In light of their Concern and Caring Attitude, PLEASE PLEASE Remunerate in KIND via E- Mail.

Thank You for your Time and Efforts.

Nate

*****ONCE AGAIN, ALLOW ME TO REITERATE. EVERY TIME I EITHER WORKED OR HEARD KE2LO, WHAT CAME OUT OF HIS MOUTH WAS VENOM. THE MAN WAS A NOTORIOUS ANTI-SEMITE, HOLOCAUST DENIER,WHITE EXTREMIST AND U.S.GOVERNMENT HATER. THE ONLY ONES WHO'LL MISS HIM ARE HIS FAMILY (THAT'S SPECULATIVE) &HIS VICIOUS FRIENDS. KE2LO REPRESENTED THE WORST IN AMERICA, THE WORST IN MANKIND AND THEREFORE WILL BE MOST WELCOMED BY THE DEVIL IF ANYONE IS STUPID ENOUGH TO BELIEVE IN SUCH A FAIRY TALE. ANY MAN WHO OPENLY STATED THAT AMERICA FOUGHT FOR THE WRONG SIDE IN W.W.II IS A DISGRACE TO THIS NATION AND ESPECIALLY TO THE BRAVE MEN AND WOMEN WHO WERE WOUNDED AND DIED FIGHTING THE AXIS POWERS. HE DOES NOT DESERVE TO BE BURIED BENEATH THE SOIL OF THIS GREAT LAND AND WOULD BE BETTER OFF BEING DUMPED AT SEA ALTHOUGH WHY PUNISH INNOCENT AQUATIC LIFE? WHAT HAPPENED TO KE2LO SHOULD HAPPEN TO THE MAINSTAYS ON 3.950. IT WOULD BENEFIT THIS NATION AND CERTAINLY MAKE RILEY HOLLINGSWORTH'S LIFE EASIER.AND AS FAR AS I PERSONALLY AM CONCERNED, NO LONGER WILL I HAVE TO SAY TO THE S.O.B.,"DROP DEAD, GENE." AF2Y,DOC*****

What if he lloked like a penis? He is a "lier", is that anything like a
liar?
He is a "theif?" Is that anything like a thief?

I do not think you ought to be calling anyone names.

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. How to pass the A+ Certification
2. See Hillary do something naked.
3. A blond naked chic being held by a female ham!.
4. Take the Burt Poll, about Clinton ham spouses, girlfriends
5. Attacks against Burt K1OIK's opinion of ham radio in a national
publication for broadcasters
6. Burt's opinion on the First Affair in the White House with a picture of
the new first couple.
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. A test for your SVGA monitor
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

Hi there

you should be able to find a cheap 2 M SSB like the IC202 of FT209

I have both if you interested in making an offer

Yaesu FT727 2m/70cm Handheld, 0.5/4W. Bit tatty but works extremely well.
Includes - C/Case, Dual Band aerial, Alkaline Batt holder plus High Power
Nicad (in need of new cells), Base adaptor/fast-charger, Car Cigar
adaptor/charger, Fist Mic/Spkr and Door Attachment carrier.
100.00 UKP the above lot. No Split.

Microwave Modules MML 144/30-LS 2m Linear (SSB/FM) 1/3 watts in 30 watts
out - RX RF amp, auto T/R switching. Ideal for FT290 etc. 35UKP OR VNO.
Buyer to arrange carriage or collection. Keith G3TYR - QTHR - GUILDFORD UK.
ICQ# 3513082

If you have a technical question, you should try rec.radio.cb. You'll get a much more informed and accurate answer (and Im not being sarcastic). I wouldn't bother asking a technical question on this NG. The people here are more interested in name-calling instead of Ham radio. They dont realize it, but its because of people like them thats causing the diminishment of amateur licenses, not policies or morse code.

Ive been watching the pissing contest that these children have been engaged in for the past couple of years now. With time the FCC will eliminate all of the amateur bands except for a small portion of the CB freeband which these people will be allowed to operate.

Kevin Alfred Strom wrote in message

>But it must be admitted that our race has been able to raise itself
>a few inches above the slime of universal squalor and savagery

I don't care to admit that, while the Mayan Indians may have sacrificed virgins to the Sun God, whites were burning women suspected of witchcraft at the stake so where's the big difference between the two? How did we raise ourselves above the savagery when we all but eliminated the american indians, when we enslaved Africans, burned witches at the stake? You seem to have a very focused view of the "sucess" storys and seem to have forgotten the rest.

>it
>did produce the greatness that was Greece and the grandeur that was
>Rome;

Rome was built on the backs of slaves, is this a trait you find admirable in a race of people?

>it did produce Beethoven's Ninth Symphony and Orff's _Carmina
>Burana_;

No it didn't, Beethoven wrote the Ninth Symphony not his race.

>it did produce the transistor and the spacecraft that
>allowed us to briefly touch the face of the Moon; it did abolish
>slavery and enshrine (I hope not briefly) the rights of citizens to
>govern themselves.

You talk about abolishing slavery as if white race accomplished something great, you failed to mention that it was the white race that enslaved the Africans to begin with.

>Such a race, which is also in my opinion a uniquely beautiful race,
>deserves to live and have its own territory, at least as much as
>does the Spotted Owl.

It's own territory? Hmm if the territory you have in mind is the U.S please don't forget our nation was founded under the belief that "all men are created equal" not "some races are better than others" I think your very confused about the difference between racial success and success due to economic, political and territorial opportunity.

>> So thoughtless of that heritage? Hmmm when the "white" sailors came
across
>> the Atlantic and found native women here are you implying that there was
no

>65) and try to contact the girls somehow.
>
>I will be charitable and assume that your motivation is the last
>mentioned.

Yes that's exaclty right, you seem like an educated man, although I totally
disagree with your thoughts on the white race, and considering the
sensitivity with respect to pictures of underage girls on the internet and
the implications that go with it I certainly wouldn't post the pictures on
my webpage under "Feminine Beauty" it just looks questionable, but I suppose
if you were concerned about being questionable you would list the links that
you do. :) By the way, the next time you make your daughter a peanut butter
and jelly sandwitch make sure you point out that peanut butter was developed
by an African American.

I think your living in a dream world when you talk of the white race
"raising itself a few inches above" If you had been given up for adoption
and raised by a Mexican family in Mexico City do you think your genetic
heritage would have caused you to rise above the poverty? I highly doubt it.

I remain, happily interracially married,

Tim ka8ddz

I mite not be able to spell but I'm honest. I mite not be grammiticly correct all the time but If I say I'm goin to do somthing I do do it. I don't rip people off. I don't con people so in saying all that PORKBUTT is a lier and a thief! I have the right to say this because I have first hand experaince. PORKBUTT has stolen from other people too. People have tryed to get their money back for those 3 dollar filters he build and all he can say is the problems in their rigs. PORKBUTT has ripped alot of people off. I have ripped nobody off. Can you say the same about your self?? Now that the truth about PORKBUTT is coming out all these people have no brains and they are liers. But let see what the facts are. Tom is a cripple and PORKBUTT set him up good he didn't have that amp that PORKBUTT built for a week and the thing blew up. PORKBUTT said Tom blew it up. WHAT DOES THAT SAY ABOUT PORKBUTT's amps. Its a wonder nobody has been killed from them. How many 11-meter amps are out there because of PORKBUTT I ask? When is the FCC going to put a stop to this no count con artist and 100% lier.
I will through one heck of a party when PORKBUTT is off the air for good!

The real problem is that so many of our families gave blood,
lives and limbs for their respective governments believing that what they

did was right.

Dan and I (sadly, among so many others) have experienced this "problem"
again
in an equally stupid unnecessary war.

If we can't learn from the horrible history of the Civil War, and Viet
Nam,
the lessons of respect, tolerance, civility, dare I say Love?,
we have to be the stupidest people to populate the earth.

The lessons are clear, learn to live together, or just die... together.

Lets hear you all on field day, look for W1DVC!

I heard that the AF2Y garage sale last weekend was a bomb. I guess that no one wants Charles junk....Overpriced for sure!!

I wonder if he had any old dentist chairs for sale? How about the drill his female employee used that he made "sexual advances" to"?

Work is coming right along with the AF2Y web site....I will be posting all of his legal papers this weekend/early next week.

Something big is coming down the pipeline about AF2Y...There will be a MAJOR POSTING later this week. You would not believe how much credit information is out there about this idiot!! (lots when you don't pay your bills)

I'm working on getting a recent photo for all to see on the "AF2Y Bad Credit & Legal Troubles Web Page". I have his college photo & think he may have payed someone off to have it in the yearbook, along with his DDS degree.

So far I have a huge stack of Charles legal paperwork....How much do you all want to see? All of it, or just the juicy stuff?

I have my pitbull teeth sunk into AF2Y real deep & I WILL NOT LET GO!! I'm thinking about also latching onto WB2OTK (Rich "big mouth" Whiten) very soon. Lets see if WB2OTK is paying income tax on his shity filters that DO NOT work.

Here is the email addresses for the two idiots....flood their email boxes & let them know what you think of them!!

Rich "know it all" Whiten Richwhiten@aol.com
Charles "the felon" Radiosigs@aol.com

THE FUN HAS JUST STARTED!!!

The Human Pitbull,

kc1zq

If you've missed me today, I've been very preoccupied with a ton of paperwork and must put in some tedious hours to earn some money for my daughter's wedding next month. I hope you'll excuse me. Of course if you prefer seeing me on this board, then contributions will be accepted. Send your "offerings" to the Doc Daughter Wedding Fund, c/o/Richard Whiten,343 Two Notch Trail, Easley,S.C.29642. Simply make your checks out to the D.D.W.F. and Rich will send them up. I must however warn you. Although I'm not USENET today, I do have agents watching out for my best interests-good decent friends like Rich, Dan Jeswald, Tom McMillan, Jim Dale and Rube Lloyd who keep me apprised by phone of any untoward postings about me. If they appear, I'll know about them and will come back with a vengeance. I have spoken! Doc,AF2Y

>
The above is a pretty good story...BUT I just want to remind all
readers that you don't have to be Jewish to ride around heaven on a
bicycle or on roller scates....Besides... Moses is not Saint Peter.
Moses brought the people the Ten Commandments....BUT he was never
assigned the job of enforcing them....or judging sinners. Like a Ham
who relays a message, Moses was just a messanger. ...In fact, Moses was
not even allowed into the promised land, although he led his people out
of Egypt. Who knows if Moses himself ever was allowed into heaven
(even with running shoes)? (:o0)
Please keep thinking,
I never met a Ham I didn't like,
Hams need MORE license classes,

It is not the employee that enjoys the status, but the office. Hollingsworth
is an officer of the court, entrusted with the authority to levy fines, revoke
licenses, and make referrals for criminal prosecution. So, impersonating him
is potentially of greater harm than impersonating someone else not in such a position.

That said, no one took that initial post seriously. It wasn't even a proper
spoof, as it came from a commercial domain known as a haven for troublemakers.

Man, I can't believe I'm reading this. You guys need to find the off switch, take the antennas down so you won't be an embarrassment to the neighborhood and find a less stressful hobby. Do something constructive like a neighborhood block watch or clean up all the trash and litter in parks. It would be good for your mental health.

I agree with you..... Some people ARE stupid! ....But wait..... Some of
them CAN change.
Did you know that the program you think as wasteful is staffed by volunteers
using their own equipment.
Have you read even one article about what you are putting down as a waste of
time?
What if I felt that medical research to keep stupid people like you alive
and healthy longer was a waste of time?
Would that be OK with you?

I havent seen much from DOC that I think is worthwhile on this news group
but.....
I have to give the man credit (and due respect) for giving his time and
resources to something that could benefit all humanity.

What have you done lately for the betterment of mankind?

I hate to admit it but I too have become a taker and user without trying to
give back anything.
Perhaps it is time I took a look around and see what I can do to contribute
something to the next gereration.

**********NEWS FLASH**********

Thanks to all who have reported Charles (AF2Y) to the IRS!! His case is under review as I speak....THIS IS GREAT NEWS. The Feds will start to turn the screws to 'ole Charlie any day now.

We need to turn the heat up a little more though....Please call your local IRS office & report AF2Y to them for not paying his taxes. You can get AF2Y's info at: www.qrz.com Just enter AF2Y & it will show you his info.

I'm starting to get a bunch of data on WB2OTK to post soon....Tax records and the like.....stay tuned.

With your help we can get rid of these clowns on the air. Flood their mailboxes with junk & tell them what you think of them. Pick one or both, YOU CAN'T GO WRONG!!

Radiosigs@aol.com (AF2Y)
Richwhiten@aol.com (WB2OTK)

**********NEWS FLASH**********

Thanks to all who have reported Charles (AF2Y) to the IRS!! His case is under review as I speak....THIS IS GREAT NEWS. The Feds will start to turn the screws to 'ole Charlie any day now.

We need to turn the heat up a little more though....Please call your local IRS office & report AF2Y to them for not paying his taxes. You can get AF2Y's info at: www.qrz.com Just enter AF2Y & it will show you his info.

I'm starting to get a bunch of data on WB2OTK to post soon....Tax records and the like.....stay tuned.

With your help we can get rid of these clowns on the air. Flood their mailboxes with junk & tell them what you think of them. Pick one or both, YOU CAN'T GO WRONG!!

Radiosigs@aol.com (AF2Y)
Richwhiten@aol.com (WB2OTK)

The fun has just started!

The Human Pitbull,

kc1zq

Hola! After SWLing you on 20meters, I think you should study your
electronics manuals to prepare for your upcoming retest! You really
are an idjit!

> The fun has just started!

Riley sez your fun ends on Aug 30th becuz you will fail your retest!

Adios senor amigo idjit!

Nice one! I heard something similar, also in the UK and some years ago.
A subscriber's phone would work (ie ring) at certain times, and not at
others. It turned out that the earth was via large metal plate set into
the adjacent river bank. Trouble is, the river was actually a tidal
creek!

I'm not a HAM and I greatly dislike morse coders, but asking people to take their antennas down for the neighbors is not right.
Should I go to my Korean neighbor next door and shut up his karoki squeeling wife every weekend?
Maybe I should go to my neighbor on the other side of my house and tell him to stop his mexican country
band practice in his garage every weekend?
I can name something annoying, embarrasing and outright ugly about every single of of my 25 close neighbors.
A HAM antenna would be the least of our worries.
Oh, BTW, before my mexican next door neighbors moved in, there was a 60 foot tower with a Beam hanging off it.
It hung over both houses (ours) and his next door neighbors and we thought nothing about it because the trees are
so deep and thick here, you can't see the tower, less the antenna because the tree line stops their visibility (unless
you are either in a helicopter or in a building close by).

2210. FS/Trade: CS-800 Repeater Controler/Interconnect

And folks...here we have a brain dead who's been a vociferous KV4FZ supporter, an instigator,music playing jammer,slanderer and he'll be going bye bye before his beloved Herbert. How sweet it is!

FCC Amateur Radio Enforcement Log

A representative listing of recent reports on Amateur Radio enforcement-related actions from the files of the FCC Compliance and Information Bureau:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has what it believes to be reliable evidence of possible rules infractions and not necessarily that the recipient has violated FCC rules. The FCC has the authority, pursuant to ï¿½97.519(d)(2) of the rules to readminister any examination element previously administered by a volunteer examiner. This Enforcement Log is representative of recent Warning Notices, Notices of Violation, calls for retesting, and other FCC communications to licensees involving possible serious rules violations. It is not a comprehensive listing.
BARRE, VT: The FCC has requested that Advanced class licensee David J. Tolassi, KC1ZQ, retake the Advanced class examination elements under the supervision of an ARRL-VEC VE team by August 30, 1999, or his license will be cancelled.

Yes I know it does, I had a friend who died from it and he was not
homosexual.
I remember in High School first hearing about AIDS and how there were many
jokes
and one liners about the disease, much like the one you posted above. Of
course that
was 20 years ago and now with a family of my own I understand the
seriousness of
it and how it could someday effect my family.

Perhaps someday you'll grow up, and start a family of your own. Maybe you'll
have children, enjoy them they grow up very fast. I wonder what your
reaction might be if someday your daughter or son asks you to sit down
because they need to talk to you about something, as they agonize through
the story you find out they are HIV positive because thier partner, who
they believed to be o.k was carrying the virus and passed it to them.

At that point Lloyd, will you look at your son or daugther and say "AIDS
kills Fags DEAD!" ?
Will it be as funny to you then as it is now?

Hi Spunky - thanks for your post... well taken.

First, I thought you might like to know that when you hit the Enter key at the end of a line, it causes all the broken
text (as you can see in your letter below). If you can't break the habit of hitting the Enter key as you type, try this.
Do your typing or load your existing text into MS Word. Then, hit the ï¿½ button. That will show you where all the carriage
returns are located within the text. Then, it's just a simple matter of deleting all the extra ones. The only place you
should see ï¿½ is where a paragraph ends and a new one starts.

Yes, you are quite right about your neighbors. We live so tightly packed in neighborhoods where houses are only 15' apart
that no one should be expected to worry about eye sores or noise... it just happens. The only thing one can do is move
away from it to a more upscale area. That's what I'm in the process of doing right now. I got into some of those risky
Internet stocks and now I can afford to look out the window and laugh at these clowns.

As for Koreans... I think they are a welcome addition to our country. They love to garden and grown vegetables; wish I had
a Korean neighbor. Ok on the antenna overhanging your property. Maybe you can take advantage of a good thing and hang your
laundry off it.

From: plaintruth@my-deja.com
Message-ID: <7krjj1$j2t$1@nnrp1.deja.com>
Source record: 138760

Well, Well, it looks like two of WB2OTK, PORKBUTTS most loyal "SUCKBOYS"
NX9J
and KE4TEW, are being forced by the FCC to redo their amateur tests
under the supervision of FCC officials. I guess the boys got their
tickets by dubious means, and the FCC knows it... Now it will be time to
show that the pigs deserve to be on the amateur bands, my opinion is
they don't, they cheated, They had a very friendly examiner who gave
them a free ride, you can tell by the way these two clowns talked they
were second rate CB operators and were ignorant of radio theory, cheated
on the exams, and destroyed the ham frequencies with there diliberate
interference and nasty language. Retest Boys...HO HO Old OINK got you
boys in trouble.. KEEP UP THE GOOD WORK RILEY!!!!!!!!!!!!!

2229. Jefferson and the ULS (via FCC)

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-23 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <7krmo1$k98$1@nnrp1.deja.com>
Source record: 138762
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

The loss of liberty will come a little at a time warned Jefferson, through barely perceptible steps. In August according to ARRL, FCC will hit hams for ULS registration.

This process requires your telephone number and TIN, both of which are personal numbers. This sort of government cross checking is ridiculous. Now FCC will collaborate with the IRS to be sure you paid your taxes ?

"1. Why do we register our TINs with the FCC?

The Debt Collection Improvement Act of 1996 requires the FCC to collect this information.
Congress enacted the Debt Collection Improvement Act (DCIA) as part of an effort to increase collection of delinquent government debts. As a result of the DCIA, the Commission and other executive agencies are required to collect Taxpayer Identification Numbers (TINs) from each entity doing business with a Federal agency, including applicants for, or recipients of, a Federal license or permit.
In addition, the TIN will be used as a unique identifier for each licensee within the ULS. The TIN, along with a user-selected password, will provide licensees access to their licensing records in order to renew or modify their licenses. "

Not to mention the FBI and DoD servers are hacked weekly and changed at will. At minimum, do you want the data to be available because the government just refuses to enable adequate security means ? If a hacker accesses this information and then accesses the Social Security site, your banking information could be at his fingertips, if you use direct deposit, another system the government is pushing.

Further, who needs to hack when FCC says that the only information that shall be kept private is your TIN. This notice appears only at the end of the ULS process. Surprise ! Yes, I realize your information is on the internet already , but not this level of detail. Thus, if your phone and e-mail are requested, these too can be released; for example, to be purchased by direct marketers or spammers, at minimum !

Picture a scenario where a disgruntled radio pirate gets the ham database and e-mails a virus to all licensees or cooperating with the FCC !

"Why do we register our TINs?

As part of the development of a new Universal Licensing System, the Commission is asking each license holder to associate all their communication radio call signs with the TIN of the responsible financial entity . By "responsible financial entity" we mean the individual or

organization that actually pays for the license, if a fee is due."

Hams owe no fees. Why is this information collected ? Note they say "ask". But if you refuse, your license can be revoked. I say big shit. With the way ham radio is going, they can have it if they want. But I will not go quietly.

"2. What is a TIN?

For individuals, it is your social security number. For corporations, it is your Federal EIN. Not-for-profits and state and local governments also have nine-digit Federal EINs. They use them to deposit withheld taxes for their employees. Not-for-profits are issued a Federal EIN at the time that they are granted not-for-profit status by the IRS. Your finance, comptroller, or accounting office will know what your Federal EIN is.

1. What's a TIN?

TIN stands for Taxpayer Identification Number. A TIN is a 9-digit identifier that the IRS requires of all individuals and businesses/ employers to identify their tax accounts. For an individual, the TIN is the person's Social Security Number. For a business, it's the company's IRS-issued Employer Identification Number (EIN). "

Join us as we file a class-action suit against the FCC in opposition to a system intended for commercial licensees, but now turned to more devious ends.

How would you like the ARRL staff or maybe Fred Maia to know everything about yur personal finances, social security claims, medical records submitted to the SSA, your e-mail, phone and the like ?

Look for my other post to see how this wil be possible.

In addition, what about all those withpout internet access ? Is this a program of forced education of internet accounts by the agency dealing exactly with that area, the FCC ?

It would appear so, as no exceptions will be made for the elderly, the infirmed or the like !

What a way to thin the herd !

This rule is against the American with Disabilities Act signed by President Bush.

No accomodations are made for these persons other thn to say "go foind saomeone who can help you" !

though. >>

***Holy smokes,I guess I must have bypassed Bill, NX9J, upon reading the Web Extra. Well, I'm sure that sterling gentlemen like Messrs. Dale and Dinsmore will easily pass the requirements to sat on the air while David Dumbassi will bite the dust. Now to show my love and respect for my fellow hams, except N0VFP who put the following link in one of his messages-a link that contradicts what he's been taught at church or perhaps he attends the Church of the Holy Bigots<A HREF="http://www.jewwatch.com/index.html">Jew Watch</A>
I offer mine brothers and sisters the following tidbits of info that I, as a member of the ARRL, must pay for. Here you cheapos-take a gander and send your thank you notes to radiosigs@aol.com
By the way,I offer the info below via a computer skill called COPY & PASTE. In just 3 months I have become a literal computer genius, able to teach users how to stop lockups and freezes and failures. A lesson is just $49.50 and I will accept VISA & MASTERCARD. That one time payment covers COPY & PASTE as well as the other goodies.*

Text-only page

FCC Amateur Radio Enforcement Log

A representative listing of recent reports on Amateur Radio enforcement-related actions from the files of the FCC Compliance and Information Bureau:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has what it believes to be reliable evidence of possible rules infractions and not necessarily that the recipient has violated FCC rules. The FCC has the authority, pursuant to 97.519(d)(2) of the rules to readminister any examination element previously administered by a volunteer examiner. This Enforcement Log is representative of recent Warning Notices, Notices of Violation, calls for retesting, and other FCC communications to licensees involving possible serious rules violations. It is not a comprehensive listing.
BARRE, VT: The FCC has requested that Advanced class licensee David J. Tolassi, KC1ZQ, retake the Advanced class examination elements under the supervision of an ARRL-VEC VE team by August 30, 1999, or his license will be cancelled.
CONOVER, NC: The FCC has issued a Warning Notice for alleged unlicensed operation to Charles Hart. A letter June 15 from FCC Legal Adviser for Enforcement Riley Hollingsworth, K4ZDH, says the FCC has evidence that Hart transmitted on amateur frequencies (28.375 and 145.190 MHz). Hollingsworth invited Hart to contact him to discuss the allegations, but he also advised Hart that unlicensed operation could result in fines and seizure of transmitting equipment.
LOS LUNAS, NM: The FCC has requested that Extra class licensee Chester R. Cook,

AC5LZ, retake the Amateur Extra class examination elements under the supervision of an ARRL-VEC team by August 15, 1999, or his license will be cancelled.
NEW ALMADEN, CA: The FCC has requested that Technician class licensee William R. Estrada II, KD6VEG, retake the Technician class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be cancelled.
PALM HARBOR, FL: The FCC has requested that Extra class licensee William E. Dinsmore Jr, NX9J, retake the Amateur Extra class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be cancelled.
SACRAMENTO, CA: The FCC has requested that Technician Plus class licensee Ronald R. Coursey, N6UUM, retake the Technician Plus class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be cancelled.
TAMPA, FL: The FCC has requested that General class licensee James W. Dale, KE4TEW, retake the General class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be cancelled.

2241. ULS: FCC allowed to collect your phone number and publish it

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-23 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <7krr8a$ls7$1@nnrp1.deja.com>
Source record: 138774
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Why is the FCC allowed to collect your phone number and publish it or refuse your application ? Try it- no phone number, no filing ! Even if you give your TIN/SSN ! Read up on this invasion of your privacy.

Notice to Individuals Required by the Privacy Act of 1974 and the Paperwork Reduction Act of 1995

The FCC is authorized under the Communications Act of 1934, as amended, to collect the personal information we request in this form. We will use the information you provide to determine whether approving this application is in the public interest. If we believe there may be a violation or potential violation of a statute, FCC regulation, rule or order, your application may be referred to the Federal, state, or local agency responsible for investigating, prosecuting, enforcing or implementing the statute, rule, regulation or order. In certain cases, the information in your application may be disclosed to the Department of Justice or a court or adjudicative body when (a) the FCC; or (b) any employee of the FCC; or (c) the United States Government, is a party to a proceeding before the body or has an interest in the proceeding.
If you owe a past due debt to the Federal government, the Taxpayer Identification Number (such as your Employer Identification Number or Social Security Number) and other information you provide may also be disclosed to the Department of Treasury Financial Management Service, other federal agencies and/or your employer to offset your salary, IRS tax refund or other payments to collect that debt. The FCC may also provide this information to these agencies through the matching of computer records when authorized.

HERE IT IS !!! CHOOSE YOUR UNLISTED PHONE NUMBER OR YOUR HAM LICENSE.

>

AIDS is God's judgement against the homosexaul commuinty. Back in the days of
the Old Testamant,

God commanded that these people be stoned to death.

>Perhaps someday you'll grow up, and start a family of your own. Maybe you'll
>have children, enjoy them they grow up very fast. I wonder what your
>reaction might be if someday your daughter or son asks you to sit down
>because they need to talk to you about something, as they agonize through
>the story you find out they are HIV positive because thier partner, who
>they believed to be o.k was carrying the virus and passed it to them.

I hope that would not happen, but in these last days that we live in, we need
to put a guard around our familes, and pary that they will live right and get
married, then have sex.

>At that point Lloyd, will you look at your son or daugther and say "AIDS
>kills Fags DEAD!" ?
>Will it be as funny to you then as it is now?

It's not funny, It's God's judgement!

Sin takes you farther than you want to go, makes you stay longer than you want
stay, and pay more than you want to pay!

A retraction please. N0VFP doesn't hate Jews but"only hating people like you",
so he says. He hates just certain types of Jews which is wonderful news. A real
Revelation by John in Patmos,Alabama.Looks like the "end times" preceded by the
Rupture.
Then he claims I make him look like a fool. Why should I bother when he does
such a good job on his own?

Since Hollingworth has arrived and scared all the trash, they have seen fit to invade Usenet and keep the war going. AF2Y, WB2OTK, KC1ZQ, KE4TEW, NX9J, N0VPF, KK7HO, and the rest of the white trash has carried on with their stupid war. Well, unlike the ham bands I can filter this human garbage out. I may even get back on the ham bands now that this bunch of shit will soon be off the air with retests and cancellation of their licenses. Ha Ha Ha.

2246. N0VFP DOES NOT HATE JEWS!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-23 00:00:00 UTC

Let me make this clear for you Doc,

I do not hate the Jewsih religion or People of the Jewish faith.

What I do hate and don't care for are people that are constantly taking away our rights like the 1st and 2nd amemendments, and other rights that we as Americans have cherished for many years.

Some of these people are not only Jews, but Catholics and Baptists and yes, Christains.

Now, Doc you figure this out, If what I said above is true, that means I would hate Catholics and others too! Right? According to you anyone who does opposse your views are labeled "Anti-Semetic"??

>AIDS kills Fags DEAD!

Yes I know it does, I had a friend who died from it and he was not
homosexual.
I remember in High School first hearing about AIDS and how there were many
jokes
and one liners about the disease, much like the one you posted above. Of
course that
was 20 years ago and now with a family of my own I understand the
seriousness of
it and how it could someday effect my family.

Perhaps someday you'll grow up, and start a family of your own. Maybe you'll
have children, enjoy them they grow up very fast. I wonder what your
reaction might be if someday your daughter or son asks you to sit down
because they need to talk to you about something, as they agonize through
the story you find out they are HIV positive because thier partner, who
they believed to be o.k was carrying the virus and passed it to them.

At that point Lloyd, will you look at your son or daugther and say "AIDS
kills Fags DEAD!" ?
Will it be as funny to you then as it is now?

Tim ka8ddz

***You've go that right, Tim. Geez, for a church going dumbell like Lloyd,
would'nt you think he picked up on the meaning of "compassion?" Poor sap-thinks
that only homosexuals contact that dreaded disease. But you see, that's the way
these asinine rednecks either believe or are taught to believe by their asinine
redneck parents and their asinine Southern Baptist or some other right wing
Christian conservative movement's pastor.You gotta feel sorry for the poor
bastard. Forgive him Timothy; he knows not what he says. Doc,AF2Y*******

Don't waste your time with the manual. It has no
mention of the xband repeat mode.

set the freq's u desire, then hold the F key for a second till you
see an X displayed over one of the buttons. Then just press the
button. Now it's in cross band repeat mode.

Do the same to get out.

Good luck... Mike

For Sale, 2 Kenwood TK-350 UHF 160 Channel Hand Held Radios. The radio are top of the line Kenwoods. They have DTMF Tone Pads, Extra Stubby Duck Antenna, CTCSS, and DCS. The radios are in very clean condition with low use (these 2 radios have sit on a shelf most of their life). The radios will be programmed to your frequency. New NiMH batteries are also available for the radios. I have a rapid dual battery charger and a single rapid battery charger for the radios as well as a speaker mic. The radios are 450-470 MHZ, but they also work on the Amateur UHF Band.

For Sale, 1 Kenwood TK-250 VHF 160 Channel Hand Held Radio. Same as the above radios except this radio is for the VHF Band, 150-170 MHZ and does not have a DTMF Tone Pad. Also this radio works in the 2-Meter Amateur Band.

These radios are in like new working condition. The only reason I am selling them is due to the fact the department I am a Police Chaplain for is moving to a Trunked 800 MHZ system. If you are interested in any or all of the above equipment please email me at chaplain@vvm.com and I will price a package for you.

One of the major reasons for this is the govt's efforts to hunt down and prosecute divorced dads who are more than 30 days overdue with child support. This is one of Hillary's pet projects. Having to make people produce a national number of some type to hold any type of permit or license ensures that the govt, through the IRS can find you at will.

Did you know: It is now a Federal felony for a divorced parent (usually dad) to cross a State line, if they owe more than one month's child support? (Many police depts are having a severe problem with this Federal law.)

become
> less involed with their faths. We become a more pagan society. I'll
give
> you all a good example how many Jewish people in the United states
> celibrate Christmas but don't beleive in the brith of Jeasu Christ.

I don't celebrate Christmas. I don't celebrate Hannukah either. This saves me lots of money. As a Pagan Humanist, I might get invited to some Winter Solstice parties, which occur during the same holiday season. I must admit that both my kids and I did believe in Santa Claus...until we were six years old....but we never had any Christmas trees.

> Easter is the same way. How many Jewish people get the kids a easter
> basket but don't beleive in the resurrection of Jeasus.

Kid don't have to believe in anything to eat jelly beans, chocolate eggs or bunnies.
Why should they? They don't get religious instruction with M & Ms either.
How many kids believe in Drackula when they go "trick or treating" on halloween? ...or the Headless Horseman of Sleepy Hollow when they make Jack-O-Lanterns out of pumpkins?

> So you all can close your eyes to the written prophecy that the
> Anti-Chirst will rise out of the Roman Catholic church and the Beast
> will rise out of Europe.

Heck...If people some don't believe in Christ...How can you expect them to believe in any Anti-Christ?

> BTW the Beast is the western Europe military
> machine in case you didn't all ready know.

Is the beast bull? You said Western European military machine?...Must mean NATO?

>Pay attention to the book of
> Daniel and the book of Revelations. These books tell the prophecy.

Pay attention to a book by Carl Sagan called "Broca's Brain", especially Chapter 23.
What will Daniel and the book of Revelations tell if their prophesies are completely wrong? According to Sagan, when "religious" prophesies of the past were proven wrong nobody ever apologized for them. Noone ever says that any interpretations have to happen in the real world...They might just be spiritual in nature....They might have happened and it is just our mortal blindness that stops us from seeing that they happened because we are blinded when we have no faith. IMHO its like the Emperor's new clothes all over again.

> There
> are a few great profits that are not of any religious fath. I have said
> it before and I will say it again I have nothing against the people of
> the Catholic religion for they are being lead a stray by the leaders of
> the Catholic Church.
I don't mean to be disrespectful of your faith...Nor of the Catholic Church or its leaders. I have not seen anything that might threaten world peace by the present Catholic leadership but to tell the truth I think that I have read some hateful stuff in the hand-out literature of some religious cults which consider themselves followers of Christ. I can respect your belief in religious phophesy if it is based on your religious faith...BUT all of your non-religious prophesy is IMHO a lot of beastly bull because I can not bring myself to believe or respect such nonsense.
> I wish I was wrong on this one but I'm not.

Well wish upon a star and you may become a real man.

I never met a Ham I didn't like,
Please keep thinking,
Hams need more license classes,
Bob Wex w2ilp (Ignore Loco Prophesies)

Humanists believe that you need not be religious
to be ethical. This is because different religions
are not even entirely in agreement about the Ten
Commandments.
So far I haven't seen any people who were brought
up to be atheiests kill anybody. Perhaps they

value human life more when they don't believe in
heaven or hell.
--w2ilp--
There are other NGs where religious opinions and
related matters are meant to be discussed. I
apologize for presenting my own beliefs or
disbeliefs here. I do feel that everyone should
have the right to express their own opinions BUT
perhaps not here.
I will refrain from any further posts on this subject
if they do not directly relate to Ham Radio. I admit
that it is difficult for me to refrain from replying
to posts that are IMHO ignorant BUT I must do so in
the future because it is the policy of this NG.
--w2ilp--
The Ten Commandments can not stop bullets from
illegally obtained guns....nor can Part 97
stop Ham Wizards of Hate.

Take a look at the "Hate Directory". This "So Called" libertynet is listed
there about 80% of the way down the page. This Directory is used by law
enforcement agencies all over the country and was created by a college
professor for that purpose.
http://www.bcpl.lib.md.us/~rfrankli/hatedir.htm
What a disgrace to amateur radio.
Also take a look at "a case study" of this so called net.
http://x11.dejanews.com/[ST_chan=rec]/getdoc.xp?AN=378614239&CONTEXT=92026
0458.781123635&hitnum=1
And then there's another ham who had his experiences with this "So Called".
http://x7.dejanews.com/getdoc.xp?AN=377795119&threaded=1&CONTEXT=916615976
.1965490261&hitnum=0
and then you'll find more on these idiots here. It's really hard to believe
that this exists on on amateur radio. What an "International Embarrassment they
are.
I haven't said anything about this gang in several weeks now but it always
seems that they want to drag me back in the fray. I guess they enjoy the
"exposure". Anyway several complaints have been sent to their ISP, they aren't
as anon as they think.

Doc,
We all thought you were supposed to be on national television for your contributions to SETE.

So far I haven't seen anything about your recording space signals. What happened?

"well its midnight, I'm not famous yet"
-Jimmy Buffett

****First off, you dumb putz, it's SETI, not SETE. I ought to make an antenna that can search for your brain instead of extraterrestrial intelligence. Who the hell taught you the ins and outs of things-Lavoris Dirtyballs? Just be patient. I've been interviewed by Newsweek and U.S. News and World Report and we have a problem about payment. The photographers for both want to use pix of me and the Cloudwarmer and wish to pay zilch. I told them to hit the road. Do Tom Hanks, Steven Spielberg, Kevin Costner and others work for nothing? I am a celebrity and want to be accorded due respect and paid too. I am making a wedding for my daughter in July with 230 guests at one of the swankiest hotels in North Jersey. What do you think-I make a wedding in the parking lot of IHOP as the redneck hillbillies do? And if you have any loose bills floating around, make one out to D.D.W.F.(Doc Daughter Wedding Fund) and send it to WB2OTK. He' agreed to handle all proceeds and wants only a 2% cut which is pretty fair for being a Jewish guy, don't you think? Watch that guy-he graduated the University of Jerusalem! Regarding my CNN appearance, they want to give me the standard fee for a guest spot and that's peanuts. I told them I wanted $10,000 and right now they're mulling it over. QST was supposed to have someone down here last week for an interview but the guy assigned was just caught by Riley Hollingsworth playing music on a Bible Study Net and the dude is in one hell of a bad mood because the fine is $7,500. I'm keeping your name and address on file and will contact you when I get my way with these leeches who want to use my resources here for free. Thanks for your interest and remember,it's SETI, an acronym for SEARCH for EXTRA TERRESTRIAL INTELLIGENCE. 73, Doc,AF2Y*********

You're right, the man who so well deserves the sobriquet "Dr. Hate"
does not represent all Jews.

But he does, unfortunately, represent a significant and powerful
faction among the Jews: the "Anti-Defamation" League and Simon
Wiesenthal Center types who would censor or imprison anyone who
would question their power or policies; the Charles Schumers and
Diane Feinsteins who would take away our First and Second Amendment
rights; and the media billionaires who use their power of television
and the press to subvert our representative government and to
convince our young people that racial suicide is a good idea.

There are Jews who have opposed the Schumers and the Swartzbargs --
Jews like Benjamin Freedman, Alfred Lilienthal, Noam Chomsky, and
Israel Shahak.

But they, unfortunately, have been in the minority, and most Jews
stand aside and let the ADL criminals speak for them, just as too
many White Americans stand aside and let Clinton and his Republican
appeasers continue to remain at large.

Happy Summer Solstice,

Hey Stromhitler, it's a privilege being put into the catagory with the ADL, the Wiesenthal Center, Diane Feinstein and Chuck Schumer even though I like Alfonse D'Amato. I'm in your face, you Nazi creep. I'm spitting in your eye, you racist bastard. You yellow dong, hiding behind the Bill of Rights while you sneakily try your damndest to destoy it. Strom,I'm waiting for the day when a big mouth racist like you dares to put his thoughts into action and some police, ATF or FBI puts a bullet in your head. The when you go to hell, you can send my worst to KE2LO. Doc,AF2Y*****

Actually it is the likes of Weaselhowl,
Feinsteinberg, and Chuck the F*** Schumer that are trying to destroy the
Bill Of Rights. Weaselhowl wants to make it a crime to tell the truth about
Jews, and
Feinsteinbergsonstein and Komissar
Schumerov want to make it a crime for everyone (except, of course, the
government) to own guns.

Now you tell me WHO are the traitors?

2273. Rapidnet's spamming policy for the one that needs to read it

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-23 00:00:00 UTC
From: kk7ho@aol.comNoJunk
Message-ID: <19990623002441.28985.00003046@ng-cj1.aol.com>
Source record: 138856

At RapidNet / DakotaConnect, we are proud to bring the Internet to our subscribers. We're excited about how the net is used by the millions who recognize its power and potential. But there are a few rules of Internet etiquette, or "netiquette," we need you to be aware of and will, as a matter of policy, enforce.

No Spam. "SPAM" is the net name for unsolicited electronic mail or newsgroup postings offering products, services, or get-rich-quick schemes. As a new communications medium, the Internet is a natural place for commerce but, because it is growing so quickly, it attracts some who are ready to take advantage of its fast growth and few rules. Advertisements and free offers are delivered to our mailboxes daily (almost 50,000 pieces over the lifetime of an address). Now, we're seeing the same things starting to crop up in our email boxes and in newsgroup postings. That's SPAM. What's the problem with it? The economics of the Internet are a little different from traditional media. All that direct media we receive at home is paid for by the advertisers. They pay for the printing and postage. On the Internet, however, we all pay for the transportation and delivery of these unasked for messages. People who send unsolicited messages are essentially using our money for their own purposes. We have received many complaints about RapidNet / DakotaConnect subscribers SPAMing. We take them very seriously. Too many complaints could slow down our system's performance and inconvenience other subscribers. A spammer invoking the anger of users on the 'Net could find his/her mailbox filled with irate responses in a matter of hours, rendering the mailbox useless. RapidNet / DakotaConnect will take action by suspending a spammer's account until the matter is cleared up, or by asking spammers to take their business elsewhere.

In article <7k3iic$i8e$1@fir.prod.itd.earthlink.net>,
Mike Yetsko <joe@user.com> wrote:
>
>My understanding was that a nuclear explosion in free space yeilded
>mostly EMP or hugh ammounts of energy as an electromagnetic pulse.
> ... In any case, the EMP was supposedly able to burn
>out a lot of electrical systems for hundreds of miles. Even car
>alternators and such.

That's true. NUDETS (Washington-speak for Nuclear Detonations) inside
the atmosphere mainly produce the kinds of ionospheric effects I mentioned.
(From a radio communication point of view, that is.) They alter the
ionosphere in much the same way that a Solar flare does, though more locally.
But it can still play havoc with normal skip propagation for awhile.

OTOH "exoatmospheric" bursts (ones outside the atmosphere) are the ones
that produce primarily the EMP effect (unless, of course, an important
satellite happens to be nearby). What happens here is very interesting.
The so-called "prompt radiation" from the burst arrives at the upper
layers of the atmosphere at essentially the speed of light. As it
encounters substantial density of air, it knocks loose electrons in
what as I recall is called the Compton Effect, the electrons sometimes
being called Compton electrons. Being in a magnetic field, they don't
follow straight lines away from the point of impact but rather fly around
and around in a helical path, as a result of the odd fact that the force
on a moving charge due to a magnetic field is always at right angles
both to the velocity and to the magnetic field lines. This high-speed
motion in a helix of course generates radio waves, which travel at the
speed of light. But what makes the EMP so nasty is that the incoming
Compton electrons are also ARRIVING at the speed of light. So the
point at which the waves start getting generated moves downward at the
same speed as the waves are propagating. The practical effect is that
the energy buildup in the wave continues to be RIGHT AT THE WAVEFRONT!
Which means that the wave takes the form of a very sharp pulse wavefront
that has a bandwidth of perhaps hundreds of megahertz, and LOTS and LOTS
of energy in it.

It is this very sharp pulse wavefront that causes all the trouble.
First of all, it can generate many kiloamperes of RF current in a
conductor, for a brief moment, and kilovolts or even megavolts of
peak voltage, depending on the circuit impedance of course.

Also, the fact that the bandwidth goes out to the VHF/UHF region
means that equipment designed for lower frequencies may not have

adequate "bypassing" to deal with the sharp peak. Even HF (3 -30 MHz) radios need to have bypass capacitors with very short leads, as if they were VHF / UHF radios, in order to tame the kind of pulses in an EMP. Not to mention unusually good shielding, parasitic chokes on leads entering the shielding, and a lot of techniques that just aren't normally used in equipment not specifically designed to be EMP-resistant.

For hams, keeping a spare radio in the trunk of your car, or in an underground shelter, or in a metal storage cabinet, might be one of the better ways to have equipment survive.

According to the FEMA consultant whose lecture on EMP I heard some years ago, the peak of the EMP spectrum is estimated to fall at AM Broadcast type frequencies, despite the very sharp risetime. I think this relates to the dynamics of the electrons' helical motion in the Earth's magnetic field that I mentioned earlier. But anyway, any piece of conductor that resonates in the low MHz region, say 0.5 to 3 or so MHz, will pick up the biggest spikes. Short conductors, like the one on your 2-meter HT, may only see a few hundred volts peak. However, even that much could well wipe out the front end of your radio.

>But technology has changed a lot since the 60's. Back then, tube
>technology (which was pretty much 'voltage' amps and high
>impedance) wasn't as protected as a lot of todays technology. Would
>most devices bite the big one? Probably, but they would also be a lot
>of survivabilty that you wouldn't expect.

Most analyses I saw seemed to conclude that tube equipment was MORE likely to survive, simply because tubes are inherently less prone to failure from high-voltage pulses than solid state devices are.

Failures of solid-state devices would probably be quite widespread, but erratic. Indeed some radios would get lucky and survive, perhaps just because the standing wave pattern didn't hit them with as high a signal level as some other radio received, maybe even in the same room.

My impression is that the phone company would come out fairly well because they have historically put so much emphasis on protection against lightning. However, the lead lengths they use from the line to the varistor devices they use for protection would probably be so inductive at VHF / UHF that sizeable spikes would remain. Old-fashioned phones should be fine, but solid-state phones and modems might well get zapped. There would doubtless probably be quite a few "ESS" failures (telco switch computers).

Today the power grid is probably LESS sensitive to a massive overload. The technology for handling 'events' such as lightning strikes is much improved. In that regard alone it might be a neat idea to just contact a power company and ask them how they have changed since the 60's.

Indeed, that would make a fascinating topic for a radio club meeting.
I bet they'd be surprised, though, that you were asking about EMP
rather than Y2K !!!

Incidentally, you might be surprised to find that FEMA themselves would
be happy to send someone out to talk to a ham radio club on both of these
subjects, particularly one located in a large metropolitan area that
would publicize the talk widely.

>I was told a ground busrt doesn't yield near the EMP of an air burst.
>But that's not to say it still won't knock out tons of equipment. Mike

The "exoatmospheric" burst generates the EMP as its main effect.
The less atmosphere between you and the burst, the less of an EMP effect
it would generate because the pileup of the wavefront described above
would have less time to develop. However, rumor has it that there
are now also weapons designed to produce EMP-like effects at ground
level, without using nukes.

If so, I think that's a step forward, sort of the opposite of the
neutron bomb, which kills all the people without hurting the equipment!
Wouldn't it be nice if the human race could learn how to do warfare in
the future by killing all the computers and weapons systems without
harming the people!

Or even better, if we could somehow learn to do WITHOUT warfare at all!

To put it into perspective, how close should a lightning hit in order to produce a similar EMP as an ionospheric nuclear blast ?

In the days when the NEMP was a hot topic of discussion, you could easily get the feeling that nothing would survive, but from the equipment that I have seen that have been designed to be NEMP resistant, the protection is not that exotic.

Message-ID: <3770C058.E2B6FFD5@jtg.com>
Source record: 138866
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.misc

Tim, Maybe you've forgotten what you said, I'll refresh your memory from the
.wav file that is posted on web pages about your criminal activity on
3.950.

KK7HO started this discussion about how much it would cost to have
W1WCR and another amateur radio operator killed. W1WCR has different
political views than KK7HO, and this is presumably Volz's motive for his plan
and discussion of the murders.

KK7HO states: What he don't know is that now-a-days, five hundred dollars
will get his head blown off.

K5BLB responds: For five hundred dollars you can have him and Vic both
done away.

So this transcript makes it clear that KK7HO aka Tim Volz was shopping (on
air) for a price to get fellow amateur radio operators killed.

If anyone doubts the accruacy of the above statements, I'm sure that it can be
reposted (500dollars.wav), to this newsgroup or any other.

I just hope that the FCC acts before Tim is able to make good on his
threats.

The things you run across surfing the web:

AN UNUSUAL TELEPHONE SERVICE CALL

This story was related by Pat Routledge of Winnepeg, Ontario
about a repair call he handled while living in England.

It's common practice in England to ring a telephone by signaling
extra voltage across one side of the two wire circuit and ground
(earth in England). When the subscriber answers the phone, it
switches to the two wire circuit for the conversation. This
method allows two parties on the same line to be signalled without
disturbing each other.

Anyway, an elderly lady with several pets called to say that her
telephone failed to ring when her friends called; and that on the
few occasions when it did ring her dog always barked first. Pat
proceeded to the scene, curious to see this psychic dog.

He climbed a nearby telephone pole, hooked in his test set, and
dialed the subscriber's house. The phone didn't ring. He tried
again. The dog barked loudly, followed by a ringing telephone.
Climbing down from the pole, Pat found:

a. A dog was tied to the telephone system's ground post
via an iron chain and collar.

b. The dog was receiving 90 volts of signalling current.

c. After several such jolts, the dog would start barking and
urinating on the ground.

d. The wet ground now completed the circuit and the
phone would ring.

Which shows you that some problems can be fixed by just
pissing on them.

I am not at all sure of the rhetorical intent of posting this, but I will make an observation anyway:

To wit, certainly the Technician license class was established for these stated purposes, but when the FCC amended the license structure in 1991, 40 or so years after establishing the original Tech class, they de facto (and explicitly in the Report & Order accompanying the change) changed the rationale for this class, for better or worse. That for the sake of clarity and a sensible continuity they ought to have changed the *name* of the license class is arguable.

Thank you for pointing out what ought to be an obvious flaw in the rationale for eliminating code testing. Sacking the CW requirements, if it changes the operating habits of amateurs at all, is likely to move more people down-spectrum off of the bands that truly are threatened by commercial interests, onto bands that no one other than hams and a few international broadcasters want. I just can't fathom how so many who want to get rid of code exams don't see how empty the argument about protecting spectrum is!

Now that any maniac with a modem can look up US amateurs' home addresses with the click of a mouse, it makes sense to protect yourself by using a POB. Nobody on the net, ham or no, has a legimate need to know where I live, not without my knowledge and consent. In casual use of the web-based call servers, I have observed that perhaps 15--25% of the listings give PO boxes or mail services only, so this is hardly a unique practice.

I can be reached by mail, phone, or email, but please no knocks at the door or midnight bricks through the window from someone who might like to help themselves to my gear, or harm me because they didn't like something I said on USENET or on the air. Too many dangerous whackos and thieves among us now, sadly.

Incidentally, this poster's objection to Jeff's safeguarding his privacy and property is lacking somewhat in credibility, since he chooses to conceal not simply his home address, but name and call.

Hi all
I am looking for a logging software that is made for Grid tracking on
VHF-UHF.
Any suggestions?
How about a Grid map on the computer allowing you to mark the grids worked
with out using a scaned image and a photo editor.

Thanks
Brad

It isn't. It just has to be done *right*. Same with lightning protection.

>of energy in it.

This isn't quite correct. When the nuclear device detonates, it generates large amounts of prompt gamma radiation. Gamma is electromagnetic radiation of an extremely high frequency (higher than X-rays), so it travels at the speed of light the same as any other EM. If the detonation occurs in atmosphere, the gammas are rapidly absorbed over a short distance by the atmosphere, generating an incredible heat pulse. The rapid expansion of this superheated air is the primary blast effect of a nuclear device. Relatively little NEMP is produced.

But when the device is detonated at high altitude, there is little sensible atmosphere to absorb the gammas. Instead they encounter the free electrons in the ionosphere. These are accelerated by the gammas, just as they are accelerated by any radio wave encountering the ionosphere (or as the free electrons in your antenna are accelerated by a passing radio wave). But since the gammas are so energetic, and are available in copious amounts, the acceleration produced is *much* stronger, and the reradiated energy as the free electrons decelerate is also much greater.

The free electrons do *not* travel down to the surface, nor do they travel at the speed of light (though they book right along after the initial

acceleration). As they approach the sensible atmosphere, they encounter sufficient air density to be stopped while still many miles above the surface.

Because of inverse square spreading, the gamma wave front will impinge on a large segment of the ionosphere, so the effect is spread over a large area. The reradiation as the free electrons are decelerated is also over a wide area, but bunched vertically in the upper stratosphere as air density becomes greater. This produces a sharp wavefront extended in area. We can treat this the same way as we would a uniform current in an infinitely long wire, so this reradiated field falls off only with the inverse of distance rather than as the inverse square of distance as would be the case if it were a point source. That's what makes NEMP potentially dangerous to our equipment on the ground.

A 20 MT device exploded at an altitude of 100 miles will produce a field strength on the ground roughly equal to that produced by a lightning bolt 8 miles away. But because the NEMP effect occurs over an extended area, the effect is as if there were a lightning bolt 8 miles away in every direction at the same time. The induction will strongly energize extended conductors along their entire length. That's why NEMP is such a threat to the power grid and the phone system.

For the comparatively short conductors we use for antennas and other wiring in our stations, the effect isn't much different from a lightning near miss except that the wave front is steeper, ie the risetime of the induced pulse is faster. So we have to use suppression devices which clamp the pulse much quicker than what we'd need for induced lightning surge. Fortunately, there are gas tubes available which fire in under 2 nS, and that's adequate.

> > I think it works > > best with a human trainer,

Probably true, but the MFJ-518 can be used for a modified Koch solo.
The MFJ Koch book has instructions for pure Koch with a couple of
the computer programs too.

> > and exhaustive daily work. Lacking a drill
> > instructor, and given a hectic schedule and laziness, I have missed
> > days here > > and there

Slacking off is the greatest danger in *any* morse drill.
The 90% / add a letter cycle of Koch routine makes the backsliding
resulting from slacking off more painful, you see exactly how far
you went, but it really isn't any different.
While I was doing Koch daily, I was making good progress ... and
knowing I was learning some letters at full speed was very good
feedback that I *could* do it.

> > Adapting > > Koch to Farnsworth spacing has helped me to keep motivated by
> > rewarding me > > with slower, but steady progress.

If you're going to take an ARRL exam, use Koch at the farnsworth (20/13)
rate you expect to take. But the slow progress expected of Koch is
designed to get you incremental letters at whatever your desired full
speed is. Koch 20/20 won't be much harder than Koch 20/13, and will
get you to passing the top exam.

Koch absolutely requires daily work; but any other scheme really does too,
or it will be too slow.

> I've spent too much time
> learning the slow code already.

Learning slow code is a waste of time, since you then have to
unlearn it. Learning slow code is only worthwhile if you can be
happy as a Novice/Tech+ for years ... Koch and Farnsworth both try to
avoid that. But Koch takes a different tack and has you decoding at
full speed, both letters and spaces, for a very small set, and adding
one more char each time you get to 90% ...

> Will, this is exactly why I say that in 2027 when I retire, I'll then
> devote the time to learning faster code.

I sympathize, I've tried to buckle down and get my codereading fast
enough and reliable enough to pass at least the 13 if not 20 ...
but my CfSCE for AA written expired when I ran out of time.
Maybe I'll find the right headphones to let me try it on the subway
again ...

Koch is the best I've seen. The MFJ book and MFJ pager-style code
practice box work together. I have no doubt that it will be Koch
that finally erases my "certified code free" status.

(Political footnote ... Note that my endorsement of the Koch method
for learning the oldest Modulation does not constitute an endorsement
of continuing required examination in same. Manual telegraphy would be
easier to sell as fun if it weren't required; just remember high school
literature classes if you don't understand that the first time. I'm
really glad I read ahead in the poetry section, the Rhyme of the
Ancient Mariner, Prisoner of Chillon and Ozyandius were all ruined for
my classmates by the instructor, but having read the first for
pleasure, I knew they were beautifil in spite of her self-important
interpretations and quiz. My friend the telegraphy collector would
have a much easier time convincing me his favorite mode is fun if so
many O.M.'s weren't telling me it's good for me, it's
necessary to world peace or maritime safety, and I'm lazy, whining, or
worse for not wanting to pass the same test they did before I was
born. Fie.)

73 and a fine Field Day to all, even those I disagree with ...

>Those who plan for war are sure to get it.

The appropriate aphorism goes like this,

"Those who beat their swords into plowshares
will wind up plowing for those who do not."

Those who do not plan for war will certainly be attacked
by those who do. Appeasers like your Chamberlain learned
that to their sorrow.

The only defense against war is to be ready to make it so
costly to your potential opponents that they don't dare attack.
The Swiss have understood this for 700 years. The rational
among us in the rest of the world have come to realize it in
the last 50 years.

Readiness to carry the fight to any potential aggressor has
kept the peace in the latter half of this century while lack of
preparation for war caused two major world wars in the former
half of the century. 50 million dead was a high cost to pay to
learn this lesson. People like you would have us repeat it
again and again.

The price of freedom is eternal vigilance. Those who would
have us disarm are fools, or worse. When the lamb lies down
with the lion, the lion gets up with a full belly.

I'm working on getting some info. that CHARLES PAYED FOR HIS DENTIST LICENSE!! Many of you have been telling me to dig up info on AF2Y's college days.....Looks like I might have found something big.

I have hired a "private eye" firm to do a little more checking into Charles. I'm sure they will find lots of good stuff.

As I have said, there is a rumor that AF2Y PAYED FOR HIS DDS LICENSE. Give me a few days & I will let you all know about it.

Flood AF2Y's email with what you think of him....same holds true for WB2OTK. Here are their email addresses;

Radiosigs@aol.com (Charles "the quack")
Richwhiten@aol.com (Rich "shit for brains")

If AF2Y did DDS work without a license....I WILL FILE A CLASS ACTION LAWSUIT!

Lets get these 2 bums off the air, for once and all.

The Human Pitbull,

kc1zq

I would like to know if there citizenship records on file about "Mrs. AF2Y"?

She is from overseas....I guess some calls must be placed to my local INS office to find out.

If she is collecting retirement funds & she is not a american, THIS MUST BE STOPPED! More info will be on the way.

I would like to take up a collection to ship her back if she is not here by legal means. I will get a PO Box in Vero Beach or something......kinda like the "Virgin Islands #1 Ham" has.

In the end though, I say DEPORT HER!!!!!!!!!!!

The Human Pitbull,

I am sorry, but THIS subject I simply can't ignore.....

There is something about all this EXPENSIVE nonsense
about "STAR WARS" and similar methods of Anti-Ballistic Missile
defenses that grates on me.

WHY are we spending who know how many BILLIONS of
dollars on this ???

There are so many ways the money can be used for helping
people......

OK, here is my reasoning:

1.0 The MISSILE'S function is to deliver the bomb to it's
destination and detonate it when the aggressor nation
want's to kill somebody.

2.0 The purpose of these defense systems is to stop the
missiles BEFORE they can get to their destinations and
detonate their warheads.

OK, fine.

BUT, if I were in charge of being the aggressor, I'd spend a tiny
fraction of the cost of the Ballistic Missile and smuggle the bombs
to it's destination some years prior to the war.

This way, I wouldn't have to develop expensive and delicate
missile systems, just use the same methods drug smugglers have
used for many years.

All that fancy "STAR WARS" garbage means absolutely nothing,
since the bombs are already at their destinations.

SO, why are we wasting our money trying to develop a useless
system ?

I suspect it's due, in part, to the reluctance of the politicians
in charge of military projects to admit to the public that there
IS no defense against this tactic. Well, that, and a tenancy
to want to keep money flowing into programs that help
keep them employed.

Things would be simpler if all the major nations admit that they
have done this smuggling in of weaponry and that there is no
practical defense against it other than the knowledge that the entire
world would go up in smoke if ANY of them started a major offense.

Yep, "MUTUALLY ASSURED DESTRUCTION"

If they all admit to this obvious tactic, then we can stop wasting
money on useless "defensive" programs and use the money
for something constructive.

Like, for example, helping the large starving parts of the world...

Yeah, true, it WOULD require politicians and military types to admit
to reality.... That seems to be a problem with some people.

Jefferson was correct.. This is known as "boiling the frog" to those
in government watchdog groups. If you've never heard of this expres-
sion, email me and I'll explain to you how to boil a frog.

> This process requires your telephone number and TIN, both of which are
> personal numbers. This sort of government cross checking is ridiculous.
> Now FCC will collaborate with the IRS to be sure you paid your taxes ?

Read about it at:

http://www.fcc.gov/wtb/uls/

Where is the ARRL? Aren't they our watchdogs and on the alert for
stuff like this? Isn't one of their main purposes to protect the
Amateur's and Amateur Radio interests? I don't consider having
my 'phone number and amateur call letters attached together in a
public database in my interest. If I have an unlisted phone, I
expect it to stay that way.

It's also bad enough that some states require your SSN to get a
driver's license -- but now required for a ham ticket? What a
load of crap!

In lieu of the 'phone number, the FCC can mail me a letter if it's
all that damn important. I'm sure if anyone can pass an amateur
exam they can also figure out at least a number of ways of confounding
a private telephone number.

Maybe I won't renew my 49 year old ticket when it comes due in
2004 - if this is what it takes to protect whatever privacy I have
left.

Sorry to be venting on the group. I'm *very* pissed.

2318. The Southern Anti-Defamation League

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-24 00:00:00 UTC
From: n0vfp@aol.com
Message-ID: <19990624190153.16906.00001864@ng-fw1.aol.com>
Source record: 138651

In a time when it is completely unacceptable to discriminate against members of most ethnic groups, Southerners are fair game. It seems that America must have some group to look down on, someone to despise. In the past, blacks, Jews, Irish, Polish, and others, including Southerners, were legitimate targets. Today, only Southerners remain. Do you appreciate this?

The Southern Anti-Defamation League (SADL) was formed to fight the efforts of American media to portray Southern people in a negative fashion. Finally, an organization to look out for your interests!

Such attacks against Southern heritage and Southern people are on the rise. The Confederate Battle flag is universally portrayed as a symbol of hate and racism, despite its use in other parts of the world as a symbol of freedom and self-determination. Do you agree with this portrayal of our symbols?

Southern people all live in trailers, have less than a full complement of teeth, are alcoholics, molest their daughters, are vile racists, and use firearms irresponsibly. Do you believe all this? If so, you are probably on the wrong web site.

Join us in this fight to defend Southerners against our detractors. For a modest fee, you will be provided a media reporting kit and our quarterly newsletter. Strength is in numbers and you can help change things. Join now!

Message-ID: <19990624194747.22990.00004418@ng-xa1.aol.com>
Source record: 138654

Simple answer to this.....The defnition of the term "73" (seventythree) is Best regards. so 73 is already plural. If you say 73's thats wrong, that would effectively mean Best Regardses, not too cool!! Seven-three is also wrong, the term is 73 or spoken, seventy three. So a sentence like" 73 to you and yours" or simply "73 to you" is proper, come to think of it if you say, Best 73, thats kinda wrong too, that would mean Best Best Regards, Right? I think the matter is cut and dry, those "ol' buzzards" got nothing better to talk about, but thats OK....73 LOU

Simple. Whether the "Star Wars" defense system was
ever technically achievable or not did one thing. It
bankrupted the former USSR.

You misspelled, "I can dish it out, but I can't take it." Look around.
The rest of the South is leaving you behind, while you revel in
neo-Confederate fetishism. The fact that you are letting a local
talk-show host get under your skin is not a good sign, either.

I don't especially like redneck jokes. I don't like being presumed to be
stupid, inbred, or bigoted. But I'd rather let that perception stand
than be defended by the likes of your group, the League of the South,
etc. Too much baggage.

Actually, we should take this over to news:alt.thought.southern if you
want. Or you can just put me on your enemies list. That would fill me
with PRIDE.

YES, and while they're at it, they can restest
Conditional Class licensees such as yourself. That
CONDITIONAL CLASS license you got in the
late 50s IS VERY much subject to restest. Just cause
you were "grandfathered" to general class when they
did away with Conditional Class licenses does not
make YOU exempt from retesting!

2326. Re: Anyone Know of PACKRATT software?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-24 00:00:00 UTC
From: Joe Schlatter <joe@schlatter.org>
Message-ID: <7kulmm$15d3@enews5.newsguy.com>
Source record: 138659

PC PAKRATT is produced by AEA and comes bundled with their TNCs. I use
PAKRATT for Windows; good program. There is also a DOS version.

While I agree that some of the people on your list aside from kc1zq
are idiots, they are not all the same. Some (but not all) of them are
probably just innocent, regular joes using the same computer as kc1zq.

You see, 209.180.6.218 is one of the public access internet web
browsing terminals at one of the Hennepin County Public Library.
Querying the DNS database:

Name: hennhp97.hennepin.lib.mn.us
Address: 209.180.6.218

Stop seeing conspiracies where there are none.

2328. Repeater Directory ON LINE

Newsgroup: rec.radio.amateur.misc

Can someone supply the url for any on line repeater directory?

Thanks

Tim Wright KD4OVM

2329. "TAMPA TURD" KE4TEW "RECALLED" by FCC

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-24 00:00:00 UTC
From: realdeal@my-deja.com
Message-ID: <7ks25q$o7r$1@nnrp1.deja.com>
Source record: 138791

It looks like the "TAMPA TURD" KE4TEW will have to take his amateur test again. But there is a difference this time. He will have to take a exam in front of a FCC official instead of a very friendly local "BUDDY" who wants his palm greased. Lets see if old smart mouth Jimmy will be cracking "FUNNYS" to the hard nose official. I think not. and that goes for the other Florida retard NX9J who scammed his way to a extra class ticket. Now he has to put up or shut up. Lets hope for the good of the hobby that these two trash mouths leave th hobby forever.

From: realdeal@my-deja.com
Message-ID: <7ks2mcode1@nnrp1.deja.com>
Source record: 138792

It looks like NX9J, who the FCC must think had a easy ride to his "EXTRA" ticket will have to lick vomit. He will have to take that test again in front of a FCC official. Lets see if the FCC official can be bribed like it appears was the case with the local "BUDDY" who gave him the first test. Complete with answers and skipped code test. I DON'T THINK SO!! Think God for Riley Hollingsworth!!!

Why is the FCC allowed to collect your phone number and publish it or refuse your application ? Try it- no phone number, no filing ! Even if you give your TIN/SSN ! Read up on this invasion of your privacy.

Notice to Individuals Required by the Privacy Act of 1974 and the Paperwork Reduction Act of 1995

The FCC is authorized under the Communications Act of 1934, as amended, to collect the personal information we request in this form. We will use the information you provide to determine whether approving this application is in the public interest. If we believe there may be a violation or potential violation of a statute, FCC regulation, rule or order, your application may be referred to the Federal, state, or local agency responsible for investigating, prosecuting, enforcing or implementing the statute, rule, regulation or order. In certain cases, the information in your application may be disclosed to the Department of Justice or a court or adjudicative body when (a) the FCC; or (b) any employee of the FCC; or (c) the United States Government, is a party to a proceeding before the body or has an interest in the proceeding.
If you owe a past due debt to the Federal government, the Taxpayer Identification Number (such as your Employer Identification Number or Social Security Number) and other information you provide may also be disclosed to the Department of Treasury Financial Management Service, other federal agencies and/or your employer to offset your salary, IRS tax refund or other payments to collect that debt. The FCC may also provide this information to these agencies through the matching of computer records when authorized.

HERE IT IS !!! CHOOSE YOUR UNLISTED PHONE NUMBER OR YOUR HAM LICENSE.

In addition, all information provided in this form, except Taxpayer Identification Number, will be available for public inspection. If you do not provide the information we request on the form, the FCC may delay processing of your application or may return your application without action.

PRIVACY, WHAT PRIVACY ? WANT A LICENSE, SUBMIT, PEON !

This notice is required by the Privacy Act of 1974, Public Law 93-579, December 31, 1974, 5 U.S.C. Section 552a(e)(3) and the Paperwork Reduction Act of 1995, Public Law 104-13, October 1, 1995, 44 U.S.C.

> Clouds Weigh Lots

I was sent this article, it may explain why we all feel down when it's
raining like this ...
While busily working one afternoon (AKA staring at the clouds), my co-worker
told me that a cloud could weigh as much or more as a 747. I think she's
nuts and that this is impossible. Please set her straight.

In fact:

? The maximum takeoff gross weight of a 747 is 875,000 pounds.
? Did you know this includes six million parts?
? Three million of which are fasteners?
? One and a half million of which are rivets?
? The people at Boeing are full of fascinating facts like this.

Anyway, let's be scientific and say a 747 weighs 400,000 kilograms.

The amount of water vapour in clouds varies widely depending on temperature, pressure, etc., but five grams per cubic meter (5gm-3) is about average. We feel confident in stating this number because it was confirmed for us by the meteorological office at the airport at the Isle of Man, off the coast of England. I'm telling you babe our informants are everywhere.

A good-sized cumulonimbus cloud, or thunderhead, might be ten kilometres tall, with a base ten kilometres in diameter. Noodling a bit, we come up with a volume of (7.854 x 1020 m3) 785 billion cubic meters per cloud (you can see this is not looking good). This gives us a mass of (3.927 x 1021 g) roughly four billion kilograms per cloud, or the equivalent of not one but 10,000 747s. A lake approximately 200m x 200m x 100 m deep would form. This would look like four sports arena 100 meter deep. Or a 10m (32' 6") deep square lake of sides 626.7m (680yd), 36 sports arena 10 metre deep.

To put it another way, a modest-size cloud, one kilometre in diameter and 100 meters thick, has a mass equivalent to one 747. And they let these things just float around up there! Why, if one fell on us, it would ... it would ... well, it would get real foggy, that's what. Because of course weight isn't the same as mass--a cloud put on a scale wouldn't weigh anything. This fine but crucial distinction gets you off the hook in the argument you're having with your co-worker.

Still, her point is that there's a lot of stuff in those clouds, and she's right. Suppose it's a dark, grey day with cloud cover one kilometre thick. Suspended above your noggin (to be precise, above the one square meter centred on your person) is the equivalent of five kilograms (11 pounds) of water! And I'm just talking about the water that's condensed into clouds--there's a lot more if you count water vapour in general. If you feel a weight hanging over you during such weather, now you know why.

a = b
multiply both sides by a
a&#65533;= ab
add a&#65533;- 2ab
a&#65533;+ a&#65533;- 2ab = ab + a&#65533;- 2ab
simplfy
2(a&#65533;- ab) = a&#65533;- ab
divide by a&#65533;- ab
2 = 1

Writing another way
a - b = 0
a&#65533;- ab = 0
a&#65533;+ a&#65533;- 2ab - ab - a2 + 2ab = a2 - ab = 0
2(a&#65533;- ab) - a&#65533;+ ab = a&#65533;- ab = 0

Hi,

This would be my first interaction with HAM radio. I would like to buy one in Saudi Arabia and one in India with an objective of communicating between these two locations. Any help towards that end would be highly appreciated.

Thanks.

If it is going to happen why do so many people
spend so much time and effort wailing and moaning
about the code test?? Why don't they just sit
back and wait for it to happen??? Then they can
use their "modern, high tech" microphones on the
HF bands to complain about something else.

I am new to amateur radio, and I want to have a descent grasp of Morse code before I try out for my license. I am aware of the no code license, but I want the real thing. So, I am looking for a shareware/freeware Morse tutor of PC, and any other software that will help me study for my license. I would appreciate it, if anyone could point me in the direction of any useful websites, I have seen the ARRL and CQ magazine websites already. Also, I have already read all the library books available on the subject, in my local library. (Which was the ARRL ham guide from like 1985.)

Etc

I understand he is on two meters in the Kalamazoo area, Your best bet is to hire a detective to locate him in that area. But the cost would outweigh the expense of the transformer. I would suggest your friend forget the deal and chalk it up to chance buying from people he does not know or can not check the gear himself. Sad but true.... You can check with Rube, K4RUB who was a friend of the family, he might shed some light on Mikes location.

This was copied from the ARRL web site:

QUOTE

FCC Amateur Radio Enforcement Log
A representative listing of recent reports on Amateur Radio enforcement-related actions from the files of the FCC Compliance and Information Bureau:

NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has what it believes to be reliable evidence of possible rules infractions and not necessarily that the recipient has violated FCC rules. The FCC has the authority, pursuant to ¬97.519(d)(2) of the rules to readminister any examination element previously administered by a volunteer examiner. This Enforcement Log is representative of recent Warning Notices, Notices of Violation, calls for retesting, and other FCC communications to licensees involving possible serious rules violations. It is not a comprehensive listing.

BARRE, VT: The FCC has requested that Advanced class licensee David J. Tolassi, KC1ZQ, retake the Advanced class examination elements under the supervision of an ARRL-VEC VE team by August 30, 1999, or his license will be cancelled.

CONOVER, NC: The FCC has issued a Warning Notice for alleged unlicensed operation to Charles Hart. A letter June 15 from FCC Legal Adviser for Enforcement Riley Hollingsworth, K4ZDH, says the FCC has evidence that Hart transmitted on amateur frequencies (28.375 and 145.190 MHz). Hollingsworth invited Hart to contact him to discuss the allegations, but he also advised Hart that unlicensed operation could result in fines and seizure of transmitting equipment.

LOS LUNAS, NM: The FCC has requested that Extra class licensee Chester R. Cook, AC5LZ, retake the Amateur Extra class examination elements under the supervision of an ARRL-VEC team by August 15, 1999, or his license will be cancelled.

NEW ALMADEN, CA: The FCC has requested that Technician class licensee William R. Estrada II, KD6VEG, retake the Technician class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be cancelled.

PALM HARBOR, FL: The FCC has requested that Extra class licensee William E. Dinsmore Jr, NX9J, retake the Amateur Extra class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be cancelled.

SACRAMENTO, CA: The FCC has requested that Technician Plus class licensee Ronald R. Coursey, N6UUM, retake the Technician Plus class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be cancelled.

TAMPA, FL: The FCC has requested that General class licensee James W. Dale, KE4TEW, retake the General class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be cancelled.

I just listened to a great debate about this issue just last night on 75 meters. Two old time Hams were taking the position that when you want to give another person "best regards" it should always be 73 (seventy three) as compare to 7 3 (seven three). In the original telegraphers code a 7 (seven) code had a certain meaning and a 3 (three) code had a certain meaning. Putting the two together as in "7 3" (seven three) meant that the two codes were merged, which gave a completely different connotation. The number 73 (seventy three) meant best regards to you individually and when wishing "you and yours" best regards 73's (seventy three's) should be used.

These guys went on to say that most Hams use 7 3 (seven three) when using voice transmission which is completely wrong.....They brought up several valid points.

The best one I heard goes like this, This amateur was on forty meters running high power, he had noticed that his dog Fido was barking when he was on the air. Finally he thought he should check it out . He discovered burns around the neck of the dog. Very puzzled? By close examination he discovered the chain on the dog was about sixty odd feet long and had a metal collar for the dog. Everytime he keyed the rig, he was lighting up the chain with RF and the dog was getting a dose of it around his neck..... Fido was a HOT DOG...

Believe it or not

Why is it that if you want to be a Marine you have to go to boot camp and have some Drill Sergeant call you names and beat the snot out of you for 16 straight weeks?

They dont ask you what race, religion, creed or sexual orientation one has (which are in fact a violations of the amended "Bill of Rights").

You want the license, you give them what they want, or you no getta da tiket.

I have just spoken with the Clifton, NJ police.....They have told me
that 'ole Charles was arrested back in 1994 on a charge of driving while
drunk.

His blood alcohol was .19

Looks like Charles has more legal troubles than any of us knew about.
I'm in the process of getting the police report for this arrest.

Thanks to all who have reported AF2Y to the IRS for not paying his
taxes!

The Human Pitbull,

kc1zq

Yes, this apparently is correct. I checked the FCC web site and yes, as of August 2nd of this year, they will be requiring any AS applicant to provide their Social Security Number and home telephone number as a condition of processing any license-related transaction: new licenses, upgrades, address or call sign changes, etc. They *will* be publishing home phone number information, though not SSNs, on their call-server, and QRZ and BuckMaster will no doubt follow suit. I had a 15 minute phone conversation this morning with Mary Shaak of the FCC's ULS infoline (888-225-5322), and she did confirm what I read on the web site.

The reasoning behind the SSN collection is not internally at the FCC. It is, according to "Fact Sheet #206-U," because the Congress mandates collection of SSN from anybody "doing business" with a Federal agency, as per:

"The Debt Collection Improvement Act of 1996 requires all Federal agencies to collect Taxpayer Identification Numbers from all persons doing business with the agency. This includes all applicants for and recipients of a license. For most individuals, their Taxpayer Identification Number is their Social Security Number"

But it is the *publication* of our home telephone numbers that bothers and puzzles me. I have no qualms about the *FCC* having my home number. I believe they have a right to it. I am a Federal licensee, and the FCC may at some point have the need to call me to inquire about matters related to my license, or operation of my station, or other matters related to the Amateur Radio Service. Why they have decided to disseminate the residential telephone numbers of >675K US hams I have no idea, except that we may be being painted with a broad brush here. That is, we may be getting subject to the same rules commercial AM, FM, and TV broadcasters are subject to.

It is easy to see how access to broadcasters' *business* addresses and phone numbers is in the public interest: they hold licenses granting them exclusive use of particular "channels" in a locale, and the public has a right to know who has been entrusted with the "public airwaves," in order to contact them about interference, programming, and other concerns. No such need exists for anyone other than the FCC to know a ham's home phone. The ham bands are non-commercial, they are not broadcast radio, and no exclusivity to any frequency or band, in any place, is granted to any individual licensee. Moreover, ham signals are usually transparent to better than 99% of the population.

The likely result of our phone's being made so freely available will be:

a) use of the database by telemarketers and political campaigns, and

b) a lot of crank phone calls from a minority of zealously rude and vindictive hams.

To a lesser degree, I resent my home address being published. That provides an opportunity for fist fights and worse, because one ham doesn't like another ham, because of something he said on the air, or because he got drunk and decided to go take a crap in your wife's flower bed because some guy who used to hold your call was his arch-nemesis in 1977. Think carefully about this one as well: what better "shopping-list" could a burglar ask for than the addresses of 675K+ people who own a lot of very expensive radio equipment! On a dollars-per-pound basis, ham gear is like the Brie of electronics, where TVs and stereos are the medium Cheddar. I am surprised we haven't seen a serial-burglar targeting ham residences in the couple of years the call books have been available on-line for free!

Now, what the hell are we going to *do* about this? Has the ARRL even let out a peep in support of our privacy? I think not; I read my QST cover to cover each month, paying close attention to the "DC Currents" section, and have seen nothing that would indicate the ARRL even believes a problem exists. How does one file a NPRM? Maybe it's time we found a new group: No Phone (number!) International?

I suppose you want an itemised parts list with
Manf. part numbers and Federal Stock Numbers.

Just hang on whilst I get the latest release and I'll post it to the Ng.

Ain't that about the truth! I can surly hear old porkbut on 11-meters
again sceaming,"I got sleezy harmonic genrating linears for sale . Yes
thats right buy one of my interferance causing linear amplifiers for ten
times there true value. Run your neighbors out of the neighborhood cause
the price of the land to drop then buy up all the land."
I can hear him now. A;; the truckers on 27.185 will be stopping at the
porkbut CB amplifier shop in Easly S.C. I can hear it now. All those
truckers getting on their little CB radios screaming for porkbut.
BREAKER BREAKER porkbut CB shop. We might have to put up with his sleezy
posts here in this newsgroup but to hear old porkbut on the radio one
will have to go to 27.185 and break for the porkbut CB radio amplifier
shop.
Yes it won't be long now! You yourself can get one of those harmonic
driving amplifiers too! You too can run you neighbors off. Thats if the
amplifier would even work. Most of the stuff porkbut builds or has
anything to do with doesn't work or dosen't work for very long anyway.
Just ask Tom A.K.A. Waiver Boy about the porkbut amp. He got one of
porkbut's amps. ASK HIM WHY IT BLEW UP AFTER A WEEK! He seems to think
it was something he did. Boy old porkbut has got him fooled. What you
expect from a person who got a waiver.
CBers aern't to bright so porkbut should fit right on in, and he
calls people white trash. I beleive that old porkbut neeeds to keep his
side of the street clean before he goes and points the finger at anyone.

I don't get it, Don.

The whole concept of licensing is for the purpose of (1) ensuring you know how to conduct yourself using those privileges, and (2) tracking you down in case you cause problems while exercising those privileges.

For a public agency to trust you with a license you must return that trust with information which can be used to track you down in case you violate the laws governing that license. And for federal government agencies, knowing who you are includes knowing your SSN. That's the new law. The FCC didn't make that law --our elected congress did. That's probably why the ARRL didn't contest this action.

If you don't like it, write to your Congress critters and get them to change the law. Or if you have no faith in your government, you're free to go straight to the hills and become a hermit. Face it, if you have a license, they know who you are, where you live, and how to contact you. That's the price of the privilege of driving a car, flying an airplane, operating a radio, using explosives, designing a public building, etcetera, etcetera, etcetera.

Gentlemen...if anyone's experiencing freezes and punting(being tossed off line), it's not that your computer is broken. Aside from possible extension conflicts, the main problem is called CORRUPTION and I know the way to stop it. I'm unsure at this stage whether or not I'm willing to give away the info or charge nominally for my technical expertise, however if you are interested in getting the info right online, give me your screen name and I'll get back to you. I simply want to put all of you in the right order. My technical info is applicable to all computer makes. I've experimented on mine and have hit the jackpot. Ever since the great and famous WB2OTK piqued my interest in computers, I've been more interested in learning about the guts than anything else. Put your trust in me because I'll never foul you up. Computers are too valuable and wonderful to trifle with. I'll respond to radiosigs@aol.com even though I use the following:

2376. Re: electrical downtilt

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-25 00:00:00 UTC
From: budgie <budgie@NOWHERE.cantech.net.au>
Message-ID: <3773954b.3282922@news.cantech.net.au>
Source record: 138587

On Fri, 25 Jun 1999 12:55:17 GMT, mihaiush@my-deja.com wrote:

>What means ?electrical downtilt? ?

By controlling the phase of the signal fed to different parts of an antenna array, the main lobe of the radiation pattern can be tilted above or below the normal angle for the antenna type.

As an example (from commercial areas) consider two identical vertically polarised antennae mounted one above the other, and fed in parallel, in phase. The combined radiation maximum will be in the horizontal plane.

Now introduce a phase delay into the feed to the bottom antenna. The signal arrives later, and the "wavefront" radiating from the upper antenna will lead that from the lower antenna. The combined signal will then radiate with the major (in-phase) lobe tilted downwards. The angle of tilt can be calculated from the speed of light, the vertical spacing and the delay.

>Is it possible to modify electrically the vertical radiation pattern of
>an antenna ?

Yes, as above, by altering the relative phase of feed to the separate parts radiating - presuming it has multiple radiating elements. A colinear antenna is a good example. It is also a good example of where the pattern tilts whether you want it to or not, as the drive frequency is altered.

>If it isn?t possible and the electrical downtilt is a fix value what is
>the difference between mechanical downtilt and electrical downtilt ?

See first part, where the mechanical downtilt is zero but electrical downtilt is available.

In colinears, for a narrow band of frequencies the difference can be adjusted at the expense of natural resonance, requiring some compensating reactance.

Johnny,

ICOM W32A Cross-band repeat command: Lock Keyboard then press
SQL+MAIN+BAND+POWER ON. Unlock Keyboard to revert to normal.

I got this from an ICOM tech and it works with my unit. I was advised
to be aware of prolonged repeater use, since the unit can get quite warm
when subjected to a heavy transmit duty cycle.

2383. ARRL response on ULS doesn't match FCC responses !

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-25 00:00:00 UTC
From: cwdxer@my-deja.com
Message-ID: <7l0fgdani1@nnrp1.deja.com>
Source record: 138594
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.equipment

Apparently, ARRL once again wants us to receive regurgitated, properly spun information only through their "know-it-all" mouths.

Again, until this morning, the only thing anyone including ARRL said would be private was your Social Security Number. As one of the people who researched his, I stand by it as being accurate. And until FCC validates ARRL claims, I don't stop my publicity campaign.

Quite a paranoid place when anyone (even a member) who researches something themselves and gets a set of answers right from FCC has an "agenda". You bet I have an agenda- to get the farts running that place out of there before the destroy the RS through their lack of advertising, and lame ass attempts to recruit people (young and old).

BTW, someone ought to teach FCC not to say what they don't mean on the web and on the phone if N1RL is correct...

from almighty N1RL:

Registration of WTB licensees in the Universal Licensing System will be required.

Yes, you will have to supply your telephone number to register for ULS. You'll also have to supply your Taxpayer Information Number (typically your
Social Security Number).

FYI: The current paper FCC Form 610 series already requests a daytime telephone number, so this requirement is nothing new.

No, the FCC has no plans to publish or give out any of this information, and
security measures are in place, we are told. The actual database does not reside on the Internet but on an FCC Wide Area Network.

Please, let's not overreact on the basis of incorrect information and half
truths being spread by those with some kind of agenda. The FCC also has yet
to release full details of ULS implementation, but we are told that it will
be effective for amateurs "sometime" in August.

Visit http://www.fcc.gov/wtb/uls/ for the FCC's most up-to-date ULS information and to register.

73, Rick

2384. Frankie Tood's Parents Need Investigating

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-25 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990625130957.08059.00001806@ng-fs1.aol.com>
Source record: 138595

I have two legitimate children unlike many of the bastard -producers on this board; I take marriage vows seriously unlike some of the philandering creeps loose on this board.
And above all I took child rearing MOST seriously. I clearly remember the first time I sent one my kids on a very distant trip. It was Richard, Rick or Rich, named after the great Richard Whiten from South Carolina whom I had known in my childhood days in Poughkeepsie. Even then I knew he would turn out to be my inspiration. Well to continue, Rick was friendly with a kid on the block named Gary who moved, along with his family in 1980, to Huntington Beach, CA. Gary was from a fine family; his dad was a restauranteur and his mother did nothing all day but sit home, eat bon bons and play tennis to sweat off her fat behind. The bon bons won! In Spring of '82 when Rick was just 14, they issued an invitation to him to spend 10 days with them in sunny Cal. Knowing that the family was okay and never in trouble, especially with the law, I remember putting Rick on a jet at Newark Airport on July 2 of that year. I did so because I had confidence in the HOSTS. The vacation went wonderfully and my son returned a better man for having taken that first plane ride 2,500 miles away even though both my kids started going away from home to camp in N.Y. state when they were nine. Now let's talk about that Pennsy misfit, Frankie Todd, who for the longest time was unlicensed altogether yet sponsored and encouraged to get on the air and jam by the likes of such braindeads as Martin Shittum, Al Abernasty, Queenie the Weenie Mort and a few other intellectual midgets. As you know, many have been saying that Francine is ill with leukemia and have made fun of him. I won't go that route even though the kid's a first rate scumbag. In fact I hope like hell he beats it and lives to be 100, honestly. To continue, it turned out that he needed a vacation just like everyone else and Lord knows-if one flies, the world is one's oyster. And since I've been to the Caribbean, I can vouch for the fact that it's a GREAT vacation site; you can't beat the sea and sand, the food, the hotel accommodations, the night life and the general atmosphere and hospitality of the gentlefolk. Can therefore someone tell me why, of all places and people Frankie could have visited, his parents decided to send him into a criminal atmosphere? The only way the Toods could have saved money in the Caribbean was to lodge their son with the likes of Herbie Schoenbohm, KV4FZ, a convicted felon and the father of four sons, three of whom just spent time in the "slammer?" And to boot, Mrs. Schoenbohm too was on the Secret Service hit list? For heaven's sake, they could have sent him on a field trip to Alcatraz Island for less money! Apparently the Todds don't give a flying fig about their son's welfare-in other words, "Go anywhere, you putz; just get the hell out of our hair." And in case you haven't been listening, Herbie teaches well since he's not home while Frankie, without benefit of the proper license, is on 20 meters using the call KV4FZ. That's ILLEGAL, folks. A control operator must be present in such a situation and Frankie has admitted that his idol was away at the time. Riley is very concerned with cleaning up the bands and therefore my suggestion to him is to give Frankie an unexpected

surprise NAL and personal visit upon his return. What to do with KV4FZ for sponsoring such a travesty of justice? Leave the crooked s.o.b alone-his ham radio days are drawing to a close anyway and why give him a chance to appeal anything?
But my main concern is with the Todd family. They are unfit to be parents and therefore Frankie should be, upon his return, housed in a foster home until adoption by sane people commences. AF2Y, Doc

I am in full agreement with you. Being a avid SWL non amateur with no
axe to grind, I have listened for hours on the twenty and seventy five
meter band. I have heard hours of malicious interference from Porkbutt
WB2OTK. Also cussing, nasty talk and everything in the book. He has
broken most of the part 97 rules. If he is not kicked off the amateur
bands, no one should be kicked off. May be a retest would be a good idea
for him, but that would be just a inconvenience, a short time effort. I
think he should be banned for life, made to pay a fine, and all his gear
confiscated. And restitution made for all the scams and fake money
cheating deals he has pulled on neophite amateurs. Then, the ham radio
would be rid of a cancerous growth that needs to be excised. I hope Mr
Riley Hollingsworth does his job and takes these actions..

Realdeal

2387. Follow up on ULS !ARRL actually unaware

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-25 00:00:00 UTC
From: cwdxer@my-deja.com
Message-ID: <7l0hlq$bm2$1@nnrp1.deja.com>
Source record: 138598
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.equipment

According to sources at ARRL, they were actually unaware of the phone number issue vis-a-vis public access.

Again, the issue I think people were raising was not a fear of government peddling our SSNs, but rather application of the FOIPA act gone mad.

I still doubt the security of servers however, uless such info were to be retained on a LAN, based on the recent hacker sprees.

Thus, calls have been placed to determine how those who wish to remain inaccessible to telemarketers and burglars with scanners (yes they get arrested all the time, I have dealt with this plenty) can comply (without giving a pay phone number).

Message-ID: <cEPc3.450$O51.4246@typ31b.nn.bcandid.com>
Source record: 138603

Downtilt refers to the angle of the lobe of the signal as it leaves the antenna. Lobe angle can be controlled by various means either electrically or mechanically. For example: An antenna placed directly on the ground would have a lobe straight up due to the effect the ground has on the system. The higher the antenna, the less the effect.

MY MY Charlie
why are you so afraid of the facts. This guy has done nothing to you
and yet you call him all kinds of names. Why do you do that Charlie?
Does it bother you to see the facts so boldly put. Charlie I sujest you
go and talk to some body about this problem you have with HATE. You seem
to hate everyone.

You! Dr Hate are a antiSWLite. you bigot! I have every right to SWL the ham bands. I am not going to let a hateful, nasty, antiswlite with a bigoted attitude toward a group of the nicest people in the world get by with such bigotry. You Dr Hate are not innocent. You share the blame with your Master, Porkbutt for bringing Ham radio down to such a sorry state. Mr Riley Hollingsworth should kick your no good antiswlite ass off of ham radio forever!!! From what I have hear on the ham bands from Herbie (God bless him} Big Al, and the other SWL supporters and Americas finest amateurs, you are not only a antiswlite but a radio criminal. Quit being a bigot DR Hate and leave us SWLers alone. SWLs RULE! and we are the chosen ones!!

Here we go folks. I had suspected it but couldn't prove it until now. Where else did the Nazi war criminals go besides South America and a few countries in the Middle East? And where is South America did they find substantial haven? BRAZIL. Remember Ira Levin's(I think he wrote it-I read it more than a decade ago) unbelievable novel, "The Boys From Brazil" about Hitler clones? Didn't that tell you something about those damned PYs? Well look who has a Brazilian callsign? That reprobate from Saint Croix-the white trash in a black paradise-Herbert Lucifer Schoenbum. It figures, doesn't it?. That country takes in and welcomes German dreck and I guess Mengele and Schoenbohm go hand in hand. I want to thank one of my Haganah agents for bringing it to my attention. Now the ADLand JDL will find out about it too. It's about time the authorities in Brasilia knew that the latest war crimional they've welcomed in has a ham callsign and is wanted by the FCC up here. WANTED FOR IMPERSONATING A HAM. WANTED FOR LYING TO AN ADMINISTRATIVE LAW JUDGE. Doc,AF2Y

>The whole concept of licensing is for the purpose of...
>(2) tracking you down [by phone] in case you cause problems

I don't have a problem with giving the information to the FCC for the purpose of tracking me down. I do have a problem with them releasing that information to anyone else *outside the government*. If they can track down tax criminals, deadbeat dads, or government loan defaulters, with that information then so much the better. But to release it to enlarge the advertisers databases is criminal. The latter practice is what most of us hope will never happen. I get enough advertising phone calls as it is, and I have an unlisted phone number...

I'd like to build a small, short range radio. It doesn't need much range, less than 200 ft. Where would I get the information on how to build it? Is there an FAQ out there somewhere?

What kind of stuff will I need to get? I've been interested in doing this kind of thing for a while, but haven't had the chance.

Also, is it legal to use any bandwidth for short range transmissions, or do I need to keep to a certain range?

Thanks,
Will Gant

I can't seem to able to get through to these guys. Yes, some top scientists do believe I picked up and taped intelligent extraterrestrial signals using my Cloudwarmer whose idea was given to me the great WB2OTK. Are you knocking me because you don't believe me or because I'm president of the WB2OTK Fan Club(dues are just $35/year) or that my "standard" dipole has been souped up to become the greatest wire antenna in North America as judged by an independent antenna research organization? Now I read postings by someone who thinks that SETI is a waste of time and money and all that jazz. Listen up fool to Bill Lee. Read his posting. Only the narrow minded are satisfied with what is and seek to go no further. Just suppose Queen Isabella didn't fund Colombo? Do you think his raincoat would have ever made it here? Suppose Leonardo DaVinci didn't promise Mona Lisa some good sex? Do you think that dumb broad would have posed like that for months? Get with the program, doubting Thomasses. Progress is nothing we should take for granted-it must be sought diligently. Take Bugsy Siegel for example. Suppose that Sicilian gangster didn't have a dream? And he was Sicilian and not Jewish because no Jew can be a Sicilian gangster. They just keep the books.Now suppose on the way through the sleepy little unsophisticated town of Las Vegas in 1946 he didn't stop to look over the desert to mull over the idea of building a gambling oasis? Just suppose he stopped to pee? You know what Las Vegas would now be famous for? URINALS! Come on guys-give progress and incentive and guile a fair shake. And how about our rockets to the stars? Know where it came from? If not, I'll tell you. In Nazi Germany there was this evil but very intelligent scientist named Werner Von Braun who devised something called a "Vergeltungs Rakete" i.e. a vengeance rocket. The Huns called it a V1 while the Limeys dubbed it "Doodle Bug" and "Buzz Bomb." Just for the hell of it, Werner loaded the things with dynamite and sent it over England to indicriminately fall to earth and blow up civilians. Why? Because that was the German way of having fun. Subsequently came larger boosters packed with much more TNT and they were dubbed "V2." Who knows how many Brits were killed by such nastiness but here's my point. We and Russia saw a great advantage in possessing such a weapon, so instead of shooting Von Braun and his bastard cohorts after the way, we grabbed as many as possible and so did the USSR. And what happened next. WE MADE THESE MURDEROUS PIGS,HEROES! We housed them in areas in which a black man was denied housing which was disturbing when considering that American blacks fought and died killing these Nazi cockroaches like Kevin Strom and the late KE2LO, Gene Metzger. However SCIENCE RULED. We courted and mollycoddled and wined and dined the Hitlerite scumbags just to progress. We knew that sooner or later, their expertise in killing innocent civilians would be translated into our killing Russians and vice versa. You see what I'm driving at-in every society we must have visionaries and my Cloudwarmer makes me exactly that. You may think it's funny that I sit for days on end and monitor and tape; in fact, "I'm always 'monitwing' in the quiet mode," and it paid off. I am now a celebrity who indeed will appear on TV and in the magazines and one day you'll say, "I knew

that guy when he was just a USENET nebbish." If you've derived anything out of this posting, which I seriously doubt except for eye strain,it should be this. A few of the planets are almost impossible to see using a standard telescope. But here's a good way to circumvent that. If you have a full length mirror in your home, stand in front of it and take down your trousers and shorts. Then turn around to place your backside to the mirror. Make sure you can take in the view. Then bend over and you'll see Uranus. AF2Y, Doc

I'd like to build a small, short range radio. It doesn't need much
range, less than 200 ft. Where would I get the information on how to
build it? Is there an FAQ out there somewhere?

What kind of stuff will I need to get? I've been interested in doing
this kind of thing for a while, but haven't had the chance.

Also, is it legal to use any bandwidth for short range transmissions,
or do I need to keep to a certain range?

Thanks,
Will Gant

2444. BUZZARD PEAK 145.460 MHz

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-25 00:00:00 UTC
From: PDWK66A@prodigy.com
Message-ID: <7kurd2$40bg$1@newssvr01-int.news.prodigy.com>
Source record: 138691

RE: BUZZARD PEAK 145.460 MHz

I used to monitor the BUZZARD PEAK 2m repeater on 145.460 MHz since whenever there was an earthquake in Southern California, hams from all over would get on that repeater and report what they felt, and within a few minutes, you would have a pretty good idea of the epicenter and reports on any damage.

This repeater is listed in the 1997 Southern California ScanFan (6th Ed.), but is NOT listed in the 1998 Repeater Location Guide.

I tried to raise the repeater this weekend, but had no success.

On Wednesday, June 23, 1999 around 9:30 pm local, I heard a computerized voice announce essentially the following:

"K6PYP and KC6OKA - Southern California Dept. of Veterans' Affairs Emergency SHARES Repeater."

I tried again to raise anyone on this frequency, but again no success.

Does anyone on here know what happened to the BUZZARD PEAK repeater and what this Dept. of VA Emergency SHARES Repeater is?

Thanks and 73 de JOHN, KC6NWJ

I just simply love how PORKBUTT calls people in this newsgroup all kinds of bad names and yet the proof has been put out there for all to see. Lets face it PORKBUTT is guilty as charged! PORKBUTT can't stand to see the proof out there. This proof shows us all what kind of person he truly is.
PORKBUTT had the FCC come and see him. If he was this law abiding person that he would lead us all to believe, the FCC would of never come to see him. Lets see he has made amps for 11-meters he has run well over the leagal limint more than once on 75-meters as well as 20-meters. He has jammed many stations on 75-meters as well as 20-meters and gotton caught. (Hey PORKBUTT!!! I hope that you are aware of the fact when you explain the reason why you did those things on the tape that Riley gave you, can and will be used against you.)
Now he has to explain why he has jammed those stations on 75-meters and 20-meters, as well as any OO card that he might of gotton in the said time frame. So all these other people that PORKBUTT calls names don't need to worry. PORKBUTT is just frustated because like Herbie the FCC has his number, and its just a matter of time! PORKBUTT has ripped off friendly ham radio friends with, filters, amplifiers as well as mics. (I wonder if Charlie A.K.A. Dr. HATE, PORKBUTTS only friend, bought one of those PORKBUTT 3 dollar filters? I don't think so all though they will probly lie because they are both liers and theives!)
Herbie ripped off strangers by their long distant telephone bills. Which is worse? I wonder who lacks cander now? So as we can see by all the things that PORKBUTT says can be taken as a grain of salt. Its just a matter of time and PORKBUTT will no longer be able to get grid squares on HAM radio. I wonder if his 6-meter operation is in accordance with the RF safty act? I mean 1500 watts on 6-meters, maybe thats the true reason for the puss sores on the back of his neck.
I'm willing to predict that PORKBUTT will be back on 11-meters yelling,"What about it skipland?" I'm sure that he will be back to selling amps to freebanders and CBers alike. I'm sure that he will be continue to contributing to the freeband effort! So I don't think that this perdiction will not be to far in the to distant future.
BYE BYE PORKBUTT!!

According to the 1999 edition of Passport to Worldband Radio, there are three stations on this frequency, two from Germany (Deutsche Welle from Julich and Wertachtal) and the one from Belgium (Radio Vlaanderen International via Germany). These are shortwave, intentional international broadcasters. I recall from years ago (and hear them marginally almost nightly) there are a few domestic broadcasters from either Australia and/or New Zealand in the area of 3995 kHz (and above) but can't find any listings for them in the reference books I have to my avail in either the catagory of domestic or international broadcasters. I hope this helps. Good luck.

2450. Re: KK7HO, continual embarrassment to amateur radio

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-25 00:00:00 UTC
From: Arthur Landsburger <alands@rapidnet.com>
Message-ID: <377312BB.B5BF6D90@rapidnet.com>
Source record: 138697
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur,rec.radio.shortwave,rec.radio.amateur.misc

KK7HO spun:

> Listen to the rest of the conversation (tape), and the others who are in it and
> it''ll all be clear. Other than that I don't really give a damn what someone
> like you believes or thinks.

That's the problem Tim, I have heard the whole tape, and it's clear that
you were discussing the cost to have W1WCR killed. Thats when you
said:

"What he don't know is that now-a-days, five hundred dollars will get
his head blown off."

Your statement shows that you are the only true 'hater' on the
frequency, Tim Volz.

>
> >Tim,
> >
> >Okay, I've seen your denial about this before, and I'm willing to accept
> >it as fact, but if you are innocent,
>
> INNOCENT, hell yes! Making a statement isn't a crime. ONLY to the libertynet
> gang when someone speaks out about THEIR statements. You know, the racist
> separatist remarks they make. The condoning of bombing abortion clinics and
> doctors. The KKK, the National Alliance, the Western Imperative Netwerk, Ernst
> Zundel.

What are you ranting about Tim? You're really off in some fantasy here. These
things are not part of the discussions on 3950. They are only voices you must
be hearing in your head. Do you think it's time you got some professional help?

> Instead of questioning their motives you want to ask me about a statement that
> you and the NITS have taken a little sound byte of and twisted it in an attempt
> to implicate me in some "conspiracy".

Well it was you and Sid that were talking about having other amateur radio
operators killed. If you want to call that a conspiracy, that's your call. You
just sound like two phychos to me.

> Of course we all know that the "So
> Called" net THRIVES on "conspiracies" . I suggest you listen to the whole tape
> Then shut up about it.

Well If I'd been recorded in the act of a felony, and the recording was made
available to 1000's of others, I'd want everyone to shut up about it too.

Don't mind him, He's our resident expert on self inflation and paranoia.

There are certain frequencies within the FM broadcast band that you can legally use for your purpose. I cannot remember the specifics, but I am sure someone here will point you in the right direction.

One thing that Doc mentioned is correct. If you have a good antenna and the proper conditions for the frequency that you are using, you can exceed the 200 ft you are shooting for. I have had successful contacts with people in Europe on as little as 100mw around 28mhz. Be aware that a transmission of any wattage, within the amateur bands, without a license is illegal. Be sure to check where you are allowed to operate.

For a cheap and easy way to get a radio that operates on these principles, buy a Mr. Microphone.

Oh horse poop. The U.S. Privacy Act prevents universities from releasing student records without permission from that student. And if you'd ever been to college yourself, you'd realize how foolish it is claiming one could pay off every professor in every class one had taken.

Because you've lied above, KC1ZQ, you'll have no credibility in any future article you post. In the kill-file you go.

>PC PAKRATT is produced by AEA and comes bundled with their TNCs. I use
>PAKRATT for Windows; good program. There is also a DOS version.
>

PC PakRatt is now sold by Timewave Technology Inc. Timewave sells PC PakRatt 2.1 for Windows 3.1. This version is the only Y2K compliant version and supercedes all previous versions (ver 2.0 and ver 1.0).

PC PakRatt for DOS has been discontinued. It is not Y2K compatible, and Windows 2000, which is in the beta test stage by Microsoft, is said not to support DOS. All other DOS software products from Timewave are also discontinued.

Timewave also sells PK-TERM'99, a Windows 95/98/NT program that supports all the TNC's and multimode data controllers produced by Timewave and the now defunct Advanced Electronic Applications, Inc. of Lynnwood, Washington.

Timewave has an exclusive marketing and distribution arrangement with Creative Services Software, Inc. for all the Timewave terminal products. The two companies collaborate to specify, develop and manufacture the software products, with each company contributing in its areas of expertise.

Timewave purchased all of the data products line of Advanced Electronics Applications, Inc. in April of 1997. Tempo Research of Vista, CA purchased the AEA name, the antenna and antenna instrumentation products.

Please visit the Timewave Website (www.timewave.com) for more information.

Thank you,

Hi all....

This is a NO BS NO SCAM DEAL....AND IT IS FOR HAMS ONLY!

My company is 20 years old and we sell computer parts and Microsoft products at wholesale to re-sellers. There is an even chance you have a product from Amax if you patronize your local computer shop.

I am a salesman for Amax and I am offering to sell either built systems or components to hams at the price we sell them in quantity 50 lots to resellers. This is for real, and so am I.
I am offering this not to make money but as a way to repay the ham community for the TONS of help I have gotten since I got in this hobby.

Go to www.amax.com and check out the stuff there....

Then call me in the Chicago office at 888-810-2629. I am at extension 106.

Our Illinois location has some pricing at http://people.ce.mediaone.net/amaxil but it is kinda old pricing. You can call me for deals, but an email to Doug_Adair@amax.com is best.

I just simply love how PORKBUTT calls people in this newsgroup all kinds of bad names and yet the proof has been put out there for all to see. Lets face it PORKBUTT is guilty as charged! PORKBUTT can't stand to see the proof out there. This proof shows us all what kind of person he truly is.
PORKBUTT had the FCC come and see him. If he was this law abiding person that he would lead us all to believe, the FCC would of never come to see him. Lets see he has made amps for 11-meters he has run well over the leagal limint more than once on 75-meters as well as 20-meters. He has jammed many stations on 75-meters as well as 20-meters and gotton caught. (Hey PORKBUTT!!! I hope that you are aware of the fact when you explain the reason why you did those things on the tape that Riley gave you, can and will be used against you.)
Now he has to explain why he has jammed those stations on 75-meters and 20-meters, as well as any OO card that he might of gotton in the said time frame. So all these other people that PORKBUTT calls names don't need to worry. PORKBUTT is just frustated because like Herbie the FCC has his number, and its just a matter of time! PORKBUTT has ripped off friendly ham radio friends with, filters, amplifiers as well as mics. (I wonder if Charlie A.K.A. Dr. HATE, PORKBUTTS only friend, bought one of those PORKBUTT 3 dollar filters? I don't think so all though they will probly lie because they are both liers and theives!)
Herbie ripped off strangers by their long distant telephone bills. Which is worse? I wonder who lacks cander now? So as we can see by all the things that PORKBUTT says can be taken as a grain of salt. Its just a matter of time and PORKBUTT will no longer be able to get grid squares on HAM radio. I wonder if his 6-meter operation is in accordance with the RF safty act? I mean 1500 watts on 6-meters, maybe thats the true reason for the puss sores on the back of his neck.
I'm willing to predict that PORKBUTT will be back on 11-meters yelling,"What about it skipland?" I'm sure that he will be back to selling amps to freebanders and CBers alike. I'm sure that he will be continue to contributing to the freeband effort! So I don't think that this perdiction will not be to far in the to distant future.
BYE BYE PORKBUTT!!

http://pubweb.ucdavis.edu/Documents/prelaw/whatispad.html
You've got that right,Paul.What cry babies! MY RIGHTS ARE BEING TAKEN AWAY BY THE FCC. That's horsebleep. What's happened is that because of ABUSE of the ham bands thanks to the outrageous hands-off-approach by the FCC for a decade, they now realize that without much more forceful administrative and regulatory procedures, our bands will be LOST to foreign interests at the next ITU conference. Hence the stringent turnaround. It simply had to happen. And many are asking why all this re-testing stuff. You can thank KV4FZ, Schoenbohm, for that baby. The FCC is tired of something called FRIVOLOUS APPEALS a la Schoenbohm. Too time consuming and expensive for them. Therefore this whole ridiculous appeals thing is history because the FCC now outflanks the party is question. Either put up by showing the demanded proficiency or you're GONE. That's not to say I agree with their decision about retesting certain parties but IT'S LAW and if you whining wimps don't like it, then get the hell out of ham radio! THEY CALL THE SHOTS, YOU DON'T! Tim,

You were caught -again- threatening other amateur radio operators. It's nothing new, from a jammer such as yourself. You will no-doubt deny that you -ARE- a jammer. But before you launch into your tirade about Nazi's and the like, please point your browser at:

http://members.xoom.com/kevin_strom/

And listen to the first two selections. Your recordings there prove that you harass other hams on 3.950. In this jamming session you just started harassing a non-political conversation on 3.950 about packet radio baud rates. This clip runs over 6 minutes, and contains the whole conversation.

KK7HO wrote:

> I was never discussing how much it would cost to have w1wcr or anyone else
> killed. You seem to always want to twist the truth, but then again that's all
> you guys are known for.

You sure were. That's why you were talking about the price for a contract killing on the frequency occupied by your intended victims. Why are you so full of hate?

> You only put up one little sound byte because the whole conversation would
> blow your LIES up in your face.

This clip runs over 6 minutes, and contains the whole conversation, and illustrates your true character. That of a true amateur radio outlaw.

So give it a listen, and then it's clear who the lyer is: Tim Volz KK7HO

Absolutly correct Doc, every single problem on the ham bands today
can be directly traced to the KV4FZ situation. It all began with
his harassing the 40 meter caribean nets, then he moved to 20
and started on intercon. Those of us that know the real history are
HAPPY the FCC is back in town. I know I AM.

You and your friends should be proud of your volunteer work and the fact that you choose to bring new life into this world. Raising children is a task that is being neglected more and more these days and I commend you for taking the time and making the effort to raise yours in a manner that is respectful to our society.

Brent, It is common practice for publishers to pay people for stories. His demands for his intellectual property is reasonable. You may not agree with the price he wants but the principal is sound.

Most people think it would be unacceptable for an organ or blood donor to ask for money. But think about it..... the donor is the only one NOT getting money for the thing of value. Everyone else is being paid and making money from it but the donor is expected to give it away. I am not saying that is wrong .... just odd that it is considered OK for everyone else to make stacks of money while the donor is considered an asshole if he asks for some. Dont get me wrong here..... Donating organs to someone else is a very noble and humanitarian thing to do and I respect and admire anyone willing to do so without any exceptions of reward.

I have read some of Doc's posts here and like I said, I do not find them very interesting and most of the time just skip over them. There are others that post here that are much worse. Some have crossed the line into slander and harassment and it is just a matter of time before someone gets their attorney (or gun) and takes care of business.

Don't pay any attention to that idoit!
There are many plans to build low power say 200 ft range at your local
library. You also don't need a license if you build this transmitter in
the 49-50 MHz range. Part 15 of the rules and regulations allows this.
You can also look on the internetnet by using your search engin. type in
something like low power transmitter. you can even build something on
the FM broadcast band if you keep it under 100 mw (millawatts).
I hope I helped you

I am in full agreement with you. Being a avid SWL non amateur with no axe to grind, I have listened for hours on the twenty and seventy five meter band. I have heard hours of malicious interference from Porkbutt WB2OTK. Also cussing, nasty talk and everything in the book. He has broken most of the part 97 rules. If he is not kicked off the amateur bands, no one should be kicked off. May be a retest would be a good idea for him, but that would be just a inconvenience, a short time effort. I think he should be banned for life, made to pay a fine, and all his gear confiscated. And restitution made for all the scams and fake money cheating deals he has pulled on neophite amateurs. Then, the ham radio would be rid of a cancerous growth that needs to be excised. I hope Mr Riley Hollingsworth does his job and takes these actions..

Yes, you can transmit on some bands with low power and
no license (such as the AM and FM broadcast bands).

No, you cannot transmit on every band, even at low power.

There are plenty of "do's" and "don't's" and I would
recommend checking the FCC Web page first,
http://www.fcc.gov/mmb/asd/lowpwr.html.
Most of the information will be covered under
Part 15 devices.

There are lots of kits for such transmitters. Check amateur
radio stores, the stores' Web pages, and the manufacturers'
Web pages (such as Ramsey).

Three points:

While it is technically correct that telephone numbers and SSNs are the "property" of the grantors, that in no way alters the fact the access to such information compromises the holder's privacy. This is apparently clear to the Feds and to your telephone company, to go by the reams of law and regulation on the books about their disclosure.

If the requirement to submit SSNs (which is mandated by Congress, *not* the FCC, and applies not just to FCC-licensees, but to all transacting business with any Federal agency) results in IRS collecting from deadbeats, and spouses collecting child-support from the other dead-beat spouse, all the better. I am just concerned that SSN info and other info will be misused, i.e. made available to employers, credit bureaus, marketers, political campaigns, etc. The record of government stewardship of private information and protection of citizens' privacy over the last 25 years is very poor.

I pay USWEST a couple dollars a month to keep my telephone number private. In this way my friends, employer, family members, and anyone else who I choose to make my number available to has it. Others don't. I fail to see what right the FCC has to publish my unlisted telephone number, and what legitimate purpose of the WTB/ARS it accomplishes. I am a little frightened by assertions to the effect that "anyone who doesn't have something to hide has nothing to fear." By such reasoning, everything from my college transcript to my medical records ought to be widely disseminated. Its a slippery slope down which we all go this way.

I spoke to Mary Shaak at the FCC's ULS info number (888-225-5322) on Thursday morning. While she was uncertain, Ms. Shaak indicated that it was her understanding that the FCC would *not* be publishing telephone numbers; she said the phone numbers were for FCC use only. I guess we will all have to wait and see. She did suggest using my work number on FCC forms, saying that it was OK "just so long as you give us a number we can contact you at." (verbatim quote). Likewise, she declared that it is permissible to use a post office box as my address. So, here are some ways to comply with the law without too seriously compromising personal privacy.

Agreed. What is at issue, at least for me, is *not* the FCC asking for or possessing any information about me, including my SSN and home telephone number, but rather that that info remains with the FCC, not to be published on QRZ and BuckMaster and the FCC's own call server. Such dissemination goes beyond the Commission legitimate purpose and need to monitor and contact licensees.

One important note of clarification: the FCC won't be using the SSN internally--they will pass it along to IRS and others. Therein lies some of the apprehension felt by many of us. Yes, ostensibly the collected information will be used to located tax scofflaws, but who is to say that that will be the end of it? By small increments, personal privacy is being eroded in the name of fair taxation and public safety. When we have all the safety and fairness we can, what then will the rationale be? Where do we go from there? Will we someday soon all be asked to provide a DNA sample to aid law enforcement in catching violent criminals (it has already been seriously proposed), and to help identify us in the event of a house fire or catastrophic auto crash? The risk is not in the (mis)uses we can now foresee, but in those we cannot.

Having re-read the ULS Report & Order, and FCC's Fact Sheet #206-U, it is clear that email addresses are *not* mandatory. Also, contrary to much of the posting going on about the subject, it remains very unclear whether the FCC will release collected home telephone numbers. They will *not* be releasing SSNs. Instead, they will generate a seperate random 9-digit ID (and one not using an algorithm having the SSN as an input) for tracking. That is what will appear on the FCC's call server and others.

So where is it in part 97 that says people can't have discussions. So if what you say is true Tim none of us can talk about anything but radio and signal reports. If what you say is true 98% of the amateur radio transmissions anywhere on the amateur bands would be considered illeagal transmissions. I would like you to quote the rule that backs up what you say. I would like to see it as we will discuss it further. I think so of what you have to say here is opinion and not regulation. I don't think that the regulations can change the communications act of 1936. I think tha communications act of 1936 as well as the Constitution of the United States of America says that we can talk about anything we want. We have to ID every 10 min, (porkbut went 30 mins with out IDing 6/25/99) and we are notto use foul profane language. SO I don't think that anyone on 3.950 has violated any of these rules. I know there are alot o0f jammers on the 75-meter band as a whole. Tim I thing you need to reread part 97.

At LEAST his parents are trying to
give him a vacation , YET some people are so jealous , they set and
complain about everything.CAN you find something to complain about
instaed of the parents that are giving their son a trip .THAT you can
not afford
and ARE you jealous ? LEave the people alone and pick on your own KIND
.....
ONES that dont give a good TWO HOOTS IN HELL WHAT you say or DO >>>>>

What is troubling about the entire issue, not simply within the FCC in regard to ARS or other licenses, is the inversion of years of case law applying to Federal agencies, law enforcement, and the IRS. Prosecutors, investigators, IRS agents, FCC agents, and the like, are not allowed to simply cast a wide net and say to another agency, "give me all the information you have on everyone in your database."

That is called "going on a fishing expedition" (for want of the true legal term, though judges and attorneys use it commonly in court) and is not permitted. You have to have a reasonable suspicion that an *individual* is doing something, or has done something in violation of a *particular* statute. This is a very basic tenet of privacy and 4th, 5th, and 6th Amendment law. As long as the FCC collects SSNs et al. and keeps them until some other agency specifically requests an individual record, that is fine. But if records are shuttled around wholesale, then laws are being broken, and our liberty and privacy are decimated again.

That all I'm doing is telling the TRUTH! porkbut STOLE I repete STOLE my TS 700! So thats a fact! I gave that guy every opertunity to get right with me and he just blew me off and called me names. You yourself said there was nothing wrong with the audio of my station. When I asked for my money back for the filter that I got from him all of a sudden I had bad audio and nobody had a problem with my audio until porkbut started crying! The filter didn't work because I have a bad signal. So it sounds like you don't know whats going on. Then there is the fact that porkbut did lie to the FCC about that over leagal limit amplifier. I know for a fact that that amp worked because porkbut told me that it was finished and he said, "I am going to jam the heck out of those stump humpers on 3.894.5." The he said he would beat my ass if I every told anyone. Now I am a lier. So I think Dan you don't know whats going on. I also know for the fact that he did try to rip Bob off with a Mic. Bob is afraid of porkbut and he told me that he would never admit to it. Well after I ran my mouth porkbut got his mic back. Now about Tom a.k.a. waiver boy porkbut sold him a amp and it was less than a week and the amp was blew up. What that say about the world famous porkbut filters. Now there is the wav file floating around of porkbut using extreem bad language and racest statment by which he said never happened. So all this evidance proves that your buddy porkbut is a theif and a lier. I will not let go of the truth.....!
I never had a bit of trouble with other operators on ham radio until I came across porkbut. Why is it so many people don't like this guy? Well I know why! Look what he has done to me and other evidance. So I think you need to pay more attention to what is going on. I can only hope that you never have to get the first hand experiance that I got with porkbut.
now that is the truth!
Oris

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX
Saturday June 26th 1999.

Not only in the UK were/are telephone ringers connected to ground (earth) to provide two, or more, party service on one telephone cable pair of wires.

Especially in rural areas of North America where long lengths of cable or 'open wire' telephone distribution are required, it was, and probably still is in many areas, common practice to connect the ringer circuits of several phones to each side of the line. This means that all the phones on that side of the line will ring; however ring 'codes' such as two short, one long etc. help to identify which customer is being called.

A variation of this method of ringing was/is to use different ringing frequencies for each phone. The 'bells' in the phone are tuned electrically and mechanically to a particular frequency such 33.3 or 50 cycles/sec. One system (Automatic Electric Chicago) provided up to five frequencies; this meant that five different ringers could be connected to each side of the line. This resulted in a ten-party line on one pair of wires, with secrecy of ringing. So, unless one picked up the phone to make a call while the line was in use (not uncommon with ten parties on a line!), you wouldn't be aware that your neighbour had received or was making a call. The telephone companies used to ask customers to "Share the time on your party line". This ringing system was sometimes called "Harmonic Ringing"; although the five (5) frequencies were, if I recall correctly, 16, 25, 33.3, 50 and 66.6 cycles/sec.

However in general telephone ringing frequency was/is about 20 cycles/sec; but with non harmonic-frequency phones was not critical. Ringing sources in telephone systems varied from a hand crank mounted in the key shelf of a manual switchboard, AC and DC motor operated generators or dynamotors and AC operated units sometimes called a "sub cycle".

The ringing voltage, still in use today, is generally around 90-100 volts, AC; much higher than the typical, 48 volt or 24 volts DC fed out to the telephone line through relays and resistances to provide a few milliamps of current for speaking and signalling.

All these "grounded ringing" methods depended, of course, on a good ground (earth) hence the original story in these posts!

In this part of North America the soil resivity is very high and it is very hard to get a good ground, especially at each individuals premises. Also we had a number of three phase 'delta' power system which also were not well grounded and which could cause weird ground currents at times, in comparison to multi grounded 'wye' (star) three phase common today.

We had many multi party lines, (I recall one line with 14 telephones including a pay phone!) especially in magneto phone exchanges and we had a four party version of the 'harmonic' ringing in one area, in almost all cases our ringers were bridged right across the telephone line because of the difficulty getting a relaible ground. As telephone systems were replaced and modernised fewer two party telephones were needed. So, generally, grounded ringers at customers premises have disappeared in this area; although ringing to ground can still be provided if necessary.

I'm certain other telephone industry 'types' can provide more stories and humerous incidents relating to 'grounded' and 'ungrounded' ringing!

What a SPIN DOCTORING bunch of LIARS all of you liberty net nazis are.
Just go on, continue with your lies, and when one of your LIES really does affect me, in anyway, other than just psychotic babble in this NG, I'll just drag you ass into court. Tim

>Your statement shows that you are the only true 'hater' on the
>frequency, Tim Volz.

Good attempt at changing the subject. You want to talk about "Haters"
TAKE A LOOK AT THE HATE DIRECTORY.
http://www.bcpl.lib.md.us/~rfrankli/hatedir.htm
THAT'S WHERE THE "HATERS" ARE LISTED. ON THE HATE DIRECTORY YOU'LL FIND THE "SO CALLED" LIBERTYNET GANG ON THERE. YEP THAT'S RIGHT, listed about 80% of the way down the page, THEY'VE BEEN THERE FOR QUITE AWHILE. AS A HATE GROUP.
How come you tried to avoid making a statement about their hatred of blacks, Jews, Chinese, Mexicans hell almost everyone who isn't "Blinding White".
How come you are trying to make yourself look as though you dislike "haters" and ignore a group like that. There can be only one reason and we all know what that is.
I guess the group you like so much, that so called liberty net, does not hate when they says things like- calling for a race war,
dragging blacks behind trucks is OK, bombing abortion clinics and killing doctors is ok. They have condoned all of this, on ham radio. You know this but yet you TRY to twist a sound byte to fit your LIES.
give it a rest IDJIT. 73 de Tim
Oh continue to harass me - thru this NG with multiple postings of BS about me and you'll be finding another ISP Tim

2525. Re: EMP phenomena (was: Morse code)

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-26 00:00:00 UTC
From: Dave Shrader <dshrader@earthlink.net>
Message-ID: <3774AA6E.33853DAB@earthlink.net>
Source record: 138546
Cross-posted to: rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc

EMP will generate a very broad area of coverage. A high altitude explosion will produce 50,000 volts per meter over a 1000 mile radius.

The energy spectral range is different between lightning and EMP. Lightning does not have the fast rise time of EMP and therefore lightning EM energy peaks in the range of LF to MF . EMP, as mentioned earlier, has measurable components out to 800 MHz, but peaks in the MF to HF range depending on weapon design and altitude of burst.

Ground burst EMP exhibits a different characteristic. The nuclear x-rays are absorbed within about 10 feet of the blast center and they produce tremendous heat and EMP. The electrons, due to the earths magnetic field, rotate and curl into the earth as opposed to transiting in a longer space path. They produce a radial field. The nuclear prompt gamma rays, much higher energy photons, require about 1 mile of atmosphere, at sea level, to complete their absorption in the atmosphere. It takes a longer time for photons to travel a mile, so you get a broad pulse width.

All together, nuclear EMP produces about 50,000 volts every ~40 inches with energy peak spectral density in the 1-10 mhZ range. Lightning produces about 20,000 volts every ~40 inches with a peak spectral density in the 0.1 to 3 mhZ range.

Both are very nasty. We have all read about lightning damage to antennas and equipment in these groups. It will happen if ever there is a Nuclear induced EMP event.

==========
Could this be clarified please ?

Is the field strength 50 KV per meter at a distance of
1000 miles from the explosion?

If not, where *does* the 50 KV per meter occur ?

Reg.

The REAL bottom line is that the participants on 3950 HAVE JUST AS MUCH RIGHT
to voice their opinion as you do. That's how our Republic works. That's how our
Constitution
is intended to be applied. Even if you don't like it, everyone has a right to free speech
on WHATEVER medium that free speech is carried over. This includes Broadcast Media,
Internet Newsgroups, Handbills, Roadside Signs, Newsprint and even Amateur Radio.

Please do not be so foolish as to join with those who would usurp the rights of individuals
and groups to speak and print ideas and opinions! (even if you find them distastefull)

Please remember that when one groups right of freedom of speech is taken away YOURS
JUST MIGHT BE NEXT !

>There's plenty more evidence visit the 3950 Opinion Page. They are creating

Im not claiming to "as clean as the winddriven snow", and never will.
As for my cussing and acting like a shit, your right. And when did
it stop? When those stumpjumping malcontent assholes stopped jamming'
me on a nightly basis. As far as Im concerned the "war" is over, and
unless attacked, as in the past, by blatent lies and jamming, it will
stay over. The ball is in the stumpers court, simple as that. Leave
me alone and I'll do the same.

Noboby pressured me to resign as an OO. I resigned because I realized
that the program was a farce. I resigned because I could no longer
remain out of the fight on 3.901. I could not in all good coincience
be a OO and be in the fight at the same time. So I resigned.

And for your information, I NEVER sent out any OO cards for ANY of the
crap that happened on 75 or 20. Why? Because I was not an outsider
looking in, I was in the mess and thus could not be objective. You
can believe me or not, I don't care which.

The only reason I was attacked by Polly and his braindead crew was because I talked to Rich Whiten. An enemy of my enemy is a friend of mine. Bet you read that somewhere eh?

My view of life is simple....you can be my friend, or my enemy.. YOUR CHOICE..but if you chose enemy, your one for life.

Looks like a decent explanation. However I have one question. Shouldn't the signal generated fall off at something between 1/d (close to source) or 1/d^2 (further away)?

I have a right to swing my fist anywhere I want to. Of course, you may argue that my right to swing my fist ends where your nose begins.

The analogy holds for the freedom to speak. You do not have the right to malign, call names, spread untruths. Well, you can do all that, but you can be called to account for it.

Of course, anyone with a shred of maturity and wisdom does not dwell on rights. Instead, with maturity and wisdom comes the realization that we have RESPONSIBILITIES that are as important as rights. Such as the responsibility for civil language and behavior.

You are very much mistaken, transmissions made on the amateur service are not governed by the same
regulations as broadcast media, handbills or internet newsgroups. A quick review of Part 97 will show
you this.

ANOTHER OUTRAGE VIA CNN:

(JUST LIKE MAKING GUN OWNERS GO THROUGH RIGOROUS PROCESSES, WHILE THUGS ESCAPE THEM- BTW, I DON'T OWN A GUN, NOR DO I WANT TO)

Kewulay Kamara is already on the job as a specialist, explaining to minority groups why it is important that everyone in America be counted and why no one should fear giving information to the census takers.

Efforts made to reassure illegal immigrants

U.S. law prohibits the Census Bureau from releasing any information to other federal agencies, so illegal immigrants are being told they should step up and be counted and not to worry about being deported because of any information in the census questionnaires.

WHY THE HELL NOT WHEN US HAM DATA WILL BE USED OR TAX CHECKING AND DEAD BEAT DAD FINDING

WB3HGW, "WAIVERBOY" Who has been on hiatus from ham radio, is back on the air,doing the same things he did before he took his "VACATION". Informed amateurs know even if he does not know, that the qrming and tape playing that is so good at is not acceptable behavior on the amateur bands anymore. Mr Riley Hollingsworth will be sending Waiver a notice if he does not curb his activitys . This is a new day, and Mr Hollingsworth is cleaning up the Ham Bands. So wake up "Waiver", stop the qrming. It is a new deal now, a Realdeal!!!

***Tim is right on target and you can yell "MY RIGHTS" all you damn well please but the truth remains truth just the same. Sorry but you don't use a ham radio frequency as a pawn for a bunch of hatemongers who, for instance, publish that suitable- for -toilet paper rag, "SPOTLIGHT."When you get on the air you have a responsibility to act according the rules set forth by the FCC instead of trying to regulate them by bringing in the Bill of Rights which is INAPPLICABLE in this instance. Apparently the rules and regs governing commercial shortwave stations which preach hate, insurrection and intolerance all day and all night are not the same for amateur radio and if anyone thinks I'm wrong, try pushing the envelope and watch your ticket go up in flames. And so, you stinking pious hypocrtitical flamboyant artifacts of American life,listen up and when you're told to SHUT UP by the FCC, SHUT UP or pay the price. You've been getting away with your horsebleep bigotry for far too long and it's going to stop. NOW.

It never ceases to amaze me. It was KV4FZ, felonious Herbie Schoenbohm who dubbed Tom McMillan, "Waiver Boy" in order to hurt his feelings, to depress him and discourage and intimidate him off the air. And yet, KV4FZ brags about his old man having started Camp Courage in Minnesota and how important KV4FZ was in lending asistance to all of the handicapped up there who wanted to become ham radio ops. You talk about bullcrap? Herbie, what's happened to you, you deserve. You are the lowest type of human possible and right in step with your goddamn goosestepping relatives as well as Monika's, haunting Germany. WB3HGW has gone through living hell just remaining ALIVE, let alone on the air,and instead of helping the guy, you continue, along with your maniacal friends,trying to destroy him. I pray to almighty Jehovah, the Creator of the Universe, to destroy you and yours. I conscientiously try to avoid profanity, but in your case, you're just plain shit and so's your crooked wife and your jailbird sons. I'll never know what the people of St.Croix ever did to deserve the stinking rotten Schoenbohm crew as inhabitants of their lovely island. And furthermore I will do everything I can to assist Tom ,WB3HGW, because he's a REAL MAN, not a snake like you. Remember this you louse-in due time, he WILL get the last laugh on you. AF2Y,Doc

That's exactly right Joe, and one other thing IS that the amateur radio service was not set up to promote, strengthen or further the First Amendment. The FCC has the authority to decide what transmitions, and in the cases I'm refering to "broadcasts" are compliant with the intent of the service.

That's right! The amateur radio service was not put in place so that any group could exploit it as a media by which they can promote (broadcast) their philosphies week in and week out free of charge AND, as they (the "So Called" net) would like it, free of RESPONSIBILITIES.

Neither of which are personal numbers. You rent a telephone number from
the phone company: You own your phone, but from your house connection,
they own the rest of the equipment -- for a monthly fee, they allow you
the privilege of using to their system.

Your TIN is government-issued -- the FCC could always use other methods to
determine it.

> This sort of government cross checking is ridiculous.

Only to those who have something to hide. Your option is to surrender your
government-issued radio license.

> Now FCC will collaborate with the IRS to be sure you paid your taxes ?

Hope so. Track down those dead-beats and make 'em pay their fair share
of the privilege of living in this country. Lock 'em up if they refuse.

As usual, the assumption is that W4NTI supports KV4FZ losing his
license. NOT TRUE. I am not on his side because of the vicious
malcontents he has choosen to align himself with. Ask Herb if I have
not been of help to him in his fight. I am not in favor of this witch
hunt that has been shoved upon him. My statement is that he is a
dumbhead. And, in my opinion, that is still the case. Sometimes it is
best to drop back ten and punt. Herby prefers to go down as some sort
of a hero. I think that is dumb.

Interesting Lloyd, Friday night you put "Richwhiten" in your kill file, then Saturday morning you make a post about him.

Dan, cut out the bull shit, You W4NTI. and AF2Y are Porkbutts biggest suck boys, you would never disagree with him on any subject, he has you in his pocket.and the fact that he gipped Oris, then he has a right to complain
anywhere.

Now as for "WAIVER" boy and his infirmitys. That is no excuse to QRM and play tapes. He should understand this, and not listen to the things you are saying. "QRM Tom, You are sick and it is OK." That is bad advice and you know it. Just because he has health problems make no difference on the ham bands, he has to follow the rules like the rest of the hams. I am glad I am just a lowly SWLer, but I can tell for a fact,that your advise is wrong, wrong ,wrong.

Well I have nothing to do with EITHER od those two groups! I mean its
like since porkbut and I have had our little fallin out I'm all of a
sudden a BARF or stumper I'm neither! I'm not a part of them. So I'm not
ignorant to what is going on. I am independent of any group. I just made
a little comparison on which was whorse lieing and ripping friends of to
lieing and ripping strangers off thats all. I want no part of either. I
will let everyone no about how Rich Whiten a.k.a. porkbut took advantage
of a friendship.
Do I know what is going on? Maybe maybe not. I do know that there is
Jamming going on. I also know that the goodfellows are just as guilty of
jamming as the barf group as well as the stumpjumpers. This jamming
isn't only on 3901 its on 3950 3915 38945 and 20-meters too. I also know
where the Jamming comes from. It comes from one person disagreeing with
another. That is where the jamming comes from. People arn't strong

enough to handle another point of veiw. Thats where the Jamming comes from. In other cases of jamming the guy is drunk or on some kind of dope and their judgment is impaired. That guy has no business on ham radio in that condition. That is where the Jamming comes from. I know where it comes from. Just because I don't agree with another persons point of veiw dosn't give me the right to jam them.Dan you and I know who the Jammers are and were. Some of them have been caught and some of them have stoped their jamming operations for now. Some of them have to answer to the FCC and some of them got away clean. The band is quiter now. 10-5 with the OH NO ITS MR BILL VOICE is still on but his signal has been grately reduced. Fear maybe? There are a few more that are still around.
As you see I know what is going on.

Take a look at all the hostile posts on this news group. They all seem to
revolve around one thing.
PORK BUTT
!!
Take a listen to this wave file.
http://homestead.deja.com/user.n0vfp/Porkbuttvote.html
Is it KC1ZQ?
Is it N0VFP?
Is it KT4TR?
Is it KV4FZ?
Noooooooooooooooooo !!
It's ----------------------------------
PORK BUTT
!!!
If it wasn't for
PORK BUTT
!!!
this news group would wither away.

2565. Return of WA9KJI

You can not say for sure that Oris is a part of one group or the other. He was ripped off by WB2OTK, and is sending out a protest to watch and caution other amateurs who have dealings with "OINK"......At least he has the gonads to complain, You other pussys and wustzs get ripped off with those "RF FILTERS?" and other specials and just take it. I don't from my listening as a SWL, think he is a member of the Stumpjumpers or BARF, in fact I think he was a "GOODFELLOW", right? He spent many hours interfering on seventyfive for PORKBUTT.

Take a listen to AF2Y's hero in action. It's amazing.
http://homestead.deja.com/user.n0vfp/Porkbuttvote.html
Send it to you friends so they can be amazed.
Send it to Mr. Hollingsworth (rholling@fcc.gov) so he can be amazed too.
Hooray for KC1ZQ.
Hooray for KT4TR
Hooray for N0VFP
Hey PORK BUTT !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! Go to Radio Shack and
get you a DX-398 while they are on sale. Then you can join us in the SWL hobby
after you get your NAL.
Hey PORK BUTT !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! How many illegal CB
amps will you have to sell to pay off your NAL for Ten
Thouuuuuuuuuuusaaaaaaaaaaaannndddd Fiiiiiiiiiivvvve Hundred Dollars.
Go ahead PORK BUTT !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! Tell everybody this
post was by N0VFP. If that don't work, tell them it was Oris. Who really
cares what you say.

Sometime this year QST Magazine had an article on a new digial mode, that several HAMS were experimenting with. It runs via the Sound Card of a PC and software. It supposedly has the capability to capture signals under the poorest of band conditions.

I have misplaced the QST this article appeared in and would like to find a WEB Site to download the software from.

Can anyone advise the address of this site?

Thanks,.

Nope, there was a court case where a Federal Court gave this guy his amateur privileges back to him
arguing that the same criteria for broadcast "free speech" should be extended to Amateur Radio.

Well, Well, it looks like one of B.A.R.F.'s most loyal "SUCKBOYS" KC1ZQ, is being forced by the FCC to redo his amateur test.I guess he got his ticket by dubious means, and the FCC knows it... Now it will be time to show that the pig deserves to be on the amateur bands, my opinion is he doesn't, he cheated, he had a very friendly examiner who gave him a free ride, you can tell by the way this clown talked he was a second rate CB operator and was ignorant of radio theory, cheated on the exams, and destroyed the ham frequencies with his diliberate interference and nasty language. Retest Boys...HO HO Old B.A.R.F. got you boys in trouble.. KEEP UP THE GOOD WORK RILEY!!!!!!!!!!!!!

Gosh, that reads the same, either way.

Well I certainly hope it isn't true. If it IS
true, it would mean that the FCC is not
serious about removing jammers from the
ham bands.

The "guy from Arkansas" you refer to is
none other than the infamous K5ZU. He is
famous for his insane, humorous monologues on 3950. Most of the things he says
are ad-libbed on the fly, so I wouldn't believe anything he says. Apparently
K5ZU's brain has a few cold
solder joints.

Happy listening.

Well
There is not any proof anywhere that I did any Jamming. I don't Jam. I value my ticket to much and I have more respect for the service to ever Jam anyone. I was reporting goodfellows for jamming as well as BARF stump jumpers to the FCC since april of 97. That was before porkbut even ripped me off. I even confronted porkbut over the air about his jamming all he could do was lie. Maybe that was his modive for ripping me off. I did question his Jamming on 3.8945 sevral times. I did report AL Abernathy for Jamming on 3.901 as well as Richard Whiten Jamming on 3.894.5 I also reported James Obrien III and I reported Marion, Frankie Todd and a few others. I DON'T violate the rules. Where is the proof? I have heard myself being accussed of such activity. But yet to see the proof.
I was a Goodfellow, number 63. I was a member till Richard Whiten ripped me off and I complained. If I would of sat back and didn't say anything about it one could call me a suck boy. See I'm nobodys suck boy when I say I'm going to do something I doit. I'm afraid that alot of these fools get do not do what they say they are going to do. I'm afraid I just might be to honest for them. I hear these porkboy suckboys talk behind his back but they cry don't tell porkbut. I think the more of us that stand up against this 75-metter con-artist the sooner he will be off amateur radio. I would like to see him try and get grid squares on 11-meters.
73 Oris

Damn right I'm a snitch! I belive in the service. Those who jam have no respect for the service. They also have no right to be on the air much less the privalage.

Hey Chip,

Its called PSK31 (phase shift keying) and its 31 cycles wide !!.
You can find all you need, including the 1.06 program at:

http://www.aintel.bi.ehu.es/psk31.html

Have fun and see you there.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2KW, WB2RAJ/ WB2YQH & The 59(9) DXReport, W2SF, W3UR & The Daily DX, AD5A, N6RT, K8YSE, DJ5AV & DX News Letter, G4BUE & DX News Sheet, GW0ANA, I4UFH, IK0DWN, OA4QV, OZ6OM, OZ2ZB, SV8CS, VO1HE and ZD8V/KF4OOX for the following DX information.

3V, TUNISIA. Fabio, I4UFH, will be active from the 3V8BB club station July 8-11th, and will also be in the IARU Contest as a Single Op/Phone entry. Emphasis will be on the low band and 10 meters for the USA and Asian stations. Outside the contest the activity will be mainly on the WARC band and 2 meters (depending upon antenna availability). QSL to I4UFH via the bureau/direct. He will ONLY confirm these QSOs and the Jan 7th, 1999 operation.

3Y, BOUVET. The "DX News Sheet" reports that 3Y5NT was active on June 14th, at 0250z on 14003 kHz CW giving the QSL info via W3HNK. However, Joe, W3HNK, does not know anything about the station!

4M1, VENEZUELA. Look for 4M1X to be active in the upcoming IARU Contest (July 10-11th). Operators Kenny/K2KW, Bob/N6TV and Will/K6KM will be entering the contest as a Multi-Single class and will be active on 80-10 meters CW/SSB. Beginning July 6th, look for activity by the operator signing YV1/homecall. QSL 4M1X via W4SO (mail drop). QSL YV1/K2KW via WA4WTG. QSL YV1/N6TV and YV1/K6KM via homecall.

8S1, SWEDEN. "The 59(9) DXReport" states that special event station 8S1IG will be active from Gotland Island (EU-020) now through July 2nd during the "Island Games". QSL to SM1TDE via the bureau or direct to: Eric Wennstroem, Vasagatan 9-324, SE-17267 Sandbyberg, Sweden.

AMATEUR GROUPS ATTEMPTING TRANS-ATLANTIC 2M CONTACT. The following are excerpts from a press release by Paul, VO1HE (All OPDX InterNet Subscribers will receive the complete release as an additional). Beginning on June 26th

and continuing until July 4th, 1999, a group in Scotland led by Bill, GM0ICF, will be operating from Ardnamurchan Light House on Ardnamurchan Point, the most westerly point in the mainland British Isles, in an attempt to make the first transatlantic 2-way contact on 144 MHz. Operating from the North American side will be a group led by Paul, VO1HE, operating from Cabot Tower, the site where Marconi received the first transatlantic signal in 1901. The operating frequency on 2 meters will be 144.075 MHz plus/minus interference and at 15-18 wpm CW. Operating times will be between 1200-2000z daily for the entire period but most likely not the entire 8 hours per day. The callsign of the Scottish station will be 2S0ICF/P and the call of the Canadian station will be VO1AA. The groups are trying to win the Irish Radio Transmitters Society's "Brendan Trophies", which will be awarded to the first two stations to make a verified contact across the Atlantic Ocean using 144-146 MHz without aid of man-made reflectors, repeaters or moon bounce. For more information on the Brendan Trophies and the rules, check out the URL address: http://www.irts.ie/brendan.htm

A9, BAHRAIN (Update). "The Daily DX" reports that David, A92GE, is saying Regi, ON4CFI, who is active until July 7th as A9/ON4CFI, is not authorized to operate. The reason given is there is not a reciprocal licensing arrangement in Bahrain and A9/homecall callsigns are not permitted.

HC, ECUADOR. Reports indicate that Ted, HC5K, is now active on 6 meters using an IC-706 and two 6 element yagis. No QSNs have been reported. QSL direct.

IOTA NEWS.....
EU-052. Spiros, SV8CS, will be active until July 10th from Corfu Island in northwestern Greece, 2 miles from Albania. Activity will be on all bands using an IC-756 Linear amp, Collins 30l-1 (except 160m), TH3MK III and dipoles. Also, he will be active on RTTY and PSK31. Check out the Web Page: http://www.geocities.com/Athens/Forum/2310/index.htm

EU-124. The Barry Amateur Radio Society (BARS) will be going to the Welsh island called Flat Holm Island from Friday, August 27th to Wednesday, September 1st. They will be active on all bands 160m to 70 cms CW, SSB, RTTY, Amtor, and SSTV. QSL via bureau or CBA of GW0ANA (QSL Manager).

OA178, PERU (Attention Prefix Hunters!). Cesar, OA4QV, informs OPDX that during the entire month of July, he will be using the special prefix/ callsign OA178QV to commemorate 178 years of independence of his country. Activity will be on 80/40/20/15/12/17/10 meters. QSL via OA4QV.

OPERATOR(S) NEEDED. Mats/5X1Z/SM7PKK and Nils/SM6CAS report (in a press release) that they still need one more (possibly two) operator(s) for their DXpedition. Their primary target is T31 Kanton, a place that is still very high on the most wanted lists around the world. Their secondary target is ZK3 Tokelau, a small but often bypassed island that has yet never seen a big multi-operator DXpedition. The initial itinerary is as follows:

T31 September 23rd - October 3rd (1999)
ZK3 October 7th - October 12th (1999)
They intend to have three stations with 1KW. These will be manned by 6 operators. There will be beams for the all the higher bands including the WARC bands and verticals for the low bands. The rough budget for this DXpedition is about 30,000 USD not counting the personal tickets and hotels to the takeoff site for the DXpedition. The DXpedition is looking for additional funds from Clubs and Foundations. If interested, please contact Nils via E-mail at: nils.sm6cas@swipnet.se
All OPDX InterNet Subscribers will receive the complete press release by Nils as an additional bulletin.

OZ, DENMARK (Attention VHF DXers!). A team from the EDR Vestfyn Branch (OZ5VF) will participate in the annual VHF Field Day (from 1400z July 3rd to 1400z July 4th) using the callsign OZ5VF/P from JO45XG near Ebberup on the Island of Fyn (IOTA EU-029). Their suggested frequencies will be around (+/-QRM) 50.173 MHz, 144.173 MHz or 144.273 MHz and 432.173 MHz. The team will consist of OZ2EW, OZ4CQ, OZ6CQ, OZ6OM/OZ7M, OZ9CQ and possibly others (All are qualifed VHF DXers).

OZ, DENMARK. Knud, OZ2ZB, reports that the Danish Island of Fur (DIA NJ003) will be activated by Jacob, OZ7AEI/P, on July 5th. Activity will be on 10/15/20/40 meters. To see more information about "The Danish Island Award", and for expected DXpedition for the award, check out the Web page: http://www.qsl.net/oz2zb

P29, PAPUA NEW GUINEA. The "DX News Letter" reports that Tom, P29TL, has returned to Ukarumpa for another 4 years (after being in the USA for 2 years). Look for him to be active on 10/15/20 meters SSB. He hopes to be on all bands and active on packet and SSTV soon. QSL direct to:
Tom, SIL, Box 115, Ukarumpa EHP 444, PAPUA NEW GUINEA

QSL INFO AND NEWS.......
All FO0PAP and FO0MAC direct cards have been answered. John, K8YSE, states, "If you don't receive your cards in the next week or so, please send an E-mail to k8yse@en.com or resend direct to: EIDX Network, 4910 Royalton Road, North Royalton, OH 44133, USA." Bureau cards will be processed in the next month or two.

The logs for the June CY9SS St. Paul Island DXpedition are now available at the Web Site: http://dx.qsl.net/logs

"NEVER GIVE UP!", states Marco, IK0DWN. Marco reports to OPDX, "Yesterday (June 23rd) I found in my letterbox the return QSL for a contact that I made with SV9AKI in 1990. My SAE was still in pretty good conditions, considering that it's been hanging around for 9 years!"

SECRETARY SELECTED FOR IREF. A press release by Mike, AD5A, dated June 21, 1999, reports: "Bob Nadolny, WB2YQH, has been selected as Secretary for the Island Radio Expedition Foundation, Inc. Bob is the editor of The 599 Report and is an avid DXer and Island Chaser. IREF should benefit from Bob's experience. The Island Radio Expedition Foundation, Inc., was founded

to raise funds in support of amateur radio expeditions to rare and new islands qualifying for the IOTA award. The Foundation has begun accepting donations and more information can be found at the Web site:
http://www.sat.net/~iref

TF, ICELAND. Bob, W2SF, informs OPDX that he would like to announce his planned trip to Keflavik, Iceland, August 26th through September 6th. This will be a Single Op all band (80-10 meters plus the WARC bands) operation on CW/SSB/RTTY. He has the license W2SF/TF and the airline tickets. His equipment will be a TS-850s, lap top computer, R7 vertical and g5rv all band dipole. QSL to his home callsign.

WELL KNOWN DXER ARRESTED. Information from several sources being passed around indicate that a Japanese newspaper called "Asahi Shimbun" reported that Zorro Miyazawa, JH1AJT, and Hirohiko Daikoku, JG3QCW, were arrested on June 16th. The reason given was that in 1995 Zorro allegedly had let Hirohiko take the second class license test for him using false identification. At the 1999 New Orleans International DX Conventions, last month, Zorro was announced as "DXer of the Year" because of his activities as 7O1A, XW30/XW30A, A51/JH1AJT, XU1A, XW8KPL, E31A etc. During the 1998 Visalia International DX Convention Zorro announced that he had been invited back to the Kingdom of Bhutan for another DXpedition. This operation was originally scheduled for early 1999 and has yet to happen.

ZC4, U.K. SOV. BASE AREAS ON CYPRUS. If you missed last Saturday's activity by ZC4ATC (by Alf/5B4AFB, George/5B4AGC and Ian/5B4YX) you may have another chance this coming Wednesday, June 30th. Alf, 5B4AFB, will be there for his usual monthly club meeting. Begin looking for him starting around 1700z for about 3-4 hours.

ZD8, ASCENSION ISLAND. As reported in last week's bulletin, Paul Hutley, KF4OOX, is now active as ZD8V and is looking for a few states to finish his WAS. Paul planned to be active during last weekend's "Field Day" and is looking for the following states: Hawaii, Idaho, Oklahoma, South Dakota, Utah and Wyoming. However, Paul informed your editor this past week of some "Bad News". Paul has reported that his antenna is broke and "needs some TLC". He has lost the ability to tune the 15m band and the 12m band is not very far behind. Paul states that he will operate Field Day only 10/20 meters (both of which work just great). After "Field Day", he will take his antenna down. Paul hopes to have it back up in a week or two at the latest.

Hey realdumb,

How did it go on 3901 and 3894.5 when I told you your hero Al the
asshole was jamming? You said, it ain't AL, I know he don't jam.

As for Tom playing tapes, maybe he does. But I've never heard it,or
at least am not able to prove it. How about you? Or are you using the
latest "doppler HF DF" system, per Jimmy O brainless?

Oris,

You know what's going on in RECENT HISTORY. You have NO CONCEPT why
it all started. That's my point Oris, nothing more. As for the
comments on the jamming, yes I agree.

>>
***You're damn right he's amazing. I knew this guy in Poughkeepsie in the '50s and he was liked and adored by everyone. In fact, we called him "King Richard" and he was voted best looking and most likely to succeed in his high school graduation book. AND HE WAS AND DID. I remember his rock 'n'roll days and how the girls used to swarm him after a concert. That guy could really beat the skins DURING the show and caress them afterward. He had this girlfriend named Camille who measured 40-26-36 and Rich was the envy of every dude in that school. But nothing came of it because she was spotted by a talent agent and went into stripping in Baltimore. She was named Blaze Starr's Star and that's where his dog got her name. I mean this Camille could erect a corpse and that's why you're jealous of the great Richard because most of you are impotent slobs. Rich went on to see active duty in the Navy and was instrumental in liberating the Dominican Republic from the despotic ruler, Irving Trujillo. I saw newspaper clippings about Rich and how he singlehandedly liberated a prison which housed political dissidents and also one of Herbie's sons who, at that time, was just getting started in the rackets. You'd think that Schoenbohm would be grateful to Rich but the cur never liked that son anyway and curses Rich 'til this day for allowing him to go back to St.Croix. While we guys had to be contented driving around on cheap wheels, Rich had a Cadillac but without a plastic Jesus on the dashboard because at that time, people took Christianity seriously rather than laughingly. Although Rich is Jewish, he'd never mind sticking one of those figurines in his car since the man is the most liberal minded, decent and unbiased fellow I ever met. I simply can't understand why some of you dopes actually believe the man's going to receive an NAL and/or taken off ham radio. He has done more to clean up this hobby/service than anyone else by pointing out the worst elements polluting it. I only wish I could have received a standing ovulation at the Intercon dinner and I'm not eggsagerating. WB2OTK has done more to keep Intercon going in the face of the depravity, decadence and meanness by Schoenbohm and his gang of wretched renegades than any ham who ever held a mic. And HE deserves an NAL? HE deserves to be taken off the air? On the contrary; Richard Whiten should be voted not the ham of the year but of the CENTURY. I say God bless that man of wisdom, dignity, fortitude, courage and discipline. His brilliance illuminates the darkest recesses of our hobby and we should all salute him if not actually bow down. AF2Y, Doc

Well, Well, it looks like one of B.A.R.F.'s most
loyal "SUCKBOYS" KC1ZQ, is being forced by the FCC
to redo his amateur test.I guess he got his
ticket by dubious means, and the FCC knows it...
Now it will be time to show that the pig deserves
to be on the amateur bands, my opinion is he
doesn't, he cheated, he had a very friendly
examiner who gave him a free ride, you can tell by
the way this clown talked he was a second rate CB
operator and was ignorant of radio theory, cheated
on the exams, and destroyed the ham frequencies
with his diliberate interference and nasty
language. Retest Boys...HO HO Old B.A.R.F. got you
boys in trouble.. KEEP UP THE GOOD WORK
RILEY!!!!!!!!!!!!!

Gosh, that reads the same, either way.

***Dear Quiet Giant,
May the Lord bless you and yours. You have that Vermoink pig,
KC1ZQ, pegged to a T. Did you ever hear of a photo having B.O? The one of him
did. I mean it. He sent me this snapshot a few years ago. It depicted a dirty
looking Vermoinker redneck with filthy overalls and a filthy looking face and
hair standing by his truck with the beam in the background. I mean garbage
collectors in New Jersey are snazzy dressers compared to Tolassi. My drawer
stunk from that photo and finally I had to destroy it. Phew.....
KC1ZQ will FAIL the re-test because you're right. Somebody did "David Dirt" a
favor and now the chickens are coming home to roost. Doc,AF2Y********

I dont know if Radiosigs is correct or not. I know Herbie has his case on appeal and is legally operating at the moment. Radiosigs has been squeaking on that two dollar treadmill for years screaming "Herbie's almost gone". Well Radiosigs, is he going or not? And for Gods sake, oil that damn treadmill. If you cant afford some oil, Ill be glad to send you $3. Porkbutt could tell you where to apply the oil.

Hello,
I have revently got interested in the world of packet radio.
My interest revolves around receiving email in my mobile station from
a person on an internet machine (and vise versa). There is a tcp/ip
gateway in my local area but I dont want to start sending random
packets to upset anyone.
From what I have researched so far, I understand that "jnos" or
"tnos" is probably going to get me there, but what about that
autoexec.nos file... I have a lot of quistions there. For example,
is the hostname; SOMETHING.ampr.org, there's or mine? Also, when
the program is started, do I have to log into the unit, or do I just
issue a comaand like telnet ..... ? And, do I need a static
I.P. or will the remote host issue me one?
I might even have the wrong impression here. Is the Ham tcp/ip
network connected to the internet network? can stuff like this be
done?
The remote host I am trying to get to is listed on this page;

http://repeater.org/packet.html

I would appreciate it if I didnt get replies with people trying
to advertise something for sale.

Now Tim
You can point your finger at me and say what ever you like but I know
for a fact you are a Jammer on 75-meters 3.950. So its is just a matter
of time before you get yours. If any of us get retested its just a
simple peice of disaplin to study and pass the exam again. Now I will
say this I took my exam in front of the FCC when I got my genral ticket.
So I wonder how you would do in retaking your exam. Like I have said in
pervious posts I don't jam.

I am starting a CB Radio Callsign database to try to make up for the one that the FCC deleted years ago. Nothing else will be done with the information except to archive it and (of course) the site will be promoted on the web. If you email me with your old CB callsign, name and current address, I will make a page on my website similar to the QRZ website for ham radio operators. Hopefully, this will be a cool way to find and communicate with those old time CBers that we all have lost touch with.

I will ask you again
QUOTE THE RULE THAT SAYS WE CAN"T HAVE CONVERSATIONS ON THE HAM RADIO
BIG GUY! al asked you to do is quote the rule! You have yet quoted me
the rule. It surly isn't 97.113. Where is it in the rules that say I
can't talk about the state of affares. WHAT RULE? I agree with we casn't
go on the radio a cus and sceam foul words. I agree and there are laws
that are suposed to protect us from that. I also stated the supreme
court ruling that supports that. 97.113
ï¿½97.113 Prohibited transmissions.
(a) No amateur station shall transmit:
(1) Communications specifically prohibited elsewhere in this Part;
(2) Communications for hire or for material compensation, direct or
indirect, paid or promised, except as otherwise provided in these rules;
(3) Communications in which the station licensee or control operator
has a pecuniary interest, including communications on behalf of an
employer. Amateur operators may, however, notify other amateur operators
of the availability for sale or trade of apparatus normally used in an
amateur station, provided that such activity is not conducted on a
regular basis;
(4) Music using a phone emission except as specifically provided
elsewhere in this Section; communications intended to facilitate a
criminal act; messages in codes or ciphers intended to obscure the
meaning thereof, except as otherwise provided herein; obscene or
indecent words or language; or false or deceptive messages, signals or
identification;
(5) Communications, on a regular basis, which could reasonably be
furnished alternatively through other radio services.
(b) An amateur station shall not engage in any form of broadcasting,
nor may an amateur station transmit one-way communications except as
specifically provided in these rules; nor shall an amateur station
engage in any activity related to program production or news gathering
for broadcasting purposes, except that communications directly related
to the immediate safety of human life or the protection of property may
be provided by amateur stations to broadcasters for dissemination to the
public where no other means of communication is reasonably available
before or at the time of the event.
(c) A control operator may accept compensation as an incident of a

teaching position during periods of time when an amateur station is used by that teacher as a part of classroom instruction at an educational institution.
(d) The control operator of a club station may accept compensation for the periods of time when the station is transmitting telegraphy practice or information bulletins, provided that the station transmits such telegraphy practice and bulletins for at least 40 hours per week; schedules operations on at least six amateur service MF and HF bands using reasonable measures to maximize coverage; where the schedule of normal operating times and frequencies is published at least 30 days in advance of the actual transmissions; and where the control operator does not accept any direct or indirect compensation for any other service as a control operator.
(e) No station shall retransmit programs or signals emanating from any type of radio station other than an amateur station, except propagation and weather forecast information intended for use by the general public and originated from United States Government stations and communications, including incidental music, originating on United States Government frequencies between a space shuttle and its associated Earth stations. Prior approval for shuttle retransmissions must be obtained from the National Aeronautics and Space Administration. Such retransmissions must be for the exclusive use of amateur operators. Propagation, weather forecasts, and shuttle retransmissions may not be conducted on a regular basis, but only occasionally, as an incident of normal amateur radio communications.
(f) No amateur station, except an auxiliary, repeater or space station, may automatically retransmit the radio signals of other amateur stations.

So where does it say that another person and I can not talk about the state of affairs.
Please tell me

Yes, I've heard Tim Volz's threats too, they are on:

http://members.xoom.com/frg9600/500.wav

It's amazing, after hearing Volz's threats in this
.wav file, and then seeing his rants here in the
newsgroups, where he poses as a some kind of
moral authority.

Volz (KK7HO) belongs in jail, or better yet,
a good mental institution.

It's important to consider who this guy is, and why he does what he does. He has threatened other operators in the past, and shows signs of becoming more and more violent, and unstable. I hope that Mr Hollingsworth takes action before Volz is able to carry out one of his threats, and someone gets killed over his silliness.

73's Sal,.

Well said DOC !!!. Tom McMillan has more gonad's in his left finger

than all these stumper and barfly's put together. Anyone that can support these people deserve whatever Jehovah can put on them. They all make me sick. All they can do is attack and harass innocent people. They really enjoy attacking the old and the infirm. To hell with them all. I wish I could sell tickets at the gate when they have to explain to the lord GOD why they did what they did. Remember that a-hole K4GFM? Wanted to make lampshades out of the JEWS, had a nice long chat with Drunken Nazi Walter Miller about "microwave crematoria". To hell with them all and their offspring. Put them in the ovens. That's right Doc, Hitler didn't go far enough. He forget these jerks. And to you ORIS, I attribute IGNORANCE on your part. You have NO IDEA IN HELL what is going on.

Oris if you think you can say whatever you want and have "a First Amendment right to the amateur bands" then start cussing up a storm and see. Speech Is regulated because the amateur service is not a right.
Freedom of speech is but you cannot use the Second Amendment to say you have a right to "broadcast" this or that.
You see you think that you have a 1st amaendment right to the ham bands and you don't. I'll look up the provisions that would apply, of course you could just ask Riley he's quoted them already. But I'll find it for you. Maybe someone else has it and will put it up. Tim

Source record: 138516

KK7HO who ever you are,
Oh your right you can't get on the radio and cuss up a storm. In fact the surpeam court tried a case in 1978 that has to do with foul offensive language in public. In fact it was the state of Minnasota against George Carlin. It was his world famous 7 dirty words you can't say on TV bit that got him into trouble. The court ruled that communities have the right to regulate foul language in public. Your right one can't get on ham radio and say obsean words. That would be like standing on the street corner and yelling foul language. All though people might think your nuts you can get on the street corner and preach the gospel. As long as your not disturbing the peace.
However the FCC nor any other fedral state or local agency has the right to regulate what is talked about on ham radio the coffee shop or bar. The code of Amateur radio is not law. Its just a real good set of pinciples to operate your radio by. The government (for lack of better terms) can not tell me weather or not I can talk about the state of affairs in this nation, WEATHER OR NOT I LIKE SLIK WILLY. IT WOULD BE REAL DAGEROUS FOR THEM TO EVEN TRY. That one I think would end up before the supream court.
What I see here is if some one doesn't agree with your set of opinions then all of a sudden they are breaking the rules. I hate to say this but your wrong. In fact the government has losend up section 97.113 to allow you and me to call our doctors if we are stuck in traffic and going to be late. (that was a reasult of a court case Bellsouth mobilty against FCC the FCC won. In fact if the FCC would of lost Bellsouth would of had to pay EVERY ham operator in the USA a roylaty check because phone patchs were the start of CELL phones) If our wife is a ham she can get on the radio and tell us to get a loaf of bread on the way home. This all used to be considered illeagal communications on the ham bands. Its called personnel business which is now permitted. Your also wrong about broadcasting. We have broadcasted code practic in this area on ten meters and gotton many operators here is the Athens GA area off of VHF and down on the ham bands as a direct result of such broadcasts. K1MAN boadcasts nightly and sometimes right over on going QSOs. The ARRL does the same thing not just in CW but RTTY and AMTOR and PACTOR as well. I think what goes on 3.950 can not deamed as broadcasting. Its more like a bunch of guys in a coffe shop talking about their veiws on things. I also think the ones that are guilty of breaking the law are the one continuosly jamming.
Everyone runs to Hollingsworth and quotes him over and over again. We are supposed to know the rules (part 97). I have yet to see where the in the rules can govern what is talked about on ham radio in the United States of America. The Amateur Code does but the rules don't. There is a part in the rules that talk about acceptable communications

but that is well to vage. What one person fines acceptable may be what another person fines unacceptable. So where do we draw the line? That is why we have the Amateur Radio Code. I would still like to see the rule that saysa we can't talk about what ever we want to on the radio! You look it up for me and I'll study it further.
Oris

Does any one know that can tell me why the call kv4fz doesn't show up
on the fcc data base ,buckmaster or qrz is this a real call ?

****KV4FZ's license ran out in March of '94 or '95. The FCC refused to renew so
he appealed and appealed and appealed ad nauseum. His FINAL appeal to Appellate
Court on Wash.D.C. went in, in Nov.98. His lawyer, Lauren Colby's oral
arguments will be heard on Oct.18th. They'll prove to be useless. He's history
and he should be. KV4FZ is ham trash,an instigator, a jammer of the Intercon
Net among others, a bigot, a convicted felon and someone who lied before FCC
Admin. Law Judge Edward Luton. He has been allowed to transmit for as long as
his appeals hold out. It won't be long before the fat lady sings. AF2Y,
Doc******

Like who the hell cares what you want, pygmy brain?And the same goes for your phony sampling. The man doesn't have to be re-tested because of his brilliance in all phases of amateur radio; brilliance and astuteness every time he opens his mouth. Unlike you,Rich doesn't have to brag about his TinyTenna and shortwave radio. He's a REAL ham with a REAL TICKET. Every time he's on the air, he imparts wisdom to all in just about all facets of our lives i.e. politics, radio, sports,psychology,physiology,veterinary medicine, health, arts and entertainment-you name it. I sit there mesmerized by the man and I take notes too. Last night my wife and I and a few couples went out for dinner and during it, all of us talked about various subjects.We were discussing politics and usually at a loss for words, I summoned from memory what Rich was talking about pertaining to the conflict in Kosovo and our friends were amazed. Upon asking from where I had derived such insight into the situation, I told them about WB2OTK and all agreed that his intellect is superior to that of most men. N0VFP, it's obvious that you are extremely jealous of Mr. Whiten and in rage over your inadequacy, you lash out to try to injure this exemplary man and scholar. You ought to feel ashamed and render an apology to my hero and the number one man in ham radio, WB2OTK, Rich Whiten of S.C. AF2Y,Doc

Get a grip Oris, re-read my post....what the hell does Rich Whiten
have to do with what I said? Pay attention. If you have a problem
with Rich, then deal with Rich.

Here, this may help you out....I'm talking about the history of the
BARF and the stumpers. I have no interest in starting a useless verbal
flame here with you, I would like to keep you as a friend. Quite being
so defensive and hung up on Rich. Hell, Oris I have a few problems
with Rich also. But I handle them with him, not here on a open forum.
Nobody agrees with everything another person says or does, if they do I
have no use for them. Be your own man Oris.

Dan/W4NTI

If your refering to the comments of wa9kji's return made by K5ZU, better known as "monkey-vomit", take em with a grain of sea salt. I heard the same and if you listened for a bit longer that evening you would have gathered that he was three-sheets-to-the-wind on auto radiator condensed moonshine.

Don't take my word for it, listen to RealAudio of k5ZU for yourself at http://pw1.netcom.com/~frg9600/jammers.html

Hi Terry,

What about on outgoing calls? With so many subscribers on one pair, how did the exchange know
(for billing purposes) who had originated the call ? Or would this be on a manual exchange?
I can see that using a combination of simple eth and / or loop calling could account for, perhaps, 6 or 8 subs on a line, but 14!?

Best Wishes,
Andy

>test for Miyazawa using false identification. At the time, JH1AJT was a Fourth
>Class ticket holder.

It's just the *Tip* of the iceberg.

If the word ever got out as to how much "cash-for-an-advanced-or-extra" was really
going on, it would set the hobby on it's EAR! Esp in the state of Florida where
the alleged going rate for a passing grade on the Extra exam is just a paltry $250.00

I know hams in Fla who don't know a single bit of CW and minimal theory who have an
extra and a big yacht - coincidence? HARDLY!

Does anyone have any knowledge of the WinRadio unit. It is supposed to plug into your computer and provide continuous recieving coverage from 500 Khz to 1.3 Ghz.
Does it perform well?
Does it pick up alot of interference from the computer?
Is it a pretty sensitive receiver? (Specs say .5uv sensitivity)

There is no doubt that your reply shows promise, but you do not have the ability to create. Now, write your own reports and do not copy mine. I do not have to compose a message to suit you. Nor do I have the need for your approval. As for David, he will have no problem on the retest therefore I did not bother mentioning him, but I think the OTK Suckboys KE4TEW
and NX9J will have a bit of a problem. Have you heard them lately? They should hit the books, and get out the old CW key. Now, write something original if you can. Oh yes, I will not respond to you again. Too busy creating . Yes , you can post, but don't copy others, bad form.

It is not ungentlemanly to speak out against what one believes to be wrong, extreme, and against the well being of the country.

As for accusing you of plotting murder: I did not name you specifically. I used the collective terms they and their. If you are part of "They" then I suppose it is a accusation by association; A tactic you yourself have used against me numerous times on 3950. If however you are not part of "They" then the accusation does not apply to you. Only your conscience can decide into which category you fall.

What do I think you believe ? I think you believe in a white only America. Or, at least a America under the firm control of whites only.

I think you believe that you and others can somehow stop assimilation in this country; even though assimilation is a natural part of human evolution and has never been successfully stopped.

I think you believe we should be a "White European" America with "THE BEST OF THE THIRD RIECH " as part of our laws and culture.

I believe you and your mentor William Pierce are dangerous and bear close watching. Then again, Mr. Pierce may not be all that dangerous. He is after all quite busy noting the locations of armories.

With
the best of wishes,

CHIEF fieldmouse

Indeed. That was its real purpose. The West knew it could outspend the East, and that the East would bankrupt itself in an attempt to compete. This showed a nice grasp of human nature which overshadowed any technical merits or demerits of SDI.

There were some nice spinoffs of SDI in the areas of adaptive optics, supercomputing, and high power lasers, but it was never realistically assumed to be a real defense against nuclear weapons. The concepts of castles and moats are dead when faced with the power of the atom.

The FCC will be using the TIN to determine whether the
applicant is entitled to receive the benefit (license) under
the terms of the Federal Debt Collection Act, not the other way
around.

This is nothing new. We were consulting a "check list" of
(mostly) bad-check passers for that very purpose when I came to
the agency in the mid-50s. The ULS/TIN process just speeds up
the action, so to speak.

I think most (but obviously not all) here agree with using the information for legitimate purposes such as collecting federal debts. But some states actually sell vehicle registration information to marketing companies to make extra money. Could the federal bureaucrats ignore this new lucrative stream of revenue? That's what is worrisome...

BTW I read where some commercial banks were selling depositors information, including account balances to marketers. Now that *is* scary...

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX
Monday June 28th 1999.

Hi Andy thanks for your questions.

First let me clarify. The 14 telephones, and other combinations of parties, were on a rural magneto lines out of manual magneto switchboards located in small communities. Customers paid a flat monthly fee, I think it was about $1.60 per month back then with no limit on number of 'LOCAL' (within that community) calls.

All calls outside the community would be 'TOLL' calls and would be manually ticketed and timed by the local operator in the community. Outgoing circuits, back then, were usually 'Ring-down' and very few in

number. Typically a customer would ask if 'the' circuit was available out of the community to the main centre (called a 'Toll Centre'). If not, local operator would take details and call back when circuit became free. Customer only paid for actual time connected to the distant called party. Calls could be made on a 'person-person' or to a telephone number. These were toll calls. Grade of service wasn't great but with the personal service of the very dedicated operators (and their families) was very acceptable in it's day. The operators knew everbody's voice and more about community 'goings on' than anyone else.

BTW with magneto there was no DC current in the line; each telephone contained dry batteries to energise the carbon microphone. All signalling was by means of the hand crank generator. You were supposed to listen first then crank the handle one 'longish' ring to get the operator at "Central" as it was sometimes called. The operator would use the various combinations of short and long rings to ring each customer.

Only subscribers such as the doctor or the local cleric etc. had 'Private' lines. You were supposed to 'Ring Off' at the end of each call, but most people did not. Sitting in such a magneto 'exchange' one would hear the operator ask, frequently, "Are you through, are you through", meaning "Have you finished your call?". As mentioned this was magneto service.

Later, for a while, we did have some 'Common Battery' manual systems which did operate on a DC loop basis (sort of like dial service without the dialling) which brought up a light in front of the local operator in the community to tell that customer wished to make a call. When the operator needed to ring a customer it was very similar to the magneto system and Toll calls were locally ticketed and timed.

In one case the local operator was so good and service so personal that we received a petition from that community "NOT TO INSTALL DIAL SERVICE!" in place of their manual service. In many locations it was in fact a personal message and assistance-informatiomn service as well.

For example, I was in one exchange when (we'll call him George) phoned for Joe .... Joe wasn't at his house, the operator didn't even try ringing it, Joe was a bachelor, see. The operator told George she had just seen Joe go down the main street in his pickup on his way up to Aunt Mary's. She would call Aunt Mary in a minute or two and get Joe to call him back; OK? Fine, thanks!

During a community emergency or disaster many operators would often sleep next to the switchboard!

Similarly in our dial exchanges, as is common throughout North America generally I believe, the local service is on a monthly flat fee basis. I am a residential customer, all residential customers in this community (exchange) pay the same basic monthly rate. For that rate I can call within the community, two adjacent communities and since the rate contains an EAS (Extended Area Service) component we can call into the

main centre about 6-8 miles away. In fact I can call a pretty high percentage (probably about 80%) of the 100 000 people in this area without additional costs. So there is no 'local metered service' or whatever it is called. I think I recall in the UK about 45 years ago, one fee to call down the road and up to six fees to call across London. Each exchange, then, had a whole bunch of 'veeders' being read manually and written down in a book for billing of local calls?

For 'Long Distance' (Toll calling) we get a detailed bill giving the time, the rate, destination of call, length of connection etc. Telco here still charges to the full or part minute. There are now many competitors offering LD at various rates and packages. Some of them make a big issue of charging to the second or part of a minute. We can direct dial (no operator involvement) or get operator assisted calls uch as 'person-person'; but these get more expensive as time goes on and it is often cheaper to dial direct and leave a short message either with the person who answers or a voice recording.

Anyway, Andy, sorry for the length of this; but I did spend about 40 (mostly, but not all, fun) years working in the telecommunications industry! Boy what changes we have seen, havn't we.

Again thanks for the question/s.

Terry Sanford, Torbay, Newfoundland, Canada.

Want to keep that "Tosh" purring like a kitten? Here's some hints if you're on AOL. Double click on the HARD DRIVE icon. That will open the hard drive window and look for SYSTEMS folder. Double click on that and the systems folder window will appear. Look for the PREFERENCES folder. Double click on that and the preferences window will come up. Look for the AOL folder and double click on that. The America Online Window will come up. In that window, you TRASH every item but DATA! You dump for example browser cache,download cache,temporary files and anything else, but DON'T TRASH THE DATA FOLDER. After trashing them, go up to SPECIAL and click on EMPTY TRASH. You have given your MAC a purging which may definitely help to stop you from either being punted or run into an error 11 complete "meltdown" causing any word processing to be erased if it had not been saved on a floppy(diskette). Also once monthly it's advisable to build a new desktop. This is done at startup by depressing both APPLE and OPTION keys until you see the dialog box asking if you want to build a new desktop. Click OK. If you still have problems, then you have EXTENSION conflicts and to solve that takes time. You go to APPLE and go down to CONTROL PANELS. Slide across to EXTENSIONS MANAGER and open up that complete panel. By process of elimination you'll have to shut down or open up one at a time to see which is vying for the same chip as another. IT REQUIRES PATIENCE! Keep in mind that most often, computers do not have to be brought in for repairs. You can do it yourself because what computers suffer from is (1)corruption (2) extension conflicts(extensions are applications) (3) a cluttered desktop. I've been on a computer for just three months and if this doesn't convince you of the fact that I'm a flaming genius, nothing will.Thank you. Doc,AF2Y

Yes but if you look at the cause behind the jamming and spamming, it boils down
to one thing.
PORK BUTT !!!!!!!!!!!!!!!!!!!!!!!!
http://homestead.deja.com/user.n0vfp/Porkbuttvote.html
Go there and hear the following.
PORK BUTT says what he thinks of people of other races.
PORK BUTT tells what the FCC can do with the enforcement line.
PORK BUTT tells all.

Can someone help here please!!!

This guy "Blake Bowers" thinks that because I gradually upgraded thru
all levels from Novice to Extra and stated the years I did each upgrade,
that I am claiming I hold each license upgrade parallel/at the same time!!

He is a newer technician class ham, so he has never up-graded from
the entry level license & obviously does not have the benefit of that
experience to help his understanding of it. Can any of you help me explain
it to him so that he'll understand it?

thanks!

What other radio services? The other radio services are...

1. CB-too much trash talk and rudeness in my opinion.
2. FRS is too low-powered, but it serves its purpose.
3. GMRS, still requiring a license, is suffering because of cell phones.

That leaves us with (guess who?): Amateur Radio. :)

Tim
You appear to me as being a closed mined idoit. Lets see I don't agree
with you so I'm a anus. HMMMM I don't agree with you and now I'm not
smart enough to pass a test. You have yet to quote me the rule! I think
what we have here is a guy like Dr Hate and porkbut if a person doesn't
agree with you on every topic you get online as well as on the air and
call them all kiund of names. I have a degree in communications I have a
degree in electronics and I also have diplomas in office equipment.
Spelling isn't as important as you think it is. Having a open is though.
eletronics is a art you need a open mind to enjoy art of any kind. I
think that you have a very closed mind to the point of stupidity.
I can't wait to see the FCC shut you down. From what I understand you
are one of the ones that aren't smart enough to have a opinion your just
smart enough to cause willful interferance. So timmy boy its just a
matter of time.

Now Tim
You can point your finger at me and say what ever you like but I know
for a fact you are a Jammer on 75-meters 3.950. So its is just a matter
of time before you get yours. If any of us get retested its just a
simple peice of disaplin to study and pass the exam again. Now I will
say this I took my exam in front of the FCC when I got my genral ticket.
So I wonder how you would do in retaking your exam. Like I have said in
pervious posts I don't jam.

Looks like there's a BIG problem with Nip DX. Their honcho, the HAM HIROHITO, is a crook. Yep,the mighty DXer over there is a FRAUD. Personally speaking I laugh at the Honor Roll of DXers in QST. It's tough grabbing a zillion countries if you're running megapower and a directional in the clouds? What a joke! The real DXer is the guy running about 100 watts output to a vertical or dipole and has 100 or more countries confirmed. Or the guy running pipsqueak power on cw. The rest are mere mortals-the aformentioned are GODS of HAMDOM. Here's what's on the ARRL Web Extra Page for Members and although I bring it to you for free, nonetheless I myself pay through the yearly dues to that organization for which all of you cheap scabs should be extremely grateful. "Doc", AF2Y

Text-only page

"DXer of the Year" Arrested in Japan Exam Case

NEWINGTON, CT, Jun 25, 1999--According to press reports, noted DXer Yasuo "Zorro" Miyazawa, JH1AJT, has been arrested in connection with an Amateur Radio exam scandal in Japan. Bernie McClenny's June 18 edition of The Daily DX says that the Asahi Shimbun newspaper reported Miyazawa's arrest on June 16.
The Daily DX reports that in October 1995 Hirohiko Daikoku, JG3QCW, holder of a First Class license in Japan, allegedly took the Second Class amateur license test for Miyazawa using false identification. At the time, JH1AJT was a Fourth Class ticket holder.
The Japanese PTT began an investigation last March after a tip from someone close to Miyazawa. Daikoku and Miyazawa reportedly were arrested June 16.
According to the JARL Web site, Fourth Class Amateur Radio Operators may operate all modes except CW and run up to 10 W on frequencies from 21 to 30 MHz and 8 MHz and lower.
Last month the 1999 New Orleans International DX Convention named Miyazawa as DXer of the Year (see http://www.gnofn.org/~w5ru/DX_Cnex.htm). The convention is set for August 27-28. A presentation is scheduled for the convention's gala banquet Saturday evening.
Over the years, Miyazawa has been to many DX spots throughout Asia, Africa and the Pacific Ocean including 7O1A, XW30/XW30A, A51/JH1AJT, XU1A, XW8KPL, E31A, among others. During the 1998 Visalia International DX Convention he announced that he had been invited back to the Kingdom of Bhutan for another DXpedition. This operation was originally scheduled for early 1999 and has yet to happen.--thanks to The Daily DX and Bernie McClenny, W3UR

Thats right!
So Timmy boy there has not one leg to stand on. Now all he can do is
hook up with Charlie and call me names. Whats that i might ask? The guy
comes on 3.950 and jams nightly then lies about it and then trys to
through the rules and regs around without being able to quote one rule
to back up what he says. So just like a person with a closed mind he has
to call people names. pretty childish I might add. Maybe he is the one
that should be retested? I mean he surly is pointing the fingure at me
awful hard. Do you know what happens when you point your fingure at
someone , you have three pointing right back.

You are a good one to talk about domestic relations Dan. We remember the butcher knife escapades in your household, your wife at the time running you around the house with a large meat cleaver. And the police record in Alabama about domestic disturbances involving you and your wife. Don't be so quck to run your smart mouth about parents and children and other domestic situations, You have plenty to keep quiet about.

How very generous of you. I'm sort of new at getting messages up here and I wondered who was in charge and with whom I was supposed to check in. Is it okay if I continue now?

> but please do not plagiarize my words.

Well, you see, you fell into my trap. It just struck me as ironic that you would hurl your invective regarding retesting about two lesser characters at the bottom of the retest list and ignore the guy at the top. The fair reporter would have included all. That anomaly begged to be highlighted.

> If you have to use other peoples words to post a letter, go back to school.

You will find that I am more than capable of using my own words, and when I do, they won't include such errors as failing to make the distinction between possessive and plural. "Peoples" in your sentence should have an apostrophe to make it the possessive word you intended.

You see, if you have a point to make that you feel is important, you are taught the tools in school to best present that point. People won't take your opinions seriously if they suffer in basic form.

> I guess it is flattering for some one to use my brilliant mind if they have none of their own.

If you can't distinguish sarcasm from flattery, you are not equipped for this discussion. And that should be "someone."

> Realdeal, sometime copied but not duplicated.

That should be "sometimes," but since copied and duplicated are synonyms, the premise fails anyway. Oh, and people don't take opinions that are anonymous seriously, either.

Hey Moron,

If your gonna tell a story, at least get it right. It was not a meat cleaver, it was a kitchen knife. She wasnt chasing me, she was after the kids. And who made ALL of the reports? ME !!. Any other questions? Oh and one more thing....in the divorce I got the house, the kids and she got zip. That tell you anything asshole?

Goodbye, Gene.

You were fun. You were funny. You were honest. You were honorable, even to those who abused you and lied about you.

You were a gentleman, but you had the discernment to see when honesty trumped politeness. This gave you a reputation as a teller of the truth, even when the truth hurt.

You were a patriot, even when, in recent years, it became very unpopular to be a patriot. You didn't hide your patriotism, either. You spoke out against what was wrong in our nation -- and you weren't afraid to say who was responsible.

You weren't wealthy, but you supported patriotic individuals and organizations like the National Alliance with your hard-earned money.

You were a true friend. You helped your friends when they were in trouble, and never sought credit for it publicly. Probably more than anyone, I knew that.

The King of Hearts is dead. The "pack of cards" will carry on, but the game will never be the same again.

I raise my glass in your honor. I propose a toast -- "Confusion to our enemies..."

It's been a distinct pleasure, Gene.

KE2LO, this is WB4AIO clear with your station.

Good luck in the contest.

Indeed. That was its real purpose. The West knew it could outspend the East,
and that the East would bankrupt itself in an attempt to compete. This showed
a nice grasp of human nature which overshadowed any technical merits or
demerits of SDI.

There were some nice spinoffs of SDI in the areas of adaptive optics,
supercomputing, and high power lasers, but it was never realistically
assumed to be a real defense against nuclear weapons. The concepts
of castles and moats are dead when faced with the power of the atom.

From: James Lee Tabor <ku5s@wtrt.net>
Message-ID: <3777B385.5D815021@wtrt.net>
Source record: 138465

Greetings,

The NCDXF beacon system is an awesome resource. It's also lots of fun.
http://www.ncdxf.org/beacon.htm

We provide a download able software app called Active Beacon Wizard ++,
or ABW++ to help listeners make easier use of the beacon network.

ABW++ displays the currently active NCDXF beacon over a topographic map,
along with the solar terminator. Tools for setting the system clock, via
the net, are also provided.

ABW++ will download and display selected, totaling 14, Space Environment
Center (SEC) solar reports and forecasts. In addition, ABW++ provides
the comprehensive SEC glossary of solar terrestrial terms. This
glossary, along with report explanations, is provided in
windows-help-file format and may be of use when interpreting the
propagation reports and forecasts.

ABW++ requires win95 or later.

Look for the "Active Beacon Wizard ++" link at the URL below.

Wendy, there are a lot of other ham radio email reflectors for just about every interest, you might find reading those a bit more interesting, try qth.net and take a look at the plethora of groups you might join and share in. Unfortunatly for RRAM there is a group of about 20 or so that make up 90% of the posts, most of them revolving around 75m and a handfull of operators. Don't let it discourage you, look around on the net you'll find some really interesting groups to join.

There will be a firestorm of complaints if that were to happen.
Identity theft is an all too frequent occurrence. I'm not saying
there won't be mistakes, but I expect the FCC knows better than to
publish telephone numbers or SSNs. After all, they recently pulled
date of birth information out of their public license files.

>One important note of clarification: the FCC won't be using the SSN

Admittedly, I don't like this nonsense either. Frankly, I have
difficulty understanding why an agency such as the IRS would care if
we have an amateur radio license or not. The only use might be if
some fool tried to cheat on his taxes and then give a false address to
the IRS while keeping his real address current with the FCC.

Perhaps there really are a few fools such as that, though I have a
hard time believing it.

Indeed, it may have worked for you, a conspiring member of a very small world population minority, including North American citizens like yourself. But it does not work for by far the great majority of the world's population. It is they who have been robbed.

But, of course, the remainder of the world's very sensible, intelligent, better educated population do not expect you to admit it. It goes against normal human (aggressive) nature. So don't worry about it.

THE SAXONY AWARD

The German Amateur Radio Society (DARC), Saxony branch, issues this award
to promote the spirit of community between radio amateurs in the Federal
Free State of Saxony and other radio amateurs in the world.

The award can be obtained by any radio amateur or short wave listener
who submits proof of two-way radio contacts or confirmed SWL reports with radio
amateurs of Saxony (DARC-DOK, saxony VFDB-DOK and saxony special-DOK).

All contacts after
January 1, 1992 are valid for the award.

Rules for the basic-award on short-wave:

DL-stations need 40 different Saxony-DOK
other EU-stations need 20 different Sayony-DOK
DX-stations need 10 different Saxony-DOK

Rules for the basic-award VHF and upper frequencies:

DL-stations need 40 different Saxony-DOK
other EU-stations need 20 different Saxony-DOK
DX-stations need 1 Saxony-DOK

you can apply follow sticker:

CW-sticker if all contacts for the basic-award in CW
additional-sticker for each 10 Saxony-DOK more

The submission of QSL cards is not required. Send your application form
(GCR list) endorsed by your radio amateur club or two senior radio amateurs
along with the

basic-award fee of 10 DM or 8 IRCs
CW-sticker SASE only (if separate application)
additional-sticker SASE only (if separate application)

Let's hope so. But it was many years before DOBs were pulled, and they can be used in identity theft also. I think personal privacy is pretty much gone now. I could likely find all your vital info if I really wanted to, and you could do the same to me...

I'm laughing at you you fat slob! Braged about losing 50 lbs but forgot
to say what his weight truly was. Have you gotton those radiation burns
on the back of your neck looked at from having a station that doesn't
conform to the RF safty act?
In all reality idoit its 10X16 Ham shack ie shop. In my backyard so
there is referance to a house too? One can't have a backyard with out
having a front yard and one can't have either unless there is something
to have a front or a back yard. HMMM porkbut at least I own it. You are
still paying rent from what they say. So you can talk all the trash you
want the proof is out there.All You are a agnostic Jew boy who eats pork
and celebrates Chirstmas. HMMMM yet you don't beleive Jeasus Christ
didn't happen but you celebrate his birthday. I geuss that makes you a
bigger hypocrite then the sleeziest southern baptist. What kind of
providance do you believe in? Wow what a lonely world you must live in.
So being how you are so lonely you have to lash out at everyone. I mean
going around and calling people trash when the proof is out there about
how you talk on the radio, how you steal from your friends and how you
jam every chance you get. So look who is calling anyone poor white
trash. porkbut get help before you hurt yourself. I would hate to see
you have a accedent or something. Have you gotton your NAL yet there
porkbut! HA HA HA I am truly laughing at you! LOOOOOOOOOOOOOOOOOSER!

Just a quick question.

I was told that if an ARRL official stops in to visit your Field Day
site that you are eligible for 100 extra points. I can not find that
information anywhere in the rules or on the ARRL web site.
Does anyone have anything on this?

Thanks..

rips a radio friend off or one who rips off strangers.

2707. Advertisement on W1AW

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-29 00:00:00 UTC
From: Roy Lewallen <w7el@teleport.com>
Message-ID: <3779A10B.A821DE9@teleport.com>
Source record: 138228
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

I copied the Field Day bulletin from ARRL and was surprised (and disgusted) to see that part of it was an advertisement for merchandise which the ARRL is selling (Field Day pins). Besides the fact that this isn't a purpose to which I'd like to see W1AW put, it seems to me that this isn't a legal use of an amateur radio station. Even if it is legal (which I doubt), I hope that other ARRL members will join me in letting our directors know that we don't want W1AW to degenerate into another advertising medium for the ARRL.

Hi,

Is there any kind of band-plan for radio controlled models on 50 MHz?

I know that there are 10 channels for R/C with 20 KHz separation, starting at 50.800 MHz, but can each channel be used for *any* type of R/C activity, or are some set aside for flying, others for cars, others for boats etc?

Tim,

Why not address your statement on the .wav
file below:

http://members.xoom.com/frg9600/500.wav

This is the clip of you discussing the
contract killing of W1WCR with K5BLB.

You were on 3.950, at the time, and attempting
to intimidate W1WCR, the intended victim of
your threat. So rather than chant "LOL" and
other silliness, please address the issue.

Also, what type of amateur radio operator would
do such a thing? Why are you so full of hate?

KK7HO wrote:

Tim,

Please tell us why you were jamming the Liberty Net
the other night. If you've forgotten, there's a six minute
audio clip of you chanting, jamming and harassing other
amateur radio operators on 3.950 at:

http://members.xoom.com/_XOOM/kevin_strom/volz.wav

Rather than claiming it's a lie, just explain what you were
doing while this .wav file was being recorded.

Thanks for your reply.

Source record: 138276

RE: BUZZARD PEAK 145.460 MHz - UPDATE

I received two informative responses to my post about the BUZZARD PEAK
repeater:

#1

The W6FXN repeater was taken down just before Richard LaBelle became
a silent key.
Neither K6PYP or KC6OKA are coordinated to the frequency pair by TASMA.
The earthquake net is now found on the Flint Peak repeater on
147.705 (-) MHz.
73's
Karl N6BVU
Editor, Repeater Location Guide

#2

From: K6PYP
Subject: Re: BUZZARD PEAK 145.460 MHz
Sent On: 06/26 08:11 PM ET

The W6FXN repeater was turned over to us .. and we moved it to the VA in
West
LA. then TASMA never answered our request to change of everything??/
We are now in the Hollywood hills and will be a back up system for the VA
in
Emerg times.... out pl is 131.6 and when Mexico is not jamming us you can
get
in.

Thanks Scott K6PYP

****

So, I guess those responses answered my question!

We should *all* heed Jake's .sig line!

I just finished a graduate degree. It took me four years, and during the middle two, I earned *no* income (save a little here and there off the books). I survived on family support and student loans (neither of which are taxable), living *very* frugally.

At some point late last Fall, I submitted a request for a statement of contributions and projected benefits to the Social Security Administration, which is a good idea to do every five years or so to ensure all you have paid in is being credited to you, and that no one else is using your SSN for work/tax purposes.

The surprise I got was not from the SSA; all their data was fine. I got "Threatening Letter #A39102--Q, rev. 3/51" from the IRS, demanding W-4s, 1099s, and that I file 1040s for the two years I didn't work and had a *taxable*(gross gross, not adjusted, not net, but before we even get to line 1, much less personal exemption and standard deduction!) income under $1000(and that entirely off the books), and thus was not required to file. They still don't get it, but in this case it is just funny as I have no liability (What is the interest on $0.00?)

My point is that submitting a form to one Federal agency tripped off another one. This is precisely what SSN collection is meant to do. It is for tax, child support, and student loan collection (guess who owes the most in defaulted loans? physicians! by far!), especially where someone gives either a false address or a private mailbox or some other such gaffe rather than home address. This is what FCC will do with your SSN and whole file when they get it. It goes speedily along to IRS, DOEd, and DOJ's Child Support Enforcement Office (and thence to State agencies) for collection, where applicable.

So OK, what's the big deal, if you aren't a tax scofflaw, student loan creep, or welshing parent? If you don't get it, re-read above. You can be in full compliance with every Federal, state, county, municipal, housing association, parking, and moral law ever drafted and still get a notice that you owe $520.66 in back taxes, penalties, etc., for the improper deduction you took for breast enlargement surgery; does the fact that you are male sway them? Not in the least! Remember all the women with male-sounding (Morgan, Micheal, etc.) first names who received draft notices during WWII? God, at least then you could go down and talk to a real person somewhere!

All these shuffling, circulating files, and automatically generated threatening letters go out to many times the number of honest, decent folks as they do to deadbeats. Many times. That is a lot of time and worry clearing things up for those of us who get stuck in some government algorithm, not to

mention the bite out of the Federal budget (nibble, nibble, nibble) it takes. Who gets caught? Only the very dumb, I imagine. If someone hiding from a tax lien is smart enough to throw the IRS bogus info for a long time, isn't he smart enough to be consistent and do the same on FCC Form 610 (or whatever it has morphed into under ULS)?

Whatever, I am just waiting for the law to change to allow me to get SSNs for all of my multiple personalities. I have 247 of them, and they all share the same last name and DNA. Maybe then I, or one of us, will feel more OK about Dopey Big Brother collecting everything they can about me.

ID theft is really a *lot* more difficult than "20-20" and "Dateline" make it look like. Getting the full package (SSN, DOB, place of birth, mother's maiden name, father's name, name as it appears on B.C., current and former addresses and telephone numbers, and employer, to start {add schools attended, former employers, make and plate of auto, name of bank, name of doctor, insurers, spouse, siblings, and children's names, and military service rank & discharge info if you really want to be thorough and cover all the info you might be asked when impersonating someone else}) off the internet, despite the fear-hype on TV, or alternately the craven promises of shady CD and book publishers, is very very hard, and getting harder, as people get wiser about leaving their personal info laying around, in the real or virtual worlds, and as business and government are being forced to tighten up their acts. A degree in dumpster diving is required of all would-be ID thieves, save the cyber-talented, and among those you would have to present a lively ripe target. Just tear up all those pieces of paper with personal info on them before throwing them in the trash. The people you hear the horror stories about on the TV newsmagazine shows got burned one of two ways: they were careless about credit card receipts et al., or someone with special, inside access to a computer system (creditor, bank, doctor, hospital, gov. agency, school; *not* the internet, *not* the WWW) containing personal info screwed them. Of course, TRW and the other Credit Reporting Companies are still a problem: all it takes is a good looking letterhead and a check to get your info from them , in many cases.

Please clarify this--do you mean to say FCC will deny/revoke licenses if you owe back taxes or have an unpaid check? Please refer me to FCC or other Fed. agency docs. that can explain this more fully. Thanks.

Other way around? I don't follow?

It remains to be seem just *what* FCC or any other Federal agency will, or won't, be doing with our SSNs. Reading both the text of the original bills (I can't find the damn thing in the CFR or USC, but not for lack of trying), and the FCC's own commentary, everything is very vague as far as the mechanisms of analyzing, forwarding, storing, and safeguarding license info. I doubt FCC will be charged with comparing their license database against a list of tax debtors et al. I would guess they will simply forward names and SSNs {let's be honest about this one--the DCIA is aimed at private citizens. 5 will get you 50 dollars collected from individuals will exceed those coming in from corporations, by better than 100:1. As far as dollar amounts of defaulted Federal guaranteed loans, corps. win the race: default rates on student loans have never exceeded 7%; more than double that on loans to commercial debtors} to IRS, Dept. of Ed., etc. Then the creditor agency will report back to FCC. All in seconds, as I'm sure the databases are linked for this purpose. Sort of like the Brady Law, in Hyperspace. Still, we have to play wait and see, I don't think FCC even knows what the hell is going on yet {surprise!}.

Gee, I found the lyrics to be much less offending than, let's say, singing about ramming a broomstick up a woman's vagina, or promoting cop killing.

Let's face it, "Rap Is Crap"......

Jack

My AEA Isoloop body broke (probably too many birds). Anyway, does anyone want the huge variable cap and metal loop band welded to it?

Shipping plus a small donation would be appreciated.

Rudi - KF6RLQ

This is a mesage for all Radio Amateurs visiting the Central Florida
area and the world's largest family attractions destination...

Walt Disney World, Epcot, Sea World, Universal Studios, MGM Studios,
Universal Islands of Adventure and lots others

http://www.qsl.net/lmars

If you need information on amateur radio resources in the area try
surfing over to the web site of the Lake Monroe Amateur Radio Society.
There you'll find a page called "Our Repeaters" in which you can
review and download the Central Florida Repeater List ordered by
county and city. You'll find email links to club members that can also
assist you with information and other contacts in the area.

There was no "butcher knife fight". She attempted to attack the kids
and me with it and I disarmed her. Called the police and had her taken
away to the booby farm. End of story. As to why? She was nuts.

Might I suggest you stop listening to all this BARF/Stumper BS and use
your own brain. Assuming you have one.

Check out Section 1.923(h) of the FCC Rules and Regulations (47
CFR s. 1.923(h)) which deals with this.

On Tue, 29 Jun 1999 05:21:19 -0700, Will White wrote:

I'm checking up on some reports that AF2Y's SON IS A BASTARD!!! Could it be that 'ole Charles had a son out of wedlock? We will soon see.

Deja.com cancelled my "kc1zq" sign on....Now I must use "kc1zq_1" to log on with. I think Charles had something to do with that.

The screws are starting to turn on AF2Y real tight now....LETS ALL KEEP UP THE GOOD WORK.

swl002 is doing a good job on the tracking of Charles. Call your local IRS office & tell them Radiosigs@aol.com is not paying his taxes.

Now that the Tampa Terd is busy putting the bars over his windows and doors to keep his drug addict son JR. from once again breaking into his 900 sq. ft home .He will have plenty of time to study his test material for the upcoming examination required by the FCC. His only problem will be that he will be a little excited as he goes before the FCC for the code test. Well, that will be problem for Jimmy, as he will prepare a concoction of medication that he has on store which will ease the pain. The mix will consist of a few Xanax and anti-depressants along with his muscle relaxers and he will breeze right through the exam. Hey Jimmy, you can name the concoction the " Riley Highball."

Free Speech Directory || National Alliance Main Page

Free Speech - January 1996 - Volume II, Number 1

Racemixing - Worse Than Murder

Murder is Homicide; Racemixing is Genocide

By Kevin Alfred Strom

Let me read you a short article published in Harper's Magazine, which is controlled by the super-rich MacArthur family, whose John D. and Katherine T. MacArthur Foundation is almost omnipresent as the opening and closing sponsor of so-called "public television" programs. The article, written by David A. Bush, is headlined "Ozone Anxiety: It's a White Thing":

A lot has been said recently about the thinning of the ozone layer. Interestingly, it turns out that the whole issue is really of concern only to fair-skinned Caucasians in the Northern Hemisphere, who are threatened with skin cancer and other problems associated with increased ultraviolet radiation. The peoples of the middle latitudes have always been exposed to higher ambient levels of ultraviolet radiation, but their naturally darker skin has acted as protection. It is entirely possible that "lard-white" skin just will not make it in this new world reality! Perhaps the era of the "classic" Caucasian is drawing to a close, and for completely natural reasons. Fair skin might eventually be considered an affliction and impose on those who possess it severe limitations on their enjoyment of the world.
The far-thinking Caucasian cannot help but realize that the best gift delicate-skinned individuals can give their progeny is a better chance of survival in the coming ultraviolet environment. Fair skinned individuals should give careful consideration to the selection of a mate who will contribute a darker complexion to the genetic makeup of their offspring.
I am not suggesting that the government should mandate changes, but it could do a great deal to encourage interracial coupling. First of all, the government could provide some financial incentive to encourage interracial families. Special tax deductions would mitigate some of the problems that these families encounter.
On another level, the government could organize summer camps, or even working camps, where majority children would encounter minority children in a relaxed atmosphere, away from social constraints.
Let me add that when the author says "away from social constraints," what he

really means is away from parents and away from peers of the opposite sex and the same race, whose instinctive abhorrence for interracial coupling might "inhibit" the results desired by the author and presumably by Harper's magazine and the MacArthur family. Now back to the Harper's article:

Majority girls would participate in camps where they would encounter only minority boys, and vice versa. In such an environment, children would not be subjected to prejudicial pressures or obsolete taboos. Even if relationships did not develop at these camps, the participants would gain a greater appreciation of people who are different from themselves. When they returned home, they might be more disposed to the idea of a different-race partner.
In addition, the public should be educated about the positive aspects of a darker complexion. When mainstream television programming promotes the existence of couples from different races and backgrounds, then cultural and racist barriers will fall and society will move forward. A major benefit will be the fact that the population's general resistance to ultraviolet radiation will be enhanced.
The thinning of the ozone layer is just one more reason for Caucasian parents to bestow the gift of a darker complexion on their offspring. If we continue to lose the ozone, there may not be any options at all for fair-skinned individuals, as they will simply cease to exist. But if Caucasians do the right thing, how comforting it will be for them to look at their children and know they have done their best to ensure them a safe and comfortable future.
Harper's magazine published that article in December 1993. It had originally been printed by a glossy magazine called Interrace, the primary purpose of which is to promote interracial sex and marriage. We do not know the source of the funding for Interrace magazine, but we do know that its reported owner is a person named "Candace Mills" and the list of its officers consists of only one name repeated for each position, and that name is "Gabe Grosz."
Now David A. Bush may know, and the MacArthur family surely knows that what they are calling for is genocide of the White race. And all of them surely know that their moronic argument about reducing the rate of skin cancer by a minuscule amount is not the real motivation for their call to exterminate our people.
Here we have a major pillar of the liberal establishment calling far more openly for a genocide far more sweeping than that they accuse Adolf Hitler of calling for. And yet we hear of no protests against Harper's or its owners, no Million Man Marches of White men and women concerned for the survival and welfare of their kind, no charges of "hate crimes" against the perpetrators of this outrage. No. We hear nothing except a few worried clucks from conservatives that, well, "they probably don't really mean it that way," and approving snickers from Jews and White liberals about how amusing it all is and how wonderful and advanced their thinking is on such matters. Well, I don't think it's funny, and I do think they mean it, and we ought to take this advocacy of genocide through racial mixture very seriously indeed. We must take it seriously because it is happening right now.
Under the title "Interracial Baby Boom," the following data from the Population Reference Bureau was published in The Futurist:

Between 1968 and 1989, children born to parents of different races increased from 1% of total births to 3.4%. U.S. Census Bureau data show that, mirroring

changes in laws and attitudes from 1970 to 1991, the number of mixed-race married couples increased from 310,000 to 994,000. PRB researchers observe that this trend is taking place among all racial and ethnic groups, but the patterns for each group are distinctly different.
The article goes on to say that although mixed marriages still represented less than four per cent of the total in 1989, the trend is definitely upward, tripling in less than twenty years. And that trend is probably accelerating. Carry that four per cent forward a few decades - three times four is 12, three times 12 is 36, and three times 36.... Couple this ominous trend with the fact that the White birth rate is now below the replacement level, and you see that use of the term genocide is not hyperbole. Also carefully consider this, according to the Population Reference Bureau report: "Most mixed births involve one white parent, but by no means all."
Notice the use of the qualifying words, "but by no means all." Why add them? Out of 994,000 mixed race couples, would anyone expect that every single one of them that had a child would have one White parent? Of course "by no means all." But the extremely significant thing to notice is the report's admission that most mixed births involve one White parent. What does this mean? It means that the majority of racial mixing involves the destruction of the White race - Whites mating with Asians, Whites mating with Blacks, Whites mating with Arabs or Jews, Whites mating with mestizos, Whites mating with the racially unclassifiable. You have seen it in your shopping centers. You have seen it in the street. You are a witness to genocide. You are seeing it before your very eyes every day. What are you doing about it? If you do not at least speak out against it, you are allowing yourself to be complicit in this horrible crime. The crime is racemixing. It is a worse crime than murder - far worse.
For when you commit murder you kill one man, you end one life, you tragically injure one family and circle of friends. When you commit murder, if your victim has had no children you do cut off the potential existence of one small branch of the race's future.
But when you commit the crime of racial mixing you are participating in genocide. The probable effect and possible motive for your act is to bring into the world hybrid young, who will not be clearly of one race or the other and which will, by their very existence, increase the probability of future racial mixing and dilute both the gene pool and the sense of identity of the next generation of White children. And don't underestimate the importance of that instinctive sense of identity among our young Whites. Except for efforts like this radio program, which are growing but are still far too small, that sense of identity is about the only thing standing between us and total extinction of the European race. Our young people may be confused, but their innate sense of decency and racial identity has held amazingly firm so far. Even though the Jewish media have been strenuously promoting interracial sex for decades, and even though the so- called "White establishment" has provided no leadership and nothing but treason to our race for the last 30 years and more, about 90 per cent of them are still marrying within their race. This contrasts starkly with the results of a recent Washington Post poll on the subject. According to the poll results, only 47 per cent of White men would not be willing to marry a Black woman; and only 60 per cent of White women would be unwilling to marry a Black man. Quite clearly there is a gap between what White people say and what they actually do. Why? Even among those intimidated into responding to the

question in a Politically Correct manner - even among those who have at some level convinced themselves that they would mate with any arguably human subspecies - the natural instinct to cleave to your own kind is still a powerful determinant of action. Thank God that it is! And to Hell with those who are working in the media and in the schools and in the churches to destroy that healthy natural tendency in our children. They are worse than murderers. And yes, you heard me right, some of these murderers of our future generations have weaseled their way into positions of influence in the churches. That many of these have hidden Communist sympathies or are actually in the pay of our enemies has been documented by many others, and I do not have the time to recapitulate those data today. But their words speak for themselves. Let me give you a few quotations from the March 1994 issue of Christianity Today, a mainstream Protestant publication.

..Is it possible God actually calls some Blacks to fall in love with Whites, and vice-versa? If that is true, then we should celebrate.
Yes, celebrate! Let's rejoice over the beautiful children born to interracial marriages and do everything possible to make them fully accepted. Let's recognize the contributions intermarriage can make toward breaking down prejudice. And though we may not necessarily promote interracial marriages, let's take the lead in defending, protecting, and supporting them in our churches.
..The entertainment industry has attempted to keep pace with the increasing number of intermarrying Americans. Television shows such as General Hospital and L.A. Law and major Hollywood releases like Jungle Fever, Mississippi Masala, The Joy Luck Club, and The Bodyguard have all highlighted interracial romances.
This is one area where the media may be morally ahead of the church.
.. American churches can become havens of safety and support for interracial couples....More creative heterogeneous churches may emerge, becoming places that feel like home to interracial families....We should rejoice over the barrier- shattering potential each Christian interracial marriage brings to our churches.
That is what it says in the March 1994 issue of Christianity Today, the chairman of the board and founder of which is the Reverend Billy Graham. No comment should be necessary. I invite you to obtain a copy from your local library if you think I am misrepresenting their position.
Every White man who commits the crime of marrying a non-White will not be fathering any White children. Every White woman who pollutes her body and her spirit by marrying a non-White will not be giving birth to any White children. And by their actions they will be committing the crime of misleading White boys and girls to follow their example. And all those who do not speak out against their racial treason will be complicit in the crime. When your four-year-old sees a Black or an Asian or a mestizo with a White mate, and you do not condemn this, that child will believe that what he has seen is normal and that his mommy and daddy approve of it.
Nature - or Nature's God if you prefer to express it that way - created our race through hundreds of thousands of years of incredible hardship and rigorous selection. We have survived the Ice Ages. We have fought against invaders for thousands of generations, from the Moors to the Huns, again and again and

again, back beyond the impenetrable mists of history of our race. Our ancestors gave their all so that we might survive, so that we might live. And wedo live. We did survive. Thanks to them. Our race extends back continuously to the mysterious beginning of life itself. It can extend into the infinite future. And its continued existence would undoubtedly be assured by our superior intelligence and unmatched technology, if it were not for those who practice and promote the genocide of our people through racial mixing. By their actions they are killing us. They kill not an individual. They kill the infinite generations of our future. Their crime - the crime of racial mixture - is far, far worse than mere murder.

As long as I live, I will be shouting this truth from the housetops and doing everything I can to encourage more and more of my people to see this truth. And I will applaud the growing numbers of members of other races who understand that racial mixing means death for their race and culture as well. This truth is the one factor that the promoters of the one world government called the New World Order fear. They do not fear the constitutionalist and the legalist "patriots" who avoid the issue of race in order to gain for themselves a measure of "respectability." They do not fear the sellers of gold coins on radio station WWCR. They don't care how many sacks of gold and silver coins you have salted away. They don't care if the front men for their secret government call themselves conservatives or liberals. They don't care if there is prayer in the schools or not. The one thing they fear more than anything else is racial consciousness, because they know their history, because they know that national and racial loyalty threaten their plan to establish the ultimate multicultural construct, a world government. For this twisted dream of world dominion, they are attempting genocide against our people.

I'm white but am I proud of it? Not really but I accept it because I was born that way. In other words, skin color is nothing is which to take pride. It's simply a happening and no one can do anything about it except Micheal Jackson who's still Negro but so what? Only he minds. And Strom doesn't like Jews either. I'm Jewish and I could do something about it but won't because I take PRIDE in being one. Religion is something in which anyone can take pride, but so what? No one can tell me that being one faith gets you into heaven while any other won't. That's Brother Stair poppycock and besides, has heaven been proven? Has hell?
Has Jesus's existence? Has Moses's? It's all faith and most of it is HIGHLY SUBJECTIVE anyway. I don't know what racists like Strom are talking about. I don't see skin color or religion as any criteria whatsoever for excellence or failure and for that moron to believe that America is threatened, or the white race is threatened, or that Christianity is threatened is nothing but Hitlerite crap initialized into the mind of a breathing "warp." No religion in America is threatened and if you believe that Bill Clinton is out to destroy this land or our Constitution or anything else associated with our great freedoms and way of living, you're nuts. You're as nuts as Strom or perhaps we should call it devious. What Strom and his gang want is a neo-Nazi revolution here and they'll concoct any lie,distort any decent principle to achieve their goals which isn't gonna happen. The next time you feel like you're better than someone because of your white or pink skin, ask yourself how'd you handle this situation; you're in a foxhole with a black man and you rely on each other to survive the attack. Would you share a canteen with that man? I'd bet you would. Would you share memories with him? Wouldn't you feel comraderie? If he took a hit, would you not attend to him or would you call him an "N" and let him bleed to death? For God's sake people-get with it. Don't allow hatemongers like Strom and his allies to poison your minds with this WHITE SUPERIORITY garbage. With this CHRISTIANITY UEBER ALLES mentality. All of us have a stake in keeping America great and we can do it through mutual respect and understanding and cooperation. To hell with these bigots. AF2Y, Doc

The term used is *social engineering*. While a good hacker can get lots of personal information on the net, the average con man can do as well on the telephone.

Calling the victim directly is one way. You would be surprised how much information the average person will tell you over the phone without verifying your identity. Con men call and falsely identify themselves as the bank, police, IRS, and so on.

Another way is to falsely identify yourself to the organization you want the information from. Often low paid, poorly trained employees who handle customer service have access to computer records. In many cases all that is required is a SS# (my credit union, cable company, cell phone company, and electric company for example) and they will give you information from the account records.

Lloyd has Rich Whiten and "Doc" AF2Y "filtered out" just like Bill Cheek
had John Mackey "filtered out". What this means is that the newsgroup cretins
like Lloyd don't see posts by those which they have in their killfile, but they
continue to post endless spam about those individuals which they despise.
Hence Lloyd's recent post regarding Rich Whiten.
My advice? Add these AOL screen names to your killfile: CBRambo1, N0VFP,
DX302MAN, DX394MAN, SWL002, etc. These are but a few of the screen names Mr.
Davies has used or is presently using.
Still waiting for you to tell me how I'm "bootlegging" someone's callsign
by using "FRNKBURNZ" as an AOL screen name, Lloyd.

Bill, KB4P, is subdividing his farm to pay upcoming college tuition for his two daughters. The Fawn Ridge subdivision will expressly ALLOW ham antennas and satellite dishes including the big c-band dishes. The utilities are going to be buried.

The subdivision will consist of 5 lots on 15 Acres. Bill is keeping lot 3 for himself and the other 4 lots range in size from 1.26 to 3.0 acres.

Fawn Ridge is located 0.7 miles west of Maryland Rt. 4 in Calvert County, MD 3 miles south of Dunkirk and 2 miles north of Sunderland. Rt. 4 is a high speed divided highway which connects to the I-95/I-495 Washington DC beltway at exit 11A on the east side of Andrews AFB. The beltway is 20 minutes from the subdivision. It is also 32 miles north of NAS Patuxent River, home of NAVAIRSYSCOM. It is in the excellent school districts of the award-winning Sunderland Elementary, Northern Middle, and Northern High schools.

All 4 lots for sale are 2/3 clear and slope gently away from the common lane (Shepherd Lane). All are wooded at the back 1/3 with tall trees perfect for one end of your dipoles, longwires, or curtain arrays. A stream runs along the rear boundary of each. Most lots back up to designated openspace or other wooded terrain.

Lot prices are in the $85,000 to $95,000 range. E-mail Bill at santiff@olg.com for photos and a a satellite overhead view with lot lines shown.

The ARRL reported that attendance was up from last year and the year before at the 99 Dayton Hamvention. I'd like to think so too but is there anyone else out there that finds this hard to believe? Seemed like a ghost town compared to previous years.

It seemed to me to be down at least a 1/3 of last years crowd.

Oh yeah? Prove it.

How many times did I fart today?

How many were loud?

How many were silent?

How many really stank?

Was I forced to change my underwear?

Come on ... prove how much you really know.

No such word as "theirselfs." Perhaps you meant "themselves."

> it is a compulsion to read the creative works of "REALDEAL",

Well, not a compulsion, but it is always interesting to note the creative ways you have of mangling the English language.

> You can learn from the master..

Ah, yes. A How-Not-To primer.

> REALDEAL, WORLD CLASS SWL!!!!!

world class swl? Is there an award for that? Well, maybe you're short, and you may have a wave, but it doesn't say much for your listening if you "listened to 20 meters for years" and don't even know who Polly is.

Am I getting creative enough for you?

Oh, by the way, you responded, just like I said you would. Those "reply buttons" will get you every time. You'll be replying to this one, too.

Well again another night of porkbut knowing everything but yet another night of 22 mins between IDs. Yes folks 22 mins. I have been timing the loser. He has done this kind of thing in the past. The frequency is 3.901 from 11:35pm EST to 11:57pm EST then another 11 mins then he signed off. It would of been funny to here someone yell break porkbut because he sounded like a cber with no IDs, and KNOWING EVERYTHING about, patens, guns and what have you. He was in QSO with WD4MGP Mike up in NC. So where is this mighty FCC Crackdown. Where are the OO cards now? porkbut thinks he dosen't have to ID like the rest of us. He must think that since the FCC payed him a visit he has speical privs.

This is what your fuss is all about?:

Has your group heard about the new Field Day pins? Information
on these attractive keepsakes may be found on page 96 of the May
issue of QST or at the Contest Branch home page on the Internet.
You may also download all Field Day and other contest forms from
the ARRL Contest Web Site.

Good grief. That's no different than the Sweepstakes PINs. And if they were mentioned over W1AW, big deal. This is the number one amateur radio event in the continent, and the League and lot's of local clubs put a great deal of effort into recruiting participation amongst the uninitiated. That's so amateur radio can grow, something many people are hand-wringingly over-wrought about. One way, just like the Sweepstakes PINs is to offer some sort of incentive for that participation. Just like the code practice, W1AW is a very effective and perfectly legitimate tool for that purpose.

For crying out loud, if we don't want the only viable organization representing amateur radio in this country to promote it, then let's all take up model airplanes, or fishing.

Hello Larry,
I tried a few of the freeware and shareware code tutors back when I learned CW but they all paled in comparison to Morse Tutor Gold. I believe I got my copy from HRO in nearby Phx,AZ. It was hands down much better then any of the other code tutors I tried. It gives random or structured code tutoring and will also send CW from any ascii text file. It was also the nicest looking tutor I found. Good luck to you and your daughter......73

I would hope so. Remember we are all innocent till provin guilty. For me
to come up with a fair decision on this matter I would have to see more
info. Now I'm not a court of law this is just the way I see it. I try to
hear both sides before I make a desision on anything in my mind. In this
matter I fail to see that Vic has done anything wrong. Also his callsign
was the only callsign I heard in those sound bytes. So I don't even know
if the other two stations where even leagal.

I wonder about this post. You mean to tell me that if one is a advanced
class or extra and beleives in a compormise in this battle arn't
welcome. I think you need to see my band plan. I beleive that code is
good but I also beleive that in some cases CW doesn't nessasaly need to
be a requirement for SOME HF privs. Check out my band plan

The great "JaJa" wants the old 14.313 & 3.894 back and the equally famous "Tootaloot" agrees. I ask that you read below before I continue on a most important topic.

Subject: JaJa want old 14313 + 3894.5 !
From: "Suck Green Persimmons" <tootaloot@aplaynet.org>
Date: Tue, 29 June 1999 07:50 PM EDT
Message-id: <7lbmag$d75$1@oak.prod.itd.earthlink.net>

This sniping back and forth on Usenet is BORING!

It's * almost as bad * as having to listen to Al Gore pontificate
on the finer points of Democratic politics and the Y-2000 election.

Poo with this virtual reality crap! We want to hear the
good ole days of 3894.5 and 14.313 ** LIVE ** and in living Stereo ! !

bring back the:

"eight incantatons" of Gravel Girdie
dancing ZQ Chicken
"tewey auctioneer tape" [anybodie..anybodieeeeeeee...Sold!
tothegentlemanuponthetop]
assorted geezers, wheezers, kooks and krazies
infamous "broccoli belcher" {rumored to be the "Bathroom Man"}
the guy who always says "You get happy !" he's funny
the pugnosed preacher in Scranton Pa ?
Bathroom Man {one of the more creative and amusing humorists on ham SSB}

*****Yes, I, AF2Y, agree with them about the tranquility which has replaced raucousness., rancor and an idiot like KA4MUJ, Mike Galego, who was spurred on to self-destruction by KV4FZ and others. But that doesn't make him any less an idiot. To continue, this whole ugly mess which began on 14.313 or thereabouts and spilled onto 75 meters was ther brainchild of one Herbert Schoenbohm, KV4FZ, an anti-social pathetic anti-Semitic psycho from Saint Croix. In 1999, the lunatic fringe in this country use the idea of white supremacy and Christian identity to foster anti-American hatred and revolution. The whole thing is absurd, yet some people buy it. Back in the late eighties when the trouble began on 20 meters, Schoenbohm used the tactic of spreading and reinforcing the idea that Jews were in control of Intercon and therefore the net was "set up" to steal money, via phone patches, from telephone companies. Aburd? You bet but some bought it and those who did, set up their own hate organzation called "B.A.R.F." (The Better Amateur Radio Federation) and war was declared. Both Jews and caring Gentiles decided that this hate group should be destroyed and now if a book would be written chronicling the era, it would bear the title of "The Rise and Fall of the B.A.R.F." Simply stated: a

B.A.R.Fie was anyone with anti-Semitic tendencies who therefore idolized their Hitler, Herbert Schoenbohm,KV4FZ. Now once upon a time there lived in Newark, NJ, a female SWL named Doris Parnofiello who has passed on. She was at one time a true blue BARF hater. Despised Schoenbohm, Galego, "Crazy Billy Gasell,"WB4GDP etc. Well she took to me and to Rich Whiten and others who likewise despised everything these low class animals stood for. And she taped and taped and taped. That lady was blind and had nothing more to do all day and night but to listen to the happenings on 20 and to tape them. She built up a monumental collection and sent each, while keeping a copy for herself, to the Anti-Defamation League of West Orange, NJ. Doris was INCENSED by the awful anti-Semitism even though she herself was Catholic. She and I became phone friendly and lo and behold-what did she bestow on me? Her cassette collection-the whole thing. It became too vast for her apartment so she deciced to use my garage as a warehouse. I simply didn't have the heart to say no. What happened unfortunately is that her calls to me became incessant and annoying to my wife because of the tied up phone lines. I then had to tell Doris to cut down on them but she became offended and decided to turn on me and Ruth Hoffman who is still manager of the Intercon net. It got ugly but Doris was terribly moody and demanding and our friendship ended as she cuddled up to those same people whom she once despised.
But.....
The cassettes REMAINED HERE, INTACT. Those tapes plus ones I myself made definitely chronicle the rise and fall of the BARF as well as the rise and fall of KV4FZ. We have history to RELIVE and I intend to do something about it. Each of Doris's tapes have her voice on it giving dates and times-they are completely authentic . On the cassettes you will hear for yourself the voices of the combatants and everything else that has now faded out into just memory. You will revlive the famous verbal battles between those BARFies and the good guys. Why among them I believe there are those famous "Mike and Judy Shows" which thrilled us all. The magic those two oafs projected have never again appeared in our wonderful hobby/service. The collection is enormous. The materiel is outrageous, comedic, hurtful, senseless, poignant-you name it and now you can relive those episodes. I have thought about the proper name for the cassettes since each will be marketed individually and something like the rise and fall of so and so would take up too much space on a cassette label, therefore the collection will be known simply as "BARF Herbie." The first selection being offered to the public for just $5 is dated 9/21/92, 7:50 PM . On the envelope containing this cassette, Doris typed the following: "Side one:Transmissions regarding AF2Y and his anti-President Bush stance. Side Two:Antisemitic remarks by KA4MUJ and KV4FZ. Both sides of this tape have anti-semitic rhetoric." Other mind boggling, enlightening tapes will be forthcoming which will bring back the glorious days of yesteryear on 20 while you're in the car or on the beach or in your den or bedroon and even on the "can." A lot of water has passed under the bridge since KV4FZ and his clowns were kingpins on 20 and even though some have passed on while FZ has become a shadow of his former self and will soon pass into ham obscurity as his last appeal is denied and the cease and desist order arrives, nontheless let us relive those momentous days through our series of cassettes entitled "BARF Herbie." Each one is just $5 postpaid and remittance will be accepted only by cash or money order in U.S. funds. No personal checks will be accepted. If

remitting by check, simply make it out to either "Doc" or to CASH and endorse the back of the check. Each cassette shell is in virgin white in honor of KA1SKV with a label affixed and come in a clear plastic polybox so that you can build a suitable library. Please note: these cassettes are for your personal enjoyment ONLY and must NOT BE TRANSMITTED at any time on our ham frequencies! Remit to P.O.Box 1347, Clifton,N.J. 07013 and request "BARF HERBIE 9/21/92."

May I be the first to thank you for posting this wonderful
work. It has caused me to think about our nation's plight
and the reasons for it. To think that this has been on the
internet all along...

Tell me, where can I find more of Mr. Strom's work?
It should be required reading for all 6th graders in this
country.

Thanks for your reply,
Richard.

Due to a large number of CODED Amateurs whining about being "left out" I have changed the NCLA (No-Code Liberation Army) web site at http://www.angelfire.com/nc/ncla/ to allow anyone to join! That way you coded ones won't feel the pain of being on the outside like the nocoders feel now because of you!

Join the No-Code Liberation Army - For a RADIO FREE EARTH!
Email us at ncla@angelfire.com OR Visit us on the web at http://www.angelfire.com/nc/ncla/

Then we can count on hearing no more from you about the sound bite over
on the "vote" page, correct? After all, even the most inexperienced
person can tell that it is cut-and-pasted over who knows how many
different sessions and different receivers, perhaps even different
bands.

I'm not defending the content, I'm not even defending the speaker. But
without the context, I'm sure you'll agree as you said before, that to
judge the whole of the conversation from just that would be, well,
unfair.

As a world famous entrepreneur, are you willing to sell 100 tapes at a discount, since I never pay retail price? Also, will you ship in bulk for free? Does this also include "Say the doity woird" tape? Also would like to know the availability of the "Mike & Judy Masterbation" tape? Thank you in advance, Babe10

> That way you coded ones won't feel the pain of being on the outside
> like the nocoders feel now because of you!

If you feel pain being on the outside, accept the responsibility for
that pain caused because you CHOSE to refuse to meet the requirements.
No one else made the decision for you. You made it. The standards are
there. You either meet them or not, by your own choice, but don't blame
those who have met them for your decision not to.

From your webpage:

We at the N.C.L.A. have sworn to eliminate code testing by
military action...

To you who are coded hams beware the "angry hordes of no-code
technicians" are outside your gates...

We will claim all of the HF ham bands as our own plus all of
the frequencies inbetween them.

Does it bother you that what you advocate is against the law? Do you
have any respect for the law of the land? Or have you made the choice to
ignore that as well?

Your right, it is good for a laugh. He only mentions General,
Advanced, and Extra class operators. I guess he forgot that Novices
and Tech+'s also earned their HF privileges with code. Don't
they count for something? Do I have to produce a license that
says General, Advanced, or Extra, before the "angry hoardes of no-code
technicians" (his words, not mine) beat me up?

I hope he doesn't turn this in as an English class assignment. The
grade would be very disapointing.

Randall,

I think you got your URL wrong. It should be:

http://members.xoom.com/frg9600/500.wav

This is the clip that has KK7HO discussing a
contract killing price with K5BLB. They were
on 3.950, the frequency occupied by W1WCR,
the intended victim of their threat.

It's illustrative of the character and mind of
Tim Volz, KK7HO. So take what he claims
with a grain of salt.

Randall Kent wrote:

Question: from whom was Bill Gates' wealth redistributed?

Wealth is most certainly created... ever hear the term "economic growth"?

How is that different from: "Have you heard of Swatch's new glow in the shower personal massager? Read all about it in this month's Personal Masseuse. Be sure to check our web site often for our many exciting breakthroughs!"

On the surface, it appears to be in violation of the laws against commercial use of amateur radio. Your further thoughts are welcome. I don't feel strongly enough about it to take up arms, but Roy's objection seems well founded. There are reasons to be concerned. The ARRL as an organization places itself in a position to help enforce and forward amateur radio, as you so rightly pointed out.

Michael.

Nice try Tim.

These files illustrate nothing. There is no clear infraction or crime
contained within them.

The file that does contain evidence of a crime is your own voice
discussing the price of a contract killing of W1WCR. It's on:

http://members.xoom.com/frg9600/500.wav

Maybe you can help us out here, and tell us about this "thing" you
have for W1WCR? You seem to delight in tormenting him.
Is it some wierd gay fantasy that you indulge in? For years now
you've worked hard at harassing him. Here is a six minute clip
of you chanting and harrassing W1WCR, and others on 3.950.

If anyone ever had any doubt about your sickness all they need
do is listen to this rant.

http://members.xoom.com/_XOOM/kevin_strom/volz.wav

Tim, please seek professional help.

I don't suppose I could talk you into doing something truly useful for society? I had in mind the No Dandelion Liberation Army. You could visit my front yard and knock yourself out killing defenseless dandelions with AK-47s. It would certainly make my lawn look nicer.

========================
So why do US citizens refer to themselves as 'americans' ?

They do not yet own the whole continent.

After all, Cubans are americans.

U.S. citizens? The proper name of the country is the United States of
America. How they refer to themselves is irrelevant. Your implication that
all use this moniker and that by this use there are no other Americans
outside of the USA is silly

You forgot Canada (which by the way has far more land mass than the USA),
all the various sovereign Indian nations, Haiti, and Costa Rica to name a
few.

Keep trying, you'll eventually get it.

> don't think you have much to worry about.

Thanks Tim,

Yes, that was my primary concern! As others have pointed out (on this group or on rec.models...), there are downsides to using the 6m band such as interference from other stations dozens or even hundreds of miles away when there's a 6m band opening(!) and the fact that the normal third party rules do not apply to R/C (as the person operating the unit becomes the control operator!). The former is bad for obvious reasons (crash!), the latter is bad because it means that your instructor also has to be a ham.

I ordered my Futaba 6XA on 50 MHz... at least that way I'm continuing to use ham radio for both hobbies!

Julian

2828. Pickup Truck Antenna Mount

Just got a great mobile mount for the stake pocket in my Chevy Pickup Truck.
Not real cheep but very well built, super strong, and fits perfect. Check out

http://www.geotool.com/antmount.htm

They have VHF S0239 and HF 3/8-24 mounts.

Best mount I have ever seen for a pickup truck. Really.....

Gee, Doc, you sound just like the Nazis used to sound. Allow me to demonstrate:

I swear. I can't wait until the SS or the
Gestapo puts a bullet into Steinberg's
(or pick any Jewish name) ugly corrosive
brain. Jews have no right living in this
wonderful fatherland.

AF2Y, you are so full of hate that you have
become the very thing you hate. You are
really sick. Mr. Strom has every right to
express his views, and so do you. Just
who the HELL do you think you are
telling us that we should not allow Mr. Strom to express his views or to even
be
allowed to LIVE???

Maybe we should start a campaign to
silence all Jews in this country, eh?
Hey ... if Strom doesn't have a right to exist, then why should YOU?????

Of course the above was just a rhetorical statement, and I am not saying you
should be silenced. What I AM saying, however,
is that you are a real asshole!!!

2831. Frankie Todd's parents again,again

What the hell is wrong with this board's posters? Why can't they stay on the SUBJECT? What did W4NTI's domestic problems with a nutty wife have to do with the subject at hand? Focus on Frankie in the evil clutches of the Slimy Schoenbums with the possibility that he could return to McQueensport screwier than when he left. Suppose the kid was trying to straighten out before hopping the jet to Saint Croix? Look's what happened. KV4FZ, who has no respect for the rules at all, is encouraging him to use 20 meter phone in light of the fact that Frankie's half assed ticket prohibits it. And Frankie BUYS it! There is no control operator in that shack! Sure, what does Herbie care when the kid comes home and finds a whopping NAL in the mail? Any skin off FZ's nose? Didn't Herbie entice the stupid gullible Mike Galego to do his dirty work by jamming Intercon while carrying on an anti-Semitic tirade? Didn't FZ have to answer to the FCC why he interfered with the vessel TIKI in distress? Didn't Schoenbohm and fat slob Judy from Massachusetts and ignortant KA4MUJ intentionally interfere with medical traffic pertaining to a baby in El Salvador? Didn't FZ block WB2OTK's call for help one night due to auto problems on a highway? It goes on and on. Is it possible that the Todds knew nothing of the Lucifer and Luciferess who took Frankie in for a vacation? Or maybe they simply didn't care? Whatever the case, anyone responding please STICK TO THE SUBJECT and stop digressing. And if you have nothing intelligent to add to the topic at hand, then SHUT UP. Doc,AF2Y

2835. Re: THROW STROM OUT OF THE U.S.A.

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-30 00:00:00 UTC
From: Kevin Alfred Strom <kevin.strom@innocent.com>
Message-ID: <3779889C.CDBAC1B6@innocent.com>
Source record: 138239

Let me thank you for reposting my articles. They're just as good as the way I remember them when I wrote them a few years ago, and though they were written to a deadline and to a specific time constraint (for a radio program), I am still proud of my work.

I have two comments, however:

When you make the transition from HTML to ascii, it is best to reformat the paragraphs to put a bit of white space between each one; and it is also good to place quotation marks around quoted sections that were set off by a different point size in the original HTML.

Also, I suggest that these articles would be slightly more relevant in rec.radio.shortwave than here, since they were broadcast over shortwave and other broadcast media, not amateur radio. They are probably most relevant in soc.culture.usa, alt.california, or alt.politics.nationalism.white, so my suggestion is that any future articles of mine you wish to post should go into one of those groups or some other newsgroup for which the content of the particular article is relevant.

With best wishes to all,

Kevin, WB4AIO.

This proves it. The slimeball locks me out of his mailbox while I didn't reciprocate. I don't believe in censorship and anyone liking or disliking me is free to E mail me and I'LL READ IT. But anti-Semitism is ugly as is Lloyd Davies and his mindset. His church has failed him completely which unfortunately is a black eye for Alabama style Christianity. Maybe if he started seeing that buzz cut, one eyed and one tooth girl at church more often, Miss Cyclops may be able to teach him manners? Here's his note. Doc,AF2Y

Doc,

What is your beef? Just leave your big fat Jewish bananna nose out!

Got it?

I realize that in short time I have become Mr.USENET. Perhaps it's to the point whereby I've taken over this board with wit, wisdom, satire truth and wisdom. Enemies and friends have been made. I want to re-iterate the following. Someone told me that I've posted about 850 messages. Not one contained a different screen name than radiosigs@aol.com/ Not one didn't identify me by call or name or both. Anonymous sniping is cowardly at best. Unlike some yellow bellies, my mailbox remains open to all-I will block no one EVER because I live in a free democratic society which means that everyone, within the restaints of good taste. has a right to free expression except when one's goal is to overthrow this beloved country's Constitution. Therefore I invite pro and con E-mails at anytime. At times I may not like what I see but I'll read nonetheless. And if that antagonist is a real man, he will afford me the same courtesy. Do not emulate N0VFP who BRAGS about having blocked me and WB2OTK. That's equivalent to a little kid running behind momma to stave off a confrontation. You stand up for what you believe and I shall reciprocate and may the better argument win. God bless free expression. Since the Internet is WORLDWIDE and is unpoliced by any specific country, let's all be thankful of its policy of free expression i.e.non-censorship. And especially let us Americans rejoice in OUR special freedoms unlike any other people anywhere. And last of all, the reason why God gave me a banana nose is to sniff out subversive and anti-Semitic rats and the shnozz is doing a great job. AF2Y,Doc

If it is an emergency situation [power off would be a MAJOR crisis] in
Y2K anything goes to restore normal operations and to prevent rioting
and civil war.

Reg, you're not stupid so why insist on being ignorant???
Have you NO knowledge of history? Even that of this century?

How many despots did dear old England have to endure for centuries before the populace rose up and demanded some resemblence of humane treatment? How long did we "North Americans" try to ignore the Nazi threat, stay out of it and let your "nature" take it's course before we came to realize that the threat was not just to those on the other side of the pond? How many repeats -of history- does it take to drum some sort of knowledge into any human? Fortunately not an infinite number for some of us. Not so sure about you.

We have learned that the undesirable traits in human nature tend to try to dominate the desirable-so we must remain eternally vigilant so that the Hitlers, Stalins, Pol Pots et al are nipped in the bud, and not at the cost of millions of innocent lives.

Yes--Milosevich, too, is an "educated man". So what does that help?
Did he "rob" anyone???

73, Dick

Evidently you don't know anything of economics or the workings of a capitalistic economy... Money MUST be spent for the economy to survive, and LOTS of money must be spent for it to grow.

From college economics of the 60's, I recall that "a dollar spent generates seven dollars" by the time it has circulates through the economy. Who knows what that figure is now? We MUST have huge spending projects such as the B2 bomber at a $billion per copy and other huge spending projects which integrate "high tech" into--and keep it in-- our everyday economy in order for the economic expansion required --no, DEMANDED-- today to endure. Examples are HDTV, the personal communications explosion and Star Wars, to name a few. Forget giveaways to foreign countries, tho it's sure they will continue unabated, but those dollars do nothing for OUR economy. The dollars spent HERE are what counts.

First requirement is that you MUST hold a Technician Class amateur radio license. These channels are NOT available to the general public. Beyond that, it's the normal user cooperation that exists (at least in theory) throughout both Amateur Radio and Radio Control fraternities.

Well to me there isn't enough prooof to see whats going on here. I wish
you could of gotton the whole thing, instead of comming in on the
middle. Maybe the frequency was clear in the case of Vicjams3.wav. And
in the Vicjams4.wav it sounds like Vics the one getting jammed. So
neither one of these sound bytes start early enough to prove anything. I
n fact nobdy knows if the stations being so called jammed are leagel
stations. The only callsign one hears is Vic's. So I thing that these
sound bytes are inconclusive and wouldn't stand up in court.

Speaking as a total idiot when it comes to economics: What kind of BULL is that? Inflation aside, as far as I know, wealth is not created or destroyed, just redistributed. With a trade deficit, the only meaning I can infer from your statement is that each dollar inflates 700% by the time someone gives it back in taxes.

This doesn't feel right, so please explain.

Michael.

2869. FS: Garmin GPS-45

2871. Code Program Recommendation

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-30 00:00:00 UTC
From: Larry Benko <benko@aztek-eng.com>

Hi,

My 11 year old daughter recently expressed an interest in learning Morse code. I know that there are several programs that claim to help learn the code. I would like a user friendly program that might be suited for a younger person (e.g. runs under Win98, uses a sound card, and looks "pretty"). Any recommendations would be welcome.

Thanks in advance,
Larry Benko, AC0B
